PREFACE AND INTRODUCTION.

THE appearance of a Hebrew Grammar, claiming to be a critical one, will not, it is thought, in the present state of philological science, prove entirely unacceptable. Indeed it might somewhat savour of affectation, were the author to offer any apology for the publication of his work in a period so productive in all the departments of literature; since it has been undertaken, and by the permission of the Almighty so far completed, with the design of meeting the urgent demands which the improvements effected in every branch of general philology now make on the cultivators of the Hebrew language for its further and more philosophical development. With this view of the subject always before him, it has been the author's constant aim, to analytically investigate, and synthetically exhibit and explain, those laws which give rise to the phenomena of formation and inflection presented by one of the most natural and regular of languages; and at the same time incidentally to point out its surprisingly intimate connection, both lexicographical and grammatical, not only with the other Shemitish languages, but also with those of the Japhetish or Indo-European stock,—thereby laying open to the view of the future investigator in this interesting field of research the rich mine of discovery which awaits him. How far the present work may have succeeded in effecting these important purposes, it must be left for the candid and impartial critic to state, and for time to decide.

The period has now gone by when a grammar was regarded as complete which exhibited the etymological and syntactical forms of a language as phenomena peculiar to itself, and whose sole merit consisted in the degree of diligence employed in collecting these facts, and the clearness of the arrangement in which they were displayed. In the present age, when philology, by means of the philosophical mode of treatment to which it has been subjected, is raised to the rank of a science, that grammarian will not be considered as having duly executed his task who does not enter upon the resolution of the phenomena of the particular language he undertakes to discuss, with the conviction that they are all necessary results of immutable and constantly operating laws, and with the intention of discovering and exhibiting those laws, and of applying them to the illustration of the

whole body of facts which the language presents; at the same time showing for what reason and in what manner certain forms are made to serve certain grammatical purposes, and how these forms have arrived at their existing state. By this method of proceeding, the grammar of an individual language, which must otherwise prove a dry collection of lifeless, arbitrary, and loosely connected facts, is reduced to a completely organized system, connected in the most intimate manner by internal and eternal bands with an entire science.

The honour of creating this new and splendid era in philology has been reserved for the nineteenth century, the distinguishing characteristic of which is an impatience of the circumscribed limits within which our less enterprising forefathers were content to move, and an ardent desire to extend the moral, political, and literary horizon to its utmost stretch. In the general struggle of all classes of men for the advancement and elevation of their several pursuits, the philologist has not remained idle. For, as an aspiring youth, not satisfied with the one-sided view of men and things obtained by even the most intimate acquaintance with all that pertains to his own country, travels through divers and far distant regions, and, after contemplating the exhaustless variety of their institutions and productions with the comprehensive glance of a world-historian, returns with his knowledge increased, his views enlarged, and his powers of observation sharpened, to his native land, where he meets with a thousand sources of interest and instruction which before from their very familiarity escaped his attention; so the philologist, to whose elevated aims the study of a few favourite tongues no longer suffices. turns his attention to that cradle of history, arts, and languages, the East,—and, having reached the banks of the remote Indus, by investigating the venerable tongues there still existing, discovers the means and the manner of exchanging their ideas which men have employed from the birth of time. With the knowledge thus acquired, he applies himself anew to the examination of his native tongue and of those more nearly related to it, whose structure now presents to his delighted view a philosophical symmetry and beauty of which before he possessed not the slightest conception.

The revolution thus produced within the last thirty years in the science of philology, is one which for magnitude and rapidity has not been surpassed in the history of the human mind. When the scholars of Europe directed their intellectual vision to that newly discovered star in the East, the Sanscrit, now so brightly illumining the horizon of philology,—and led on by its refulgent beams arrived at the classic soil of the ancient Hindu, where to their astonishment they recognised the scenery of their own familiar homes, and heard the well-known accents of their native tongues,—they began to anticipate a discovery of no less importance, than the means of demonstrating the correctness of those views of the fundamental connection existing between all languages, which had long pressed themselves on the attention of

critical minds. For, knowing as they did that languages are the product of the movements of the organs of speech, which are originated and controlled by the emotions of the soul,

" post effert animi motus, interprete linguâ;"

and also that, as human nature is in all times and places essentially the same, so consequently is human feeling, they argued with justice that these results of the operations of the mind, however concurrent circumstances might cause them externally to vary, must nevertheless

bear a strong internal resemblance to each other.

The real conditions of the difficult problem, the solution of which is the nature of that common bond of union between all languages whose existence has long been felt and acknowledged as certain, begin to be more clearly understood, now that the philologist, by a philosophical study and comparison of languages the most remote, is prepared to seek this intimate connection in something deeper than the mere outward form, viz. in the nature of the human mind, the primary cause of all language, and in the structure of the organs of speech, the universal instrument by which it is produced. The truth of the proposition is now fully established, that, as the logician in undertaking to discover and explain the laws of thinking, (the internal speech or language of the soul, depending indeed upon words, but not yet incorporated into sounds,) must examine into all the faculties of the human mind, watch with a deeply penetrating look their movements, operations, and progress, and finally display the results of his inquiries in a series of laws so systematically progressive that each one may serve as the foundation for that which succeeds it; in like manner the philologist, after an accurate investigation and comparison of the various powers of the mind, must discover in the relation of the physical senses to the external world, how the internal man becomes excited to cause the organs of speech to be set in motion, and in what manner these organs are impelled by his feelings to the production of articulate sounds.

At the very outset of his inquiry, he will not fail to recognise the important truth, that all the nations on which the sun shines in his daily course, from the subdued and patient Chinese to the untamed savage that roams the wilds of America, have the same purpose in putting their organs of speech in motion, namely, to embody in sounds the operations of their minds; and that those ideas and feelings which one nation wishes to communicate, another will likewise desire to convey. But that which remained undivided and unchanged in the harmony of thought and feeling, and dependent for its form on the subjective character of each individual nation, as soon as it is brought forth into the external world through the agency of the organs of speech, becomes diversified in a variety as boundless as the modifications which the voice and the movements of the organs themselves admit. Thus the ideas must necessarily break through their previous

harmony in order to issue forth embodied in sounds; and as these come in contact with the rest of the external world, the reaction exerts upon their formation a powerful influence. And hence the development of these sounds,—which are produced by changes in the position or configuration of the organs of speech, as for instance the vowels, or by their actual collision, as the consonants,—although in all times and places essentially the same, exhibits itself under varying aspects, not only in the different languages of separate nations, but also in the often numerous dialects of a single tongue.

Accordingly the developement of consonants and vowels, considered independently of each other as the primary elements of speech, is the second point in the formation of language to which the attention of the philologist must be directed. And this will lead him by an easy transition to the discovery of those general principles on which is founded the combination of vowels and consonants into syllables. Here a much greater variety will disclose itself to him in the methods pursued by different languages than in the course of his preceding investigations; for in proportion as these articulate sounds remove from their internal source, and continue to render themselves independent by advancing further into the material world, the more extensively they become modified by external influences. Yet amid all this diversity of sounds and forms, he must not lose sight of their unity of origin, or shrink from the task of seeking out the clue to its discovery.

As the philologist thus pursues his investigations, and, prepared by the results of his preceding researches into the primary elements of language, proceeds to examine the further combination of syllables into words, he again enters upon a larger and at the same time an entirely new field. It must now be his object to ascertain, not only how syllables are combined, but also why they are combined as he finds them, and not otherwise; and not only what ideas such combinations are intended to convey, but also why they convey one idea rather than another. Indeed the philologist can scarcely be said to have fairly entered upon the study of language, till he comes to inquire on what account words are created, or in other words, wherein consists the connection between these external sounds and the internal impressions and operations of the soul which are their producing cause.

Since however the external sound belongs entirely to the material and the idea which it represents as exclusively to the immaterial world, the two stand at a distance so remote from each other, that the connection between them has hitherto been a complete res occulta; and such doubtless it will continue, so long as we shall remain ignorant of the nature of the union existing between the body and the soul. For the present therefore we must rest content with the ability to trace the connection of such of these representatives of ideas with their originals, as are rather imitations of material sounds than the

immediate production of the operations of the mind, viz. onomatopees; while that which exists between those words and their primary cause, whose origin lies in the activity of the soul, whether excited by sensation or reflection, is likely to remain for ever an impenetrable mystery. All that we can hope to accomplish in the vast majority of cases, is to find out the primitive idea or signification of a word for the expression of which the organs through the power of the soul were first set in motion; and when once the word with its individual meaning has been thus established as an integral part of the language to which it belongs, the formation of derivatives may be shown to take place on

principles the determination of which is comparatively easy.

The improbability however of our ever being able to discover the nature of the connection between the objective word and the subjective idea which it represents, is no sufficient argument against its existence. On the contrary, that such a connection does exist, is proved by the fact, that a striking similarity and even identity of form is often presented by corresponding primitives in languages the most remote from each other; the origin of which resemblance, though not deducible from any circumstances of time or place, may yet be found in the relation borne by language to the human mind, which gives rise to the production of similar sounds or combinations of sounds by different individuals or nations, to denote the same idea. Still we must not expect to find this internal relation displayed in an objective resemblance of all languages to each other: since in the very moment of its birth an idea may be perceived in modes as various as the innumerable degrees in which mental development and culture exist; and even when the original perception is uniformly the same, it is liable to be indefinitely modified through the influence of the external world on becoming incorporated into sounds. we see that at the very outset of the word's creation there exists a reason why those sanguine expectations of the discovery of a genealogical band uniting all languages to a parent stem, which the brilliant results of their acute investigations have raised in the minds of some ardent cultivators of comparative philology, have hitherto been and will continue to be frustrated, so long as it is sought in the external form of the word itself, with the preconceived opinion that a given combination of sounds must of necessity express the same idea in one language as in another.

When once the word has obtained its expression, that which before was the exclusive property of the mind acquires a separate existence of its own, and is submitted to the cognizance of the senses by means of the organs of speech; and thus the sound and its animating idea become coëstablished in the mutual relation of body and soul. Accordingly a repetition of the primary impression, by causing the organs of speech to be set in motion in a similar manner, results in the reproduction of the same sound or combination of sounds which it at first originated. These considerations enable us to understand

why it is that primitive words, which are the direct expressions of the operations of the soul, not having acquired a complete individuality, but continuing partially to retain their connection with the latter, frequently exhibit an astonishing similarity to each other in languages whose sources are to all appearance totally distinct. Again, as the points of resemblance afforded by an idea are numerous in proportion to the scope of its signification, we frequently find in the comparative study of languages, that although corresponding derivations may present an almost entirely dissimilar appearance, the examination of their roots, which are the more immediate reflections of the impressions of the soul, often proves them to be astonishingly near.

Primitive words, even after their establishment as the outward signs of ideas, are liable to mutations of various kinds: thus an individual, in endeavouring to render an idea objective by means of the same representative through which it was before communicated to him by another, may involuntarily change some of its elements; a process whose continued repetition is capable of producing essential alterations in the forms of words. These changes may be effected in two different ways: either by accidentally commuting nearly related sounds, i. e. those produced by the same or contiguous organs; or by neglecting one of the elements of a compound articulation, or adding another as an assistant, for the purpose of facilitating utterance. And this we may reasonably conclude to be the origin of the almost infinite variety of dialects of many single languages, and also of the numerous languages which spring from an individual stock.

Entertaining such views of the origin and progress of language, after a careful examination of the structure of the organs of speech, and of the relations which the products of their activity bear to their movements, and after watching the influences exerted by climate and other external circumstances upon the moral and physical condition of mankind through long periods of time, the inquiring philologist has been enabled to separate the effects of extraneous causes from the primary forms acquired by words as the direct expressions of the ideas conceived by the soul. These are the principles and the mode of investigation which have brought about the wonderful discoveries that characterize the present state of philological science, and which must go on producing others of increasing importance, whose magni-

tude none can presume to estimate.

The involuntary mutations in the forms of words to which differences of organization give rise in the attempts to reproduce the original combinations of sounds, doubtless suggested the notion of voluntary changes for the purpose of denoting ideas differing in a greater or less degree from those already embodied in words, although still bearing to them a direct and obvious relation. In this manner a comparatively few primitives are made to furnish the materials for constructing a multitude of new terms; the selection of similar expressions as the representatives of similar ideas being the natural

result of the constitution of the human mind. Hence a language containing but a moderate number of primitives may be extremely rich in its vocabulary, if the power of derivation exist in full force. Those changes which consist in the commutation, rejection, or addition

of a vowel or consonant, may be called INTERNAL.

Again, a modified idea may be represented by the addition of another term to that which denotes it in its simple state; the two words, although severally retaining their independent significations, being made to serve as the expression of a single idea: this may be termed *inclination*. These two words in consequence of the simplicity of their joint signification may become united into a single compound expression; in the course of which either one or both may undergo some change from the original form, although adhering to it in the main: this is termed composition. The process may even be carried further, until at last one of the terms by parting with some of its principal elements is made to assume the appearance of an initial or final increment, at the same time surrendering its individual meaning, which is no longer distinguishable in that of the compound: this is called afformation. The mutations produced by this mode of designating related ideas may be denominated EXTERNAL. They are far more decided and important than those of the preceding kind; for as the word becomes increased, its objectivity is enlarged, and the greater are the changes it admits.

As a result of this variety in the modes of constructing expressions for ideas similar to those already denoted by words, we find that not only is derivation effected differently in separate words and classes of words in the same language, but also that a marked distinction in this respect exists in different languages,—internal changes prevailing

chiefly or almost exclusively in one, and external in another.

We have two principal data on which to proceed in the attempt to distinguish the primitive word from its derivatives; these are its

signification and its form.

First. In order to discover the primitive by means of its signification, we must seek out that idea lying as a common root at the foundation of all the rest, from which they have grown out in various directions, either as its branches or as newly formed independent stems, and to which they all admit of being reduced, however apparently remote from their original. This mode of proceeding is grounded on the fact that the conception of the modification of an idea must always be preceded by that of the simple idea itself, which immediately upon its birth in the mind obtains an external existence in the form of a word. The truth of this proposition is not disproved by the non-existence in a language of words corresponding to certain primitive ideas: for such terms may become obsolete, while their derivatives remain in use, and constitute an indispensable portion of the language; even as in the physical world a tree is seen to wither and die, after producing shoots whose branches flourish as widely as

those of the parent stem. In the course of the laborious investigations here pointed out, and which it lies chiefly within the province of the lexicographer to make, comparative philology is capable of furnishing assistance of the most important kind; since a radical word which has become extinct in one language is not unfrequently

preserved in another of the same stock.

A plan similar to the above must be pursued in the attempt to deduce the *primitive meaning* of a word from the variety of acceptations in which it may be employed; that is, our researches must be uniformly directed to the discovery of that idea which forms the foundation of all the rest. And this will always be that which lies nearest the soul of man, and is most likely first to affect it; for the first activity of the organs is exerted to produce a primitive word, and the first causes of such activity are the earliest impressions of the soul.

Secondly. In endeavouring to ascertain the primitive by its form, we must seek out that word which presents the least complexity in its appearance. For as a mutual relation exists between the internal impression and its external representative, and as the first impression is invariably the simplest, the primitive word which corresponds to it must exhibit the greatest degree of simplicity in regard to the elements of which it is composed. To the question, therefore, whether the monosyllabic or the polysyllabic form of words is to be regarded as original, we would reply without hesitation, the former; for, though we may find ideas which are certainly primitive expressed in a language by words of a more or less complex appearance, they must nevertheless be susceptible of reduction to those simple forms from which the operation of various influences through an indefinite period of time has caused them gradually to deviate, until at length they have arrived at that state in which they first attract our observation. That essential changes in the forms of primitives do actually occur, is completely proved by a comparison of the prevalent forms of words in the chief great divisions of human speech. Thus the inflexible nature of the monosyllabic Chinese appears to forbid any modification of the primitive type even in derivatives. On the other hand, the interminable dialects of the aborigines of America present the majority of words both primitive and derivative in a luxuriantly polysyllabic form. The Indo-European and Shemitish stocks may be said as a whole to constitute a medium between these two extremes. although in this respect they differ to a considerable extent among themselves.

The changes to which a primitive word is liable are the modification of its original elements, addition, and rejection. These again are of two kinds, viz. those which a word undergoes in passing from one dialect or language into another, and those employed to indicate a deviation from the primary meaning. The changes of the first kind are not the result of the operations of the mind, but are involuntarily produced by varieties in the conformation of the organs of speech; as

however these varieties are of limited extent, so also are the changes of which they are the cause. The philologist, therefore, in tracing their origin need go no further than the structure of the organs, from which they arise; after examining these with attention, and ascertaining the precise nature and extent of the modifications to which they are liable, he must exhibit the results of his inquiries as the laws on which all such changes depend. But in order to penetrate the sources of that other class of changes which take place during the progress of derivation, this alone will not suffice; since those are the result of a deliberate operation of the mind, exerted to express, either by means of an internal change in the primitive word itself or by the addition of another word in an entire or fragmentary form,

an extension or modification of the original meaning.

The discovery of the causes in which changes of the latter description originate, demands a much greater share of intelligence and application. The statement that the change of a certain consonant or vowel, or the addition of a certain word or syllable, is uniformly accompanied by this or that change of meaning, will not be considered satisfactory. It will be required further to show by what means a given change in the form of a word, or accession to its length, is rendered capable of conveying that modification of the original idea by which it is attended. And here, it must be owned, the philologist is frequently left in darkness: since the numerous influences both internal and external which so strongly affect the primitives, exercise the same power and in a still higher degree on their less important Consequently not only may those additions which retain somewhat of their independent signification have departed so far from their original form and meaning, that these can be recovered only through the laborious inquiries and happy suggestions of a vigorous and original thinker; but they may so merge their signification into that of the compound, and become so essentially altered in appearance, as to render every attempt at their elucidation utterly hopeless. The cultivation of this abstruse department of philology has been pursued with the most distinguished success, as far as relates to the Sanscrit and its remains in the principal Indo-European languages, by Professor Bopp. We must observe, however, that there are some prepositions and inflections whose explanation this learned scholar has left unattempted, and that with regard to some others we do not feel fully prepared to acquiesce in the correctness of his conclusions.

By means of the foregoing reasonings and statements,—in which the word has been treated as an independent existence within its own proper limits, and a history attempted of its gradual development and formation, from the period when it lay hid as an embryo in the productive womb of the mind, until that in which it steps forth into the world as an individual existence, and tells the cause of its creation,—we hope to have clearly demonstrated the erroneousness of the views entertained by those grammarians who, regarding this broad and fertile field for the labours of the critical philologist as a barren and unprofitable waste, have limited their exertions to the cultivation of the word as received in its perfect state from the hand of the lexicographer. For until the principal elements that enter into the composition of language, the laws on which depend the formation of derivatives, and the hidden power of modification residing in the prefixes and affixes, have been discovered and displayed, the lexicon can be little better than a mere vocabulary, in which indeed the words with their respective meanings as nearly as they can be ascertained without these previous inquiries are collected and arranged, but where many of the statements must rest upon vague and insufficient testimony, and not unfrequently are altogether without foundation.

Who, we would ask, is to furnish the lexicographer with the preliminary truths which must serve as the animating principle of his labours, if not the grammarian? and who shall collect, digest, and usefully apply them, if not the lexicographer? The grammarian and lexicographer are not independent of each other, but possess a united control over the entire word: and thus, while it is the duty of the former to trace its formation from its simplest elements to its completed state; the latter must arrange and make himself familiar with these results, preparatory to his own further deductions,—in pursuing which the statements and opinions of his fellow-labourer must constantly be consulted, so long as the word remains an isolated portion of the language, neither affecting others nor being itself This independent state, however, it cannot long preserve: for as a man by his very birth is constituted a member of a community of beings similar to himself, nay, is created in order that he may become so, and in this capacity variously influences those individuals with whom he comes in contact, and is as variously influenced by them in turn; in like manner a word, which is designed to form an integral part of a complicated system, as soon as it obtains its citizenship in the body politic of language, begins to act and be acted upon through the relations which spring up between itself and the objects of its kind with which it is surrounded. When this takes place, the word falls entirely into the power of the grammarian, who has now not only to note the changes both internal and external which are at once the effects and the exponents of these relations, and to deduce from them the laws of inflection prevailing in a language; but also, and this must be his principal aim, to show by what means these changes are rendered capable of indicating the relations which words are made to bear to one another in the course of rational thinking and speaking.

We have seen that a word, before becoming affected by contact with others of its species, is subject to changes produced either involuntarily by varieties in the conformation of the organs of speech, or voluntarily in order to indicate those modifications of the original idea which distinguish derivatives from their primitives. It might

not unreasonably be supposed that the changes which words undergo in consequence of their mutual action upon one another would be more various and extensive than those just mentioned; seeing that, in addition to the direct influence which words in connection exert upon the forms of each other, there exists a fruitful source of change in the many new shades of signification resulting from this connection. But, as words before they become related are established in the external world with their respective meanings, these relations and consequently the changes by which they are denoted are much less dependent on varieties in the organs of speech, and, being originated and controlled almost exclusively by the reflecting mind, are in reality far less numerous than those of the class alluded to.

The principal modes employed to indicate grammatical relations

are the following three:

First. The word, having obtained its proper form with its inherent animating idea, resists the effects of all influences both internal and external, and remains entirely independent and immutable; while the accessory ideas or relations are indicated either by a change of position or by a separate word. This extreme tenacity of the original form is strikingly exhibited in the unbending nature of the Chinese

language.

Secondly. The word readily surrenders itself to every influence that is brought to bear upon it in the different circumstances in which it is placed, and accommodates itself with the utmost facility to the indication of its relations to the others, by which means internal changes are produced; or it preserves its original elements unchanged, and to denote the relations in which it is placed receives external additions; or lastly it undergoes at the same time both internal and external changes. This susceptibility to influence from without is manifested in the highest degree in the exceedingly flexible Sanscrit.

Thirdly. The word refuses to surrender the form it has acquired, but receives into its composition as an additional member the representative of a closely connected idea. This construction obtains chiefly in the Mexican language, the verbs of which are made to

include entire nouns.

It should however be remarked, that no one of these modes of indicating grammatical relations is employed perhaps in any language to the entire exclusion of the rest, but that which prevails in one to the greatest extent confers on it its peculiar character. This is the case

in regard to the languages above mentioned.

Since the willingness or aversion of words to be affected by their relations to one another depends on the immutable laws that direct the operations of the human mind, the character which is thereby stamped on a language is of the most marked and permanent kind, and therefore the most proper to be consulted by the philologist as his principal guide in attempting the classification of languages according to their affinities. It would lead the pursuer of such inquiries to no satisfac-

tory results, but would rather involve him in uncertainty and error, were he to make isolated words the subject of his researches, and to consider the mere discovery of a greater or less number of terms common to two or more languages as clearly indicative of a radical connection. In the first place, such terms may have been adopted from one language into the other: again, although now presenting a similar appearance, they may in their origin have been perfectly distinct; for, as the changes to which words are liable frequently cause those which were originally similar or identical to differ by degrees, until at length their connection is scarcely discernible by the most experienced etymologist, so likewise, by operating in a contrary direction, they may produce between words from totally different sources an almost perfect resemblance: or, granting that these terms have not been borrowed, and still are radically the same, their similarity proves nothing more than the common structure of the human mind and the intimate connection existing between the internal impression of the soul and its external representative.

The exceeding difficulty of the task undertaken by the philologist who attempts the classification of languages according to their affinities, may be conjectured from the amount of time and intellectual exertion required for the complete mastery of a single tongue; especially if we reflect that to execute it successfully, he must penetrate the spirit of all the principal and most variously constructed languages of the globe, acquiring in addition to an extensive knowledge of their vocabularies an intimate acquaintance with all the modes of indicating relation to which the fertile mind of man has given birth in every clime and age. Accordingly it is not a matter to excite surprise, that the many distinguished scholars who have applied themselves to this arduous undertaking should have accomplished little more than the removal of obstacles from the path of investigation, and the collection of materials for subsequent use, until at length in our own day their efforts have been crowned by the posthumous work of the

immortal Wilhelm von Humboldt.*

Desirable and important as we feel it would be, having now arrived at the grammarian's peculiar province, the treatment of words in connection, could we here enter into a detailed account of his labours in the classification of words according to their meaning and formation, and in the subsequent treatment of each class separately and in connection with one another, at the same time pointing out the characteristic features of the different parts of speech and of different languages; yet, as we have already removed too far from our principal object, the Hebrew, we must for the present remain satisfied with having briefly shown the manner in which the philologist, after a preparatory collection of materials from sources the most various

^{*} Ueber die Kawi-Sprache auf der Insel Java, nebst einer Einleitung über die Verschiedenheit des menschlichen Sprachbaues und deren Einfluss auf die geistige Entwickelung des menschlichen Geschlechts. Berlin, 1836.

and remote, must examine into the gradual process by which words are created, watch the changes produced by their mutual contact, and hence draw his conclusions as to what he may expect to find constantly prevailing throughout all language, and what must necessarily be fluctuating and partial; so that on arriving at the scene of his actual labours, which at first may present an appearance of interminable confusion, his previously settled principles will serve as a clue to the seeming labyrinth, and enable him to produce a work

that shall be the guide of all succeeding inquirers.

What have already been the results of philological investigations undertaken with such views, is plainly testified by the present advanced state of the science of language as compared with that of a quarter of a century ago. Few there are, we presume, who are altogether unacquainted with the important additions to our grammatical knowledge of almost every language cultivated either in Europe or America which have been made by the united and indefatigable exertions of such scholars as Schmitthenner, Grimm, Bopp, Hupfeld, Pott, and above all the lamented Humboldt; and it would indicate unpardonable ignorance of the present state of the study of the Shemitish languages, were we to assert that this wide-spread revolution in philology has taken place without favourably affecting it also. Still we may venture to observe, that while the stupendous exertions made to elucidate the Indo-European languages challenge the admiration of the learned world, to those of the Shemitish stock ample justice has not hitherto been done.

EWALD was the first who showed to any considerable degree that the modern improvements in philology had extended to the Hebrew— a language that has of late years attracted an increasing share of notice, particularly since its acquisition has been facilitated, and its importance to the philologist enhanced, by the learned labours of Gesenius. But the very attention thus drawn to the Hebrew caused it sooner to be perceived, that the illustration of its grammatical structure, even after the publication of the copious and well arranged Lehrgebäude of the latter scholar, was far from being complete. In fact the demand was for a grammar which, adopting as its basis the eternal laws of speech disclosed by a profound study of comparative philology, should investigate the manner in which the phenomena presented by the language are originated, and the means by which they are rendered capable of answering the ends of their production.

When a work of this description is required, the execution of the Kritisches Lehrgebäude will neither justify its title, nor answer public expectation. The chief merit of its author consists in extensive and accurate researches into the Hebrew and its cognate dialects, a careful collection and judicious arrangement of their grammatical phenomena, and an occasional indication of some point of mutual resemblance. Great as were the comparative merit and utility of this work at the time of its appearance, and which still in a good degree remain undi-

minished, it is by no means calculated to meet the requisitions of the present age, in which reason is made to triumph over memory. When called upon to state appearances which differ more or less from what the preconceived notions of the occidental grammarian would lead him to expect, its author seldom undertakes to explain the manner of their origin, but is content to adduce the existence of the same or of similar forms in the cognate Aramaic or Arabic. characteristic feature of Gesenius, which in all probability arises from a peculiar bent of mind acquired from his long continued lexicographical labours, is exhibited even in the latest edition of his smaller Grammar, where, instead of the much desired explanation of some difficult point, the reader is presented with a similar appearance in various other languages. This mode of illustration is far better adapted to lexicography, in which Gesenius confessedly stands preeminent, than to grammar. Indeed in the latter branch of philology no essential progress can be considered as having been made, until the internal causes on which the genius of a language depends have been discovered and displayed, and its so-called irregularities either reduced to an inconsiderable number, or entirely explained away.

These considerations appear to have presented themselves in all their force to the inquiring mind of Ewald, and to have excited in him that noble desire to bring about the required improvement which resulted in the production of the Kritische Grammatik. It is unnecessary here to enlarge upon the beneficial effects which this work has wrought upon the study of the Hebrew, since it is well known that from its appearance dated the commencement of a new and important era in Shemitish philology. Ewald had the merit of proving by means of his ingenious work that the Hebrew both admits and deserves a philosophical investigation, and that its peculiarities, which were before regarded as inexplicably mysterious, may be analyzed and reduced to principles founded in nature. His bold and keen spirit of research has opened a rich mine of discovery, from which he has extracted many a brilliant elucidation of the deepest

obscurities of Hebrew grammar.

Yet, notwithstanding the high praise to which this writer has so just a claim for the boldness and originality of his conceptions, it cannot be denied that his performance is marred with many and serious defects. Indeed it appears to have been executed under the erroneous impression, that since the *Lehrgebäude* did not fully answer the wants of the age, its statements must either be utterly disregarded, or consulted only to be refuted; a supposition that has had the inevitable effect of often leading its adopter into the most glaring absurdities. In consequence of his eager search after novelty, his rules have become so multiplied, and frequently so vague and arbitrary, as to render his work totally unfit for the use of beginners; while to the critical reader it is completely evident that many of the laws he lays down, instead of being founded in the nature of the

human mind or in the genius of the language which is its offspring. are, notwithstanding the dogmatic and self-sufficient style in which they are couched, the exuberant product of a creative imagination. which extracts general principles from a few isolated facts, and applies them to the illustration of a whole class of phenomena, without their having acquired any other authority than the mere ipse dixit of their promulgator. Harsh as such remarks may sound when applied to a scholar of Ewald's abilities and acquirements, we feel confident that the impartial examiner of his grammatical writings will meet with abundant proofs of their correctness. At the same time no animadversions of ourselves or others can lessen the consideration due to his real merit; and this we hold to consist rather in having been the first to subject the Hebrew to a philosophic mode of treatment, than in having brought its theory to perfection.*

The grammarian who aims to be regarded as the philological investigator of a language, must first direct his attention to the discovery of its leading principles, which are few in number, and based on the nature of the human mind internally, on the genius of the language externally, and on the structure of the organs of speech, which form as it were the connecting link between them. From these the illustration of the phenomena he meets with must proceed. and to these they must continually be referred, in such manner that, each successive rule being exhibited as the consequence of what goes before, the whole etymology may be worked up into a gradually progressive system, in which the same mind that dictated the general plan may be seen pervading its minutest details. In this way grammar, instead of being converted into a means of overburdening the memory, is raised to the rank of a science, the study of which constitutes a species of mental discipline of the highest order.

Much it may be thought is here required, and much perhaps incidentally promised. These views, however, have not been adopted

^{*} The opinions expressed by the able writer of the article headed "Robinson's Gesenius," in the Princeton Review for January, 1837, as respects the characteristics of Ewald's philology, so entirely coincide with those which the author has long entertained on the subject, that he cannot refuse himself the gratification of presenting them to the reader entire. "There is, we think, the strongest internal evidence that in the composition of his (Ewald's) grammar, what he directly aimed at was originality. He would almost seem to have made it a rule never to agree with Gesenius where it was possible to differ. That a book constructed on so false a principle should be free from paradoxes and ingenious absurdities, was not to be expected. So strongly indeed is Ewald's grammar marked with these faults and that of general obscurity, that it seems to be essentially unfit for elementary instruction. But while it would be absurd to undertake a vindication of Ewald from charges so obviously true, it is equally absurd to deny the existence of merits. charges so obviously true, it is equally absurd to deny the existence of merits which are not incompatible with the faults in question, and which in effect are partially produced by them. A constant effort to be new and striking, while it must be tray the author into paradox and error, cannot fail at times to elicit brilliant thoughts when the writer is endowed with superior talents, and that such is Ewald's intellectual character we have never met with ignorance hardy enough to question."

without mature reflection: they are the result of an enthusiastic study of the Hebrew and its cognate dialects, in addition to much time and labor devoted to the acquisition of a competent knowledge of the principal Indo-European languages. With the convictions upon his mind which such a course of study is calculated to produce, the author has applied himself more particularly to effecting improvements in Hebrew grammar; and if the solution of many difficult points, by some left entirely unexplained, and by others imperfectly and artificially illustrated, and the exhibition of hitherto considered exceptions and irregularities as the necessary results of the laws which regulate all language, demonstrate the correctness of the leading principles with which these investigations were undertaken, and justify the hope of having brought the subject of his labours nearer to perfection, he may be allowed to entertain the pleasing thought, not to have endeavoured If he might venture to intimate the light in which he could desire his work to be regarded in connection with the preceding labours of those two distinguished philologists, GESENIUS and EWALD, he would remark, that while in forming his opinions he has remained completely independent of both, his aim has been to preserve a course intermediate to those which they have pursued, remembering that,

Quos ultra citraque nequit consistere rectum."

Thus, on the one hand, the author has not shunned the discussion of the most formidable topics that present themselves in the course of the etymology, even to the minutest particulars. Nor has he rested satisfied, in attempting their explanation, with adducing as a ground form some similar appearance in the Aramaic or Arabic; for, indispensable as a knowledge of the sister dialects certainly is to a thorough acquaintance with the Hebrew, the true use of such knowledge consists not in the bare citation of parallel cases, but in the application of the principles which regulate their phenomena to the illustration of the Hebrew within its own limits. A grammar is not like a lexicon. In the construction of the latter it becomes necessary to consult a variety of books in order to complete the list of significations in which words are employed, before we can arrive with certainty at their radical meanings; and when the literary monuments of a language are but few in number, so that some words may not occur in such connections as to render their import perfectly clear, recourse must be had to the cognate dialects, which may afford the information required. But the grammar of a language, which is the logic of speech, must be contained as completely in one book as in a hundred

On the other hand, the author has not allowed himself to be actuated by a mere thirst for novelty, or a desire to contradict all previous statements. His constant search has been directed to the attainment of truth and simplicity; and, as he believes, his inquiries have not

unfrequently been rewarded by the discovery of new and important facts, which have enabled him to place matters that had been the subjects of much discussion, in a clearer light. He has never lost sight of his principal object, which has been to render his work not only theoretically but likewise practically useful; and on that account, while he has spared no pains to reduce every part of grammatical formation and inflection to a comparatively small number of elementary principles, he has withheld many suggestions on points of minor importance which might have presented an artificial appearance. He trusts, therefore, that while his labours may not prove void of interest to the scholar already conversant with the language, they will render its acquisition an agreeable intellectual exercise for the learner.

Having thus described the principal features of his work, and having given in outline the general views of philology with which the grammarian of an individual language should enter upon his task, the author would esteem it desirable to state in what manner these views apply to the Hebrew as compared with other languages, and to particularize those parts of his present performance in which he supposes them to have been followed by happy results. But while he intends that the former topic shall occupy a place in the introduction to the second volume, he hopes that the latter will be rendered

sufficiently obvious by an inspection of the work itself.

The author takes a most sincere pleasure in being able thus publicly to render his acknowledgments to his friend Mr. Wm. W. TURNER, for his constant and essential aid in both the literary and typographical execution of the present work. And he cordially admits, that, should it be regarded as an acceptable addition to the valuable labours of American scholars in this department of philology, among which the grammar of Professor STUART certainly ranks preëminent, a great share of the credit will be due to his friend. Indeed, without some degree of assistance the work could not have appeared at all for the present, as the author feels himself not yet sufficiently master of the English language to venture on such an undertaking unaided. the same time he may be allowed the gratification of introducing to the literary public this young gentleman, whose great talents and extraordinary zeal for learning have enabled him, while in the daily practice of his profession as a printer, to make uncommon progress in philological pursuits, and will doubtless ere long insure him a favourable notice by means of an independent publication of his own.

To conclude, the author presents his work to the American public, as a slight testimonial of the warm feelings of gratitude which he entertains for the kind reception he has experienced in this the land of his adoption; and happy will he esteem himself, should it prove not entirely unworthy the acceptance of those to whom it is offered.

ADVERTISEMENT

TO THE SECOND EDITION OF THE FIRST VOLUME.

In preparing the Second Edition of this volume for the press, the Author and his friend Mr. W. W. Turner have carefully revised it throughout. The numerous additions and improvements that have been made, while they are so incorporated with the original matter as to render it impossible to enumerate them, are still such as cannot escape the notice of the attentive student. It will suffice therefore to say that, though almost every page will bear evidence to our anxious desire to render the work still more worthy of the gratifying reception it has met with, the reader who wishes to see at once in what the changes principally consist, is referred to the inflection of verbs and nouns, the latter of which it is believed has been not a little simplified. It should be remarked that the original numbering of the sections has been adhered to as strictly as possible, so as to offer no impediment to the use of this volume with the second or with the Grammatical Analysis.

CRITICAL GRAMMAR

OF THE

HEBREW LANGUAGE.

BOOK FIRST.

ORTHOËPY AND ORTHOGRAPHY.

CHAPTER I.

THE LETTERS.

§ 1. The Hebrew character in use at the present day, and in which the oldest existing MSS. of the Bible are found written, is not only the same that was employed in the time of Jerome, viz. in the fourth and fifth centuries after Christ, but is even spoken of in the Talmud,* and still earlier in the Mishna,† by the name of בתב לאשררית Assyrian writing, as consisting of the Assyrian or Aramæan letters which they affirmed to have been brought by Ezra from Assyria on returning with his fellow-exiles from the Babylonian captivity. This character is likewise called by the writers in the Talmud בְּחַב מַרְבַּע square writing, on account of its angular form, to distinguish it from the more flowing text in ordinary use, which they denominated כַּחַב עַנֵּהל round writing. This square hand is that which bears the greatest resemblance to the letters found on the Palmyrene monuments and in the Carpentras inscription. That it does not extend further back than the commencement of the Christian era, is proved from an inspection of the coins struck in the time of the Asmonean princes, the alphabet of which is called in the Talmud כחב עברי, | i. e. Hebrew writing (κατ' εξοχήν), and has a greater similarity to the Samaritan and Phœnician.

^{*} T. B. Sanh., 21. b., 22. a. † Megilla, i. 8., ii. 1:2. Yadayim, iv. 5.

[‡] The meaning of this word has been disputed. Rabbi Jonah advocates אָבְּעֶּהֶת, rendering it מותר באושר באושר which is elegant in its letters; others read יְבִּישְׁרָת proper (recta, from נְשֵׁר hupfeld derives it from שָׁבָּל to be firm.

[§] Kopp, Bilder und Schriften der Vorzeit, ii. p. 157. | T. H. Megilla, 71. b.

§ 2. The ordinary Hebrew alphabet, consisting of twenty-two letters, is that exhibited in the following table, of which the first or left-hand division contains the letters, and their representatives in Roman characters; the second, their names in Hebrew and English; the third, the corresponding letters of the Samaritan and Rabbinic* alphabets; and the fourth, the numerical value attached to each letter.

^{*} A rounded form of that in ordinary use, and employed chiefly by Jewish printers in comments on the Scripture, notes to grammars, &c.

Powers of the Letters, and their Representatives.

- § 3. Before entering into details concerning the powers of the various letters, and the mode of representing them by Roman characters to be adopted in this work, it may be proper to state that the name of each letter is that of some natural or artificial object, of which name such letter is the initial. It has been maintained in addition, that the forms of the several letters were intended as imitations of the objects denoted by their names; but though a connection between the names and figures of some of the letters even in their present form can be traced, or at least imagined, the attempts made to prove it as existing throughout have signally failed. We shall accordingly enter into no discussion of this sort, but proceed at once to what is of far greater importance, viz. the powers of the letters, and their representatives.
- R. This is the weakest of all the consonants, being produced by a nearly imperceptible compression of the throat during the passage of the air, and in this alone it differs from a vowel. It approaches in its nature to the light breathing of the Greeks, or the silent h in hour. On this account, and because of the strong resemblance it bears to the simple open vowel a, which takes its place in the European alphabets, we shall represent it when standing alone by that letter with an attached spiritus lenis, thus 'a; but when, accompanied by a vowel, it commences a syllable, we shall denote it, for the sake of convenience and to avoid misconception, by the spiritus lenis alone.
- In This is properly a labial aspirate corresponding to the English v, and which for the sake of uniformity of notation we will represent by bh. Sometimes, however, this letter loses its aspiration, and to show this, a discritical point is inscribed in its bosom (thus b), when it answers precisely to the English b, which we shall accordingly employ as its representative: and such is to be understood of all similar cases where no mention is made to the contrary.
- 3. The original power of \mathfrak{I} is that of a palatal aspirate corresponding to the soft aspirated g in the German word sagen; and which we shall represent by gh. When it loses the aspiration, a dot is inscribed, as in the preceding letter (thus \mathfrak{I}), and then it corresponds in sound to the hard g in give. This is the original and appropriate distinction between the unpointed and pointed letter; though at the present day

and by Europeans the two sounds are generally confounded, or rather the aspiration is neglected, and the letter in all cases is pronounced like g simple.

- \neg . The letter \neg has also two sounds, an aspirated, corresponding to the soft th in thine; and an unaspirated (marked \neg), which answers to that of the English d. This distinction, however, as in the case of \triangleright , is now often improperly neglected in pronunciation.
- π . A rougher breathing than \aleph ; it corresponds exactly to the English h in heat.
- 7. The weakest of the labials, produced by a very slight compression of the lips. Its sound is intermediate between that of v and the consonantal w: we shall represent it by the latter at the beginning and by the former at the end of a syllable.

T = z.

- 77. This is the strongest of all the gutturals, and is made by contracting considerably the aperture of the throat, whilst the air is forcibly expelled. It is equivalent to the German ch in the interjection ach! and will be represented by a reduplication of the English aspirate, thus hh.
- $\mathbf{z} = t$ will be represented by t to distinguish it from \mathbf{z} (which see below).
 - 7. The weakest of the palatals, answering to the consonant y in year.
- \supset . The original sound of this letter is that of an aspirated c hard. It may be necessary to observe that the aspiration does not change the character of the sound of this letter farther than by softening it. It answers to the soft German ch in ich, by which combination it will in this work be represented. Upon losing its aspiration, a dot is inscribed (thus \supset), when it is equivalent to the hard c in cap. This distinction, although an exceedingly proper one, is not now universally observed, many pronouncing it like hard c in both cases. To avoid mistakes, we shall represent it, as is usually done, by kh and k.
 - b=l: b=m: b=n.
- $\mathfrak{d} = s$, which for distinction's sake (see \mathfrak{w} below) we shall denote by the French \mathfrak{c} .
- D. The proper sound of this letter, so difficult of imitation by all but Orientals, approaches very nearly that of the aspirated \mathfrak{Z} , but is somewhat deeper, the former being produced in the back part of the cavity of the mouth, the latter in the throat. The impossibility of conveying an exact idea of it by description has given rise to different modes of pronunciation among Europeans. Thus the Seventy have

represented it alternately by a spiritus lenis, as אָקרֹן, אַבְּלֹרָן, אַבְּרֹן, אַבְּלֹרָן, אַבְּלֹרָן, אַבְּלֹרָן, אַבְּלֹרָן, אַבְּלֹרָן, אַבּלִרְּלּ, אַמּסְמֹּν; by a spiritus asper, as עֵּבִּלְרָן, and by the palatal γ, as Γαμβάλ, עֵּבִּלְרָהְן, Γομόζόα. The Jews of Germany and Poland give it at the end of words a slight nasal sound, like the French gn in campagne, in order to distinguish it from א ; though in the beginning they drop its sound altogether as they do that of the latter character: this method has been adopted in the German universities. The Portuguese Jews, and after them several seminaries of learning in this country, combine its proper sound of a softened g with the nasal at the beginning of words as well as at the end, thus עַבְּוֹרְ pron. gnāmódh. We shall represent it in all cases by the aspirate h with an added spiritus lenis, thus 'h.

 \mathfrak{D} . A labial aspirate harder than \mathfrak{D} and corresponding to the English f; which sound, for the sake of preserving uniformity of notation, we shall represent by ph. Upon losing its aspirate, a dot is inscribed, thus $\mathfrak{D} = p$.

 $\Sigma = ts$ in mats.

- \triangleright . The strongest of all the palatals, and equivalent in sound to the English k. To distinguish it from \triangleright (which see above), we shall represent it by k.
 - 7. The rough French and Spanish r.
- \mathfrak{W} . The usual sound of this letter was that of the English combination sh, which in reading unpointed Hebrew is uniformly given to it at the present day. In certain words, however, it was pronounced somewhat softer and more like its cognate \mathfrak{D} ; and accordingly when the points were added (see § 12), this difference of sound was intimated by a diacritical point placed over one of its extremities, thus \mathfrak{W} , \mathfrak{W} , called $Sh\bar{\imath}n$ and $S\bar{\imath}n$, and which we shall represent by sh and s respectively.
- n. Equivalent to the hard th in think. Its loss of aspiration, as in the other letters of its class, is denoted by an inscribed point (thus n), and then its sound corresponds to that of the English t.
- § 4. That the order in which the letters of the alphabet are now arranged is the same with that observed in ancient times, is obvious from its being found in several chapters of the Bible, the initial letters of whose verses stand in alphabetical order. These chapters are as follows: Ps. 34 (here the letter is wanting as the initial of a verse, but commences the latter clause of the fifth, whose initial is in), 119, 145 (in missing); Prov. 31, beginning at verse 10; Lam. 1, 2, 3, 4. (In the three last instances in and in are found transposed.)

& 5. That feature of the system of Hebrew orthography (common to it with the rest of the Shemitish languages, excepting the Ethiopic) which most forcibly strikes the beginner, is the direction of the writing from right to left, contrary to the practice of Occidentals. Again, on running the eye down the column containing the letters of the alphabet, it will be perceived that several terminate in a thick horizontal stroke turning to the left. The whole of these, except \(\sigma\) which has a projection at the angle, vary their form when occurring at the end of a word: thus, D, D, and D, bend this stroke into a perpendicular direction-7, 7, 5, 7; while that of 2 is continued till it reaches the opposite descending line, thus : Another peculiarity of Hebrew writing and printing is that words are on no account suffered to be divided; and, as an expedient to fill out the lines, certain of the characters are written and cast broader than ordinary: those most in use for this purpose are \searrow , \supset , \supseteq , and \supset . In manuscripts and old printed books it is very common to see a short line eked out with one or more letters of the succeeding word: these of course are not to be noticed in reading, as the word is invariably written in full at the commencement of the line which follows.

Classification of the Letters.

§ 6. The letters of the Hebrew alphabet being originally all consonants, i. e. representatives of articulate sounds formed by the movements of the organs of speech, they have very appropriately been divided by grammarians into five classes, according to the principal organs engaged in their production. In Hebrew, as in other languages, we

perceive that words upon undergoing some modification of their original meaning, as well as during the regular course of grammatical inflection, are liable to change certain of their letters into certain other letters. And on investigation we find that this takes place most commonly between those which belong to the same organ, they being only modifications of the same radical sound; and sometimes, though not so frequently, it occurs between those of organs situated the nearest to one another, as, for instance, between the gutturals and palatals: and hence the great utility of such a classification, as showing the reason of these mutations, and enabling us to retain them in the memory with greater ease. Accordingly they are divided as follows, the weakest of each organ being placed first, and the rest following in the order of their strength:

Gutturals,	8	,	П	,	ダ	,	П		
Palatals,	7	. •	٦	,	כ	,	P		
Linguals,	7	,	מ	,	נד	,	5	,	۵
Dentals,	7	,	O	,	T	,	文		
Labials,	٦	,	ב	,	D	,	בל		

According to some, the liquid \(\gamma \) is to be placed among the gutturals, while others consider it as a dental.

§ 7. The letters may again be considered in another point of view, viz. as regards certain peculiarities attached to many of them, and the degree in which these peculiarities affect the forms of words. In this respect we shall separate them into two principal classes. The first class comprises what are called imperfect letters; these again consist of the quiescents, so styled from their altogether losing the consonantal power in certain cases, and quiescing in a preceding or accompanying vowel; and the gutturals, which give rise to certain changes in the vowels in order to facilitate their enunciation. The second principal class contains those which, on account of their strength and freedom from change, are termed PERFECT letters; these are the aspirates, which are liable to lose their characteristic breathing, and become converted into mutes; and the sibilants, whose only peculiarity, if such it may be termed, is that of being occasionally transposed with The liquids, the chief peculiarities or assimilated to the dental ... of which are that I is subject to assimilation to the following letter, and that 7 occasions vowel-changes analogous to those caused by the gutturals, may be placed as a minor and intermediate class by themselves. We will now give the whole at one view, arranging them as

before according to their respective degrees of strength, beginning with the weakest.

CHAPTER II.

THE VOWELS.

§ 9. WE have seen that the Hebrew alphabet consists solely of consonants, of which alone the whole orthographical system was in its origin composed; the vowels being left, as far as concerned the letters, without any provision made for their representation. This of itself constitutes a proof, if one were required, of the extreme antiquity of this venerable tongue. For the first and most obvious division of words is into syllables, which these letters were designed to represent; while their further subdivision into consonants and vowels, on account of the difficulty which attends the resolution of syllables into the elementary sounds composing them, is a process requiring a much deeper and more accurate investigation of the mechanism of language. Thus the syllable bā (Heb. 2) was originally regarded in the light of a single articulated sound; and it was not till considerable progress had been made in the investigation of the constituent elements of speech, that it was discovered to consist in reality of two sounds, namely, a consonant—formed by the unclosing of the lips, and a vowel or mere continuous emission of the voice. The Sanscrit, Bengali, and Ethiopic alphabets are instances of the syllabic system carried to its highest degree of perfection: in all of them a syllable consisting of a consonant and a following short a is represented by the consonant alone; in the two former, when any other vowel is required, it is expressed by an additional character, and in the Ethiopic a slight variation in the form of the consonant is made to answer the same purpose.* The Hebrew alphabet, on the contrary, furnishes the mere outline or skeleton of a word, which is left to be filled up by the knowledge of the reader. Still the vagueness and obscurity which one would at first sight be disposed to attribute to such a system of verbal notation will not appear to us so great, if we take into consideration the homogeneous nature of the language, and the regular manner in

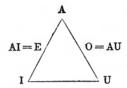

^{*} The Cherokee alphabet, invented by the Indian Sequoyah, alias Guest, is also syllabic; but the characters employed by him to represent a given consonant as accompanied by different vowel sounds, bear no resemblance to each other. In this respect his alphabet is inferior to the Ethiopic.

which derivatives are formed from biliteral or triliteral roots contained within itself. In fact, so long as the language continued to be a spoken one, the inconvenience arising from the want of vowel characters could have been but trifling; and it was not until the Hebrew at length began gradually to fall into disuse that the deficiencies of the system attracted attention. For then doubts as to the proper pronunciation, and consequently of the meaning of words, grew of more and more frequent occurrence; and to remedy this defect, the literati of the nation, who had too much veneration for the sacred tongue (לשׁוֹד) to alter its orthographical system to such a degree as would be occasioned by the admixture of novel characters, took for the purpose of representing the principal vowels those consonants which from the weakness of their sound are most nearly allied to them. The consonants so taken were &, 7, and 7: these were made use of to represent the vowels a, u, and i respectively; and from their office of guiding to the just pronunciation of words by supplying the place of vowels, they afterwards received the name of matres lectionis (אמוֹת למקרא), i. e. mothers, or sources, of (correct) reading. That these are the chief vowel-sounds, of which the others are but intermediate modifications and combinations, and that the consonants thus selected as their representatives are those which bear to them the nearest affinity, we will presently undertake to demonstrate.

But before proceeding so to do, we will first explain the values which we shall give to the vowels of the English alphabet in the representation of Hebrew or other Oriental words in the course of the following work, and which it is necessary that the student should carefully impress upon his memory in order to attain a correct pronunciation. These then are as follows: \bar{a} will have the sound of that letter in the word father, and a its sound in mar; \bar{e} that of a in mate, and e that of e in met; \bar{i} that of ee in feet, and i that of i in fit; \bar{o} the sound of o in note, and o its sound in not; \bar{u} that of o in fool, and u that of u in full.

 δ 10. Of all the sounds of which human speech is composed that of the vowel a is the simplest and the most easily produced, it consisting of a mere emission of the voice through the unclosed lips; and on this account in most alphabets it ranks the first. 2. The vowel i is produced by the greatest horizontal dilatation of the mouth, or in other words, it is that vowel in the enunciation of which the oral aperture is extended longitudinally in the greatest degree. 3. The utterance of its opposite u is effected by the closest approximation of the corners of the mouth during the emission of the voice. The remaining vowel-

sounds are the intermediates of the three principal ones: thus the diphthongal vowel e holds a place between a and i, both of which sounds may be said to enter into its composition, whence it is frequently denoted both in English and French by the two conjoined, thus fail, gait; maison, fraiche; so too the diphthongal o, the medium between a and u, is represented in the latter tongue by a combination of its elements, thus au, faux.* The whole five may be appropriately arranged in the manner following:

The vowels on the left side of the diagram are those produced by dilating and those on the right by contracting the orifice of the mouth in a horizontal direction. The vowels placed furthest from a, viz. i and u, are thus modified in the greatest degree; and those placed half-way between the simplest vowel and each of its extremes are less so, being something between the simplest and the most highly modified forms, and partaking of the nature of both.

§ 11. The vowels, like the consonants, may be classed according to

^{*} That \bar{e} is in reality a compound of a and i, and \bar{o} of a and u, is most clearly shown in the vowel-changes of the Sanscrit language, in which e and o have each only a single character, because as compound or diphthongal vowels they are always to be considered long; while the other vowels have each two letters to represent their two sounds, long and short. And whenever e and o are to be resolved into their constituent parts, e becomes ay, and o changes to aw: thus, for example, $n\bar{e}$ with ana becomes nayana; and $b\bar{o}$ with ati becomes bawati: and vice versa, when a at the end of a word concurs with i at the beginning of the following, it becomes \bar{e} , and a followed immediately by u becomes \bar{o} ; thus walawith ishti becomes walēshti, and with ushtra becomes waloshtra. The same cause has produced in Greek a phenomenon directly the reverse. In that language e and o have each a long and a short character, while the remaining vowels have only one. The vowels α , ι , and v, may denote either a long or short sound as occasion requires; but as the diphthongals $e(\eta)$ and $o(\omega)$ were in all probability at first uniformly pronounced long, it was considered necessary, when in the course of time they acquired in certain cases a briefer sound, to invent additional characters (& and o) for its notation. It may be worthy of mention, that in the Gothic Gospels of Ulphilas the Greek vowels & and o are respectively represented by ai and au.

the organs by whose agency chiefly they are produced: thus a, which is made by a rough breathing through the throat, properly belongs to the gutturals; i and its modification e, made by pressing upwards the root of the tongue against the roof of the mouth, may be called palatal vowels; and u and o, which are produced by a close approximation of the lips to each other, though without touching, are labials. In these three vowels lie in a manner concealed the sounds of the corresponding three weakest consonants of the same organs, which will at once be made to appear by pronouncing them in rapid succession with another vowel: thus the sounds of ia, ie, iu, pronounced quickly are equivalent to iya, iye, iyu respectively; and in like manner ua, ue, ui = uwa, uwe, uwi; and under each of these heads are to be arranged their modifications, which partake of the same nature in a minor yet still perceptible degree, thus, ea, eo, eu = eya, eyo, eyu, and oa, oe, oi = owa, owe, owi, though the consonants are here not so strong as those produced in passing over from those vowels (viz. i and u) which bear to them the greatest analogy. The reason is, that in pronouncing i and u the organs of speech are so near the position required for the pronunciation of y and w that they cannot quickly assume another shape without making those sounds heard. This view of the subject affords we think a satisfactory solution of the fact that the letter 7 so frequently coalesces or loses its consonantal power in the sound of u or o, and that $\overline{}$ in like manner quiesces in a preceding i or e. The letter & bears in its nature such a strict resemblance to the simple open vowel a, that it does not require, and in fact scarcely admits of a separate explanation.*

^{*} If proofs of the soundness of the theory we have advanced were desired, they are to be found in abundance in almost every language, whether Oriental or European. We will select a few of the most striking. In Arabic the three principal vowels are the only ones which have a sign devoted expressly to their representation: thus a, i, and u are denoted by fatha (—), kesra (—), and dhamma (—), though the two latter are likewise employed to represent their respective modifications; and these three signs have their corresponding quiescents as in Hebrew, viz. | = 8, = 1, and = 1. In Sanscrit the semi-vowel (the concealed consonant residing in a vowel, and which on the resolution of that vowel into its elements makes its appearance) of i is y, and of u is w. And the same fact is observable if we turn our attention nearer home: thus, the Latin i at the commencement of a syllable when followed by a vowel had, and on the continent of Europe still generally retains, the consonantal power of the English y or Hebrew = 1; in like manner u was employed both for w (= 1 cons.)

Having thus shown that the fundamental vowels are a, i, and u, and that to these the weak consonants x, z, and z bear the closest relation, and were therefore with great propriety employed to represent them, we will now explain the signs by which the whole of the vowel-sounds in Hebrew came afterwards to be denoted.

Vowel-Signs.

§ 12. The contrivance above detailed, of representing the principal vowels by means of their homogeneous consonants, useful as it was at the time, could answer its intended purpose only while the language continued to be studied as a living one; but when it fell by degrees into still greater disuse, till at last it was no longer spoken, the new doubts and difficulties which continued to arise respecting the correct manner of reading it were removed by the gradual introduction of vowel-marks, and also of diacritical points distinguishing the different sounds of the same letter. In this manner the existing system was completed about the seventh century of the Christian era.

The following are the signs that denote the vowel-sounds, of which in Hebrew there are ten, five long and five corresponding short ones, together with their powers and names.

		Long.					Sho	rt.
	Na	me.	Power.	Fig.	Fig.	Pov	ver. Na	ime.
	למג	Kāméts.	\tilde{a}	т	-	ă		Páttahh.
		Tsēré.	ē			ĕ		Ceghól.
בָּדוּל	חירק	Hhíriķ Gād	hól. ĩ	- ر		ĭ	חירק קטון	Hhírik Katón.
	חולם	Hhólem.	Õ	ำ	_	ŏ	למג המוע	Kāméts Hhātúph.
	שורבק	Shūrék.	\bar{u}	ħ	31	ŭ		Ķíbbuts.*

§ 13. The forms of these signs, which are made up of short strokes and dots, appear to be entirely arbitrary. Long a is denoted by a horizontal stroke under the middle of which a dot is placed, thus $\binom{1}{2}$

and u (5); e.g. iam, pron. yam = jam; nauis (from naus), pron. nawis = navis. The twofold power of the English w and y must occur to the mind of every one.

^{*} Their names are derived partly from the manner in which they are pronounced, and partly from their figure: thus, Kamets signifies contraction; Pattahh, opening; Tsere, breaking; Ceghol, cluster of grapes; Hhirik, gnashing; Hholem, strength; Kamets Hhatuph, short kamets; Shurek, hissing; Kibbuts, compression. See next note.

(in printed books, however, and often in writing, this dot is converted into a vertical stroke, and connected to the horizontal one like the figure in the table we have just given); short a, by the horizontal stroke alone; long e, by two dots in a horizontal direction; short e, by the preceding, with an additional dot placed under and between them; long i, by a single dot, followed by its homogeneous semivowel 7; short i, by the dot alone. All the preceding signs are placed beneath the letters to which they are attached. The vowel long o is denoted by a dot placed over the left edge of the consonant to which it belongs, as in the word $t \bar{o} h \bar{u}$; by which position it is distinguished from the accent R'bhia'h, which consists of a dot placed over the centre of a letter (§ 49). It is on this account also that Hholem is in general accompanied by its homogeneous semi-vowel 7, which accordingly is to be considered as a part of the Hholem, though not an essential one: so that a word may be written fully with it, as קוֹטל; or it may be omitted, as סמל When א should be employed with Hholem, and when not, cannot in all cases be determined with certainty; the following rules, however, for its omission have been given by Ben Zebh, in his 'Talmudh Lashon 'Hibhri.' Hholem is not to be accompanied by 7, 1st, when the letter bearing Hholem has likewise an accent, e.g. שׁהָם, שֹׁהוֹם (for then it cannot be mistaken for R'bhia'h); 2d, when Hholem is followed by one of the letters א, ה, or ן, e. g. האה, כהך, ראה, (to prevent the concurrence of too many weak letters); 3d, when followed by v, so that its diacritical point coalesces with the dot Hholem, e. g. מֹשֶׁה. מֹשֶׁה; 4th, when two Hholems come together, e. g. מאורת, מאורת (for the same reason as Rule 2d, i. e. not to increase the number of serviles in a word); 5th, when the second and third radical letters have been contracted into one, e. g. לד, כל, דם, עד, עד, בל (lest the 7 should be mistaken for a radical). Yet the student must be reminded that in the application of these rules there is considerable uncertainty; for, though in general they will be found to accord with the facts, the contrary is frequently the case. Short o is denoted by the same figure as \bar{a} (to distinguish it from which, see the directions given § 24); long u, by a dot placed in the bosom of γ (for the manner of distinguishing it from a point called Daghesh, whose position is also in the bosom of a letter, see \S 26 et seq.); short u, by three dots placed obliquely in a straight line.*

^{*} As it probably may interest some of my readers, I will give in brief the celebrated Aben Ezra's theory of the vowels contained in his grammatical work

Combination of Consonants and Vowels.

§ 14. We have now given the characters representing all the sounds in Hebrew, whether consonants or vowels. In the Occidental lan-

entitled Cepher Tsahhoth, 'The Book of Elegance.' The opening is so curious that it must be quoted in his own words: בעבור שנבראת נשמת האדם בצלם אלהים: ידמו מעשיה אל מעשיו. וחנה סוד כל התנועות על שלש דרכים: התנועה האחת מחמוצק : שהיא כנקודה בתוך עגולה : וזאת תנועת האזיר והאש : שהיא תנועה מלמטה אל מעלה: כי הארץ אמצעית בתוך הגלגלים: ומוצקה היא מוצק גלגל המזלותו והתנועה השנית אל המוצקו וזאת תנועת המים והארץו שהיא תנועה מלמעלה למטהו והתנועה חשלישית סביב המוצקו וזאת תנועת הגלגליםו שהיא חנועה לא למעלה ולא למטהי וכאשר חפשתי דברי התנועות הנקראות שבערה מלכים: מצאתי המוסרים מהן הם שלשה: חולם וחירק ופתח גדול: i. e. "As the souls of mankind were created in the image of God, therefore their actions resemble his; thus the secret of every motion is in three directions: The first motion is from the centre, which is like the point in a circle; this is the motion of air and fire, which is from below upwards; for the earth is the centre of the celestial bodies, and her centre is the centre of their orbits. The second motion is towards the centre; and this is the motion of water and earth, which is from above downwards. And the third is around the centre; and this is the motion of the celestial bodies, which motion is neither upwards nor downwards. And as I was examining the vowelsounds which are called the Seven Kings (i. e. Hholem, Hhirik, Pattahh, Kamets, Shurek, Kibbuts, and Ceghol), I found that they are grounded on the following three, viz. Hholem, Hhirik, and Pattahh, and the other four are compounded from them." He then goes on to say, "1. The vowel Hholem is an elevated tone (ותנועת החולם למעלה), and is accordingly expressed by a dot above the letter, and always over the end of it, as in the word , in order that it may not be confounded with the accent R'bhia h, which is also a dot above the letter, but placed in the middle. It derives its name abin from the root abn to be strong, as in the word יהחלימני Is. 38: 16. By some this vowel is called פום) מלא פום Chald. for no mouth) full mouth; because in pronouncing it the mouth appears to be full. 2. The vowel Hhirik is a depressed tone (ותנועת חירק למטה). represented by a dot under the letter; its name parm is derived from the root דרק to gnash; because in uttering it, one appears to gnash with the teeth (!). 3. The vowel-sound of Pattahh is neither exalted nor depressed, but is an intermediate broad sound. Its figure is therefore a horizontal line drawn under the letter. Its name is derived from the root not to open, because it is produced by an opening of the mouth. The reason why it is placed beneath rather than above the consonant to which it belongs, is that it may thus be distinguished from the mark Raphe, which is placed over the בגדכפת letters to show when they are to be aspirated (§ 45). 4. The vowel-sound Kamets is the intermediate tone between Hholem and Pattahh, whence its figure is composed of those of Pattahh and Hholem, thus (), which were afterwards connected in the present manner (). (According to the opinion of Aben Ezra, Kamets differs from Pattahh in the length and also in the quality of its sound; the former being

guages these are written in one continuous line; but in the Shemitish tongues the consonants alone are placed in the line, and the signs for the vowels long and short are inscribed above or below those consonants to which they are to be read, e. g. long \(\mu\) bā, \(\mu\) bē, \(\mu\) bō, $\exists b\bar{u}$; short $\exists ba, \exists be, \exists bi, \exists bo, \exists bu$. When a vowel is followed by one of the letters &, T, T, technically termed 'Eh'wi letters מהדר) I will be), without a vowel of its own, which letters as before stated sometimes lose their consonantal power (§ 7), the following rules are to be observed: X, being the weakest of all the consonants. when preceded by a vowel merely lengthens such vowel and rests in it, thus $\& \bar{a}, \& \bar{a}, \& \bar{c}$, &c., and the same is the case with π ; but $\bar{\gamma}$ and a can quiesce only in their respective homogeneous vowels o, u, and i, e, which they were once employed to represent (§ 9), thus 12 bô, 12 $b\bar{u}$; בר $b\bar{e}$; for when preceded by any other vowel, \bar{e} retains its power of a labial consonant, and a makes with it a diphthong, thus bai, ברר boi, ברר bui.

pronounced by him like a in all. But as the analogy of the remaining long and short vowels, as well as that of the other Shemitish tongues, not one of which has this sound, gives to the vowel Kamets that of long a simply, we have considered it as differing from Pattahh in quantity alone). 5. Shurek. Its sound, compounded of those of Hholem and Hhirik, is denoted by a dot in the middle of a letter, and, lest it should be taken for Daghesh, which is likewise a dot in the middle of a letter, it is always accompanied by its semi-vowel 7. The reason of its being placed in the middle is that its sound is a compound of Hholem which is above, and Hhirik which is below. (This sound between e and i is still retained in the pronunciation of Shurek by the Polish Jews, which strongly resembles that of the French u in une or the German ü; thus, for instance, the word \underline{z} is pronounced by them barüch). 6. The corresponding short u is expressed by three dots; one of them taken from Hholem, another from Hhirik, and the third from the middle of 7 (scil. Shurek!). 7. Tsere. Its sound, like that of Shurek, is composed of Hholem and Hhirik; but this sound, e, is nearer to i, while that of Shurek is nearer to o. It is expressed by two points, one from Hholem and the other from Hhirik, which, for the sake of distinguishing them from Sh'wa, which consists of two dots one above the other, are placed in a horizontal direction. (His opinion of the power of this vowel may be the reason why the Polish Jews of the present day pronounce Tsere like the diphthong ai; thus אמן is according to them to be read āmāin). 8. Ceghol is a compound of Tsere and Pattahh, and is pronounced as in the East (i. e. like ai in fair). Its sign consists of the two dots of Tsere, and one in the middle of them, which represents the centre; that denoting, as I have already stated, the vowel-sound Pattahh" (!).

3

CHAPTER III.

SYLLABICATION.

- § 16. a. From what we have said, it will be easily comprehended, 1st. That the vowel of a simple syllable must be long, for it does not pass over to, and become absorbed in, a following consonant, but remains with its own; and vice versâ that a long vowel always helps to form such a syllable. 2dly. It is evident that the vowel of a mixed syllable must be short, as it becomes lost in the following consonant; and on the other hand, a short vowel invariably forms part of a mixed syllable.* Thus in the word symple syllables and two long vowels; while in the syllable, has a long vowel,—and the second, a mixed syllable, has a short one.
- b. And hence it ensues, that if in the course of inflection a mixed is converted into a simple syllable, the short vowel of such syllable must as a general rule be changed into its corresponding long one, e. g. הַקְּרָה , which by the rejection of ז becomes הַקְּרָה ; and in like manner the changing of a simple into a mixed syllable causes the long vowel to be replaced by its corresponding short one, e. g. הַּבְּרָה she stood, דְּבָּה thou stoodest. We have said that this mutual interchanging of long and short vowels takes place between those which correspond to each other; we may here observe that to this there are exceptions, which will be stated in the sequel.

SH'WA.

- § 17. As a syllable in Hebrew may begin or end in a consonant without a vowel, a sign has been invented to accompany such letter, in order to certify the reader that no vowel has been omitted through mistake. This sign consists of two vertical dots () called Sh'wā (Heb. N\vec{v}\v
- § 18. Since no consonant can be uttered without the aid of a vowel, every one which is not accompanied by a vowel of its own is to be pronounced by means of the one attached to the preceding or following

^{*} The only apparent exceptions to these rules arise from the introduction of an accent. See § 55.

consonant. Thus, if the initial letter of a word be destitute of a vowel, as the בְּ in קְּמֵל, it must be expressed by means of that attached to the second; if, again, the final consonant have no vowel of its own, as is the case with the 5 of the same word, the vowel preceding it, which is here (), enables it to be pronounced. And one or the other of these means is resorted to in the case of medial consonants occurring without a vowel: in the word קטלה, for example, the pronunciation of מ may be effected by the help of either the preceding (), thus kot-la; or that which follows, kā-t'lá. When a consonant is enunciated by means of the vowel which goes before it, the sign () is called Sh'wa quiescent (שׁרָא בַּה); when by the help of that which follows, it is termed Sh'wa mobile (שׁרָא נע). The question, whether a consonant so situated is to be pronounced by the aid of the preceding or of the following vowel, is answered by the rule in § 16 for distinguishing simple and mixed syllables: for when the vowel immediately preceding a medial consonant with Sh'wa is short, the consonant must be read with it, in order to complete the syllable; and when the preceding vowel is long, as that syllable is thus rendered perfect, the consonant will go to the succeeding one. Or in other words, when Sh'wa is preceded by a short vowel, it is quiescent, as מַקְמֵיל yik-tól, מַקְמֵיל mak-tíl; and when by a long one, it is mobile, in which case we shall represent it by an apostrophe, as יְקַטְלֹר kō-ṭ'lá, יְקַטְלֹר yik-kā-ṭ'lú.*

- § 19. Besides the rules given above, there are some others requisite to be known before we can in all cases make the necessary distinction between these two species of Sh'wa:
- 1. If two Sh'was concur in the middle of a word, as in לְּקְשַלֵּל, the first is quiescent, and is in consequence to be read with the vowel preceding it; while the second is mobile, and must be expressed with the assistance of the following vowel. For two vowelless consonants at the beginning of a syllable cannot be expressed by Oriental organs (§ 15), neither can they at the end of one without considerable effort: it is true that at the end of words this cannot be avoided; but in the middle it can, and accordingly is, viz. by attributing them to separate syllables.
- 2. If a letter with Sh'wa in the middle of a word is by the influence of the sign called Daghesh forte (see § 27) to be pronounced double, such letter is considered as consisting of two, each accompanied by

^{*} The accents of course exert the same influence on Sh'wa which they do on the syllables. See § 55.

Sh'wa; thus קְּמְלָּה is equivalent to קְמְיִלָּה, and will accordingly come under the preceding rule.

3. If a letter with a subscribed Sh'wa be immediately succeeded by a similar letter expressed in writing, this Sh'wa must be made audible although preceded by a short vowel; which is done in order to give greater distinctness to the reduplication: thus הללה is to be read ha-l'lú, not hal-lú; and so דָלֶלָּה pron. hi-n'ní, דָלֶלֶה pron. tsi-l'lú.*

COMPOUND SH'WA.

§ 20. The Sh'wa of which we have just spoken is called simple Sh'wa (שׁרָא פֿשׁרָש), and may be placed under any letter of the alphabet

^{*} As we have already observed, these Sh'was quiescent and mobile were originally intended, and are accordingly to be considered, merely as signs to certify the absence of a vowel; for they are by no means short vowels, as some grammarians have asserted. This idea of theirs probably had its origin in the fact that two initial perfect consonants, as for instance those in the words שמב and שמל and שמל cannot readily be pronounced without a slight intermediate breathing, thus b'nī, sh'ma'h; but when we reflect that this difficulty still exists whether a Sh'wa be written or not, and that the sign (:) still remains the same, and is employed for the same purpose, viz. to show the absence of a vowel, whether occurring at the beginning or end of a syllable, we cannot fail to perceive the erroneousness of the supposition which attributes to it different powers and uses according to its place in a word. This is further corroborated by the uniform manner in which the signs corresponding to Sh'wa are employed in the Arabic, Persic, Sanscrit, Bengali, &c., in which languages they in no instance represent a vowel-sound, however short. And again by the statement of Aben Ezra (Cepher Tsahhoth 3. a.), and of D. Kimhhi (Mikhlol, 48. b.) relative to the manner in which Sh'wa mobile was pronounced by the school of Tiberias: wherein he affirms that when occurring before one of the guttural letters, they gave it the same vowel-sound as that by which the guttural was accompanied; thus אָאָבֶּל they pronounced $y^aabbar{e}dh$, בְּבֶּר $b^ohar{o}r$, בְּבֶּוֹר $b^ohar{o}r$, בְּבֵּר הּ before י they gave it the sound of i, thus יְרְמֵּלְהוּ יִיִּשְׁלְ ȳūyāhhél, יְרְמִיְהוּ yirmiyāhū; and before any other letter, that of the vowel a, thus קלבה kalālá, הַבַּרִים gabhārīm, קלבלת galīlīm. This practice appears to have arisen from a difficulty they experienced in enunciating a consonant unless immediately followed by a vowel-sound, and hence when there was no peculiarity in the succeeding letter which could exert an influence in determining the vowel to be taken, they chose the simplest open vowel a: when the succeeding letter was 7, they gave to that with Sh'wa its homogeneous vowel i; and when a guttural, which from the tenuous quality of its sound does not present the same effectual barrier between two vowels as one of a stronger texture, they substituted a vowel the same as that taken by the guttural. And this, as we have said, constitutes an additional proof of the truth of our assertion, that Sh'wa is not a vowel; for were such the case, with what propriety could it have been exchanged for any other which convenience might suggest?

§ 21. Of the five short vowels given in § 12, only the following three are employed in this manner, viz. (), (), and (). Thus,

Fig.	Repr.	Name.

- (ַ ,) " הְשֵׁק אַשְׁהָ Hhātéph† Páttahh (or Sh'wa Pattahh).
- (ֱ הְטֵבְ סֶגוֹל Hhātéph Ceghól (or Sh'wa Ceghol).
- (בוֹ מְעָק קְּעֵק Hhatéph Kaméts (or Sh'wa Kamets).

The reason why only these three vowels have been adopted to form compound Sh'was will appear from the following considerations. The gutturals admit of being accompanied by any vowel whatever; but when it is not necessary in order to determine the form of the word that they should take one of the other vowels, they prefer their homogeneous vowel a of the same organ, or at least one of its modifications e and o (§ 10). Now as the short vowel-sounds denoted by the compound Sh'was were given to the gutturals for the purpose of facilitating their enunciation, and have little to do with the characteristic forms of words, it is natural to conclude that such vowels alone would be

^{*} To this general rule of giving to vowelless gutturals a compound Sh'wa, there are some exceptions: thus ח, which of all the letters of this class has the strongest sound, is not unfrequently accompanied by Sh'wa simple, as אָבְיִבוּיִבּי, יִיבְּיִבִייִּבּ, יִיבְיִבִּי, with ח and שׁ this is but seldom the case, as הַּהְיבָּי, יִיבְיִיבִי, and with א very rarely, it being the weakest of all, as אָבְיר These anomalies have in all likelihood arisen from a want of exactness in carrying out the system; to which cause may likewise be attributed the appearance of compound Sh'was with other than guttural letters, as בַּבְּיֹב Gen. 2: 12., בְּבִיבִּי Zech. 4: 12. (which the K'ri notices) סולה בּבָּרִי Zech. 4: 12. (which the K'ri notices) סולה בּבָּרִי Zech. 4: 12. (which the K'ri notices) סולה בּבָּרִי בּבָּרִי בּבְּרִי בּבְרִי בּבְּרִי בּבְּרַי בּבְּרִי בּבְּרַי בּבְּרַי בּבְּרַי בּבְּרַי בּבְּרַי בּבְּרַי בּבְּרַי בּבְּרַי בּבְּרַי בּבְּרָי בּבְּרַי בּבְּרָי בּבְּרָי בּבְּרָי בּבְּרַי בּבְּרַי בּבְרַי בּבְּרַי בּבְּרַי בּבְּרָי בּבְּרָי בּבְּי בּבְּי בּבְּי בּבְיי בּבְי בּבְּי בּבְּי בְּבִּי בְּבִיי בּבְיי בּבְיי בּבְּי בּבְי בּבְי בּבְּי בְּבְי בְּבִי בְּבִי בְּבִי בְּבִי בְּבִי בְּבִיי בְּבִי בְּבִי בְּי בְּבִי בְּבְי בְּבִי בְּבִי בְּבִי בְּבִי בְּבְי בְּבִי בְּבְי בְבְי בְּבְי בְבְּבְי בְּבְי בְּבְי בְּבְי בְּבְי בְּבְי בְּבְי בְבְי בְּבְי בְבְי בְּבְי בְּבְי בְּבְי בְּבְי בְּבְי בְּבְי בְב

[†] ਸ਼ਹੂਜ snatching, Chald. act. part. from ਸ਼ਹੂਜ to snatch.

received into their composition as are consonant to the nature of the gutturals.

§ 22. From what we have said, it will be perceived that it is nearly a matter of indifference which of the compound Sh'was is employed in a given case, whence we have אַבֶּי 'h°mōdh, אַבּר' 'a°mōr, 'æ°nī; though when not occurring at the beginning of a word, that compound Sh'wa is in general preferred which is similar to the vowel preceding it, e. g. הַּעָבִיר ha'h°mídh, הַעָבִיר ha'h°mídh, הַעָבִיר ha'h°mídh, הַעָבִיר ha'h°mídh,

PATTANH FURTIVE.

Pattahh Furtive (בות גנובה) is the name given to a short a placed under a vowelless guttural letter at the end of a word or syllable when such letter is preceded by any other vowel than a; in which case a difficulty is experienced in passing directly from such vowel-sound to the enunciation of the guttural, and consequently a short and homogeneous a-sound (see § 21) steals in, as it were, to aid in expressing the guttural: thus the word man will naturally read ruth; and this is accordingly denoted in writing by placing under the guttural a Pattahh, which is to be pronounced before its guttural, thus 777. This however takes place only with the strong gutturals, which refuse to coalesce with a preceding heterogeneous vowel, as ש, ה, and ה; thus רַקִּיע rāķī h, מובה mizbē hh, בבה gābhō h; for the weak gutturals, א and ה simple, lose their sound altogether in such case, and quiesce in that of the preceding vowel (§ 14). Hence Pattahh furtive is employed only when a strong guttural is preceded by a heterogeneous vowel, that is, another than a; for with that vowel it readily coalesces, so that none other is needed for the purpose of facilitating its enunciation. only exception is when the guttural is followed by another vowelless letter; for then it still takes Pattahh furtive, in order to assist the enunciation of the final letter, although preceded by the vowel a, e. g. אַמע pron. shāmáa ht.

KAMETS HHATUPH.

§ 24. 1. To be enabled to distinguish between the long vowel Kamets, or long a, and the short vowel Kamets Hhatuph (קַבֵּץ הָשֵרָּן snatched Kamets, so called on account of its brevity), or short o, both

of which have the same figure (,), it is necessary to consult what was said (§ 16) respecting the relative connection existing between vowels and the syllables formed from them, viz. that a long vowel requires by its nature to make a simple, and a short vowel a mixed syllable. This is the leading principle which determines what vowel the sign () represents: for whenever () is followed by a letter with a vowel of its own, it makes in consequence a simple syllable (§ 15), and stands for the vowel \bar{a} , e. g. מלכים, pron. $k\bar{a}t\acute{a}l$, $m'l\bar{a}ch\acute{i}m$; but when it is followed by a letter bearing Sh'wa quiescent, it makes with such letter a mixed syllable, and denotes the short vowel ŏ, e. g. הכמה hhŏkhmá, קרשׁר 'aakhŏlkhá, אָכֶלְןּד kŏdhshé. When however () is followed by () in the middle of a word, a question arises, whether () is Kamets (a), and the letter with Sh'wa—which in that case is mobile—to be read to the following syllable, thus קְּטָלָה kā-t'lá; or whether it is Kamets Hhatuph (ŏ), and the Sh'wa-then quiescentto be read to the syllable containing (ָ), thus קַמַלָּה kot-lá. case is generally decided by the sign Methegh (see §63): viz. when () is accompanied by Methegh, it is long, and forms a simple syllable, thus קְּמֶלֶה kat'la; and when unaccompanied by this sign, it is short, e. g. קרבן hhokhmá, קרבן korbán.

2. From these rules the following cases are to be excepted: A (,) which has been derived from Hholem is to be read as short o, although followed by a consonant with a vowel of its own; such (,), being in the antepenult, takes Methegh, both on account of the accent on the ultimate (§ 64), and to enable the short vowel to make a simple syllable: e. g. שַּׁרְשֵׁים plur. אַלְתְשִׁים kodāshím, שֵׁרְשִׁים plur. אַלְתַּשִׁים shorāshím. And so of a (,) which has arisen from Sh'wa in consequence of a following (,), and which is accompanied by Methegh, according to § 63. b., e. g. לַּתְלֵּיִר for בֹּתְלֵּיִר.

\$25. 1. When () occurs in the ultimate making a mixed syllable, its quantity is decided by the position of the accent: viz. if it receives the accent itself, it is Kamets, or long a, which the accent enables to make a mixed syllable (\$55), e. g. אַרָּהְ dābhár, אָשָׁ mishkān, אַשָּׁ shāth; but if it does not receive the accent, it must be Kamets Hhatuph, or short o, from Hholem (), e. g. אַרָּרְהַן wayyárŏm, from אָרָרְרָּהָן. 2. In the beginning or middle of a word, () followed by a letter with Daghesh forte—which is equivalent to two such letters, the first with Sh'wa quiescent (\$28)—is to be read ŏ, according to \$24, 1.: thus בְּהַרְהַרִּם (בַּהַהְהַרִם) bŏttím; and it will retain this power when, on the addition of a grave or accented suffix, it

receives a Methegh (§ 64), e. g. בְּחֵירָה pron. böttēhém. But when Kamets followed by Daghesh forte takes an accent to enable it to form a mixed syllable, it retains its sound of long a, e. g. מָּבָה, הַבָּה, הִבָּה, pron. yámmā, lámmā, shámmā.

CHAPTER IV.

DAGHESH.

§ 26. Dāghésh (בָּבֶשׁ) is a dot inscribed in the bosom of a letter. Its office is of two kinds: 1st, to show that the letter in which it is placed is to be doubled in pronunciation, when it has the name of Daghesh forte (בְּבָשׁ בָּשׁ), as it strengthens the sound of the letter in which it is inserted, and at the same time causes the preceding vowel to rush on towards it, in order to give full force to the reduplication; 2d, to remove the original aspirate sound of certain letters, when it is called, in contradistinction to the preceding, Daghesh lene (בָּבַשׁ בַּבָּב בַּבָּב

DAGHESH FORTE.

§ 27. In Hebrew a letter is often by the rules of grammar to be reduplicated in the middle of a word; and in such cases, when possible, both letters of the pair are made audible in pronunciation: but for the sake of expedition, the latter of them only is represented in writing, and in this there is a Daghesh inscribed, in order to remind the reader of the omission; thus, instead of בְּמָשֵׁלְ at full length, we have merely בְּשֵׁלְ.* And this not only when the two letters were originally the same, but also when the former of them, as is often the case, has been assimilated to the latter, thus we have

^{*} In Arabic a sign called *teshdid* (w) is placed over a letter in order to denote its reduplication. The Germans in writing make use of a small stroke over n and m for a similar purpose.

- § 28. As the power of Daghesh forte consists in compensating the rejection of the first of two similar letters in juxtaposition when without a vowel of its own, it follows that this Daghesh can never be employed except when the first letter of the pair would be accompanied by Sh'wa, e. g. מַבְּבָה מַבֶּבֶל הְקַבֶּל הְקַבֶּל הִקְבֶל הַבֶּבָל הַבֶּבָל.
- § 30. Besides the gutturals, which in no case receive a Daghesh, we find also the letter, which, although a labial, and capable of taking this sign, is yet the weakest of the remaining consonants, answering to the English w, and cannot easily be reduplicated in pronunciation. Instead, therefore, of inserting a Daghesh in this letter, the word containing it undergoes some other equivalent change; for instance, in the Pi'hel form of the verbs בשל , the second radical letter, which according to the general rule should be doubled by Daghesh, is either changed into , thus בשל , in the remains single, and the third radical is reduplicated in its stead, whence the alternate form
- § 31. If we consider the influence exerted by the point Daghesh on the syllable preceding it, we shall perceive that, as the first of the two letters of which the consonant containing it is held to be composed is pronounced as though accompanied by Sh'wa, every such syllable must be a mixed one; and hence Daghesh forte is always immediately preceded by a short vowel (§ 16. a.). It is equally evident, on the other hand, that every short vowel, unless accompanied by an accent (§ 55), must be followed by a consonant either with Sh'wa or containing an inscribed Daghesh. Hence it is, that a short vowel is frequently given to a consonant for the purpose of expressing the Daghesh in a following one; while in other cases the Daghesh itself is inserted in consequence of a preceding short vowel.
- § 32. Thus Daghesh forte, although uniform in its power, has two distinct offices; one of which is to denote the reduplication of a letter, or the assimilation of a letter to the following one, e. g. בְּנָבֵּעׁ הַ כְּנָבִּעׁ for בִּנְבָּעׁ ; and this we shall call Daghesh compensative. Its other office is to enable a preceding short vowel to form in compli-

ance with its nature a mixed syllable, e. g. אָפֶסֶל,* so too the Daghesh inserted in a letter preceded by the article ק or יַן conversive. In these cases Daghesh cannot with any propriety be considered as a substitute for a rejected letter, since it has arisen solely on account of the preceding vowel, which is thereby preserved unchanged; this we shall term Daghesh conservative.

- § 33. 1. A short vowel requires the insertion of this Daghesh in the following consonant in order to complete the syllable, whenever such consonant has a vowel of its own; but when it receives Sh'wa, and can consequently terminate a mixed syllable, the Daghesh is often rejected as no longer necessary, e. g. the word above given אַסָבּי, when it takes a suffix, thus אַסְבָּי, the short vowel is followed by Sh'wa, and accordingly Daghesh is again rejected; so אַסְבָּי, דֹ Thus the Daghesh is often omitted which should be inserted after the article הַ or אַ conversive, when the letter following these particles takes Sh'wa, e. g. בּרַהָּבִיּרַם, הַּכֹּרָבִיּרַם.
- 2. And not only is Daghesh conservative, or Daghesh employed on account of a preceding short vowel, in this manner omitted as unnecessary, but also Daghesh compensative, i. e. Daghesh used to denote the rejection of a letter, e. g. מְבְּקְשִׁים for מְבְּקְשִׁים, from מְבְּקְבֶּיִר for מְבְּקְבָּיִר for מְבְּקְבִּיר for מְבְּקְבִּיר for מְבְּקְבִּיר for מִבְּקְבִּיר for מְבְּקְבָּיִר for מְבְּקְבִּיר for מְבְּבְּיִר for מִבְּקְבִיר for מְבְּבְּיִר for מְבְּבְּיִר for מְבְּבְּיִר for מְבְּבְּיִר for מִבְּבְּיִר for מִבְּבְּיִר for מִבְּבְּיִר for מִבְּבְּיִר for מִבְּבְּיִר for מִבְּבְּיִר for מוֹ מִבְּבְּיִר for מִבְּבְּיִר for מוֹ מִבְּיִר for מוֹ מִבְּבְּיִר for מוֹ מִבְּיִר for מוֹ מִבְּבְיִי for מוֹ מִבְּבְּיִר for and מוֹ מוֹ מוֹ for a rejected letter, but is at the same time a necessary effect of such rejection, in order that the preceding short vowel may remain unchanged, and still go to constitute a mixed syllable, as it did before the rejection took place. Take for example the verbal form מוֹ בְּבְּבְּיִּר for the first syllable is a mixed one; but if a be assimilated to the next following consonant, and then

[•] That this word in the cognate languages Syriac and Arabic is found to have an intermediate א thus Syr. במולם, Arab. ביים, constitutes no valid objection to the truth of our theory; for instances abound of words in these and the other Shemitish dialects receiving an inserted liquid for the same purpose and on the same occasions as when in Hebrew they take Daghesh: e. g. Chald. אַבָּה (like אַבָּה (like אַבָּה (וֹצָבֵל inf. Aph'hel אַבָּה (וֹצָבַל בּיִבָּל בִּיִבָּל בּיִבָּל : אַבָּה (אַבָּה אַנָּה); אַבָּה בּיִבָּל בּיִבָּל : אַבָּה אַנָּה אַנָּה אַנָּה אַנָּה אַנָה אַנָּה אָנָה אַנּה אָנָה אַנּה אָנָה אַנּה אַנָּה אַנְה אָנָה אַנּה אַנְה אָנָה אָנָה אַנּה אָנָה אָנָה אָנָה אָנְה אָנָה אָנָה אָנָה אָנָה אָנָה אָנָה אָנָה אָנָה אָנָה אָנְה אָנָה אָנְה אָנְה אָנִה אָנָה אָנְה אָנִה אָנִה אָנָה אָנְה אָנָה אָנְה אָנִה אָנָה אָנִה אָנָה אָנָה אָנְה אָנָה אָנָה אָנָה אָנְה אָנָה אָנָה אָנָה אָנָה אָנָה אָנָה אָנָה אָנְה אָנָה אָנָה אָנְה אָנָה אָנְה אָנְה אָנְב הּיִינְה אָנָה אָנְה אָנָה אָנְה אָנְה אָנְה אָנָה אָנְה אָנְה אָנְה אָנָה אָנְה אָנְיּי אָנְה אָנְה אָנְה אָנְה אָי אָנְה אָנְיּי אָנְה אָנְיּי אָנְיּי אָנְיּי אָנְיּי אָנְיּי אָי אָנְיּי אָנְיִי אָנְיּי אָנְיִי אָנְיּי אָנְיִי אָנְיִי אָנְיִי אָנְיּי אָנְיִי אָנְיִי אָנְיּי אָנְיי אָיִי אָי אָיִי אָי אָיִי אָי אָנְיּי אָי אָנְיי אָנְיי

[†] Thus we are not compelled to make exceptions of these instances, as has been done by Prof. Gesenius, who has given in his Lexicon the plur. בְּקְמֹוֹת as an irregularity for מְּקְלֵּוֹת, and in the latest edition the word מַקְלּוֹת, although Daghesh is not found in any of the examples quoted by him.

rejected, the short vowel () can remain unchanged only by placing a Daghesh in ג , whence arises the form בָּיבָּי ; but should this ג receive Sh'wa, so that it can be read in the same syllable with the preceding (), Daghesh may be either inscribed in it or omitted; thus the third pers. masc. plur. of the future of this verb is written either בְּיבָּי or בְּיבָּי. On this principle may be explained the other instances given above, such as the Pi'hel form of verbs, conversive, the definite article and the prep. ב; in short, whenever a letter which would otherwise receive Daghesh is accompanied by Sh'wa, this Daghesh, being no longer absolutely necessary, may be omitted.

b. This fact of the real origin and use of Daghesh is shown likewise by the change which takes place in a vowel preceding a guttural letter in a situation to receive Daghesh; thus, instead of מַנְעִירָּה. Now it is not very evident in what manner the liquid consonant. can be compensated by the vowel (_); but there is no difficulty in conceiving that, on the elision of that consonant, the short vowel (_) was changed into the long vowel (_) in order to complete the syllable (§ 16. a.). And hence we have a general rule, that whenever

^{*} Some grammarians have indeed not scrupled to assert that there is such a thing as assimilation in a retrograde direction, forgetting that this would be running counter to the very principle on which assimilation takes place; and particularly they seem to have overlooked those cases in which the third pers. masc. pret. of verbs takes an epenthetic 2 before the pronominal suffix of the third pers. fem., thus הַבְּיֶּבְיָבְיְ for הַבְּיִבְבָּי, and where the third pers. fem. pret. takes the same suffix without an intervening 2, as הַבְּבָבְיָר for הָבִּבְּיָבְי, in which there is neither rejection nor assimilation backwards, but a mere shifting of the ultimate vowel to the preceding consonant.

a short vowel is followed by a letter with a vowel which cannot be reduplicated in pronunciation (see § 84. 3.), either the short vowel is lengthened, thus הַבְּבֶּה for יְבָרֵה for יְבָרֵה, or if it be allowed to remain, it takes Methegh (§ 85. 2.), e. g. הַחַיִּרם for הַהַּיִּרם. To this, we may remark, there are a few exceptions.

The producing cause of this latter phenomenon appears to exist in the genius of the Hebrew language, which inclines to terminate all its words in a mixed syllable. The consequence is, that a word ending in a simple syllable will have a tendency to combine with the word which follows, and form a mixed syllable with its initial consonant, whenever the two are in intimate connection with each other; and this is more especially the case when the initial letter of the second word is either a liquid or dental, both of which classes of letters are reduplicated with facility, because in uttering them the passage for the air is not entirely closed as is the case with the harder consonants, b, p, k, &c.

DAGHESH LENE.

§ 36. This Daghesh differs altogether in its power and application from the preceding, it being employed for the purpose merely of removing in particular cases the aspiration of certain consonants. Consequently it can be placed in those letters only which have originally an aspirate sound, and they (as stated in § 3 on the powers of letters) are the following six, viz. 2, 3, 7, 5, and 7, which have

been united, for the sake of recollecting them more easily, into the technical expression $\exists x$. The original pronunciation of $\exists x$ is bh, bc, bc,

§ 37. This question is reduced within very narrow limits when we reflect that the power of Daghesh forte is to reduplicate the consonant bearing it; for, since these letters cannot be pronounced double at the beginning or end of a word, of course one so situated never receives the sign of reduplication: and accordingly when we find a point inscribed in the bosom of an initial בגר כפר letter or in a final one without a vowel, we are confident that it can be no other than Daghesh lene. Hence a doubt on this head can arise only when one of these letters so pointed is found in the middle of a word. And to remove such doubt we have the simple rule, that when this point inscribed in a medial consonant is immediately preceded by a vowel, it is Daghesh forte, and the letter containing it is to be deprived of its aspiration, and reduplicated; and when not so preceded, it is Daghesh lene, and the letter is simply to be deprived of its aspiration.

INSERTION OF DAGHESH LENE.

§ 38. When these letters are to be uttered with, and when without the aspiration, is a mere matter of euphony. In order, therefore, to decide when Daghesh lene is to be inserted, we have first to ascertain what constitutes euphony in this particular respect. We find, accordingly, on examination, that, simply as regards itself, a hard, distinct, unaspirate sound is more easy of production than one which is soft, obscure, and aspirate; the former being articulated by a mere separating or pressing together of the organs, while the movements required to produce the latter are much more complicated: thus, for instance, the letter b is pronounced by a simple and complete opening or closing of the lips, while in order to utter the sound bh = v, it is necessary to draw back the under lip to a line with the teeth, against which it is to be pressed, but not so as to entirely hinder the passage of the air: the same observations apply to p, ph; k, kh; t, th, &c., the aspirate form

in every case requiring a greater effort for its production. That this, however, is the original and normal sound of these consonants, is obvious from the fact that the aspirate pronunciation is that which is denoted in the simplest manner, viz. by the character alone, while the unaspirate sound is signified by the addition of a diacritical point; but as the Hebrews did not uniformly retain the aspiration, it follows that they must in certain circumstances have found it more than commonly difficult of utterance. If then we can ascertain in what cases the aspirates are most difficult of production, we can thence deduce rules for the insertion of Daghesh lene. Now it is certain that in passing from a state of absolute repose, or immediately after a short pause in discourse, the pronunciation of an aspirate is less easy than when the organs by the utterance of a vowel-sound are placed in a situation more favourable to its enunciation.

§ 39. From the above general remarks may be drawn the following rules for denoting a removal of the aspiration of these letters by the insertion of Daghesh lene:

1st. Daghesh is to be inscribed in a בגד כפת letter when commencing a sentence, a verse, or one of the clauses of a verse, e. g. בְּרֵאשִׁית Gen. 1:1.. בָּרֵאשִׁית Gen. 3:5, 19., בְּרֵוֹל עֲוֹנִי הַ Gen. 4:13.

2d. When beginning a word in the middle of a verse, immediately preceded by a mixed syllable, e. g. בְּרָאשִׁר בְּרָא Gen. 1: 1., רְישִׁר בָּיל טוֹב על־פְּיֵל עָל־יִּבְּיל עָלִיהִים תַּבְשֵׁא הַאָּרֶץ הָשֹׁר עַלְהִים תַּבְשָׁא עָר. 11.

3d. When beginning a word preceded by a simple syllable, whether terminating in a long vowel or in a quiescent אה"ר letter, which is accompanied by a disjunctive (§ 47. 1.) accent, e. g. בצלמנה כדמה הווה Gen. 1: 26, 27. 2: 3. 3: 21., דעההו פּן 3: 22. 4: 7. But when a final , instead of quiescing in the ultimate vowel, forms with it a diphthong, this is considered a mixed syllable (§ 14), and a following letter will consequently take Daghesh by Rule 2d, though the accent on the first word be not disjunctive, e. g. יְהַוֶּרָ בֵּרנוֹ Josh. 8: 11., והור כַּל Is. 55: 1.; and so also after the word יְהוֹה, read אֶרֹנֶר (§ 71), e. g. בכך כפת Ps. 18: 21. An initial בכך כפת letter preceded by a word ending in 77 pointed with Mappik comes under the same rule, and for the same reason (see § 44), e. g. בַּעַרָה הַשִּים Gen. 6 : 16 -, אֹתה חקה 1 Sam. 21:10. So likewise does one which follows a word ending in & preceded by a vowelless consonant; for then the & is termed otiant, and is entirely neglected in the pronunciation of the word, which in effect terminates with the preceding consonant, e. g. רַבָּרָא בֹּלְעָם Num. 24:1.

§ 40. We have said that the rules above given for the insertion or omission of Daghesh lene in initial letters are readily deducible from the facts enumerated in the remarks which precede them (§ 38). We will explain. The first rule, which relates to a בגד כפה letter commencing a sentence, naturally ensues from the observations relative to quitting the state of silence. As a consonant at the end of a syllable is articulated by a closing of the organs, the second rule comes under the same observations. A disjunctive accent separates more or less the word bearing it from that by which it is followed; so that the cases affected by rule third are those in which a pause in speaking With regard to the fourth, it will be at once perceived that there can be little or no difficulty in passing directly from the utterance of a vocal to that of an aspirate sound, which bears to it so near a relation, and hence no inducement to vary the pronunciation of the letter. When a final vowel is one which has arisen in consequence of an affixed paragogic 77, and which is always unaccented (§ 54. 3.), it appears somehow not to have been taken into account; whence a word so terminated is considered, with respect to a succeeding letter, as ending in its ordinary manner, viz. in a final consonant. The few exceptions to be met with in the case of two of these letters beginning a word, seem to have arisen from the difficulty of pronouncing two aspirates in succession.

\$\\ \sqrt{11}\$. The same rules apply to במד כפר letters occurring in the middle of a word. Thus, when one of them follows a consonant accompanied by Sh'wa quiescent, or in other words a mixed syllable, it loses its aspiration, as when commencing a word preceded in the same manner, e. g. מֵלְכֵּר , תֶלְבֶּר , תֶלְבָר , תַלְבָּר , בּא As this rule is analogous to Rule 2d, so it has its origin in the same producing cause. But in the case of two words in what is termed the state of construction, sufficient time is not allowed for completely closing the vocal orifice, and thereby cutting off the penultimate syllable of the first; from

which has arisen the apparent anomaly, that when the last syllable of a word in the construct state begins with a בגד כפת letter, this is allowed to retain its aspiration, e. g. מַלְכֵר, מֵלְכֵר, מֵלְכֵר, so too the infinitives of verbs, when as verbal nouns they occur in this state, e. g. בכהב from בנפל , כתב from בכהב ; and likewise imperatives, whose peculiar quickness of utterance causes them closely to resemble nouns in construction, e. g. עבדר, כתבר Frequently too the aspiration is retained when one of these letters following a Sh'wa quiescent is accompanied by a vowel which is formed from Sh'wa, and is consequently too short to give time for closing the organs completely, e. g. בבדה Gen. 2:15. for עברה, עברה Gen. 18:26. for בסרם. In all other cases the letter takes Daghesh lene, whenever the consonant preceding it has Sh'wa quiescent, thus כנפר, מלכו , כנפר, except the word , which on receiving a suffix irregularly omits Daghesh, as בַּלְדָּים. Another apparent exception to this rule exists in some verbal forms, as for instance the word יעזבר (of the form יכולר); but the Sh'wa is in reality mobile, the vowel under being a Pattahh furtive, which is to be pronounced before the guttural to which it is attached, thus yardhz'bhú (§ 23): consequently this and all similar cases come under the rule following.

§ 42. When a בכל לפר letter is preceded either by Sh'wa mobile or a long vowel, it retains its aspiration. And these cases are so analogous that one might have been predicated from a knowledge of the other; for when a consonant begins a syllable, the organs, which were before at rest, must be put in motion in order to express it, and hence the succeeding letter finds them in nearly the same position as when engaged in giving utterance to a vowel-sound, which, as we have already shown (§ 38), is easily followed by an aspirate: e. g. לְבֵרת, בְּלֶבֶה, בְּלֶבֶה, בִּלֶבֶה.

MAPPIK AND RAPHE.

§ 41. Mappik (מפּיק producing, Aph. part. of Chald. בפּק to go forth) is a point placed in one of the letters ה"ר at the end of a word, to show that they do not quiesce in the preceding vowel, but form with it a mixed syllable. This mark is employed in modern editions of the Bible only in the letter 7 when occurring at the end of a noun as the suffix of the third pers. fem. sing., in order to distinguish it from 77 characteristic fem., ה local, &c., e. g. בַּצַרָה instead of אַרְצָה, בָּצַרָה, for ארצה; in some verbs לה, as כנה, נבה, where ה is not quiescent; and in the word ה. For as ק and invariably quiesce in their homogeneous vowels, viz. \neg in o and u, and \neg in i and e, and never in any others, the insertion of Mappik in these last has been considered superfluous; thus ידר, אליר, קטלתיר, אריר, &c., where there is no need of any sign to show that the final weak letter is to be pronounced; but this is not the case with 77, which, as it may quiesce in any vowel, requires a diacritical mark to designate the retention of its consonantal power, when it may even be preceded by a short vowel, as in the instances נגה, גבה, given above.

§ 45. Rāphé (בְּבֶּה weak), a horizontal stroke formerly placed over a בְּבֶּר כַּבְּּת letter or final ה, to indicate the absence of Daghesh lene or Mappik, and to show that the letter over which it was placed retained its original aspirate sound, or quiesced in the preceding vowel. Its introduction was probably owing to the carelessness of copyists, and was designed to remind them of the fact that in certain instances where Daghesh lene or Mappik would be inserted by general rule, it was to be omitted. But in our modern printed editions of the Bible, where greater accuracy is observed, this sign, with one or two exceptions, is used only to show the absence of Mappik in a final pronominal ¬ (see § 594. 2.).*

^{*} The twofold pronunciation of the "a letters was not peculiar to the Hebrews alone: thus the Syrians placed above them a red dot when losing the aspiration; this they called Kushoi (hardness): and when the aspiration was retained, it was signified by a similar dot, called Rukokh (hos) softness), placed beneath. They appear also to have been guided in their pronunciation of these letters by the same rules of euphony as the Hebrews; since, according to Ludovicus de Dieu, the former hardened a saletter, and placed the Kushoi over it, in very nearly the same situations as those in which the latter employed Daghesh lene, viz.: 1st. On the first letter of a word preceded by a consonant without a vowel, with the exception of the word consonant which is always closely connected

§ 46. As an exercise in reading, we here give the opening verses of the book of Genesis, with the pronunciation in Roman characters, according to the system we have adopted, placed underneath.

READING EXERCISE.

CHAPTER V.

ACCENTS.

§ 47. The Accents, it can now scarcely be doubted, were introduced into the system of Hebrew orthography for the purpose of showing the relation existing between one word and another, and between one sentence and another; that is, they were analogous in their use and purport to the marks of punctuation employed by Occidentals (in which sense they are called מַנְיִבְּיִבְּיִבְּיִ tastes). Moreover, they exert an incidental influence in elevating the tone of the syllable on which they are placed; and from this the transition was easy to their employment as signs to direct the cantillation of the Scriptures (whence their name music-notes).* With respect to their first and principal use, viz.

^{*} There has existed a great difference of opinion among writers on Hebrew grammar respecting the time when, and the purpose for which, the accents were invented. Thus Buxtorf, Bohl, and Wasmuth hold with the Rabbinical writers on this subject, that they are either coëval with the Sacred Writings themselves, or at least date as far back as the time of Ezra; these authors maintain also that the original design of the accents was to serve as music-notes for directing the cantillation of the Scriptures, which was then as now practised in the Synagogues, in like manner as the Mohammedans chant their Koran, and some denominations of Christians portions of the church service; and that they were not employed till a later period as a system of punctuation. Some modern grammarians however are inclined to think that these signs are of more recent invention, and were intended from the first to point out the degree of connection or disunion existing between the different members of a sentence. Although arguments against this opinion have been drawn from the number of the accents. and from two of them being sometimes found in one word, we do not hesitate to express our entire conviction of its correctness in the main. We consider that, as the vowel-system was intended to remove all difficulty respecting the signification of individual words, so the design of the accents was to show their mutual dependence upon one another. As regards the cantillation, it now is, and always must have been, looked upon as a matter of far inferior importance; and this is proved moreover by the fact, that the German and Polish Jews chant the accents in a mode entirely different from that adopted by the Portuguese. Hence it is by no means reasonable to suppose, that the punctators of the Sacred text could have been so minutely particular in their directions on this latter head, and at the same time have neglected guarding against errors of interpretation. We do not however conclude from this, that the accents were invented at one time, and in the number and variety in which we at present

that of pointing out the relations existing between words and sentences, the accents are of considerable importance for the correct understanding of the text; and of this alone, omitting all consideration of their secondary use, which has no connection with the grammar of the language, we will now proceed to speak. In this point of view, then, they have two powers—a separating and a connecting one—and hence their division into two principal classes, consisting of,

- 1. Disjunctive Accents (טַלְמִים מַפְּסִיקִים), or those placed over or under a word, to show that it is to be separated from the one following; and,
- 2. Conjunctive Accents (מַלְמִים מְתַּדְּבָּרִים), employed for the contrary purpose, of denoting that the words that bear them are connected in meaning with those which follow, and are to be read accordingly.
- § 48. The conjunctive accents are all equal among themselves as regards their power of connection; and as one or the other of them invariably precedes and in a manner waits upon a disjunctive accent, they received from the old grammarians the common name of מְּבֶּרְתָּה Ervants, Attendants. But since one sentence, or member of a sentence, is separated from what follows in a greater or less degree than another, the signs exhibiting this separation differ considerably in their disjunctive power. In contradistinction to the preceding, as well as from their office of governing the sense of passages by pointing out what words are to be construed together, they are termed שוֹלְילֵים Rulers; these have been subdivided according to their relative strength into four classes, viz. 1. בּוֹלֶילִים Emperors; 2. בּוֹלֶילִים Princes; 4. בּוֹלְילִים Officers.

possess them. Our opinion is, that only the principal disjunctives and conjunctives were at first employed; and that additions were made to them from time to time, as a greater degree of exactness came to be considered desirable. These marks were naturally placed on the chief or tone-syllable of the words to which they belonged, and hence doubtless arose their use in directing the recitativo or cantillation, which consists in the proper elevating and depressing of the tones of the voice. This secondary use of the accents came in process of time to be regarded as one of their proper offices; and accordingly, to prevent monotony by the too frequent recurrence of the same notes, additional accents were created, both disjunctive and conjunctive, with the same powers with regard to punctuation as those already in existence, but differing in their quality of musicnotes. As, according to our views, they were not all invented at the same time, or to serve a single purpose, it is by no means surprising that grammarians have never been able to reduce the accents to one uniform system. Our ideas on this head will be more fully developed when we come to speak particularly of their use and consecution. (See Book IV. Chap. II.).

§ 49. The following are the names and figures of the DISJUNCTIVE Accents, or Rulers, arranged according to their titles.

CLASS I. Emperors. These indicate the greatest degree of separation beetween the word to which they are attached and that which follows. There are but two of them.

a. Cillúk	(,)	ספרק:
*b. 'Athnáhh	(.)	אַתְנָח

CLASS II. Kings, next in separating power to the above. They are four in number.

a.	Ç'ghōltá	(סְגֹלְתָּא	postp.
b.	Zāképh Kātón	(')	تظلا ظمبار	
c.	Zāķéph Gādhól	(")	זַקַת בָּדוֹל	
*d.	T iphhhá	(,)	೫೭ಕೆದ	

CLASS III. Princes, denoting a still less degree of separation. Of these there are six.

*a.	R'bhīah	()	רָבִיעַ
b.	Zarká	()	זַרְקָאׁ postp.
*c.	Shalshéleth	(')	שַׁלשָּׁלֶת
d.	Pashtá	(,)	क्षेप्रंच postp.
е.	\mathbf{Y} 'th $\mathbf{\bar{i}}$ bh	(,)	יַתִּיב prep.
*f.	T'bhī r	(,)	• كَاجَرُد

CLASS IV. Officers, whose disjunctive power is the weakest of all. They are six in number.

a.	Pāzér	([])	פַֿזָר	
b.	Karné Phārá	(ຶ)	קַרְנֵי פָּרָ״ה	
c.	T'līshá Gh'dōlá	()	הְלִישָׁא ג'דוֹלָה	prep.
d.	Géresh	(['])	ڋڔ؈	
e.	Gērsháyim	(")	בֵּרְשַׁ <i>וֹ</i> יִם	
*f.	P'cīķ	(1)	פְּסִיק וּ	

^{*} Cilluk occurs only on the tone-syllable of the last word in a verse, and is always followed at the end of the word by the double point (:), called Çoph Paçúk (פְּסַבְּּקָ). It is thus distinguished by its position from a mark called Methegh (§ 62), which has the same figure, but is never found under a tone-syllable.

§ 50. The Conjunctive Accents, or Servants, are the following eight.

*a.	Mūnáhh	(מרנֶח	
*b.	Mahpákh	(,)	מַרְפַּוּ	
*c.	Kadhmá	(,)	קַלָמָא	
d.	Dargá ,	(,)	דַרְגָא	
e.	T'līshá K'tanná	(*)	הַלִּישָׁא קְטַנָּה	postp.
*f.	Mar'khá	(,)	בַּרְכָאָ	
g.	Mar'khá Kh'phūlá	()	בַּרְכָא כְפּרּלָה	
h.	Yérahh ben Yōmó	(,)	רֶרַת בֶּן־יוֹכֶּיוֹ	

§51. In looking over the accents, it will be perceived that there are some which, though differing in name and office, are precisely alike in figure. They are to be distinguished from each other by their position, thus:

Pashta and Kadhma have the same form; but the first, which is one of the Princes, is always placed on the last letter of a word, e. g. קלֹוֹן Gen. 26:13.; in consequence of which, whenever it falls on a word whose penultimate has the tone, it becomes necessary to intimate this by means of an additional accent: whence it often happens that a word has two Pashtas, the first to point out the tone-syllable, and the latter the degree of separation between that and the following word, e. g. אַרֶּיֹן Sen. 1:2., אַרֶּיֹן 8:1, 13., אַרֶּיִן Deut. 32:22. Kadhma, on the contrary, is found only on a medial letter: e. g. אַרֶּיִן Josh. 7:7.

Y'thibh and Mahpakh likewise differ only in position: thus, Y'thibh

^{*} The names of the accents are entirely of Chaldaic origin. They appear to have been given to some on account of their power, and to others on that of their figure. They are as follows. DISJUNCTIVES: Cilluk, end, pause; Athnahh, rest; C'gholta, cluster of grapes; Zakeph, greater and less, suspender; Tiphhha, palm of the hand; R'bhioh, resting; Zarka, division; Pashta, expanding (scil. the voice); T'bhir, interruption; Y'thibh, sitting; Shalsheleth, chain; Pazer, disperser; Karne Phara, a heifer's horns; T'lisha Gh'dhola, great shield; Geresh, expulsion (when preceded by Kadhma, it is called Azla Nois); Gershayim, double Geresh; P'cik, stopped. Conjunctives: Munahh, right-placed (scil. trumpet, in full property); Mahpakh, inverted (scil. trumpet); Kadhma, beginning; Darga, proceeding: T'lisha K'tanna, small shield; Markha, prolonging (for paga, proceeding: T'lisha K'tanna, small shield; Markha, prolonging (for paga, proceeding: T'lisha K'tanna, small shield; Markha, prolonging (for paga, proceeding: T'lisha K'tanna, small shield; Markha, prolonging (for paga, proceeding: T'lisha K'tanna, small shield; Markha, prolonging (for paga, proceeding: T'lisha K'tanna, small shield; Markha, prolonging (for paga, proceeding: T'lisha K'tanna, small shield; Markha, prolonging (for paga, proceeding: T'lisha K'tanna, small shield;

is constantly found under the right edge of an initial letter, e. g. בַּשֶּׁב Gen. 1:11.; while Mahpakh is always placed under the first letter of the tone-syllable, e. g. מַּקְבָּוֹר . יוֹם בַּאָרוֹר . 16.

The other accents which like Pashta are placed on the final letter of a word, and thence receive the name of *Postpositives*, are C'gholta, Zarka, and T'lisha K'tanna. And in addition to Y'thibh, there is one other which accompanies none but an initial letter, viz. T'lisha Gh'dhola. These are called *Prepositives*.

\$52. The above include all the accents found in the prose portion of the Bible. Those marked with an asterisk occur also in what are called the Metrical Books, viz. Job (אַרּוֹב), Proverbs (מְשִּׁלִּרם), and Psalms (מְשִּׁלִּרם), whose initials form the technical word מַבְּבֶּרם). Of the accents thus pointed out, the two prosaic disjunctives, Shalsheleth and Tiphhha, are in poetry conjunctive; though the latter is sometimes disjunctive in poetry also, e. g. מַבְּבֶּקְשֵׁרְ בָּדָב Ps. 4:3. Compare Job 8:12., 9:14., where the K'ri and K'thibh are opposed to each other in this respect.

The accents found in the Metrical Books alone, and thence called *Poetical Accents*, are six in number. They comprise, like the *Prosaic*, both Disjunctives and Conjunctives, the former of different degrees of strength, according to which we shall arrange them, beginning with the strongest.

Disjunctives.

a.	Mar'khá with Mahpákh	$(\hat{\ })$	מַרְכָא מַׁרְפַּּוּ	prep.
b.	R'bhīa'h with Géresh	(``)	רָבִיעַ בֶּּׁרָשׁׁ	
c.	Tiphhhá initial	(,)	מׄפַּׁדָא	prep.

Conjunctives.

a.	Mar'khá with Zarká	(,)	מַרְכָּא זַּרְקָאָ
b.	Mahpákh with Zarká	(, ")	מַהְפַּה זַּרְקָאָ
с.	Mūnáhh superior	()	מרכַּדו

POSITION OF THE ACCENTS.

§ 53. In Hebrew, as in Greek, every word, monosyllables included, receives an accent, and this is usually placed on that syllable which

is elevated above the general tone of discourse, except when two or more words are connected together by Makkeph (see § 70); in which case, being considered as forming a single word, they take but one accent between them. Now as no Hebrew word has in its simplest or radical form more than three consonants,* making but two syllables, the accent can be placed only either on the ultimate or penultimate. When accented on the ultimate syllable, the word is termed Milrah (מַלְבֶּעָרֶל from below), and when on the penult, Milhel (מַלְבֶּעָרֶל from above); and even when the word is lengthened, the chief accent can never be placed further back than the penult. When, as occasionally happens, an accent appears on the antepenult, it is only a secondary one, supplying the place of Methegh see (§ 68).

- \S 54. The following letters and syllables can in no case receive an accent:
- 1. A letter accompanied by (;); because this does not constitute a syllable, except when taking a pause-accent, which changes the Sh'wa into a vowel, e. g. קבָבָק for קבָבַק.
- 2. A consonant enunciated by means of one of the extremely short vowels which has arisen from Sh'wa; as such a syllable is too brief to allow of its being made the prominent one.
- 3. A syllable consisting of π paragogic or π local and its vowel of union; which as regards the accent are not considered as forming an integral part of the word.

General Rules of Position.

- $\S\,55.$ The following will serve as general rules for the position of the accent:
- 1. A long vowel, when, contrary to its nature (§ 16. a.), it makes a mixed syllable, must take an accent, to increase its quantity; and it is by means of this addition that the final consonant of the syllable is pronounced: for example, in the word b, the b is expressed by the help of its own vowel Hholem, and b by means of the addition made to the same vowel in consequence of its taking the accent, which may be represented thus— $k\bar{o}$ °l. Hence arises the rule, that an accent enables a long vowel to make a mixed syllable.
 - 2. A short vowel, when, contrary to its nature (§ 16. a.), it makes a

^{*} A very small number of quadriliterals excepted.

- simple syllable, must be accompanied by an accent; by which its quantity is increased, and made equivalent to that of a long one; thus in the word מֵלֶלְּהְ mélekh, the first syllable takes the accent. Whence the rule, that an accent enables a short vowel to make a simple syllable.
- 3. In Hebrew, as in other languages, a *long* vowel always has the preference over a *short* one in receiving the accent; except when, as in the instance just given, it is absolutely necessary that the latter should take it, in order to form a simple syllable.
- 4. Cæteris paribus, an accent will be placed on the ultimate syllable rather than on the penult.

Position on Nouns.

- 2. Every noun whose ultimate is a short mixed syllable, preceded either by a long vowel or by a short simple syllable, is Mil'hel, i. e. has the accent on the penult, e. g. אָרָה Gen. 1: 2., בְּשֵׁרֵ v. 12., בּשְׁרֵב v. 1., עֵּרֶב v. 5.; for if the penult be a long vowel, it has, according to § 55. 3., the preference in taking the accent; and if it be a short one not succeeded by a vowelless consonant, it must have the accent, as otherwise it could not make a simple syllable (§ 16. a.). In the case, however, of an ultimate short vowel taking the place of a long one, as for instance the termination of the fem. construct, the accent retains its former position on that syllable, e. g. הַהָּה, constr. הַרֶּה Gen. 2: 19., הַרֶּה, constr. בְּתָּה הַלָּה הַלָּה בּלָּה הַלְּה בּלָּה הַלְּה בּלָּה הַלְּה בּלָּה הַלְּה בּלָּה הַלְּה בּלָּה בּלָּה הַלְּה בּלָּה בּלָּה בּלָּה בּלָּה בּלָּה בּלָּה בּלְּה בּלְה בּלְּה בּלְה בּל בּלְה בּלְה בּל בּלְה בּ

And if the penult and the ultimate be both short mixed syllables, the accent is placed on the latter by the rule § 55. 4., e. g. $\pm \zeta_{zz}$, 2 Kings 6:5., ξ_{zz} , 10:15.

3. Since all vowels are considered long in which one of the אהרר letters quiesces (§ 14), the masc. term ק likewise takes the accent by the rule § 54. 4., e. g. ק Gen. 2:5., המקנה 4:20.; unless the consonant bearing (ֶ) be immediately preceded by a short vowel, when, according to the rule § 55:2., the accent must be placed on the penult, e. g. קער Ezek. 2:10. Of course the rule applies also to א , e. g. אשק Gen. 1:11.

Participles are considered as verbal nouns, and are accordingly subjected to the foregoing rules.

Position on Verbs.

- § 57. The place of the accent on the verb, when without a suffix, is to be decided as follows:
- 1. Every verb whose root consists of three perfect consonants, will take the accent on the second, in all the persons of the preterite, future, and imperative, and in both states of the infinitive, viz. absolute and construct, whenever such radical has a vowel of its own, as this vowel is the principal one of the root (see § 113): e. g. אַטְלָּה, אַכָּיל, הַּקְטֵל , פֿרָנ , הַקְטֵל , פֿרָנ , הַקְטֵל , פֿרָנ , הַקְטֵל , the accent is placed on the third, e. g. אָטְלֵּר, הַּקְטֵלֵר, הַּקְטֵלֶר, הַּבְּעָלֶר, הַּבְּעָלֶר, הַּבְּעָלֶר, הַּבְּעָלֶר, הַּבְּעָלֶר, הַּבְּעָלֶר, הַּבְּעָלֶר, הַּבְּעָלֶר, הַּבְּעַלְר, הַּבְּעַלֶר, הַּבְּעַלְר, הַּבְּעַלֶר, הַבְּעַלְר, הַּבְּעַלֶר, הַבְּעַלֶר, הַּבְּעַלְר, הַבְּעַלֶר, הַבְּעַלְר, הַבְּעַלֶר, הַבְּעַלְר, הַבְּעַלֶר, הַבְּעַלֶר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלֶר, הַבְּעַלְר, הַבְּעַלֶר, הַבְּעַלֶר, הַבְּעַלֶר, הַבְּעַלֶר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלֶר, הַבְעַלֶר, הַבְּעַלֶר, הַבְּעַלֶר, הַבְּעַלֶר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלֶר, הַבְּעַלֶר, הַבְּעַלְר, הַבּערּר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלְר, הַבְּעַלְר, הַבּער, הַבְּעַר, הַבְּער הַבּער הַבּער הַבּער הַבְּער הַבּער הַבְּער הְבּער הַבְּער הְבִּער הַבְּער הְבִּבּער הַבְּער הְבְער הְבְּבְּער הְבְּבְּר הַבְּער הְבְּער הְבִּבְּר הְבְּבְּבְּער הְבְּבְּר הַבְּבְּר הַבְּבְּר הַבְּבְּר הַבְּבְּר הְבְּבְּבְר הַבְּבְּבְּר הַבְּבְּר הַבְּבְּבְּר הַבְּבְּר הַבְּבְּר הַבְּבְּר הְבִּבְּבְּר הְבְּבְר הְבְּבְּבְּר הְבְּבְּבְּר הְבְּבְּר הְבְּבְּבְּבְּר הְבְּבְּבְיבְּרְבְּבְּבְּר הְבְּבְּר הְבְּבְּבְּבְּבְּבְּבְּבְּר הַבּב הַבְּבְּבְּבְּר הְבְּבְיר הְבְּבְּבְיּב הְבְּבְּר הְבְּבְּבְּר הְבְב
- 2. In the following cases, however, the accent is on the ultimate syllable, although the second radical has a vowel: viz. in the sec. pers. plur. masc. and fem. pret., e. g. מַבְּלְהַן, ; and in the first and sec. pers. masc. sing. pret. when taking ז conversive, to distinguish it from the same person and tense with ז conjunctive, e. g.
- 3. Verbs אָשׁ and אַשׁ, in those persons of the preterite where the third radical has () after the rejection of the second, take the accent on the first, e. g. אָבֶּף, אַבָּף; but in those where the third radical receives an epenthetic vowel, it also takes the accent, which, were it suffered to remain on the first, would be carried back, against the rule § 53, to the antepenult, e. g. אָבָּף.
- 4. The persons of the future tense which when standing alone have the accent on the ultimate, will generally shift it to the penult, if a

simple syllable, on receiving ז conversive: thus, in Pi'hel of verbs שָּ gutt., as מַדְּי ; יִהְבֶּרֶךְ ; in Kal of verbs מַבּ, as פֵּד ; דַּיָבֶּרֶךְ ; and הוֹד, as דַיְבֶּבֶּרְ . But when the penult is a mixed syllable, the accent remains on the ultimate, e. g. דְּבָּבֶּרָ הוֹדְּבָּרָ שִׁי .

Position on Nouns and Verbs with Suffixes.

קָּטָלָּהָד, קָטָלָהַן, קָטָלָהַן, קְטָלָהָן Ps. 2 : 3.

3. When the suffix of the sec. pers. masc. sing. ק is preceded by (ָ), the word is accented Milra'h, e. g. קְבֶרְק; when preceded by a vowel, Mil'hel, e. g. אֵלֵיך, דָּבֶרֶיך.

Distinctive Use of Accents.

§ 59. Since we sometimes meet with words entirely alike in their letters and vowel-points, and differing only in the position of their accents, an acquaintance with the principles by which this position is regulated is not only useful, but is absolutely necessary to the perfect understanding of many passages of the Hebrew Scriptures. For it frequently so happens that the accentuation is the only means whereby we can determine with certainty whether a given word is a noun or a verb, and, if a verb, whether it is derived from this or that root, or belongs to this or that mode or tense; thus, for instance, in the following passage בִּל־הָעָם Sam. 30 : 6., as the word מָרָה is accented Milhel, it must be the third pers. fem. sing. pret. of the verb סָבֶב to be bitter, of the form סָבָב from סָבֶב (see § 57. 3.); while the accent on the last syllable of the same word in the phrase מרה 1 Kings 13: 26. shows it to be the third pers. masc. pret. of the לה verb מַרָה to be rebellious, like לָּה (§ 57. 1.). The word שַּׂבֶּתָה, which occurs Esth. 8:15., is shown by the accent on its penultimate (§ 57. 1.) to be the third pers. pret. fem. sing. of the verb שַּׁבֶּע to rejoice; but the accent on the ultimate—thus שֹׁמֵחָה Ps. 113 : 9.—

points it out by the rule § 56. 1. as the fem. part. of the same verb employed as a noun. So likewise אָבָה, אָבָה, אָבָה are preterites when the accent is Mil'hel, and participles when Milra'h. In the command קּבְּהִי אֲבִּרָה arise, shine, Is. 60: 1., the imperative is designated, according to § 57. 1., by the accent on the penult; but in the expression לִירְם קּבְּרָם לְּבָּרָם לְּבָּרָם לְּבָּרָם לְּבָּרָם לְּבָּרָם לֹבְּרָם לְּבָּרָם לֹבְּרָם לִּבְּרָם shows it, by § 58. 1., to be a noun with the pron. suffix -, &c. &c.

Retrocession of the Accent.

§ 60. On account of the difficulty of enunciating two tone-syllables in immediate succession, any two accents, whether placed on the same word, or on two different words in juxtaposition, require a vowel, or at least a Sh'wa mobile, between them. So that if of two concurrent words the accent of the first is on its last syllable, and that of the second on its first, the accent of the first word will be removed to the penult. This was called by the old grammarians קולה turned back.

- §61. To the above rule there are the following exceptions:
- 1. If the first accent is a disjunctive, it may remain on the ultimate, although immediately followed by another; as the words are somewhat separated by the pause, e. g. אַבְּד (Gen. 24: 52., דּוֹאָל קַת 2 Kings 5: 23.

- 2. If both accents are conjunctive, no change in the position of either takes place: for the situation of the words bearing them is somewhat analogous to that of words followed by Makkeph (see § 70); i. e. as in the latter case the accent entirely disappears, so in the former it loses so much of its force as no longer to cause offence to the ear, or difficulty in the enunciation, when two of them occur together, e. g. בַּבָּה Lev. 4:31.
- 3. If a dissyllable accented Milra'h is immediately preceded by an accent, it will not be altered to Mil'hel even though another accent should directly follow; for the object of such change from the normal position would remain unaccomplished, as two accented syllables would still concur, e. g. איל שׁנָא הַדְּאוֹ Deut. 19:6.
- 4. An ultimate syllable having a long vowel followed by a perfect consonant, must necessarily receive an accent (§ 55. 1.), which consequently retains its position, although immediately followed by another accent, e. g. לוֹבֵל הֹרֹא Lev. 25: 12.
- 5. Words taking the grave suffixes בָּ, וְבֶּם, כֶּלְ, נֶבֶּם (§ 58. 1.)., and the sec. pers. plur. of the pret. of verbs ending in מֶלְ and זְהֶּ (§ 57. 2.), invariably retain the accent on the ultimate.
- 6. When the penultimate is a short mixed syllable, the accent is not thrown back, as such a syllable avoids the reception of an accent, e. g. רְנָסָיֵח לֵר Lev. 5: 13., רַבְּכָּה אִרשׁת 2 Kings 3: 23.

METHEGH.

§ 62. Methegh (독고 bridle) is a short perpendicular stroke under a letter; and is used, as its name imports, to restrain the vowel after which it is placed from hastening forwards to be absorbed in the following consonant. The accents are employed to show the relation between different words, while Methegh exercises an influence on the syllabication alone, which it does in a twofold manner: 1st, absolutely, or on the syllable which it accompanies, without reference to any other; and, 2d, relatively, or on that syllable with respect also to the rest of the word. Of these uses we shall speak separately.

I. Absolute Use of Methegh.

§ 63. 1. This mark, when affixed to a short vowel, prevents its going over to the following consonant, while it also lengthens such vowel, and makes it equal in quantity to a long one. Thus,

a. A short vowel without an accent, whose nature requires it to make a mixed syllable (§ 16. a.), when followed by a letter with a vowel and without Daghesh, receives a Methegh, by which its tone is protracted to the length necessary to form a simple syllable, e. g. בַּרָת, הָדֶעִים, הְדֵעִים, הְדֵעִים, הְדֵעִים, הְדֵעִים,

b. A short vowel also takes Methegh when the following consonant is a guttural accompanied by compound Sh'wa, and consequently the

first letter of a new syllable, e. g. הַּעֲמֶד, בָּאֱמֶת, בָּאֲמֶת, בָּאֲמֶד, בַּאֲמֶד,

c. A Methegh is placed after a short vowel followed by a guttural with simple Sh'wa, which, on account of the difficulty experienced in the enunciation of that class of consonants, when accompanying one of them, is generally mobile (see §84. 2.), e. g. אַהְיֹה, לְהְיֹוֹת, לְהְיִה, בּוֹרָה.

d. A short vowel receives Methegh when followed by a Sh'wa retaining its original movable power, after the rejection of a Daghesh forte, whereby it is made to appear quiescent, e. g. קֹהַמְנַצִּחַ for קֹהַמְנַאַם,

נְיָהִי for נַיְהִי for נַיְהִי for נַיְהִי (see § 33. 1.).

e. When the first of two nouns connected by Makkeph ends in a mixed syllable containing a long vowel, such vowel, being deprived of the accent that enabled it to make a mixed syllable (§ 56. 1.), takes Methogh; e. g. מַלְרַהַבְּּגָן Gen. 2: 16., בַּרַרַאַל Gen. 28: 19., הַבֶּערַרַבָּגָן Ex. 3: 21.; and so if the first noun makes a simple syllable by a short vowel, as בַּאַבֶּיךְיבִוּרָב Ex. 2: 15.

f. The preformative יַ of the third pers. masc. plur. of the future of verbs בוֹּ takes Methegh on the rejection of the radical י, to show that the following Sh'wa remains mobile; e. g. רְשָׁיִר Prov. 4:15. for רְשָׁיִר, thus distinguished from יָשִׁי, thus distinguished from יָשִׁי, thus distinguished from יְשָׁי, without Methegh יַבְּרְאֵרְ Gen. 12:14. from רַבְּּרְאֵרָ

2. Methegh accompanies a long vowel which is followed by a vowelless letter in the middle of a word, in order to show that it makes a simple syllable, e. g. קוֹלְה k̄o-l'khá, קוֹלָה t̄e-l'khún; and especially the vowel Kamets, for the purpose of distinguishing it from Kamets Hhatuph: e. g. מְּבֶּלְה k̄a-t'lá, קְיֵלֶה s'khā-r'khá, קְבָּלָה m̄a-ts'ún.*

II. Relative Use of Methegh.

§ 64. This use of Methegh is grounded on that peculiarity of the Shemitish family of languages, by which every word, with but comparatively few exceptions, is capable of being reduced to a root consisting of three letters called radicals, making two syllables, thus קטל, אלה: so that originally the accent is neither preceded nor followed by more than a single syllable. And this was made a rule by the ancient grammarians, to be observed in the orthography of all words, whatever their length. Now, as the accent is never placed further back than the penult (§ 53), it can in no case be followed by more than one syllable; and in order to prevent its being preceded by more, they adopted the expedient of dividing polysyllables, as it were, into two or more smaller words by means of Methegh, each containing a syllable somewhat elevated in tone above the rest, and which is neither preceded nor followed by more than a single unaccented syllable. To effect this, the position of Methegh is of course to be regulated by that of the chief accent. Thus, when the accent is on the ultimate syllable, Methegh is placed on the second before it, or antepenult, e.g. העברים; and when on the penultimate, Methegh is removed a degree further back, viz. to the pre-antepenult, e. g. הוֹמוֹתֹרה. Should this Methegh be itself preceded by more than one syllable, a second is employed, e. g. מאותותיהם.

§ 65. From what precedes are to be deduced the following rules for the relative use of Methegh:

1. a. If a word consist of three syllables, with the accent on the last, the first of them will receive Methegh, e. g. הֹלְלְרֶדׁ Gen. 5: 4, 10., הֹלְלְרֶדׁ 6: 2, 3, 4., בְּלִרְבָּ Is. 33: 10, 15., בְּלֵּרֶבְ 2 Sam. 22: 35.; unless it be a short mixed syllable, which on account of its brevity (§ 61. 6.) is opposed to the introduction of an accent, e. g. בַּלְּרָבְּלֵּרְ Gen. 6: 13., יבּבְּבְּלֵּרְ v. 17, 19., בַּבַּרְרִם 2 Kings 4: 42., בַּבַּרְבָּלָ ib., בַּבַּרְבָּלְ 5: 10., בַּבַּרְבָּלָ 2 Sam. 15: 16. b. Should the accent of a trisyllabic word be on the penult, as this is preceded by only a single syllable, no Methegh will be required, e. g. בְּאֶרֶץ Gen. 6: 5., הַבֶּבֶשׁ Sam. 24: 10.

state, also, that the number of times which this Methegh occurs answers to the number denoted by the letters of its name (אָלֶדֶּא, viz. 84: but as this is not mentioned in the Masora, it is usually disregarded.

- 2. a. In a word of four syllables with the accent on the ultimate, when the first is a mixed and the second a simple syllable, the place of Methegh is on the antepenult, e. g. בַּבְּיבְרָהֶם Gen. 9:5., בַּבְּיבְרָהֶם Gen. 9:5., בַּבְּיבְרָהֶם Gen. 9:5. בַבְּיבְרָהֶם Gen. 9:5. בּבְּיבְרָהֶם Sen. 22:24., בַּבְּיבְרָהֶם v. 38.: since a simple syllable always takes Methegh in preference to a mixed one. If both the first and second are mixed syllables, Methegh will sometimes be omitted altogether, e. g. בַּבְּיבְרָהְם Gen. 19:11., בַּבְּיבְּרָהְם Sen. 21:17., בּבְּיבְּרָהְם Gen. 19:11., בּבְּיבְּרָהְם Sen. 21:17., בּבְּיבְּרָהָם Pen. 65:9.
- 3. A word of five syllables with the accent on the last will receive two Metheghs, e. g. מאַניוֹתְיהִם Ezek. 27: 29.
- \$ 66. These rules apply not only to single words, but likewise to two or more connected by Makkeph, which in this respect are considered as forming but one, e. g. הְמִרִיתִּבְּאָן 1 Kings 1: 19., אַבְּיִרְיִבְּאַלְּבָּע v. 20.
- § 67. As Methegh has two distinct uses, one regarding that syllable only on which it is placed, and the other the form of the entire word, we sometimes find on the same word two Metheghs, one of each kind, e. g. בַּבְּרַאָּבֶרְ Ex. 6:24., בַּבְּרִיבְּרָ Ex. 6:24.; in which case the first Methegh is employed for the purpose of restraining the vowel on which it is placed (§ 63. 1. b.), and the second on account of the accent (65. 1. a.).
- § 69. The observations here offered with respect to the twofold use of Methegh, and the rules thence arising for its position, a subject so unsettled and intricate as treated by the generality of grammarians, will be found amply sufficient to explain the phenomena of its occurrence. That this mark will sometimes be found wanting, where, ac-

cording to the rules here given, it ought to appear; and that, on the other hand, it will occasionally occur in a manner which these rules do not account for, is not sought to be denied; yet, if we take into account the obscurity in which this matter has hitherto been involved, we may reasonably conclude that such appearances are the effects of the ignorance or negligence of transcribers; for, with these comparatively trifling exceptions, every Methegh can be accounted for without the smallest difficulty.

MAKKEPH.

§ 70. 1. Makképh (קְּבֶּי joining) is a horizontal stroke placed between two words closely connected, either in signification or grammatical construction, e. g. חַרְהוֹ־אֵרֶץ beast of the field, אַשֶׁר־לַקּח which he took. The connective power of Makkeph is greater than that exerted by any of the conjunctive accents; so much so that two words which it joins together are considered as one, in consequence of which the first of them undergoes certain changes. 1. It loses its accent; thus, in the expression בנר רשוראל the children of Israel, Num. 15:26., the first of the two nouns, 522, has an accent, which it loses on being joined by Makkeph to the following one, e. g. בַּנְר־רְשֵׂרָאֵל v. 32; so רהר אור, יהר אור Gen. 1:3. 2. a. Its vowel immediately preceding Makkeph, when long and mutable, and making a mixed syllable, is changed into the corresponding short one, e. g. לל רַמָשׁ every reptile; here the word 55 stands by itself, and makes a mixed syllable by the aid of an accent; but when it is connected with the following by means of Makkeph, and loses its accent, Hholem becomes changed into the corresponding short vowel Kamets Hhatuph by § 16. a., e. g. בַּל־רָמָשׁ Gen. 1:25.; so רעזב איש , with Makkeph רעזב ארש Gen. 2:24. b. When a long vowel making a mixed syllable, and immediately preceding Makkeph, is immutable, it takes Methegh (§ 63. 1. e.), e. g. ברות־לונד Gen. 19: 36. Many words also retain a final (_), and take Methegh, when followed by Makkeph, e. g. הישם הכהר Gen. 2: 13., עץ־הגן v. 16. (see § 63. 1. e.).

sons, Gen. 7:13., or more closely to form a compound term, as אָבֵּר־בֹּקֶר Gopher-wood, ib. 6:14.; it also connects a verb with its object, as הַאַקּרַקְרַח she took meal, 1 Sam. 28:24.

2. Very often three words in succession are connected by Makkeph, as בְּלֵּירְמֵרִלּ מָבְלִיבְּלֶּיְמֵרְלֹּלְ Gen. 5:31., and sometimes, though rarely, four, as Gen. 25:5. Ex. 20:11.; in which cases the same rules apply to each of the words followed by Makkeph as to the first of two words thus connected.

K'RI AND K'THIBH.

§71. In the current editions of the Hebrew Bible, we meet with a number of notes in the margin containing directions as to the proper method of reading and writing many words, and concerning which the following brief remarks may suffice. In the course of the laborious revision of the biblical text undertaken by a celebrated body of Jewish critics, called Masorites (בעלי־המסורה the doctors of tradition), who lived in the beginning of the sixth century, a multitude of passages were found, which, according to received opinion, were in some respect defective; still the high degree of veneration in which these scholars held the sacred text prevented their rejecting readings, however faulty, in which the manuscripts concurred. They accordingly suffered all such passages to remain; but when they came to a word which seemed erroneously written, they left the text undisturbed, and placed the emendation in the margin, with the accompanying remark קרי וכתוב (Chald. part. pass.) read and written: thus in Job 13:15. the word written (i. e. occurring in the text) & is to be read לה. When a word was considered superfluous, they left it unpointed, and placed in the margin the observation כהיב נלא קרי written but not read, e. g. the word & 2 King 5: 18. And when, on the contrary, a word was thought wanting to complete the sense, the vowels alone were inserted in the text, and the word itself placed in the margin with the note קרי רלא כתיב read but not written, e. g. the word Jer. 31: 38. The number of these critical remarks varies in different editions: thus Elias Levita reckons them at 848, while Capel in the second edition printed at Venice found 1171. Among the K'ri and K'thibh may be reckoned the word יהוה, which, as the complete and most holy name of God (שֶׁם הַמְּפֹרָשׁ), was forbidden to be uttered by any except the high priest, and by him but once a year in the Holy of Holies. On all other occasions it was to be read אַרֹבָי Lord, and

hence the Masora (בְּסֵלְּהָה tradition) has given it the points of that word, thus יְהֹלָה except in those cases where יְהוֹה is immediately preceded or followed by the word אָלְּהָי, when, to avoid repetition, it was read אֱלֹהָים God, and pointed accordingly, thus אֱלֹהָים Hab. 3:19. Various other marks are to be found in the Bible, which in modern editions are generally explained either in the prolegomena or at the end.

CHAPTER VI.

CONSONANT CHANGES.

§ 72. Euphony, or that sensibility to harmony residing in the auricular organs, which seeks to soften and otherwise modify the harsh combinations of sound to which the regular inflecting of a language will occasionally give rise, has exerted its influence to no inconsiderable extent both on the consonants and vowels of the Hebrew tongue. We shall begin with the consonants, whose changes from this source may be classed under the several heads of commutation, transposition, rejection, and addition. Although unable to reduce to certain rules all the phenomena which had their origin in the peculiar ideas respecting euphony of a people so far removed from us both in space and time as the ancient Hebrews, we can still discover a certain degree of regularity in most of these changes, and this we will endeavour to exhibit.

I. COMMUTATION.

§ 73. This takes place as follows: 1, in letters of the same organ; 2, in letters of adjacent organs, as the gutturals and palatals, sibilants and linguals; 3, in the quiescents; 4, in the liquids.

1. Letters of the same organ.

a. Gutturals.

=ה: הְמִוֹן, אָמוֹן multitude; מֵּרְהָ, אֵרָה how? פָּאָה alas! פָּאָה to be humble, weak; לָאָה לָאָה to be weary; אַרְחַבֵּר 2 Chron. 20:35. for התחבר he joined himself.

 $\mathbf{z} = \mathbf{z}$: עָנַם , אָנַם to be sad ; אַרד to turn about ; אָנַם to defile ; בָּצֵל to abhor ; פּתאם suddenly, from moment.

 $\pi = \pi$: היָה to be, exist, חיָה to live.

Rarely are the weakest and strongest of the gutturals, א and ה, interchanged; yet we find related בָּשָׁר, בְּשַׁר, בְּשַׁר, מְשֵׁר ; also בְּשֵׁר, בְּשֵׁר, בְּשֵׁר, בְּשֵׁר to shut up.

b. Palatals.

The weak palatal י is rarely commuted with any of the other letters of its organ; yet we find יבי : כבי לשלי, דְשֵׁל to be right; שילי Syr. בי יב י old age; and also יבי ג בי , Eth. TWZ to instruct. We have once יבי יבי לשלי to grow old.

 $\lambda =$ ב: לְבַל to protect; נְבָל to collect; לְבַל to go about; לְבַל to shut up.

 $\lambda = \beta$: נַזַר, נַזַר to cut off.

> = > : בּבַע , פּבַע , אָבַן helmet ; הָכַן , אָבָן to be tender ; הָבַע , אָבַע , אַבַע , אַבַע to be straighten ; אַבַע , אַבַע , אַבַע be foremost, to behold ; אַבַע , אַבַע , אַבַע to be high ; אָיַרָע , אָיַרָע , אַיַע to interweave.

c. Linguals.

ד = ה: קלה, קלה to hang down.

' ב = : ד בי, Chald. דְבַה to slaughter.

 $\mathbf{u} = \mathbf{n}$: מָעָה, מָעָה, לְּמָעָה, הְחַתָּה, הְחַתָּה, to seize; פֿצֿעל, Arab. פֿצֿעל to kill.

d. Dentals.

ל = כ = ש : סור, דור to depart; בוס, בוס, בול to despise.

 $\mathbf{z} = \mathbf{z}:$ זָּהָב gold, אָהַב to shine like gold; זָּעָק , זָעַל to cry; נְּזַר to cut; זָּעָל to rejoice.

ט = צ: אַטר to shut up.

 $\mathbf{v} = \mathbf{v}$: שֹּבֶּל, סֶבֶל thicket; סָבַל, סָבָל to cover; שַּבַל to be wise; שָׁבַל to shudder; פָּעָם to cover; סַעַב anger.

שׁ = צ: פְּקָי, פְתָּיַ to laugh; סָפָּן, שָׁפָּן, שָׁבָּן to conceal.

e. Labials.

בּב בּב בּב בּב נּבְּ , בַּבְ, בָּבַ לּבְּרָ, נְבּ נִּר ; בּבַּרָ, נְבּ נִּר נִּבְּ לָּבָּ, Chald. בְּבָּרָ, Syr. בְּבָּ to split; בְּרָזֶל, Chald. בַּרְזֶל, Syr. בְּבָּ iron; בְּרָזֶל to break up, flee, חַבָּ to break out, blossom, בְּבָשׁ to break in pieces; בַּבָּ to subject, שַּבָּ to cover over.

 $\exists = \exists = \exists: үдр, үдр , үдр to compress; מְכְּהָב <math>fat$; מְכְהָב fat; מְכְהָם fat; מְכְהָם fat; מְכָהָם fat; מְכָהָם fat; מְכָהָם fat; מִכְהָם fat; מִכְהָם fat; מִכְהָם fat; אַכְּהָם fat; אָכָהָם fat; אַכְּהָם fat; אַכְּהָם fat; אָכָהָם fat; אָכָהָם fat; אָכָהָם fat; אָכָהָם fat; אָכָהָם fat; אָכָהָם fat; אַכְּהָם fat; אַכְּהָם fat; אָכָהָם fat; אָכְהָם fat; אָכָהָם fat; אַכְּהָם fat; אַכְּהָם fat; אָכָהָם fat, אָכָהָם אָכָּהָם fat, אָכָהָם אָכָהָם אָכָהָם אָכָהָם אָכָּהָם אָכָהָם אָרָה אָלָה אָבָּהָּרָה אָלָה אָלְה אָלָה אָלְה אָלָה אָלָה אָלְה אָלָה אָלְה אָלָה אָלָה אָלְה אָבְּה אָלְה אָבְּה אָלְב אָלְבָּה אָלְבְּה אָבְּה אָלְבְּה אָבְּה

2. Letters of adjacent organs.

a. Gutturals and Palatals.

 $\pi = 1$, בּ, כּ, כּ : לָם, to bind, אָבָל to bound; הוּל to whirl round; קבָר הוּל to combine; קבַב to cut.

Z = 0, ס, ס, נְבַל , נְבַל , נְבַל to spring, flow; עָטַר , סְבָל to surround; אָרְטָא , זָרַע to scatter; Chald. אַרְטָא , פֿרַלָא earth.

b. Sibilants and Linguals.

 $T = \exists$: דְּבָּח to leap; נְבָבּח), Chald. יְבָבּח to slay, sacrifice; יְצֵבָּן to quench.

 $\mathbf{z} = \mathbf{u}$: ב \mathbf{z} , הַעַר, to watch; בַאַר, הַעַב, to hew; הַבָּל to shine, טְבֵר to be pure.

 $\mathbf{v} = \mathbf{v}, \mathbf{v}, \mathbf{v}$: הָרַס , הְרַשׁ , הָרַא , הַרָא to scratch, grave ; נְחַבָּ , נְחַבָּ to pour out.

 $\vec{w} = \pi$: Chald. פְּתַר, Heb. קּתָה to interpret; קָרָה (χαράσσω, χαράττω) to engrave, plough; בְּרוֹת בָּרוֹת cypress.

- c. ה = ב, ה, ה. The equivalence of ה and the palatals, in Hebrew and the Shemitish languages generally, can be attributed only to the adjacency of the organs by which they are produced. The following instances may be given: הַבָּה, הְבָּה to open; הְבָּה to break into, to investigate; שִׁבְּה thou, suff. of the same pers. ה: in Ethiopic the pronominal afformative of the sec. pers. sing. is 7, which is thus equivalent to the Heb. ה. Again, in various European languages,—in addition to numerous instances of the commutation of the palatals and sibilants (which latter bear, as is shown by the examples under the letter b., a close affinity to the linguals), e. g. Gr. συν, Lat. cum, con; Germ. zūnden, Eng. kindle; Russ. zoloto, Eng. gold,—we find the single letter c, alternately equivalent both to s and k.
- d. הבח. The aspirate ה is frequently changed into the lingual ה, although not letters of the same or of nearly related organs: as in forming the sing. construct of fem. nouns, e. g. הְּכְּטָה, constr. הְּכְּמֵה in forming the third pers. fem. of the future tense, e. g. הקבול for

- 3. For the commutation of the quiescents, see § 86 et seqq.
- 4. The liquids are also occasionally interchanged.

 $\dot{}$ יריל : ר $\dot{}$ י האָהִיל to cause to shine ; קֶרֶב , Arab. קֶרֶב , heart ; קֶרֶב אָלְמָלוֹת , Syr. אַלְמָלוֹת , Arab. אַלְמָלוֹת , אַלְמָלוֹת , אַלְמָלוֹת , palaces ; Chald. שֵׁרְשָׁלָה, Heb. שֵׁרְשִׁלָּה deain.

 $\mathbf{z} = \mathbf{z}$: שָּׁטֵּן to oppose ; מרט מרט to totter ; בְּמָהָן n. pr.

בחר , בחן , to kneel ; בחן to prove.

II. TRANSPOSITION.

- §74. 1. Many words are found in Hebrew consisting of the same letters differently arranged as certain other words, and expressing ideas either precisely the same, or but slightly modified: thus,
- b. Transposition occurs oftenest among the weak letters אַ, ה, ז, e. g. אָנַק, הְעַרְלָה to groan; בַּלְהוֹת בָּלְהוֹת terrour; עַלְנָה עִּלְלָה עַלְנָה מַנְלָה maltreatment.
- 2. Such cases of transposition as the preceding belong rather to the department of lexicography; for they can scarcely be said to affect the grammar of the language. Those which take place on the concurrence of the lingual n with one of the sibilants, concern us more especially, and are as follows.

The lingual אַ, when in the course of inflection it would immediately precede one of the sibilants אַ, שׁ, אַ, אַ, אַ, אַ, רַ אַ, cannot without great difficulty be expressed with its appropriate aspiration, from which it is accordingly freed in several different ways: a. When coming before either of the strong hissing dentals אַ, אַ, or שֹׁ, which contain no lingual sound, the אַ is merely transposed, and then by § 41. loses its aspiration; thus the Hithpa'hel species of אַסְּאָרָאָרָאָרָ, regularly inflected אַרְאָרָאָרָאָרָ, becomes אַרְאָרָאָרָ, so also we have אַרְאָרָאָרָ, for אַרְאָרָאָרָ, be When concurring with one of the remaining dentals ז and אַ, which partake somewhat of the nature of linguals, (viz. ז of that of the softest lingual אַ, and אַ of that of the hardest אַר,) the אַ is not only transposed, but is moreover changed after ז into אָ, e. g. אַרְאַרָאָרָ, and after אַ into אָ, e. g. אַרְאַרָאָרָ, and after אַ into אָ, e. g. אַרָּאַרָּהָרָ for אַרָּאַרָּהָר.

3. Another species of transposition is that which takes place on the concurrence of two pairs of similar letters; e. g. DDDD for DDDD.

III. REJECTION.

§ 75. Besides the commutation and transposition of letters to which a regard for the laws of euphony has given rise, we find the same cause producing their rejection from different parts of words, viz. from the beginning, (termed aphæresis), the middle (syncope), or the end (apocope). Those most frequently rejected are the weak letters אַהְּרֶר and the liquids.

1. Aphæresis.

\$ 76. The weak letters אָ, ה, and ה, and also the liquid ב, when situated at the beginning of a word, are sometimes passed over in silence, the voice hastening onwards, to reach the tone-syllable at or near the end; and in consequence they are not unfrequently rejected in writing: thus, the imperative of verbs ב מוֹ מוֹ מוֹ חַבּי חַבְּי חַ חַבּי חַבְּי חַבְי חַבְּי חַבְּי חַבְּי חַבְיי חַבְּי חַבְיי חַבְי בְּיבְי בְיבְיל חַבְיי חַבְי בְּיבְי בְּיבְיל חִיי חַבְי בְּיל חַבְיי בְּיבְיל חַבְיי בְּיבְיל חִבְיי בְּיבְיל חִבְיי בְיבְיל בְיי חַבְיי בְּיבְיל חַבְיי בְיבְיל חַבְיי בְיבְיל חַבְיי בְיבְיל חַבְיי בְיבְיל חִבְיי בְיבְיל חִבְיי בְיבְיל חִבְיי בְיבְיל חַבְיי בְיבְיל חַבְי בְּיבְי בְיבְיל חַבְיי בְיבְיל חִבְיי בְיבְיל חַבְיי בְיבְיל חַבְיי בְיבּיל בְיי בְיבְיל בְיי בְיבְיי בְיבְיי בְיבּיל בּיי בְיבְיי בְיבְיי בּיבּי בְיבְיי בְיבְיי בְיבּי בּיי

2. Syncope.

- § 77. The most common species of rejection is that which takes place in the middle of words, either by contraction or assimilation.
- 1. Contraction is generally the result of the concurrence of two similar letters in the middle or at the end of a word: it takes place either, a. between two letters which are precisely the same; thus, for instance, שַׁשְׁים becomes contracted into סָבַב , קבַס into סַבָּב , סַב into סָבַב , זֹבְּים into סָבַב , סַב into סַבְּב , סַבְּ into סַבְּב , סַבְּ וֹחַל ; b. or between two letters of the same organ, e. g. קבְּים for הַחַבְּיַבְּ for הַחַבְּיבְּ וֹל 1 Sam. 4: 19. for הַּחַבְּה for הַחַבְּיב , c. and occasionally between letters of adjacent organs; as that of the the lingual n with the dentals ז and שׁ, e. g. הַבְּיבְ for הַבְּבְּה for הַבְּבְּה ; and also with the palatal ב (see § 73. 2. c.), e. g. הַבְּבְּה for הַבְּבָּה for הַבְּבּה for הַבְּבָּה for הַבְּבּר for for הַבְּבָּבּה for הַבְּבָּבּה for הַבְּבָּה for הַבְּבָּ
- 2. The kind of Assimilation which most frequently presents itself, is that of the liquid to the middle of a word, which on taking Sh'wa becomes assimilated to the letter following, and is then as in the former case rejected, e. g. מַבְּיִם for בְּבָּשׁ for בְּבָּשׁ for בְּבָּשׁ for בָּבְּשׁ for בָּבְּשׁ for בָּבָּשׁ for בַּבְּשׁ, for בַּבְּשׁ for בַּבָּשׁ. Very seldom the liquid to is thus rejected, e. g. קַבָּיִם for בִּבְּשׁ for בִּבְּשׁ for בַּבְּשׁר for בַבְּשׁר for בַּבְּשׁר פּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַּבְּשׁר for בַבְּשׁר for בַבְּשׁר for בַבְּשׁר for בּבְּשׁר for בּבְּשׁר בּבּשׁר for בּבְּשׁר for בַבְּשׁר for בַבְּשׁר for בּבּשׁר for בַבְּשׁר for בּבּשׁר בּבּשׁר for בּבּשׁר בּבּשׁר for בּבּבּשׁר for בּבּשׁר for בּבּשׁר for בּבּשׁר for בּבּשׁר for בּבּבּשׁר for בּבּבּשׁר for בּבּבּשׁר for בּבּשׁר for בּבּשׁר for בּבּשׁר for בּבּשׁר for בּבּבּשׁר for בּבּבּשׁר for בּבּבשׁר for בּבּבּשׁר for בּבּבּשׁר for בּבּבּשׁר for בּבּבשׁר for בּבּבּשׁר for בּבּבּש
- 3. The weak letters ה and ה, when preceded by a vowelless consonant in the middle of a word, are often rejected, and give their vowel to such preceding letter, e. g. יְּלְהָנִיל for יְהָהְטִיל for לָאָרֶץ, יְהַלְּטִיל for יְקְטִיל Ex. 3:2. for הָּיִם בּיִם הָּלְרִים הָרִים for הָּיִם בּיִם הָּלְרִים הַבְּיִל for הָלְיִב for הָלְיִם הַיִּלְרִים הַיִּלְרִים for יִלְּהָבָּה for בְּלָּהְגָּר for בְּלָּהְיָּה for מַלֵּבְּל for מִלְבְּב for הַלְּבְּר for בָּלְר הָאַנִים for בַּלּר הָאַלְר Ex. 2:4; and once or twice the guttural ש, e. g. בַּל for בִּל for בִּלְי הַבְּעַל for בִּל for בָּלְי הָבְּל for בָּלְי הָבְּלַר . בַּעַל for בַּעָר הַעָּל for בַּעָר . בַּעָל for בַּעָר . בַּעַל for בַּל for בָּל . בַּעַל for בַּל for בַּעַל for בַּל for בַּעַל for בַּעַל for בַּעַל for בַּעַל for בַּעַל for בַּעָּל for בַּעָּל for בַּעָּל for בַּעַל for בַּעָּר פּעַל for בַּעַל for בַּער בַּעַל for בַּעַל for בַּעַל for בַּעַּער בַּעַּער בַּעַּר בַּער בַּעַּער בּעַּער בַּער בּער בַּער בּער בּער בַּער בַּער בַּער בּער בַּער בּער בַּער בּער בַּער בּער בּער בַּער בַּער בּער בַּער בַּער בַּער בַּער בַּער בַּער בּער בַּער ב

3. Apocope.

\$ 78. The rejection of final consonants is not carried to any great extent; it principally affects the 7 of the third pers. plur. termination of verbs, which in the pret. is almost always rejected, e. g. קַּיְלֵּהְן, and generally also in the fature, e. g. קַּיְלָהְן; the final ה of the fut. of verbs הֹל, e. g. הַּלֶּבֶר; and the masc. plur. term. of nouns, on entering the construct state, e. g. מְלַכֵּר construct. מֵלְכֵּר construct.

IV. ADDITION.

§ 79. The effect of euphony on the forms of words manifests itself also in a manner the direct reverse of the preceding, viz. in the addition of certain letters either at the beginning (prosthesis), the middle (epenthesis), or the end (paragoge).*

1. Prosthesis.

§ 80. The letter most commonly added to words at the beginning is the weakest of the consonants, א, which is prefixed in order to avoid commencing a word with a vowelless consonant, and is called from its position Aleph Prosthetic; † thus דְּרוֹעָ, אָרְוֹר מִיּרְ מִּרְנָת מִיּרְ מִיּ מְיִר מִיּרְ מִיּר מִיּרְ מִיּרְ מִיּר מִיּרְ מִיּרְ מִיּר מִיּר מִיּרְ מִיּרְ מִיּרְ מִיּר מִיּר מִיּר מִיּר מִיּרְ מִיּר מִּיּר מִיּר מִיּרְ מִיּר מִיּר מִיּר מִיּר מִיּר מִיּר מִיּר מִיּי מִיּר מִיּר מִיּר מִיּר מִיּר מִיּר מִיּר מִיּר מִיּרְ מִיּר מִּיּר מִיּר מִיּר מִיּי מִיּי מִיּי מִיּי מִיּרְ מִיּר מִיּר מִיּי מִיּי מִיּי מִיּי מִיּי מְיִי מְיִּי מְיִּי מְיִּי מְיִּי מְיִי מְיִּי מְיִּי מְיִּי מְיִּי מְיִּי מְיִּי מְיִּיְ מִּיְ מִיּי מְיִּי מְּיְ מִיּי מְיִּי מְיִי מְיִּי מְיִי מְּיְ מְיִּי מְּיִי מְּיִי מְיִּי מְיּי מְיּי מְיִּי מְיִּי מְיִּי מְיְי מְיִּי מְיִּי מְיְי מְיִי מְיּי מְיּי מְיִי מְיּי מְיּי מְיּי מְיּי מְיּי מְיּי מְיּי מְיּי מְיּי מְיִי מְיּי מְיּי מְיּי מְיּי מְיּי מְי

2. Epenthesis.

§ 81. Epenthesis is the insertion of a consonant—generally a liquid—after a short vowel in the middle of a word, when requisite to complete the syllable.

Prosthesis apponit capiti, sed Aphæresis aufert; Syncope de medio tollit, sed Epenthesis addit; Abstrahit Apocope fini, sed dat Paragoge.

† Although & prosthetic is in some instances employed in Hebrew, it very often happens that a word in this language begins with a vowelless consonant. But in Arabic, when such would be the case, an is invariably prefixed, thus שَنْ اللهُ ا

^{*} The meanings of the Greek terms by which grammarians designate the three species of rejection and addition, are given in the following Latin hexameters.

- 1. Instances are to be found in most languages of the augmentation of words by doubling one of their constituent letters, or inserting a new one, generally a liquid, as for instance λαμβάνω (root, λαβ), frango (root, frag), stand (root, sta): and this is a phenomenon often met with in Hebrew. There is, however, this difference between it and the other languages of the Shemitish family, that in Hebrew the former method, viz. that of doubling a letter by the insertion of Daghesh, is employed for the purpose of furnishing a resting-place to a short vowel; while in the cognate dialects a liquid is more frequently inserted in the corresponding words for the same purpose: thus, a. In the Heb. Nos throne, we find o reduplicated by Daghesh on account of the preceding short vowel (), while in Chaldee, Syriac, and Arabic, a ק is inserted from the same cause, e. g. Chald. בָּרָכָא, Syr. בַּבָּלֶם, Arab. چَوْتِ so جَوْتِ spelt, Arab. كُرْسِتَّى. Occasionally א is inserted in Heb., e. g. שֵׁרְבֵּים equivalent to שִּׁעְבִּים thoughts; שֵׁרְבִּיט בּנֵז , בָּרַר פּ קַבַּץ , קָרַר from בֹּעָׁ, פָּלָר בּרָר מַנְיל sceptre ; בּיַר מַנָּר מָנָר אָל , from בַּבָּץ , בָּרָר בּרָר נוֹיל , נוֹיל אָל יוֹיל אָל יוֹיל אָל יוֹיל אָל יוֹיל אָל יוֹיל יוֹיל אָל יוֹיל cut. b. Much more frequently we find a Daghesh in Hebrew equivaent to the insertion of the liquid ; in the other Shemitish dialects, e. g. אחה thou, Syr. בון, Arab. בול, Eth. איזר; so אבה fruit, Chald. אָנְבֵּה; Heb. מַדָע (from יָדֶע), Sanscr. mati, Gr. μάθη-σις, Chald. מֵנָדָע (μανθάνω); לְפֵּרֶד torch, flame, Chald. (where ; is inserted, which before the labial ש becomes מֵלְמְפֵּר (Syr. בְּמִפֶּר, Gr. λαμπάς, -άδος. Once, however, we find in Heb. instead of Daghesh, viz. קנצר Job. 18:2. for לצל.
- 2. That species of epenthesis which more particularly belongs to the province of grammar, consists in the regular insertion of ctechnically termed Nun Epenthetic), for the most part between verbs and their pronominal suffixes, in order to avoid an hiatus, e. g. בְּמְשֶׁלֶהוּ for בְּמְשֶׁלֶהוּ And once before the pron. of the sec. pers. m. sing., where no hiatus would occur, viz. אַחְקָהָּג Jer. 22: 24. for אַחְקָהָּג .

3. Paragoge.

- §82. Besides the preceding modes of increasing words, a letter is sometimes added at the end, for the purpose of either strengthening or softening the termination.
- 1. In order to give strength to the termination, the liquid ב (= v Ephelkystikon in Greek) is frequently affixed, e. g. אַנְשִׁיר Ruth 3: 4. for אָדָשִׁיר פּאָנָשִׁיר אָנָ

For the contrary purpose of softening, the weak letters &, 77, 7, are employed: thus,

- 2. a. ה is often affixed to the first pers. sing. fut. or to the imp. of verbs, e. g. הְּמֶשְהָה, הְּמֶשְהֹ, to the pronouns of third pers. plur. viz. הָמֵה, for הַהֵּ, הָתְּה, for מָהָה, הָבָּה for אָבָה, for אָבָה, אַל for אָב, הַבּן for אָבָה, אַל for אָבָה, אַבּר אַל for אַבּה, אַל for אָבָה, אַל for אָבָה, אַבּר אָבּר אַבּר אַבּיר אַבּיר אַבּיר אַבּר אַבּר אַבּר אַבּיר אַבּר אַבּיר אַבּיר אַבּר אַבּר אַבּיר אַבּר אַבּר אַבּר אַבּיר אַבּר אַבּר אַבּיר אַבּיר אַבּיר אַבּיר אַבּיר אַבּיר אַבּיר אַבּיר אַבּר אַבּיר אַבּיר אַבּיר אַבּיר אַבּיר אַבּיר אַבּיר אַבּר אַבּיר אַבּייייייייי
- b. To feminine nouns after the fem. char. ה is hardened into ה (see § 73. 2. d.), which corresponds to the emphatic state in the Aramaic languages, e. g. אַרְטָּהָה Ex. 15:16. for הַּאָרָהָה Ps. 3:3. 80:3. for שֵׁרְעָה רְשׁׁרְעָה Ps. 44:27. for בָּלִילָה ; and also occasionally to other nouns, e. g. בְּלִכָּה for בִּלָּל Cen. 1:5. for בַּלִילָּה.
- 3. The semi-vowel ן is sometimes affixed to nouns, e. g. הַרְהוֹ Gen. 1:24. Is. 56:9. Ps. 50:10. 104:20. Zeph. 2:14. for מַערָנוֹ , הַוֹּיַה Ps. 114:8. for בַּן Num. 23:18. 24:3, 15. for בַּן
- 4. The semi-vowel י is affixed to nouns, participles, and fem. adjectives, e. g. Nouns: בְּלָה Gen. 49:11. for בְּלָה, אֲפֶּסָר , בַּלְּהָר, אָפֶּסָר Ps. 110:4. 114:8. 123:1. for בְּבֶרָה, אֲפֶּסָר Deut. 33:16. עוֹבָר, Participles: אַבְּרָה, אַבֶּרָה Gen. 49:11.; בְּבָרָה Deut. 33:16. עוֹבָר, בּבָרָה 11:17. אַבּרָה Hos. 10:11.; בְּבָרָה Gen. 31:39. בְּבָּרָה Ex. 15:6. Adjectives: בַּבְּרָר, רָבַּרָר Is. 1:21.

CHAPTER VII.

IMPERFECT LETTERS.

§ 83. The Hebrew alphabet consists entirely of consonants, the representatives of articulate sounds produced by opening and closing the several organs of speech during the emission of the voice, with a greater or less degree of force; and whose relative strength accordingly differs in a corresponding manner: thus, for example, p and p are much stronger in sound than the semi-vowels and of the same organs (§ 6). Consonants of the former kind are called strong or

perfect, on account of their distinctness of utterance, and capability of being pronounced by the aid of any vowel whatever; the latter receive the name of weak or imperfect letters, from their tenuity of sound, and the difficulty experienced in their enunciation, except in connection with certain homogeneous vowels (see § 7). And hence result peculiarities of different kinds in the formation of words in which these imperfect letters occur, according to which they may be divided into two classes, viz. gutturals and semi-vowels.

GUTTURALS.

- § 84. The gutturals, as their name imports, are those consonants which are produced chiefly by the action of the throat: they are the following five—8, 7, 7, 3, and 7; and in the very nature of the obscure sounds represented by them, are to be found the causes of the peculiarities of formation and inflection to which they give rise.
- 1. a. The gutturals take in preference to all others the appropriate vowel of their own organ, viz. the simple, open vowel a (§ 11); and accordingly, when occurring in a situation to receive one of the other vowels, a guttural will commonly take a in its stead, e. g. אַרַלִּי, b. When a guttural is immediately preceded in the ultimate by a vowel in the same syllable with which it cannot coalesce, it will receive in addition a short a, called Pattahh furtive (§ 23), e. g. אַרַעָּרָי, (pron. hishmia h) for הַּעָּיִבְיּרָ ; and should the preceding vowel not be rendered immutable by an accompanying semi-vowel, it may be contracted with the Pattahh furtive of the guttural into a single a, e. g. pret. Pi'hel אַרַעָּי contr. אַרַעָּי. But where a vowel is the characteristic of the form in which it appears, it must be suffered to remain, although concurring with a guttural, e. g. inf. constr. אַרַעָּי. never
- 2. The second peculiarity of the gutturals consists in taking a compound Sh'wa (§ 20 et seq.) where another letter would receive simple Sh'wa, either quiescent or mobile, e. g. אַכֹל for אָבֶלָה for אָבֶלָה for אָבֶלָה for אָבֶלָה for אָבֶלָה for אָבֶלְה for אָבֶלְה for אָבֶלְה for אָבֶלְה for אָבֶלְה for הַבְּלְבוֹר for הַבְּלִבוֹר for הַבְּלִבוֹר for הַבְּלְבוֹר for הַבְּלִבוֹר for הַבְּלְבוֹר for this peculiarity likewise has its origin in the nature of these letters, which are scarcely more than aspirates of greater or less force, the compression of the organs by means of which they are produced being much slighter than in the case of the other

consonants; whence it arises that they cannot easily be made audible without an accompanying vowel. Should these letters, therefore, have no vowel of their own, i. e. be accompanied by Sh'wa simple, and have to be pronounced by the aid either of the preceding vowel, as יְּמָבֶּי, or of the following, as יְּמָבֵי (§ 18), the sound of the guttural would in either case be almost if not entirely lost. With the perfect letters it is otherwise: thus in the words יְּמָבֵיל, יִּמְבֵּיל, the sound of p is perfectly audible, although without a vowel of its own.

And hence we see, that the reason why the gutturals are accompanied by a compound Sh'wa, or extremely short vowel, in those cases where other letters receive the sign denoting the entire absence of a vowel sound, is that the voice involuntarily dwells a little upon them, in order to render them perfectly audible and prevent their being lost in pronunciation. Accordingly, gutturals which are so accompanied by no means constitute a syllable, but merely commence one, with the remaining part of which they are not as closely connected as a consonant taking Sh'wa simple, although not as far removed from it as one which has a complete vowel of its own.

Now as these compound Sh'was are with very few exceptions placed under the gutturals merely in order that their slight sound may not be entirely lost, it does not signify in a grammatical point of view which of them is taken in a given instance. When occurring in the middle of a word, this point is decided by the preceding vowel, which always prefers to be followed by that compound Sh'wa which is homogeneous to itself, e. g. יַעְמִיר , הַעָּמֵר. And on the other hand, a compound Sh'wa in certain cases exerts an influence on the preceding vowel: for when according to analogy a guttural would be immediately preceded by short i, it usually takes a compound Sh'wa containing its homogeneous vowel a, or more frequently that modification of awhich is nearest to i, namely e (see § 21); and in either case the preceding vowel is changed to correspond to that of the compound Sh'wa, e. g. העמיד for דעמיד, העמיד for יעמד. For the cases in which a guttural receives simple instead of compound Sh'wa, see § 20. n.

3. The third peculiarity arising from the nature of these consonants is that they are incapable of being reduplicated in pronunciation, and consequently can never receive Daghesh forte (§ 29); a peculiarity which affects chiefly the preceding vowel: thus, should a guttural occur in a situation where another letter would take Daghesh forte, and consequently be preceded by a short vowel (§ 31), such vowel will be changed into a long one; viz. (_) into its corresponding (_),

e. g. הָבֶּבֶּד for הְבָּבֵּד () into (), e. g. הְבָּבְּד for הְבָּבִּד for הְבָּבָּד for הְבָּבָּד for הְבָּבְּד for הְבָּבְּ and () generally into (יוֹ), e. g. בַּבָּד for בְּבַּד for בְּבָּד for בְּבָּד for בְּבָּד for הַבָּב. The reason is, that the voice, being prevented from passing over to the following consonant to finish the syllable, remains longer with the preceding one; which has the effect of lengthening the quantity of the accompanying vowel.

- § 85. The above are the chief peculiarities affecting the gutturals, as a branch of the class of imperfect letters; but, as these are distinguished from the perfect letters by a weakness common to them all, so again each individual letter of the gutturals differs from the rest in weakness, and in the degree in which these peculiarities are manifested. We will therefore treat of them separately, beginning with the strongest.
- 1. 7, of all the gutturals, is the one affected with their common peculiarities to the least extent; since its sound, which is produced not by the throat alone, but also by the aid of the tongue, is a comparatively strong one. a. In the beginning of a word, it may be accompanied by any vowel, e. g. שׁירת ,ראשור, ראשור, דנל ; it may end a mixed syllable when preceded by any vowel without requiring its homogeneous a (see § 23), e. g. הָשָׁמִיר, ; and seldom, in its quality of guttural, changes the preceding vowel into a,—thus (), the shortest vowel and the most opposed in its nature to the gutturals, is retained in מרהב, ירעש, מרהב, &c. b. It very often occurs with simple instead of compound Sh'wa, e. g. רחב, הַרְעָץ, הַרְחָרב. c. ר is also found occasionally with Daghesh, and even when preceded by a long vowel, although the chief peculiarity to which as a guttural it is subjected, is the inability to receive the sign of reduplication, e.g. שׁרָה Prov. 14: 10., כַּרָת שֵׁרֶה Ezek. 16: 4., לשׁרָה Prov. 3: 8., שׁרָה שׁרָה Prov. 3: 8., Cant. 5: 2., הַרְעָמָה 1 Sam. 1: 6., הַרָּאִיחָם 10: 24. 17: 25. 2 Kings 6:32. All of which tends to show that 7, although reckoned among the gutturals, holds in reality an intermediate rank between them and the dentals.
- 2. \sqcap . This letter is a more genuine guttural than the preceding, being produced entirely by means of the throat, without the assistance of any other organ. At the same time, its sound is stronger than that of the remaining letters of its class; and consequently, a. Although it prefers with the rest when ending a mixed syllable to be preceded by the short vowel (_) of the same organ (§11), it may also immediately follow the short vowel (_), which is less congenial to the nature of these letters, or the still shorter and more heterogeneous

vowel (ִ), e. g. יְּחְבֵּץ, רָחְבֹּץ, הַחְבֹץ. b. It often occurs with simple Sh'wa, as in the examples just given, where as a guttural it should take one of the compound forms. In such cases the short vowel remains without being accompanied by Methegh. c. The comparatively strong sound of this guttural allows a preceding short vowel to be retained; as it can rush on to the ה and be lost in it, although on account of the organs' remaining unclosed during its pronunciation its reduplication cannot be made audible, and consequently it never takes Daghesh forte (see § 29), e. g. בַּהִוֹלְם, When such preceding vowel is the second before the tone-syllable, it takes Methegh, e. g.

3. ש. The letter ש is a weaker guttural than either of the preceding, although stronger in sound than אוני מים מול וו is accordingly subjected to all the peculiarities of the gutturals, with but few exceptions. a. It prefers to be accompanied by a, which also is the only vowel in which it can rest; and this accordingly it takes for its own (§ 23), whenever preceded by a different one, e. g. שֵׁשֵׁשׁ for אַשִּשׁי for הַשִּׁשִׁי, for הַשִּׁשִּיל for מַשִּׁשׁי, b. Its sole exemption from the guttural peculiarities consists in occasionally receiving simple instead of compound Sh'wa, which however is generally mobile, e. g. בַּשָשׁ Lev. 4: 13., צַּשֶׁשֵׁ 1 Kings 15: 16, 17.; except before the afformatives in sutting gutt. verbs, e. g. בַּשִׁשׁ, &c.

4. 7. This letter has a sound purely guttural, but weaker than either of the former; and hence it has all the peculiarities of its class in full force, except that it occasionally takes simple instead of compound Sh'wa. Indeed its peculiarities are more numerous than those by which any of the others are affected; for, the extreme weakness of its sound causes it to approach nearly the nature of the semi-vowels, with which it accords in many respects: thus, a. It rests like them in a long vowel (§ 14), and interchanges with them. It may also be immediately preceded by a heterogeneous vowel without requiring a Pattahh furtive, except when strengthened by the insertion of Mappik (§ 44); and it forms a paragogic termination which is not accounted an integral part of the word (§ 54. 3.). b. Although 77 is capable of receiving any vowel of its own, either at the beginning or in the middle of a word, yet at the end it quiesces, in addition to its homogeneous a, only in the first modifications of that vowel, namely e and o, e.g. הלה, גלה, גלה. Of these two, however, the palatal vowel e is generally preferred, as being nearer the guttural a than is the labial $o(\S 11)$; thus, in the preterite of all the species of לה verbs it takes a, and in the future e, e. g. הגלה ; גלה , רגלה . יגלה .

5. 8. The peculiarities of this weakest of the gutturals will be treated of among the semi-vowels.

SEMI-VOWELS.

§ 86. Those distinctive peculiarities of the letters &, 7, and 7, which qualified them to serve as vowel-signs before the introduction of points into the orthography of the language (§ 9), continued to display themselves after that took place, in a tendency to be employed rather as vowels than as consonants; and hence their occurrence in words, whether as radicals or serviles, gave rise to certain varieties both of formation and inflection. As a preliminary step to the explanation of these varieties, the chief peculiarities of the letters producing them may be briefly stated as follows. 1. They are inclined to lose entirely their consonantal power, and quiesce in their respective homogeneous vowels. 2. They are rejectible. 3. They are liable to be commuted the one for the other. Though the letters אור are all weak in comparison with the other consonants, and are all subjected to the three above-mentioned peculiarities; yet, as this weakness is of different degrees, the extent to which they are individually affected with these peculiarities varies in proportion. It will therefore be requisite to speak of each letter separately.

Peculiarities of Aleph.

- § 87. \aleph is the weakest of all the consonants, whence it was formerly employed in the representation of the simplest vowel a. Its influence on the vowels is exceedingly small, on account of the extreme slightness of its consonantal power, which does not prevent its being accompanied by, or resting in, any one of them, either at the beginning, middle, or end of a word.
- אָבֶּר, אָבֶר, אָבִר, אָבִר, אָבִר, אָבִר, אָבִר, אַבִּר, אַבּר, אַבְּר, אַבִּר, אַבְּר, אַבּר, אַבר, אַבּר, אַבּר, אַבּר, אַבּר, אַבּר, אַבּר, אַבּר, אַבּר, אַבּר, אַבר, אַבּר, אַבּר, אַבר, אַבּר, אַבר, אַבּר, אַבּר, אַבּר, אַבּר, א

taken in such cases, it receives the longest among the short vowels, viz.

(ֶ), which is nearer to (ַ), and hence more congenial to its nature; whence in the first pers. fut. sing. we find אַקטל instead of אַקטל for אַקטל ; except when followed as in the Niph. of אַקטל verbs by the weak letter אַ with Daghesh, which, to render its reduplication audible, requires to be preceded by the shortest vowel of all, viz. (ַ), e. g. שַּבָּאָא, not שִּבְּאָא. The following instances in the same species and tense of other verbs may also have arisen from a desire to add intensity to the reduplication, e. g. שַבָּאָא Gen. 21: 24., שַבָּאָא 1 Sam. 27: 1.

- 2. When nat the beginning of a word is destitute of a vowel, as a guttural it takes compound Sh'wa, e. g. אַבוֹר for אָבוֹר; and it retains, on account of its weakness, an accompanying long vowel when another letter would reject it, thus אַבּרָס absol. and constr.
- 3. When אַ, preceded by a letter without a vowel, has one of its own, it has a tendency to give its vowel to such preceding letter, and rest in it, e. g. מַאבִיר Is. 10:13. for מַלְּמֵבִּר מָשְׁלְּמֵדּ Job 35:11. for מַלְּמֵבָּר וֹהָל , רַאֲאַלְבֵּר 2 Sam. 22:40. for יְאַהֵל Is. 13:20. for יְאַהֵל Ezek. 28:16. for אַרָּאַלְּבוּר .
- 4. A vowelless consonant, on being placed before an א with compound Sh'wa, will generally take the long vowel corresponding to the compound Sh'wa, and in this א will rest; thus לְאֵבוֹר becomes לֵאבוֹר for לַאבוֹרִם with pref. becomes לַאבוֹרם לַאבוֹרם.
- 5. At the beginning of a word, π is sometimes taken for \aleph . See § 73. 1.
- § 89. 1. In the middle of a word also, א may receive or rest in any vowel; but in the fut. Kal of some אָב verbs it rests in the long vowel (יֹן) in preference to the short (יַן), e. g. אַבְּלֹב instead of יַּאָבֶל.
- 2. Sometimes on taking a vowel of its own, and being preceded by a letter without one, the vowel-change mentioned above (§ 88. 3.) occurs here also, e. g. אַמָּה for הַאָּשָׁה for בַּיִּאָר for בְּיִאָּה Ezek. 23: 49. for הַשְּׁאֵרנָה; and even when this will cause the rejection of the vowel preceding Sh'wa, thus בְּרָאֵה, constr. בְּרָאֵה and with בְּיִרְאֵה בּוֹרְאָה בֹּיִר בּיִר אַרָּאָה.
- 3. a. In a few instances א is rejected, e. g. בְּדִּילִים Prov. 17: 4. for בְּיִלְּיִלְּיִת Job 41: 17. for בְּיִלְּיִל Deut. 11: 12. for בְּיִלְּיִל Ps. 22: 22. for בְּיִלְים בְּיִלְים Lev. 11: 43. for בְּיִלְים b. In the first pers. fut. sing. of שׁ verbs, where two Alephs come together, the radical is in general rejected, e. g. אַבֶּל for אַבֶּל and occasion-

ally in the other persons also, e. g. הַמְרָרְ 2 Sam. 19: 14. for הָמְרָרְ , הַמְּמְרָרְ Jer. 2: 36. for רָהַאָּחָא , הַמִּאַלְי Deut. 33: 21. for בַּהַטְּק , וְהַאָּחָא , בַּהַטְּר Deut. 33: 21. for בַּהַטְּק , וְהַאָּחָא ; see Ps. 104: 29. 139: 20. 1 Sam. 28: 24. c. So too in a few instances after the characteristic ה of the Hiph'hil species, e. g. הְכִּל Ezek. 21: 33. for הְהָרָרְ , הָאָבֶרל Is. 21: 14. Jer. 12: 9. for הַאָרָרְ .

- 4. Although א may rest in any vowel whatever, it is still sometimes changed into the homogeneous mater lectionis of the vowel preceding it: viz. into י when preceded by Hhirik, e. g. בישון Job 8:8. for נְּטְמֵאנוֹר Job 18:3. for נְטְמֵאנוֹר ; and into י when preceded by Hholem, e. g. באמר Deut. 32:32. for מוֹסֶר, ראָשׁ Ps. 2:3. for מוֹסֶר Ps. 2:3. for מוֹסֶר אַר מִישׁרָן Ps. 2:3.
- § 90. 1. At the end of a word, א generally lengthens the preceding vowel if short, and rests in it, e. g. אַנְאָ for אַנְאָ, הָּמָצָא for אַנְאָד, for אַנְאָד, for אַנְאָד, for אַנְאָד, for הַמְצָא.
- 2. A final א is sometimes rejected, especially when immediately preceded by another semi-vowel, e. g. מְחָשׁה Gen. 20: 6. for מְחָשׁה Ex. 17: 16. for אָסָבּי.
- 3. Occasionally ה is substituted for א, e. g. רְפָה Ps. 60 : 4. for רְפָּא Job 8 : 21. for יְמֵלֵּא Job 8 : 21. for יְמֵלֵּא

Peculiarities of Wav.

- § 91. The semi-vowel η has a stronger sound than \aleph , and partakes more of the nature of a consonant; it accordingly exhibits the three peculiarities common to the letters $\eta \eta \eta \eta$ in a more frequent and decided manner. As the weakest of the labials, and hence bearing a near affinity to the cognate vowels of the same organ, o and u (§ 11), it always has a tendency to rest in one of those vowels, and strongly opposes the reception of any other by the consonant preceding it. This chief peculiarity of the letter η gives rise to most of the following phenomena.
- § 92. 1. a. At the beginning of a word, א is retained as a radical only in a few nouns, e. g. א מון a hook, once לְּלֶדְ Gen. 11:30. b. In all cases where it occurs as the first letter of a verbal root, it becomes changed into its cognate semi-vowel, on account of the accompanying heterogeneous (), e. g. לֵלֶד for לֵלֶד , red יָשֶׁד.
- 2. I occurring as a servile at the beginning of a word retains, contrary to its nature, its own consonantal power and an accompanying heterogeneous vowel, whenever such vowel is essential for the purpose of

contradistinction; as for instance the (_) of ר conversive, e. g. רַיּאֹבֶּיר and he said, which is thus distinguished from מראבור and he will say.

- 3. א also retains its consonantal power when as a simple conjunction it commences a word without a vowel, e. g. אָרְאֹמֵר ; except before another labial, or a letter with (ְ), when it takes its homogeneous vowel u, in which it rests, e. g. אַרְלֵכֹל ; וּפֵרְעֹה אִרְמִשְׁבֶּן ,וּבֵרן.
- 4. a. ק conjunctive preceding ב changes its own () into (), in which then rests (§ 97. 2. a.), e. g. קרודר for דרודר b. In the third pers. fut. of verbs, ק is changed into on account of the accompanying (), e. g. דרושל for דרושל.
- § 93. 7 consonantal in the middle of a word is always a radical, and is changed or not, according to the vowels which it takes, and the letters by which it is preceded or followed.
- 1. When accompanied by its cognate vowel o, it loses entirely its consonantal power, and serves as a vowel to the preceding letter, e. g. מָּבוֹ inf. for מְּבִּוֹ (kɨwóm), הַקְּבֹּוֹ for קְּבִּוֹ (kɨwóm), הַקְּבִּוֹ (kɨwóm), הַקְּבִּוֹ (yikwóm); except in some instances when preceded by a guttural, e. g. יַבִּי ('hāwón).
- 3. a. When אינול a heterogeneous vowel of its own is preceded by a vowelless guttural, it remains unchanged, by Rule 2. a., e. g. אַרָּרֶל, בָּרָרֶל, b. If the preceding vowelless letter be other than a guttural, either אָרָל on account of its prevalent tendency to rest in a vowel, gives its own vowel to the preceding consonant, and, if not

^{*} Except מְוֶה , מֶוֶה absol., but in constr. הוֹה , מוֹה .

[†] And in the following cases when the preceding letter is not a guttural, viz. לוצות Hos. 12: 12. for שוֹרִים Cant. 5: 2, 11. for קוצות קוצות .

capable of resting in it from its heterogeneousness, is rejected, e. g. קרי ימים, בְּרִים ימִים, בְּרִים, וֹנְמִים יְמִים, בְּרִים יִּמְים, וֹנְמִים יִמִים, כְּרִים יִּמְים, יִמִים, נְמִים יִמְים, יִמִים, נְמִים יִמְים, or else the peculiar nature of ן prevails, and has the effect of changing the vowel into one homogeneous to itself, e. g. בְּעוֹר , נְקְנַם יֹמִים.

- 4. א on account of its weakness avoids being doubled by Daghesh, e. g. קום for קום. See § 30.
- 5. Occasionally we find ן replaced by א, e. g. לֹא for בְּצִאֹהֶיר, לֹוֹ for בְּצִאֹהֶיר, לֹוֹ for בַּצִאֹהָיר, בּצִאֹהָיר, Ezek. 47:11. for בּצוֹתיר,
- \$ 94. 1. ק is found as the last letter of only two verbal roots, viz. שְׁלֵּח and שְׁלֵּי : to the first of these, קְשָׁתְּ, in order to avoid the anomaly of a consonantal ק at the end of a word, a ה is generally affixed, or else the final ק quiesces in its homogeneous u, e. g. הַשְּׁהְה for יְשִׁהְּהַר , הִשְּׁהְה for יְשִׁהְּה ָר , וֹשְׁהָּה וֹיִ ; the second, יְשָׁלָּהְר , וֹשְׁבְּּה וֹיִ , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , יִבְּשִׁהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁבָּר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁלָּהְר , וֹשְׁבָּר , וֹשְׁלָּה , וֹשְׁלָּה , וֹשְׁלָּה , וֹשְׁבְּיִה וֹשְׁר , וֹשְׁבְּר , וֹשְׁבָּר , וֹשְׁבְּר , וֹשְׁבָּר , וֹשְׁבְּר , וֹשְׁב , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבּר , וֹשְׁבְּר , וֹשְׁבְּר , וְשִׁבְּר , וֹשְׁבְּר , וֹשְׁבּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּר , וֹשְׁבְּי , וֹשְׁבְּי , וֹשְׁבְּיִי , וֹשְׁבְּיִי , וֹשְׁבְּיּי , וֹשְׁבְּיִי , וֹשְׁבְּיִי , וְשִׁבְּיִי , וְשִׁבְּיִי , וְשִׁבְּיִי , וְשִׁבְּיִי , וֹשְׁבְּיִי , וֹשְׁבְּיִי , וְשִׁבְּיִי , וֹשְׁבְּיִי , וֹשְׁבְּיִי , וֹשְׁבְּי , וְשְׁבְּיִי וְשְׁבְּיִי , וְשִׁבְּיִי , וְשְׁבְּיִי , וְשְׁבְּיִי וֹשְׁבְּיִי , וְשְׁבְּיִי וְשִׁבְּיִי וְשִׁבְּיי , וְשְׁבְּיי וּשְׁבְּי, וְשִׁבְּיי , וְשְׁבְּיִי וְשְׁבְּיִי , וֹשְׁבְיי, וְשְׁבְּיִי וְשִׁבְּיִי , וְשִׁבְּיִי וְשְׁבְּיוּתְיִי
- 2. a. This letter is added as a servile at the end of verbs resting in u as the plural termination, e. g. קְּטָלֹּה, קְּטָלֹּה, and in o as the objective suffix of the third pers. masc. sing., e. g. לְּטָלֹּה. b. It is likewise affixed to sing. nouns with o, as the possessive pron. suffix of the same pers., e. g. בְּיִהוֹ, קוֹלוֹ ; and to plur. nouns without a vowel, e. g. בַּיִּרָר.

Peculiarities of Yodh.

- § 95. The weak palatal is stronger than either of its fellow semi-vowels in and in an approaches more nearly to the nature of a perfect consonant; consequently it is subjected in an inferior degree to the peculiarities which are common to them all. Thus, it may be accompanied by any vowel, although it has the same tendency to lose its consonantal power, and rest in one of its homogeneous vowels; and when preceded by any other vowel, it neither quiesces nor undergoes a change, but forms with such vowel a mixed syllable or diphthong.
- \$ 96. 1. a. At the beginning of a word, ד retains its consonantal power when accompanied by either of the vowels, e. g. בַּשֶׁב, רָשֶׁב, רָשֶׁב, לַשֶּׁב, לָשֶׁב, b. And likewise when taking Sh'wa, e. g. רְנָשִׁר, רְנָשֶׁר, רַנְשֶׁר.
- 2. A vowelless י is rejected in the infinitive construct and imperative of verbs י פֿר, e. g. שֶׁבֶּח for שֶׁבֶּח, בשׁ for יָשֶׁב, and in some verbal nouns, e. g. בְּרַלְּ זְרַעְ for בְּרֵל, רָרַעָּ זָרָ See § 76.

- § 97. 1. מ. המו may also receive any vowel when occurring in the middle of a word, e. g. בְּרָת אָלֵיבָ הַבְּיָת b. It prefers, however, to rest in one of its homogeneous vowels i or e, rather than retain its consonantal power, and take a vowel of its own, e. g. בֵּרְי, בִּרִיך, בִּרִיך, בַּרִיך, בַּרִיך, and therefore, whenever it is accompanied by a homogeneous vowel, and is at the same time preceded by the vowel a, it has a tendency to contract the two into e, in which it may rest, e. g. בֵּרְת, בַּרָת, בַּרַת, בַּרַת בְּרַת בִּרַת בִּרַת בִּרַת בִּרַת בִּרַת בְּרַת בַּרְת
- 2. a. A vowelless in the middle of a word, preceded by either i or e, loses its consonantal power, and rests in such preceding vowel (1. b.); consequently it rejects in such case an accompanying Sh'wa, e. g. בְּרָהֵר בְּרָהְרֹ בֹּרְהַרְ בִּרְהַרְ בִּרְהַרָּ בְּרָהַרָּ בֹּרְהַרָּ בִּרְהַרָּ בֹּרְהַרָּ בִּרְהַרָּ בִּרְהַרָּ בִּרְהַרָּ בִּרְהַרָּ בִּרְהַרָּ בִּרְהַרָּ בִּרְהַרָּ בַּרְהַרָּ בִּרְהַרָּ בַּרְהַהַר vowel, it retains Sh'wa, and also its consonantal power, e. g. אּבַרְבֵּרִם, הַרַבָּרָם, הַרְבָּרָם, הַרְבָּרָם בּרָהַרָּהַם, הַרְבָּרָם בּרָהַרָּהַם, הַרְבָּרָם בּרָהַרָּהַם בּרָהַרָּהַם בּרָהַרָּהַם בּרָהַבָּרִם בּרָהַבְּרִם בּרָהַבָּרִם בּרָהַבְּרִם בּרָהַבָּרִם בּרָהַבְּרִם בּרָהַבְּרִבְּרָם בּרָהַבְּרָם בּרָהַבְּרִם בּרָהַבְּרִם בּרָבִּרָם בּרָבִּרָם בּרָבִּרָם בּרָבִּרָם בּרָבִּרָם בּרָבִּרָם בּרָבִּרִם בּרָבִּרָם בּרָבִיבִּרם בּרָבִיבִּרִם בּרָבִיבָּרִם בּרָבִיבָּרִם בּרָבִיבִּרִם בּרָבִיבִּרִם בּרָבִיבִּרִם בּרָבִיבִּרִם בּרָבִּרָם בּרְבַּרָבִים בּרָבִיבִּרִם בּרָבִיבִּרִם בּרָבִיבִּרִם בּרָבִיבִּרִם בּרָבִיבִּרִם בּרָבִּרָבִים בּרִבְּרָבִים בּרְבִּרְבִּרִבְּרָבִים בּרְבַּרְבִּרְבִּרָבִים בּרְבִּבְרִם בּרְבִּרְבִּרִם בּרָבִיבְּרִבְּרִם בּרְבִּבְרִם בּרָבִיבִּרִם בּרָבִיבִּרִם בּרְבִּרְבִיבְרִבּרָב בּרְבִּרְבִיבְּרָבִיבְרִבּרָבְּרָבִיבְּרִבּרָב בּרְבִּבְרִבּרִם בּרְבִּרְבִּיבְּרִבּרָם בּרְבִּיבְּרִבּרְבּיבְּרִבּרָב בּרְבִּיבְּרָבּיבְּרָבּרָבְיבִּיבּרִבּיבְּרָם בּרְבִּיבְיבִּיבּיבּים בּרְבִּיבְּרִיבּיבּים בּרְבִּיבְּיבּיבּרִים בּרְבִּיבְּיבּיבּיּיִבּיבְּיבּיּיִבּיבְּיבּיבּיבּים בּיּיִבּיבְּיבּיבּיבּיבּי בּיּבְיבִיבְּיִיבּיבְּיבּיבּיבּיים בּיּיבּיבּיים בּיּיבּיבּיבּיבּיבּיים בּיּיבּיבּיים בּיּבּיבּיבּיבּיבּיבּיים בּיבּיבּיבּיים בּיבְיבִיבְּיבִּיבְיבִּיבְּיבִּיבּיּים בּיבְּיבּיּיבּיבּיבּיּיבּיבְּיבּיּייִיבּיּיִים בּיבְּיבּיּיבּיבּייִים בּיבּיבּיבּיבּיבּיבּיבּיּים בּיבּיבּיים בּיבּיבּיים בּיבּיבּיים בּיבּיבּיבּיים בּיבּיבּיים בּיבּיבּיבּיים בּיבּיבּייבּיים בּיבּיבּיים בּיבּיבּיים בּיבּיבּיים בּיבּיבּייבּיים בּיבּיבּיים בּיבּיבּיים בּיבּיבּיים בּיבּיבּייבּיבּייבּיבּייבּיבּיים בּיבּיבִיבּיים בּיבּיבּייבּי
- 3. א is occasionally substituted for י in the middle of a word, e. g. מַלָּיִים for מַלָּאִים , תְּלְוֹּיִים for מָלָאִים , מָלָיִים.
- § 98. 1. At the end of a word, not only rests in i or its modification e, but in order to do so, it causes the preceding letter, when a weak vowelless consonant, to take the vowel i, e, g, לְּהָר for בְּהָר.
- 2. A final ד forms a diphthong with a preceding heterogeneous vowel, e. g. בַּלְרָר , בָּוֹר , בָּוֹר , בַּלָרָר , בַּוֹר , בַּרַר , בַרַר , בַּרַר , בַרַר , בַּרַר , בַרַר , בַּרַר , בַּרְר , בַּרְרַר , בַּרְרַר , בַּרְר , בַּרְרְר , בַּרְרְר , בַּרְרְבַּר , בַּרְרְבְּרַר , בַּרְרְבְּר , בַּרְרְבְּרְרְבְּרְרְבְּרְב

CHAPTER VIII.

VOWEL CHANGES.

§ 99. We have already seen, in the chapter on Syllabication, that the changes in the forms of words, and in the situation of the accent, which take place during inflection, produce corresponding changes among the vowels. All vowels, however, are not so affected; and hence their division into mutable and immutable. We shall now proceed to show what vowels are immutable, and when and into what those which are mutable are to be changed; also what vowels are to be rejected, and on what occasions the addition of a new vowel takes place.

I. COMMUTATION.

Long Vowels.

- 2. The remaining vowels, Kamets, Tsere, and Hholem, may and very often do appear without their respective quiescents; and whenever this is the case, they may be changed or rejected as follows.

- ינֶעד (דְּעֶד seldom this change takes place when (בְּעֶד for יַנֶּעָד for יַנְעָד for יַנְעָד for יַנְעָד for יַנְעָד also in the construct of the following four nouns, יַנְרֶדְּ, בָּנֵעְד וְּלָּבְיֹּלְהְ, בְּנֵעְד בְּעָר הָּנָעָד (בְּנֵעְד בְּעָבְיֹּהְ הַּבְּיִלְבְּ הַבְּעָר הָבָּעָר הַבָּעָר הַבָּעָר הַבְּעָרָ הַבְּעָר הְבָּעְר הַבְּעְבְּע הַבְּעְבְּע הַבְּעְבְּע הַבְּעְבְיבְּע הַבְּעְבְּע הַבְּעְבְּע הַבְּעְבְּע הַבְּעְבְּע הַבְּעְבְּב הָבִּע הַיְיבְיב הּבּיב הבּיב הּבּיב הּבּיב
- 3. a. Hholem generally changes into its corresponding short o (ָ), e. g. פֿל , פֿל ; שַּׁמֶרָה , שֹׁמֵר ; בַּקְרֵב , כַּל ; שַׁמֶרָה , שַׁמֵר ; בּקְרֵב , בֹּלְה , פָּל ; שָׁמָרָה , שֹׁמֵר ; b. and often into its modification (ֻ), especially when followed by Daghesh forte, e. g. תַּלְּר , עֹד ; תֻקִּרם , חֹק .

Short Vowels.

- § 102. The short vowels (_), (_,), (_), and (_), although agreeing in one respect, viz. in a strong tendency to form a mixed syllable, yet differ somewhat in quantity; and hence this tendency does not exist in all of them to an equal degree: some being so short as absolutely to require a following vowelless or dagheshed letter, while others approach nearer to the nature of a long vowel, and consequently have in some cases the power of forming a simple syllable.
- 1. a. The shortest vowel of all is (ַ), and this, on account of the acuteness of its sound, must necessarily make a mixed syllable, e. g. בְּלְטֵל, בְּלְטֵל, and vice versa, a vowelless or dagheshed letter is preceded by this vowel in preference to any other; hence, when two Sh'was concur in the beginning of a word, the first is generally changed into (ִ), as the shortest of the vowels, and therefore the nearest to Sh'wa, e. g. inf. אַטָּיִל, imp. אַטְלָּף, for אַטְלָּף, imp. אַטְלָּף, for אַטְלָּף, imp. אוֹנְף, imp. אַטְלָּף, imp. אוֹנְף, imp. אוֹנְף, imp. אַטְלָּף, imp. אוֹנְף, imp. אוֹנְף, imp. אוֹנְף, imp. אַטְלָּף, imp. אוֹנְף, imp. אַטְלָּף, imp. אַטְלָּף, imp. אוֹנְף, imp. אוֹנְרָּף, imp. אוֹנְף, imp. אוֹנְרָּף, imp. אוֹנִף, imp. אוֹנְרְּף, imp. אוֹנְרָּף, imp. אוֹנְרְּף, imp. אוֹנְרָף, imp. אוֹנִף, imp. אוֹנְרָּף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָּף, imp. אוֹנְרָף, imp. אוֹנְרָּף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרֶף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנִרְף, imp. אוֹנְרָף, imp. אוֹנְרְּף, imp. אוֹנְרָף, imp. אוֹנְרְף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָּף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרָף, imp. אוֹנְרְּרָף,

^{*} Unless the second letter is a guttural, which cannot conclude a perfect mixed syllable (§ 84, 2.), when () becomes changed into its longer modifica-

2. a. The longest among the short vowels is the diphthongal (ֶ) (§ 10. 3.), which accordingly is the most capable of forming a simple syllable, and remains unchanged when followed by a quiescent ה סי ה, פ. פ. הַּלְּהָה, רְּלְּלֶה, בֹּלֶה, b. When (ູ) is to be lengthened, it is not in general changed into its corresponding (_), but rather into its modification, the first and simplest long vowel (_) e. g. אֶבֶלְה for מֵלְכִרם מִלֶּלְה for מֵלְכִרם מִלֶּלְה c. Occasionally it is lengthened into (_), e. g. הְלֶלֶה constr. הְלֶלֶה for הְלֶלֶה imp. הְלֶלֶה d. On the insertion of Daghesh forte in the following consonant, it is sometimes further shortened into (_), e. g. אַבְּהְלָה אָבֶתְה הָ אָבֶתְה הַ אַבְּתָּה הַ הַּבְּתְּלֵה , פַּרְבֵּל ; אַבְּתְּלַה , פַּרְבֵל ; אַבְּתְה הָ אָבֶתְה הַ , פּרָבֵל . e. g. בַּרְבֵל ; אַבְּתְה הָ אַבְּתְה הַ אַבְּתָה הַ הַּבְּתְּל הַרַבְּל ; אַבְּתְבֹל , פַּרְבֵל ; אַבְּתְבֹל , פַּרְבֵל ; אַבְּתְבֹל , פַּרְבֵל , פַּרְבֵל ; אַבְּתְבֹל , פַּרְבֵל , פַּרְבֵל , אַבְּתְבֹל , פַּרְבֵל , אַבְּתְבֹל , פַּרְבֵל , פַּרְבֵל , פַּרְבֵל , אַבְּתְבֹל , פַּרְבֵל , אַבְּתְבֹל , פַּרְבֵל , אַבְּתְבֹל , פַּרְבֵל , אַבְּתְבֹל , פַּרְבֵל , אַבְתַבְּל , פַּרְבֵל , פַּרְבֵל , פַרְבֵל , פַרְבֵל , פַרְבֵל , פַרְבֵל , פַרְבֵל , פּרָבֵל , פַרְבֵל , פַרְבֵל , פַרְבֵל , פּרְבֵל , פַרְבֵל , פּרְבֵל , פַרְבֵל , פּרְבֵל , פּרבָל , פּרבְבַל , פּרבָל , פּרבָל , פּרבָל , פּרבְבֵל , פּרבָל , פּרבָל , פּרבָל , פּרבְבֵל , פּרבְבֵל , פּרבָל , פּרבָל , פּרבְבַל , פּרבְבַל , פּרבָל , פּרבְבַל , פּרבְבַל , פּרבָל , פּרבָל , פּרבַל , פּרבְבַל , פּרבְבַל , פּרבְבַל , פּרבְל , פּרבְל , פּרבְבַל , פּרבַל , פּרבְבַל , פּרבְבַל , פּר

3. The three remaining short vowels are of intermediate length.
a. The most usual change of (_) is into its corresponding long vowel
(_), e. g. הָּרָם, אָבֶה for הַּלָּב, בְּבֶּה, plur. הָרִים.
b. In a few cases it is shortened into (_), e. g. מַשְׁבֵּר, constr. מְשְׁבֵּר, מֵרְבַּץ, מֵרְבַּץ, מֵרְבַּץ, מֵרְבַּץ, מֵרְבַּץ, מֵרְבַּץ, מֵרְבַּץ, מַרְבַּתְם.

5. a. Kibbuts is generally lengthened into Hholem, according to § 84. 3., e. g. בְּדָּבְ for בְּבָּב b. The change into Shurek, which requires the insertion of the letter א, rarely takes place, e. g. בְּקָב for בַּבָּק for בִּקְנַם for בִּקְנַם for בִּקְנַם for בִּקְנָם for בִּקְנָם.

tion (,), e.g. Niph. of verbs ש" gutt. הְבָּבֶּר קוֹבְ, Hiph. הְבָּבִּר for הְבָּבִּר for הְבָּבִּר הַ, Hiph. הְבָּבִּר for יהוּל fithe guttural has already compound Sh'wa, into its corresponding short vowel, e.g. inf. בָּבָּר, fut, הַבָּבֹר, gaso בַּבְּבֹר, הַבָּר, הָבָּר, הָבָּר, הַבָּר, הַבְּרָר, הַבָּר, הַבְּרָר, הַבָּר, הַבְּרָר, הַבָּר, הַבְּרָר, הַבְּר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָּר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְיבּר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָּר, הַבְּרָּר, הַבְּר, הַבְּרָר, הַבְּרָּר, הַבְּרָּר, הַבְּבְּרָּרְיבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּרָר, הַבְּבְּרָר, הַבְּבְּיּר, הַבְּיִ

[•] Except before א, where it sounds like long i, e. g. אָנְהַיּם; and before ה, where it still makes a mixed syllable (§ 85. 3.), e. g. בַּחָם for בַּחָם, for בַּחָם, for בַּחָם.

[†] We find, however, a few instances where, after the lengthening of () into (ַ), a י is inserted, as mater lectionis e. g. מֵראָהָר Ex. 25:31., מַראָהָר Is. 44:24.

II. REJECTION.

§ 103. The same vowels which are subject to changes, from the causes above mentioned are also liable to be rejected when the laws of inflection require it. The only exception is formed by the short vowels preceding a letter with Sh'wa quiescent or Daghesh, and consequently making a mixed syllable, e. g. בְּבִּיר , אֲבָוֹר ; בִּבִּיר , אַבְּוֹר ; בִּבִּיר , אַבְּוֹר ; בּבּיר , אַבְּוֹר ; בּבּיר , אַבְּר ; בּבּיר , אַבְּר , אַבְּר ; בּבּיר , אַבְּר , אַבְר , אַבְּר ,

Rejection takes place in the cases and in the modes as follows:

- 1. When a dissyllable whose penult is a simple syllable is increased at the end by a syllable taking the accent, the first vowel is rejected, in order that the accent may not be preceded by more than one vowel, according to § 64, e. g. קַבֶּרֶים דְּבֶרֶי, דְּבֶרֶים.
- 2. a. When a dissyllable receives at the end an assyllabic augment, the second vowel, which is thereby deprived of its following consonant, is rejected, e. g. לְטַלָּה, הָקָטַלּר, הָקָטַלּר, רָקָטַל ; קַטָלַר, קַטָלָה, קָטַל, יִקְטַלר, הָקָטַלר, הָקָטַל, The reason of this rejection lies in the מקטלים , מקטל ; קטלים. genius of the language, the antique simplicity of whose character is opposed to a too great softening of the pronunciation by means of medial vowels; whence the addition of a syllable, either at the beginning or end of a word, is compensated when practicable by the rejection of a vowel in its midst. b. To the same cause may be ascribed the formation of a mixed and simple syllable in preference to two successive simple syllables in the inflection of both nouns and verbs; so that when the first vowel of a dissyllable is rejected on the reception of a final augment, the second vowel is shifted back to the first consonant, and shortened, e. g. מֱלֶבֶּר, with suff. מֱלֶבֶּר for קָבֹל; מְלֶבֶר, with . קטלה for קטלה.
- 3. For a reason similar to the above, whenever a dissyllabic noun is connected in the construct state with that which follows, its first vowel, unless immutable, is rejected; for, as the union thus effected is so intimate that both words may be regarded as forming but one compound term, the voice hastens onwards, to arrive at its termination, in like manner as on the addition of a single syllable, e. g. קבָר אָלְהִים = הַבַּר אֲלַהִים = הַבַּר אֲלַהִים = הַבַּר אֵלהִים = הַבַּר אַלהִים = הַבָּר אַלהִים = הַבַּר אַלהִים = הַבַּר אַלהִים = הַבָּר אַלהִים = הַבַּר אַלהִים = הַבְּר אַלהִים = הַבָּר אַלהִים = הַבְּר אַלהַר הַבּר אַלהִים = הַבּר אַלהַר הַבּר אַלהַר הַבּר אַלהַר הַבּר אַלה הַבּר הַבּר אַלה הַבּר אָב הַבְּר אָבּר הַבְּר אַלהַר הַבּר אַבּר הַבְּר אָב הַבְּר אָבְּר הָבְּר אָבְר הַבְּר אָבְר הַבְּר אָבְר הַבְּר אָבְר הַבְר אָב ר אַבּר הָבּר אָב ר אַב ר אָב ר אַב ר
- 4. a. This rejection of the penultimate vowel of dissyllables takes place not only when the consonant to which it is attached commences

the word, but likewise when it is preceded by another with Sh'wa mobile, as דְּבָרִים; so that after the rejection has taken place, there is a concurrence of two Sh'was at the beginning of a word, which, being in Hebrew utterly inadmissible (§ 15), gives rise to the formation of a new syllable, by changing the first () into either (), (), or (), e. g. מַלְכֵי constr. בְּבָרֵי for בְּבָרֵי ; in sing. fem. constr. מַלְכִי for בְּבָרָי ; in sing. fem. constr. also, e. g. בְּבָרָי , בְּרָבְי for בִּרָבָ, מִנְלָה ; בַּבְרַת , בְּבֶרָת , בְּבָרָת , בְּבֶרָת , בְּבֶרָת , בְּבָרָת , בְּבָרָת , בְּבָרָת , בְּבָרָת , בְּבָרָת , בְּבֶרָת , בְּבָרָת , בְּבָרָת , בְּבָרָת , בְּבָרָת , בְּבָרָת , בְּבֶרָת , בְּבָרָת , בְּבָרָת , בַּבְרָת , בַּבְרָת , בַּבְרָת , בַּבְרָת , בְּבָרָת , בַּבְרָת , בַבְרָת , בַבְרָת , בַּבְרַת , בַבְרָת , בַבְּרָת , בַבְרָת , בְבָּרָת , בַבְרָת , בַבְּרָת , בַבְרָת , בְבְרָת , בַבְרָת , בַבְ

III. ADDITION.

b. A new syllable arises also upon a simple immediately preceding a compound Sh'wa, which are completely equal in this respect: the vowel chosen to precede the guttural being always that of the compound Sh'wa, e. g. יְלַחֵלָּר, הְעָמֵר for הַעָמֵר, רְעָמֵר for לָחֵלָר, הְעָמֵר for לָחֵלָר, הְעָמֵר.

c. And also in the middle of a word, when a compound precedes a simple Sh'wa; for, as a compound Sh'wa is always mobile, there would otherwise be two concurrent Sh'was in the beginning of a syllable, which is against the rule § 15.; to avoid which, the Sh'wa of the compound is dropped, and its vowel alone retained, e. g. בַּנְבְּרָה , בַּעֲבְרָה for הַנְבָּרָה.

2. a. The Hebrew language chiefly differs from the Chaldee, whose structure represents the older form of the Shemitish tongues, by a more perfect development and a greater degree of attention to the laws of euphony; one effect of which has been the insertion of additional vowels for the purpose of facilitating and softening the pronunciation of the language. For instance, the root of a triliteral verb, which in Chaldee has but a single vowel, thus בשף, is in Hebrew converted into a dissyllable by the addition of a vowel to the first radical, thus בשף. To the same cause is to be ascribed the fact that in the fut. Kal. and pret. Niph. of שש על verbs the pronominal preformatives take (,) instead of (,), e. g. בשל, בשל בין בער בין בער

b. In these verbs also when the regular mode of inflection would interfere with the euphonic rules of the language, a new syllable is added, to avoid such interference. Thus in איש verbs, to prevent the formation of a mixed syllable containing a long vowel in the middle of the word, we find the long vowels (אֹן) and (אֶר,), the two modifications of (גָּר,), inserted, the one in the preterite and the other in the future, e. g. אָקרְמִיהָה for הְּקרְמֵיהְה for הְּקרְמֵיהְה for הְקרְמִיהְה for הְקרְמִיהְה verbs, where the last radical has Daghesh forte with Sh'wa, and would consequently be joined to the pronominal afformative in the same syllable, e. g. אָסְבֶּרְיָה for הְּסְבֶּרְיָה for הְּסְבָּרִיָּה for הְּסְבָּרִיָּה for הְּסְבָּרִיָּה for הְּסָבְּרִיָּה for הְּסְבָּרִיָּה for הְּסְבָּרִיָּה for הְּסָבְּרִיָּה for הַּסְבָּרָה for הַּסְבָּרָה for הַּסְבָּרָה for הַּסְבָּרָה for הַסְבָּרָה for הַּסְבָּרָה for הַסְבָּרָה for הַסְבְּרָה for הַסְבְּרָה for הַסְבָּרָה for הַסְבְּרָה for הַסְבָּרָה for הַסְבָּרָה for הַסְבְּרָה f

Vowel Changes produced by the Pause-Accents.

- § 105. Another species of vowel change is that produced by the pause-accents, viz. the two Emperors Cilluk and Athnahh, and occasionally some of the other disjunctives, when employed in the same manner as these two. The influence of these accents on the syllabication is entirely different from that exerted by any of the rest; accordingly, in order to illustrate it, we have first to ascertain and state, in what respect they differ.
- § 106. All the disjunctive accents have the power of prolonging the quantity of the vowel on which they are placed; but the pause-accents far exceed the others in this respect. If then we say that the ordinary accents add the quantity of a short vowel to the one to which they are annexed, we may with propriety consider the pause-accents as each equivalent in length to one long or two short vowels. If this be granted, the following axioms will result.
- 1. A short vowel with a pause-accent is equivalent to a long vowel with another accent, or to one long vowel and a half; while a short vowel with another accent would be but equal to one long vowel without an accent.
- 2. A long vowel with a pause-accent is equivalent to two long vowels; and with another accent, to one and a half.
- 3. A Sh'wa, which has no quantity of itself, when accompanied by a pause-accent is of course equal to one long vowel.
- § 107. From the above statement it will be at once perceived that as these accents differ so essentially from the rest in quantity, their effect on the syllabication must also be very dissimilar. Thus, for instance, when one of them accompanies a short vowel, it does not merely extend the quantity of such vowel to that of a long one, and

thereby render it capable of forming a simple syllable (see § 55. 2.), but it effects something more; and thence,

2. When accompanying a letter with Sh'wa which has taken the place of a long vowel in consequence of an added final syllable (§ 103. 2.), the pause-accent causes the rejected vowel to be restored, e. g. בְּטֵעֵלָה for בְּעֵעֵלָה for בְּעֵעֵלָה for בְּעֵעָלָה for בְּעֵעָלָה. The same restoration takes place even when the accent is a postpositive, and not

placed upon the tone-syllable, e. g. אָשָׁמִר Lev. 19: 19.

3. When a pause-accent is annexed to a Sh'wa which has not arisen from a rejected vowel, the letter bearing it takes, in contradistinction to such cases as the preceding, the longest of the short vowels, (ֶּ). both in the middle of words, e. g. קביק for אוֹתֶה, קביק for בֵּיְהָי and at the beginning, e. g. מֵבְיר לִּיבָר for מֶבֶר מַבְיר for מֶבְיר מָבְיר מַבְּיר for מֶבְיר מַבְּיר.

4. A pause-accent accompanying a letter with compound Sh'wa causes it to take the corresponding long vowel, e. g. מָנָי for מָנָר , הַיִּצִר 1 Kings 10: 7. for עָנָר , הַיִּצִר .

§ 108. The above are the changes produced by a pause-accent annexed to a short vowel or Sh'wa. That which it effects when joined to a long vowel making a mixed syllable, would appear at first sight to be regulated on an entirely different principle; for instead of further lengthening such vowel, it changes it into a short one, viz. () into (_), e. g. הַשָּׁב Is. 42: 22. for הַפֶּר, הָשָׁב Gen. 17: 14. for הבר Is. 18:5. for הָתֵּד; and () the longest of the short vowels is further shortened into (), e. g. רַלְהָּ Job 27 : 21. for קַלָּה, פַלָּד, Judg. 19: 20. for הוֹכֶב, הַלֶּךְ Job 40: 32. for שוֹסֶב. But inexplicable as this phenomenon has hitherto been considered, it may still be referred to the power possessed by these accents, of adding the quantity of a long vowel to the one to which they are annexed. For we have seen (§ 106. 1.) that a pause-accent added to a short vowel makes it equivalent to one long vowel and a half, or to a long vowel accompanied by an ordinary accent, and thus enables it to form a mixed syllable; while a pause-accent extends the quantity of one long vowel to that of two, and leaves it as incapable of forming a mixed syllable as it was before; for long vowels require by nature to end a syllable, and not

be lost in a following vowelless consonant (§ 16. a.). Now, may we not draw hence the conclusion, that a long vowel accompanied by a pause-accent is changed into a short one in consequence of its making a mixed syllable? If so, we see the reason why the long vowel (_) is changed in the examples above given into the short simple vowel (_), of which it is the modification.

§ 109. 1. Another peculiarity of the pause accents consists in their position. Although the accents in general, as we have shown (§ 55. 4.), prefer to be placed on the ultimate, the pause accents always when practicable accompany the penult; in order that the elevation in tone of the syllable on which they are situated may be made more evident by means of the contrast with a following unaccented syllable. And thus, not only does the tone-syllable of a word regularly accented Mil'hel retain its position on receiving a pause-accent, but also one usually on the ultimate is often shifted to the penult, e. g. אָבֹבֶר for אָבָּבֹר for אָבָּבֹר for אָבָּבֹר for אָבָּבֹר for אָבָּבֹר for אַבָּבָר for אָבָּבֹר for אָבָּבֹר for אַבָּבּר for אַבָּבּר for אַבָּבּר for אָבָּבֹר for אַבָּבּר for אַבָּר for אַבָּבּר for אַבּבּר for may be made more evident for for mean for mean

2. A pause-accent prefers to be preceded as well as followed by a vowel; and hence a preceding () is sometimes replaced by a vowel which had been rejected (see § 107. 2.), e. g. מְּלַבְּהְרּ Lev. 19:5. for בַּעְרֵּוּרָ, so בַּעָרֵרֹּוּךְ Deut. 1:17. 18:15., בַּעַרֵרֹּוּרָ Is. 7:25.

BOOK SECOND.

ETYMOLOGY.

CHAPTER I.

FORMATION OF WORDS.

- § 110. All language consists of articulate sounds, produced by the action of the organs of speech; these are formed into combinations of different lengths called words, each expressing an idea either of existence or action, or some relation of these ideas to one another; and words, again, are combined into sentences, containing one or more propositions. Of the elements of speech, as regards the Hebrew language, we have already spoken in the first book. We have now to investigate the laws which regulate their formation into words.
- § 111. The materials of which every language is constructed, are comprised in a certain number of primitive words, each of which expresses some simple idea; and from these are derived, in a variety of ways, all the terms denoting the different modifications and combinations of such ideas, viz. by changing one or more of their consonants or vowels, or by making additions to them either at the beginning or end. These primary words are technically called roots, as constituting the sources from which all the rest may be said to spring.
- § 112. As applied to the Hebrew language, the term root, or primary word, may be considered as bearing two different acceptations. 1st. It is used to designate all words originally formed to express simple ideas, and from which other words are derived, to denote the several modifications of these ideas. 2dly. It is applied to the letters which express the fundamental idea of a word, in contradistinction to those added in the course of grammatical inflection and formation. And in

this sense a word or combination of letters may be called a *root*, which in the former point of view is a derivative. The ascertaining of the former kind of root is more especially the business of the lexicographer, while the grammarian's chief concern is with the latter.

§ 113. As radical words are those which express the simplest ideas without qualification or restriction, they are naturally constructed in the simplest manner, that is, of the fewest letters. In the Indo-European languages these letters are not restricted to any particular number: in which respect they differ essentially from those of the Shemitish family, whose roots, for the most part verbs, consist as a general rule of three consonants, originally formed into a monosyllable by the aid of the simplest vowel a, which, to facilitate the pronunciation, was given to the second letter; and thus each separate idea was expressed by a single impulse of the voice, rendered as distinct as possible by both beginning and ending with a vowelless consonant, e. g. מלה to kill, מלה to kill, מלה The degree of simplicity, and even rudeness, manifested in this fundamental point, forms a striking proof of the antiquity of the languages in which it obtained. As, however, the Hebrew advanced in cultivation, these sounds came to be considered as too harsh and abrupt; and in consequence a euphonic vowel was given to the first letter, which transformed each root into a dissyllable, thus מלה, קטל (see § 104). We may remark in passing, that the more polished Arabic went further still, in giving a vowel also to the final consonant, e. g. زَمُلُكُ , قَتَلَ عَلَى عَالَى , while in the rougher Aramaic dialects the original pronunciation was retained, e. g. Chald. מלה, קטל, Syr. אילה, פעל, פעל.

§ 114. Another distinguishing trait of the Hebrew, as well as of the whole family of languages to which it belongs, is the constant endeavour to preserve the original length of words, even in the formation of derivatives. This formation is accomplished for the most part by merely changing the accompanying vowels, e. g. אַבֶּיל to kill, אַבֶּיל to kill, אַבֶּיל to killer, אַבֶּיל to reign; אָבֶיל to reign; אַבְּיל to reign, אַבְיל to reign, אַבְיל to reign, אַבְיל to reign, אַבְיל to reign, אוווים אווים אווים

§ 115. The majority of Hebrew primitives, as we have stated above. consist of three consonants. Besides these there are a considerable number composed of only two, but which were afterwards formed into triliterals according to the analogy of the language, by the reduplication of one of the existing radicals, or the insertion or addition of a new one. Such roots as far as regards their fundamental meaning, which is fully expressed by the two original letters, are biliteral: while in a grammatical point of view they are triliteral (§ 112). Thus the several cognate ideas to bind, press together, heap up, restrain, guard (besiege), are expressed by the verbs יצר, אצר, אצר, אצר, יצר, נצר; כהר, יסר, אסר ; but the simple idea of compression, which runs through them all, is denoted by the two constant radicals כר ביבר; the modifications of this idea being distinguished from one another by the different modes adopted in forming the original biliteral into triliteral words, viz. by repeating the last letter, inserting the semi-vowel 7,* or prefixing one of the semi-vowels or the liquid 2. manner are formed the two closely related classes of verbs חחה, חקה, החה, ההה to push down, and קבַק, קרק, אָבָה, הבָק to beat down, from the cognate biliterals 77 and 77. A remarkable example of this formation of triliterals is found in the proper noun בַּלל Babel and the verb to confound, whose connection (see Gen. 11:9.) cannot easily be accounted for on any other principle, than their derivation from a common biliteral root 52, of which the first letter is reduplicated in the noun, and the second in the verb.

§ 116. In addition to the primitive biliterals, which are formed in the different modes above described into secondary triliteral roots, both in order to keep up the analogy of the language, and to express with con-

^{*} There are also some instances in which the insertion of the liquid b is equivalent to that of ז, e. g. אַבְּאָ to press, אַבָּאָ to be darkened.

YOL. I.

ciseness the several modifications of the same idea, there are some which have retained their original length, as for instance the following titles of relationship, as father, as mother, as on, as brother.

§ 117. The reason why such and such sounds have been employed to express certain ideas, it is not always easy to determine, except in the case of onomatopees. To this class belong evidently the Hebrew biliteral roots 77 = 77 = 77 = 77 given above, and which are found to exist in a more or less modified form throughout the European as well as the Oriental tongues. Besides biliteral onomatopees, we meet also with triliterals diffused to an equal extent; thus in a great number of languages we find the three hard consonants BRK with their cognates expressing the idea to break, and which form a palpable imitation of the sound attending the fracture of any solid substance. The

^{*} These two words were held by Simonis, with the lexicographers who preceded him, to be derivatives from the verb אָבָה and the factitious root מַבָּא; an opinion originating doubtless in the forms which they assume in the course of inflection. These etymologies have however been very properly rejected by Gesenius, who considers the words for whose origin they are intended to account, as mere imitations of the first articulate sounds produced by a young child in calling to the objects of its affections, and which sounds, from the yet imperfect state of its organs of speech, are of necessity labials. In order to prove the truth of this theory, we have only to make the comparison between these and the corresponding words in other languages. And no one, we think, can fail of being convinced, that the striking uniformity found to prevail in this particular, through not only the Shemitish languages, but also those of the Indo-European family, can be produced only by some cause existing in nature. distinction between these two classes of languages in respect to the words under consideration, will be found to consist in the fact, that in the former they are produced by closing the lips, thus ab (ap), am; and in the latter by opening them, thus pa (ba, fa), ma. These simple sounds we find employed either in their nude form or with a variable termination. Thus in Sanscrit we have the roots $p\bar{a}$, father, $m\bar{a}$, mother, or with the addition of the suffix $tri = Gr. \tau \eta \varrho$, Lat. tor, pītri, nom. pita; and mātri, nom. mata.* In Bengalee, bā, mā, the reduplication baba (or bapa), and with the suffix, omitting the r, as in the Sanscr. nominatives bita and mata. In Russian also the r is dropped, thus batya, mat' (also baba, an old woman, the same onomatopee differently applied. Comp. Eng. baby, Fr. poupée). In Persian, Greek, and Latin with its descendants, the full form of the suffix is retained; thus, Pers. μασα, μασας Gr. πασής, μάτης; Lat. pater, mater; Span. and Ital. padre, madre; Fr. (in which

[•] We by no means agree to the opinion of Prof. Bopp, who maintains that these nouns are derived from the roots PA, to preserve, and NIRMA. to make, form (Krit. Gram. d. Sanskr. Sprache, note to p. 64.); for we consider the true state of the case to be the direct reverse, viz. that the nouns are onomatopees, and that from these the verbs are derived.

following examples may suffice: Heb. פְּרַח, בְּרַח, בְּרַח, בְּרַח, בְּרָח, בְּרָח, בְּרָח, בִּרָח, בִּרָח, בִּרָח, בִּרָח, אַבָּרָח, בִּרָּח, יִּבְּרָּח, יִּבְּרָּח, אַבָּרָח, בּרָח, Sanser. pra, baraha; Gr. βράχω, βράσσω; Lat. fra(n)go (fregi, fractum), Icel. braken, Goth. brickan, Germ. brechen, Fr. briser (brèche), Eng. break.

- § 118. I. The retention of the triliteral form of words, although a prevailing feature of the Hebrew, was still not exclusively observed. For we find, notwithstanding, some nouns which are derived from verbal roots by the addition of one or more letters: thus from אַכֶל to eat, besides אַכֶל פּמָר, אַכִּל, אַכְלֶּלָּה eater, &c., we have מַמְּבֶל food, אַבְּלֶּלֶּה foed, אַבְּלֶלֶּה a knife; so too from אַבָּל to open, besides מַמְּבֶל מַּמְלֵּלֶה insight, we have מְּבִּלְהָה a drawn sword, אַבְּלָה an opening, אַבְּלָה מַ a key.
- 2. Again, there are words of four letters formed by the reduplication of a biliteral, e. g. קליקל ruby, קליקל crown of the head, קליקל mean (victuals): and words of five letters formed by repeating the last two

the lingual is dropped) père, mère. The Portuguese approaches nearer the simple form, thus pay, may. In the Teutonic languages the b is exchanged for the softer labials f and v, e.g. Germ. vater, mutter; Sax. fader, modor; Eng. father, mother.

The Shemitish languages express both labials by means of a preceding vowel, e. g. Heb. and Chald. A, E (TAM maid-servant); Syr. L abo, L amo; amo; Eth. An eb, A am; Arab. Arab. Arab. omm; comp. Hung. apa, Lat. avus. For the sake of perspicuity, we will give the whole at one view.

of a triliteral root, e. g. אָפַרְפַּקּ הָיסּגּפּל, הַפּרְבָּקּ crooked, אָנְרָהֹר blackish; by inserting or affixing a liquid, e. g. אָנָהָ to be angry, שָׁבָּר be angry, שֶׁבָּר be angry, שֶׁבָּר be angry, בֶּרְבָּר be angry, be angry

3. A few words are to be met with formed of two others, each retaining its own meaning in the compound, e. g. דְּבֶּרְטָרֶת court of death, בְּלְטָרֶת shadow of death; and others in which the two meanings are as it were fused together to form a new one, e. g. בַּבְּרְבָּיֵבְ frog, from בַּבְּ to leap, and בְּבֶר marsh; שֵׁלְהֶבֶת flame, from צֻׁ fire, and לַהֶבֶּת flame.

GRAMMATICAL STRUCTURE.

§ 119. By the term Grammatical Structure is intended the mode of exhibiting the relations which words denoting actions or existences bear to one another, according to the genius of each particular language. This is in general effected either by means of separate words called particles; or by external changes in the original words themselves, i. e. the addition of certain letters to the beginning or end; or by internal changes in the vowels or consonants of these words. In the Hebrew, these different methods are all alternately employed. 1st. Relations are denoted by means of particles, constituting separate words, and derived mostly from nominal or verbal roots, as על, מך, אל &c. 2dly. By means of additions to the beginning, consisting of a mere preformative letter or syllable, e. g. בתקשל, הקשיל , נקשל , נקשל : or of a fragment of a verb, noun, or pronoun; as for instance, the article and interrogative I, I conjunctive and conversive, &c.; the inseparable prepositions 2, 5, &c.; the pronominal prefixes of verbs, e. g. יקטל, יקטל, &c. 3dly. By additions to the end, viz. the fragments of the personal pronouns affixed to verbs or nouns, e. g. קטל, י קטַלְתִּר , קַטַלְתִּר , בֵּיתִר ; בּיתִר ; סְטַלְתִּר , קַטַלְתִּר , קַטַלְתִּר , קַטַלְתִּר , קַטַלְתִּר , e. g. נְרוֹת ,נֵר; דְּבָרִים, 4thly. By internal changes, generally of the vowels, e. g. קטל, קטל, קטל, דָבַר, דָבַר, דָבַר, All these we shall now discuss at length, beginning with the Personal Pronouns.

CHAPTER II.

PERSONAL PRONOUNS.

§ 120. In Hebrew, as in other languages, there is a class of words employed to designate existences by their relative position with regard to the discourse; and these words may be used instead of the specific names of the objects alluded to, whenever such objects are present or have been previously mentioned by their appropriate appellations, so that no ambiguity can arise. On this account they have been called pronouns (Lat. pronomina, for-names): and as grammarians looked upon the persons or things mentioned in discourse as playing different parts or characters, according to their position as respects the act of speaking, they applied to the class of words especially intended to mark such relation, the epithet of personal (from Lat. persona, a character, part).

§ 121. Of these parts or persons there are three: the first is used to represent the speaker; the second, the party addressed; and the third, an object which is in neither one nor the other of these predicaments.* In Hebrew there are not only separate pronouns for the first, second, and third persons, both singular and plural; but, while the first person of either number is used indiscriminately to denote both genders, the second and third persons, singular and plural, have separate terms for masculine and feminine, making thus five in each number.

^{*} See Harris's Hermes, b. 5. c. 1.

§ 123. The Separable Pronouns are as follows.

Singular.

First pers. com. אָבֶּבְּי or אָבָּבְּי. One or the other of these full forms of the first pers. is used indifferently whenever the pronoun constitutes a word by itself. Of the letters composing them, is the principal consonant, and in the principal vowel, which are all that is retained of the pronoun of this person when affixed in the accusative to a verb, e. g. אַבְּבְּיִבְּי he killed me. When added in the genitive case to a noun, in alone is preserved, e. g. אַבְּבִּי a voice, אֹבְיִבְּי the voice of me, or my voice.

Sec. pers. masc. The.

The principal element of the second pers. is n; and this letter—th or t—is the radical consonant of the sec. pers. sing. in most languages, though accompanied by different vowels, e. g. Gr. $\sigma \dot{v}$ (Dor. $\tau \dot{v}$), Lat. tu, Eng. thou, Welsh ti, &c. The x in the beginning and 7 at the end, are to be considered as mere serviles, whose use is to aid in forming a full word. When, therefore, the pron. of the sec. pers. m. sing. is to be affixed to a verb, the letter n alone is employed; thus קָטֵלָהַ, which, however, does not mean he has killed thee (m.), but thou (m.) hast killed. Consequently for the accusative of this pronoun it was necessary to employ some other suffix, and the one chosen is ק; thus קמלק he has killed thee (m.); the same is made use of for the genitive case of the pron. attached to nouns, e. g. קוֹלָה the voice of thee (m.), or thy voice. See § 73. 2. c.

Sec. pers. fem. אַהְּר יח אַהְּר ה As the letter ה denotes the second person, it is employed to represent the fem. as well as the masc. The only distinction between the forms for the two genders is, that while the masc. is accompanied by (,), the fem. is either altogether destitute of a vowel, or the semi-vowel , as the characteristic of the fem. (see

under the pron. of the third pers. fem. sing.) is affixed to the end of the word for the third letter, which originally must have been pronounced with a preceding (), thus אָלָּי, and although this characteristic vowel came in after-times to be generally rejected as superfluous, the Daghesh inserted as in the masculine אָלָי, by § 33. 1. is still retained. To express, therefore, the sec. pers. fem., אָן is added to the verbal root, e. g. אַבְּיבָי thou (f.) hast killed: for the accusative, אָן is subjoined, thus אָבְיבָ he killed thee (f.); and also for the genitive, e. g.

Third pers. masc. &TT.

Here the principal letter is א, the prefixed א and final א being serviles: and hence א alone affixed to verbs represents the accusative of this pronoun, thus אָקְבֶּיל he killed him; and to nouns, the genitive, e. g. אוֹן the voice of him, or his voice.

Third pers. fem. הָרא or הָרא.

As 7 is the principal letter of the third person, it is employed in both genders; the distinction between which, as in the second person, is made by the vowels: thus in the masc., T is accompanied by the vowel homogeneous to γ , viz. u; while in the fem. it takes the characteristic of the fem. gender, i (see § 127). So that in the word ל, הרא denotes the third person, and the vowel () the fem. of that person. This form is used in the Pentateuch almost exclusively; but as \(\) is here preceded by the vowel (), which is heterogeneous to it, and in which therefore it cannot rest (§ 93. 2. c.), it is generally changed in the later portions of the Sacred Writings into its cognate 7, which is homogeneous to (); whence arises the form אהרא. As has been taken as the suffix of the third pers. sing. masc., the preceding 7, which letter also forms the fem. termination in nouns and the preterite of verbs (e. g. אלש a man, השה a woman ; לשם he killed, השם she killed),

is used, with the insertion of a Mappik for the sake of contradistinction from the fem. term., to represent the accusative of the fem. when attached to verbs, e. g. קטָלה he killed her, and the genitive when added to nouns, e. g. הלקה the voice of her, or her voice.

Plural.

First pers. com. (אָנָה)* לָחָוֹנָה †, אַנַהְוּנָה . In all these forms we perceive that : is the principal letter of the first person plural as well as singular; with this difference, that in the plural it takes the vowel Shurek, and is sometimes reduplicated with an inserted The final syllable is the principal part of the first person plural, and is all that is retained when this pron. is affixed to a verb, either as its subject, e. g. קטלנד we have killed, or, preceded by (ַ), as its object, e. g. קטלנה he has killed us; and the same syllable is employed with the vowel of union () as the genitive of the pron. when affixed to nouns, e. g. קולנה the voice of us, or our voice.

Sec. pers. masc. Dan.

The masc. plur. of this person is regularly formed from the singular by the addition of the plur. term. בּים, thus אַתּים, which by the rejection of ¬ becomes ¬ becomes ¬ (§§ 100. note, 101. 2. a.). The principal letters of the sec. pers. plur. are םח, of which ה denotes the person, and the number; and hence these are added to a verb to express its subject, e. g. קטַלְהָם you (m.) have killed; while, as in the sing., the letter I is for contradistinction's sake replaced by 5, when this pron. is affixed in the accusative to a verb, e. g. קטלכם he killed you (m.); or in the genitive to a noun, e. g. קוֹלֶכֶם the voice of you (m.), or your voice.

^{*} אַכֹּהְ appears only Jer. 42:6., where the K'ri has אַכֹּהְ

[†] Found in only six places of the Bible, viz. Gen. 42:11. Ex. 16:7, 8. Num. 32:32. 2 Sam. 17:12. Lam. 3:42.

Sec. pers. fem. אַקּהָה or אַקּהָה. The distinction of gender is here made by changing the plur. term. a into its cognate liquid 7. Accordingly the syllable 7 added to a verb denotes the sec. pers. plur. fem., e. g. you (f.) have killed: while כן (see masc. form above) is employed to represent the accusative case when joined to verbs, e. g. קטלכן he killed you (f.); and the genitive when affixed to nouns, e. g. קוֹלכֵן the voice of you, or your (f.) voice. To this pers. is often added a paragogic 77, which rests in the vowel () taken by ב, thus אתנה.

Third pers. masc. an or near. This person likewise consists of its singular with the addition of the plural term. בים. As the word has undergone some changes in other respects, this is not quite obvious at first sight: the form, however, which it assumes may be thus accounted for. On receiving the plural termination, this would be הַרָּרִם; but when in the middle of a word is preceded by a consonant without a vowel, it gives its own vowel to such preceding consonant, and is then rejected ($\S\S$ 77. 3., 93. 3. b.): so that we now have the form הים, which, on being still further contracted as in the sec. pers. by the rejection of , becomes Da. The form of this pronoun. when attached to the verb as its subject, would according to analogy (see the third pers. m. sing. and sec. pers. m. plur.) be b; and this, transposing the two letters, is the form actually employed in poetry for the accusative, e. g. קטלמוֹ he killed them (m.). But as ב is used as the suffix of this person in the accusative, e. g. קטלום they killed them (m.), to avoid ambiguity it is generally changed into its cognate 7: this letter in the future generally, and in the preterite almost always, is rejected as superfluous, and alone is retained, which, to distinguish it from the accusative singular, is pointed with Shurek, e. g. אַטָלר they (m.) killed. When

affixed in the genitive to nouns, the form \Box is employed, e. g. \Box the voice of them, or their (m.) voice. When this pron. receives a parag. \Box , as the \Box is employed in enunciating the (,) by which this parag. letter is regularly preceded, a Daghesh is inserted in \Box , in order that the original mixed syllable may be preserved; and hence the alternate form \Box \Box .

Third pers. fem. הבה or הבה. Here, as in the sec. pers., ה is changed into א ליב, to distinguish the gender. In the verbs the suffix of this pers. and numb. is common, meaning also they (f.) have killed; the accusative is represented by א היי, thus א קטילן the voice of them, or their (f.) voice. Sometimes with ה parag., thus

Table of Separable Personal Pronouns.

REMARKS ON THE PERSONAL PRONOUNS.

§ 124. For the sake of corroborating the statements we have made concerning the formation of the Personal Pronouns, by showing the extent to which the principles there set forth prevail, we will now enter briefly into a comparison of this part of speech as it appears in the Shemitish and in the principal Indo-European languages. At the same time the connection existing between the two families of languages the most interesting and important to us in every point of view, is proved by means of these primitive and indigenous words (and still more clearly by the personal terminations of verbs, which are composed of the same elements in the main) to be much closer than has hitherto generally been supposed.

First Person Singular.

§ 125. That constant of the pronoun of the first person singular, is evident from the constancy with which it is retained in so many and such widely different languages: thus, in those of the Shemitish family we have Heb. אָבָּבָּר, or with an inserted palatal אָבָּבָּר, Anok. Comp. Gr. ἐγώ, Germ. ich, &c.), Chald. אָבָּבָּר, Syr. בְּבָּר, Arab. בְּבָּר, Eth. אֹב. In the oblique cases, and occasionally in the nominative, n or its cognate m maintains its place also in the Indo European languages, e. g. Sanscr. nom. aham (Zend azem, Eol. ἐγών, Dor. ἐγώνη), accus. ma, Beng. ame or mui, Pers. , Russ. menya, Gr. μέ, Lat. Sp. Fr. me, Goth. mik, Germ. mich, Sax. and Eng. me (Erse me, Welsh mi); and likewise in the personal endings of verbs, to exhibit which we will take the verb to be, as one of the most highly inflected, e. g. Sanscr. asmi, Pers. , Russ. yesm', Gr. εἰμί, Lat. sum, Goth. īm, Germ. bin, Sax. eom, Eng. am, Welsh wyv (see § 73.1.e.).

The principal vowel, as we have already observed, is -, i or y, which occurs in the Indo-European languages either without a palatal, e. g. Russ. ya, Span. yo, Fr. je, Eng. I (comp. Copt. suff. 5); or with one, e. g. Gr. ἐγώ, Lat. ego, Dan. yeg, Goth. and Sax. ik, Germ. ich.

Second Person Singular.

לָנְם לּלְּבָּה The principal element of the pronoun of the second person is n, th or t; and this is retained with great uniformity in both families of languages. Shemitish: as separable pronoun, Heb. m. אַרָּהָ הַּ , Chald. m. אַרָּהָ הַ , Syr. m. בּיִבּי הַ , אַרָּהָר הַ , אַרָּהָר הַ , אַרָּהָר הַ , בּיִבְּי הַ , אַרָּהָר הַ , בּיִבְּי הַ , אַרָּהָר הַ , בּיִבְּי הַ , אַרָּהָר הַ , בּיִבְּי הַ , בּיבְּי הַ , בּיבְּ הַ , בּיבְי הַ , בּיבְּי הַ , בּיבְּי הַ , בּיבְי הַ , בּיבּי הָ , בּיבְי הַ , בּיבְי הַ , בּיבּי הָ , בּיבּי , בּיב , בּיבּי , בּיב היים , ביב היים , בי

Third Person Singular.

§ 127. The principal part of the third person is preceded by an aspirate, which \(\gamma\) remains constant in the masculine through the whole Shemitish family, e. g. Nan, Chald. an, Syr. on, Arab. o, Eth. Φ λ r (also Zend ho, Pers. , Gr. o. Comp. Copt. noog, suff. q, see § 73. 1. e.). In the feminine, however, this is changed by the influence of the fem. vowel i (§ 93. 2. c.) into הרא, e. g. Heb. הרא, Chald. הָּל, Syr. בֹּס, Arab. בָּס, Eth. Pat. That i is the appropriate vowel of the fem. is evident from its use as the characteristic of this gender of the sec. pers. sing. in the Shemitish languages. In Sanscrit and Bengalee also it is regularly employed in forming feminine from masculine nouns, e. g. Sanscr. deva god, devi goddess; nara man, nari woman; ragan king, ragni queen; and also adjectives, e.g. suntara pulcher, suntari pulchra: Beng. puttra son, puttri, daughter. Again, we have Lith. m. essant (Lat. ens) f. essanti; Gr. f. ή, Germ. die, sie: and for the pronoun of the third person in the Celtic dialects, Erse m. se, f. si or i (ר); Welsh m. evo (הרא) or o (ז), f. hi (הרא). As the third pers. sing. of the preterite is considered as the primary part of the Shemitish verb (see § 153), it receives no afformative except the fem. char. 7.

In the Indo-European languages, the sibilant appears to have been regarded as the essential part of the pronoun of this person, and this is either retained in the simple and original form s, or hardened into the lingual t or th (see § 73. 2. b.), or exchanged for its related aspirate h (§ 73. 2. d.), e. g. Sanscr. sah, $s\bar{a}$, tad (comp. the reflexives, Russ. sya, Lat. Fr. se, Dan. sig, Germ. sich), Goth. sa, so, thata, Germ. er, sie, es; Zend. ho, ha, tat, Gr. δ , $\hat{\eta}$, $\tau\delta$, Sax. he, heo, hit, Eng. he, she, it. This obtains with greater regularity in the personal terminations of verbs, e. g. Sanscr. asti, Pers. he, h

First Person Plural.

§ 128. The characteristic of the first person retains its place also in the plural, which is distinguished from the singular by the reduplication of this letter, and the insertion of a guttural, equivalent (see § 73. 2. a.) to that of the palatal in the singular, e. g. Heb. אַבַּחָבָּא, Chald. אַבַּחָבָּא, Syr.

בשליה, Arab. בשליה, Eth. 373 (Copt. Anon, suff. n or en). In the personal endings of verbs is retained, e. g. Heb. קטליה, Chald. איים איים, Chald. איים איים, Arab. פֿישליה, Eth. איים איים, Eth. איים, Eth. איים, The Indo-European languages the distinction between the numbers is made by taking a different vowel in the plural, or by changing n into m, or vice versâ, e. g. Sanscr. (acc.) nas, Zend. no, Pers איים, Russ. mü (gen. nas), Gr. איים איים, Lat. nos, Ital. no, Sp. nosotros, Fr. nous (Erse sinn or inn, Welsh ni or nyni). In these languages also the fragmentary pronoun regularly appears in the verb, e. g. Sanscr. smas, Pers. איים, Russ. yesmü, Gr. ἐσμέν, Lat. sumus, Sp. somos, Fr. sommes, Goth. siyum, Welsh ym.

Second Person Plural.

Third Person Plural.

Arab. m. يَقْتُلُن f. يَقْتُلُن In Indo-European verbs, the plural n is generally retained in the termination of the third person, e. g. Sanscr. santi, Pers. اند, Gr. عَنْوَانُه, Lat. sunt, Sp. son, Fr. sont, Goth. Germ. sind, Sax. synd (syndon), Welsh ynt.

CHAPTER III.

THE VERBS.

§ 131. A Verb (Heb. is action) is a word which designates a state either of action, passion, or being. Now as we can conceive of no object which is not in one or the other of these states, and as we never make mention of an object without at the same time expressing this state, or rather as we mention it only for the purpose of intimating its state of action, passion, or being, the verb is an indispensable element in every proposition, of which it is as it were the animating principle. It is therefore in every language the most important part of speech; which is very appropriately intimated by its Latin name verbum, or word (par excellence).*

§ 132. In no language has the verb a greater claim to this superiority than in the Hebrew: since here it not only gives life to discourse by its own use and signification, but likewise furnishes the principal elements which enter into the composition of many other words, as well nouns as particles; while the verb can be considered only in a very few cases as derived from any other part of speech. All verbs, therefore, with but a trifling number of exceptions, are to be looked upon as primitive words, i. e. as words whose original or primary use is to signify a state of action or of being, either without any accessory idea, as אַבָּל to kill, אַבָּל to break, בּל to reign, &c., or with some modification of the simple meaning, e. g. bo nurder, אוני to shiver

^{*} Chinese grammarians divide the characters in their language which represent notional words into two classes, viz. nouns and verbs; the former they call dead, the latter living characters.

(in pieces), הְמִלְּהָן to cause to reign. A few verbs, as was said before, are held to be derived from nouns, e. g. קר to sow (Lat. semin-are), from קר seed; אַשָּׁהְ to become green, to flourish, from אַשֶּׁהֶ grass; but in the great majority of cases, nouns are indubitably derivatives from the verbs of the same radical letters, e. g. אָבֶה a king, from הַבְּע to reign; מַבֶּהְת a breach, from שָׁבֶּר to break; הַבְּתְּהָה a key, from הַבָּע to open, &c. The same is the case with the particles, e. g. עובה to ascend; בונה to divide.

§ 133. As the verb is the primitive part of speech, from which the others are derived, it is exhibited in the simplest form, which appropriately designates the simplest meaning, it consisting of only three letters. These letters, which are all consonants, cannot be enunciated without the assistance of a vowel; and it is but natural to conclude that the primary and most simple significations of the verb should take the simplest vowel. And accordingly, as the denoting of a state of action is the peculiar and natural office of this part of speech, whilst to signify a state of being is comparatively a secondary one, and as a is the simplest of all the vowel sounds (§ 10. 1.), we find that active verbs take a for their second and principal vowel (see § 113), e. g. Sup to kill; and neuter verbs, one of its modifications e or o (§ 10. 3.), e. g. The to sleep, The to be old; The be small, the property of the small, the beable.*

§ 134. To these original letters of the verb are added others, for the purpose of indicating its modifications; and thus a verb of which the radical meaning is denoted by only three letters, appears in its modified acceptations with four or five, of which the original three express the idea of the verb, and the additional ones the modifications of that idea. As it is frequently necessary for grammatical purposes to make a distinction between these two classes of letters, the first kind, as constituting the stem or root of the verb, are termed radicals; while the second, from their subordinate use in modifying the simple meaning, have received the name of serviles (see § 8).

^{*} The same difference in the vowels of the second radical of active and neuter verbs is found in Arabic: thus, active verbs take the vowel (´), e. g. \vec{b} to kill: and neuter verbs either () or ('); those which take the former vowel denoting a temporary state of being, e. g. \vec{b} to be sorrowful; \vec{b} to be merry; and those receiving the latter, a permanent one, e. g. \vec{b} to be bad, \vec{b} to be handsome.

SPECIES.

ל אונונים structures) of the Hebrew verb, and the manner of their formation. The original or nude form of the verb, accompanied by the simplest vowel a, expresses, as above stated, its simple meaning actively, as מַטֵּל to kill; the passive of which is designated by the prefixed augment; thus מַטֵּל to be killed. Intensity of this primary signification, whether active or passive, is denoted by a reduplication of one of the radical letters, generally the second, made by inserting Daghesh forte, as מַטֵּל to kill with violence, to murder, מַטֵּל to be murdered. A causative signification is superadded to the meaning of the root active and passive by prefixing the letter אונונים, to cause to kill, אונונים to be caused to kill. And to give a reflexive force, the syllable אונונים to kill one's self, commit suicide.

Thus we have the following seven forms or species in which a verb may appear:*

to kill. I. Simple active, as to be killed. passive, to murder. III. Intensive active, IV. passive, to be murdered. to cause to kill. V. Causative active, VI. * passive, הַקְמֵל to be caused to kill. VII. Reflexive, to kill one's self.

§ 136. The technical names given to these species by grammarians are as follows:

The First is called the Kal species. Second Niph'hal Third " Pi³hel46 Fourth $Pu^{\circ}hal$ " Fifth Hiph'hil " Sixth Hoph'hal Seventh " Hithpa'hel

^{*} We say "may appear;" for though most verbs are found in more than one of these species, yet the number of those whose signification admits of their being used in all is exceedingly limited.

The origin of these terms is this. The first investigators of the language, who were Jews, wrote in Hebrew, and accordingly employed Hebrew expressions for the designation of grammatical phenomena. To denote the first or simple species, they used the word אבן (Kal) light, simple; a term which modern grammarians have found it convenient to retain. And to represent the remaining species, they took the modifications of the verb אבן to do, to make, which itself supplies the name for this part of speech: thus, instead of a term derived from the signification of that form of the verb which receives the prefix אבן such as the word passive, they employed, as a sort of grammatical formula, the corresponding modification of the verb אבן אונה (Niph'hál); and so on of the rest. Thus the third form is called אבן (Pi'hél), the fourth אבן (Pu'hál), the fifth אבן (Hiph'híl), the sixth אבן (Hoph'hál), and the seventh אבן (Hithpa'hél).

ל 137. From this use of the verb אָבָּהְ, אוֹבּ have arisen likewise the technical expressions, "verbs אַבּ, אָבָּ, אָבָּ, אֹבָּ, אָבָּ," &c., which the learner will frequently meet with: for as the early grammarians took that verb as a model for the inflection of all other verbs whatsoever, so they also named the component parts of every verb from the corresponding elements of the verb אַבָּבְּ, Thus the expression "verbs אַבָּ," signifies those verbs in which the letter answering to the בּ סַל בְּבָּבְ, i. e. the first radical, is אַ: "verbs אַבָּ," those whose second radical is אַ, and so on. We must, however, except the term "verbs אַבָּ," which means, not that the second radical letter is בַּ but that the third radical is like the second; as resembling the factitious form בַּ בַּרַבּ

FORMATION AND SIGNIFICATION OF THE SPECIES.

I. Formation of Kal.

§ 138. Every verb which has no peculiarity in its consonants to affect the vowels by which it is accompanied, receives in this species a Kamets under the first radical letter, and a Pattahh under the second,

^{*} There are two peculiarities in the letters constituting the verb , which render it extremely improper to be used as a standard for the inflection of other verbs: viz. the first radical is a הַבֶּר"בִם letter, and consequently requires in certain cases (§ 38. et seqq.) the insertion of a Daghesh lene; and the second is a guttural, and therefore cannot admit the Daghesh forte which according to § 129. it should receive. We have accordingly followed the example of most of the Vol. I.

if its signification is transitive; if intransitive, the second radical takes either Tsere or Hholem (§ 133). These are the ordinary forms, which however are differently modified to suit the peculiarities of various letters. Thus, in those verbs among whose radicals are found one or more weak letters, which cannot be accompanied by every vowel, or end a mixed syllable, some change takes place in the formation, by which the difficulty is obviated.

1. If the first radical is א, whenever, as in this species, it should commence the word accompanied by the vowel a, it is changed into its comparatively strong cognate letter א, e. g. דָלַר instead of דָלַר (§ 92. 1. b.).

2. When the second letter of the root is א, in case it would be accompanied by a, it is rejected together with its heterogeneous vowel, e. g. אוֹר for מוֹר ; if it would be accompanied by e, it is rejected, and the e placed for distinction's sake under the first radical, e. g. מֵרְהַ ; and if by its homogeneous vowel o, א רביה for אוֹר (§ 93. 1. 2. b.).

3. If the second and third radical letters are alike, they will be contracted into one, e. g. In for I (§ 77. 1. a.).

4. If the third radical is either א or ה, as these letters rest in the vowel a, they will cause the preceding Pattahh to be lengthened into Kamets, e. g. אַרָה הָבָה for הָבָּל (§ 102. 3. a.).

The verb then in its simple state may appear, according to the letters of which it is composed, in all the following different ways: זָבֶר, קְבֵּל, קָבֶר, (סָב, (for בַּבָר, קִבֶּר, (סָב, (for בַּבָר, קִבָּר, קָבָר, קָבָר, קָבָר, קָבָר, קָבָר, קָבָר, קַבָּר, קַבָּר, קַבָּר, קַבָּר, הַבָּרָא, מָבַר.

Signification of Kal.

§ 139. The signification of the Kal species is, as we have already stated, the simple idea of the verb without any modification whatever.*

later grammarians in taking as a model of inflection the verb > , which, as there is nothing in its radical letters to cause a change in the pointing, and as its signification admits of its being varied through all the species, is for this purpose entirely unexceptionable.

^{*} We say without any modification whatever, because in this preliminary account of the species, we shall omit all consideration of modes, tenses, &c., and speak only of the third pers. masc. sing. of the preterite. See § 160.

II. Formation of Niph'hal.

- § 140. The characteristic of this species is the letter : invariably prefixed to the verb in its simple state, e. g. original form of Kal אַבְּיבָּי (§ 113), Niph. בְּיבְיבִי ; but as two Sh'was cannot concur at the beginning of a word, the first of them is changed into the shortest vowel i (see § 104. 4. b.), whence we have בְּיבָי . These vowels are retained as long as there is nothing in the nature of the radical letters which is opposed to them; but when this is not the case, various changes are made in the vowels, to accommodate them to the consonants. They are as follows:
- 1. If the first radical is a guttural, which cannot readily be made audible at the end of a syllable, especially after the very short vowel \tilde{i} , (§§ 84. 2. 102. 1. a.), the \tilde{i} under \tilde{i} is changed into the longest among the short vowels \tilde{e} (§ 84. 2.), and the guttural takes the corresponding compound Sh'wa (\tilde{i}), e. g. קעבר for בעבר.
- 2. When the first radical letter is the liquid 2, it is assimilated to the following radical, and then rejected (§ 77. 2.), e. g. בּנָנָה for בֹּנָנָה.
- 3. When the first radical is א, which in Kal is changed into א (§ 138. 1.), it is restored in Niph'hal, and rests in its homogeneous vowel Hholem, e. g. נְלְכֶּדְ for בּוֹלֶבְּדְ.
- 4. When the second radical is א, instead of the usual Pattahh, it takes its homogeneous vowel Hholem, in which it rests. As the first radical has now a vowel of its own, it becomes necessary that the prefix should take a long vowel, in order to form a simple syllable; and the one adopted is in general the simplest, viz. a, e. g. מַלְנִבּר ; though occasionally e is chosen, e. g. מַלֵּנְר See § 93. 3. b.
- 5. When the third radical letter is like the second, in which case they are both contracted into one, and the first takes the vowel of the second, the preformative increasingly, as in the preceding instance, takes a long vowel, which is always a, e. g. if or interest in the preceding instance,
- 6. If the third radical is either א or ה, both of which rest in a preceding vowel, as in Kal so in this species, the short vowel (_) is lengthened into its corresponding (_,), e. g. אַבְהָה for בַּנְלָה , הַמְצַא , הַמְצַה for בּנְלָה , הַמְצַא .

-111

Signification of Niph'hal.

- § 141. This species in its original signification denotes a directing of the action upon the subject: whence it is employed,
- 1. As the passive of Kal, e. g. קְטֵל to kill, נְתְב to be killed; פָתַב to write, נַתְב to be written.
- 2. a. To express an action performed by the subject upon himself, or reflexive, e. g. מָבֶּבֶּב to hide one's self, נְשִׁבֶּב to hire one's self out.*
- * Grammarians are not agreed as to which should be considered the primary signification of the Niph'hul species. The older writers, and with them Gesenius, hold that this was originally the passive of the simple form Kal, and that hence its use as a reflexive was derived; while others, as Ewald and his followers, maintain that the reflexive was the primary force of this species, and the passive the derived one. That the former is the correct opinion will, we think, sufficiently appear from the following considerations.
- 1. If, for the sake of illustration, we suppose the original meaning of Niph'hal to have been passive, that is, expressing the receiving, in opposition to Kal, which denotes the performing of an action, the use of this species as a reflexive will naturally follow; for a reflexive likewise signifies the suffering or receiving of an action, with the accessory idea that the subject of the verb is agent as well as patient. Hence any reflexive verb may be rendered passively, if the attention be directed more upon the action than upon the agent: thus, he loves himself is equivalent to he is loved, scil. by himself. And herein lies the distinction between Niph'hal when it may be translated reflexively and Hithpa hel (q. v. infra), which latter is specially devoted to that modification of the radical meaning. Thus in Gen. 3:8, where the actors are the most prominent in the narration, and the intention is to relate not so much what was done as what they did, the Hithpa'hel species is employed: מַלְּהַחָבֵא הַאָּרֶם וְאָשׁתוֹ and Adam hid himself, and also his wife. Again, in the tenth verse, God said to Adam, " Where art thou?" to which the latter answered, "I was afraid באַרַבָּא and I hid myself." Here no information is required respecting the subject of the verb, which the Lord himself states to be Adam; and he accordingly replies by a verb in which the action predominates over the agent : אַבְּקָשָּׁ, literally I was hidden, scil. by myself. If, on the other hand, we consider, with Ewald and those of his school, that the primary signification of Niph'hal is reflexive, we shall find much more difficulty in deriving from it the secondary or passive meaning; for although all reflexive verbs may be rendered by passives, which is merely omitting to indicate the agent, there are a multitude of passive verbs which do not admit of being construed reflexively, as it is frequently impossible that the agent and patient of the verb should coincide, e. g. אַבָּשָׁ to hear, אַבָּשׁיָ it (a voice) was heard, בַחַב to write, בַּהָב it was written; but never, it hears or writes itself.

b. To designate a compound or reciprocal action, viz. one in which two or more subjects mutually act upon each other, e. g. בַּלְחָם to fight, to contend, combat; יְבַעץ to advise, נוֹפַע to take counsel together; to judge, שַּׁפֵּט to go to law together, to litigate.

3. To represent a state or action as the consequence of a suffering or the receiving of an action; and hence it is that verbs bearing this import generally appear in the Niph'hal species alone (see above, sig. 1.), e. g. אַנָּאָנָן to sigh. to lean (i. e. be supported). Or, if they are employed also in other species, the only point in which the significations of Kal and Niph'hal differ, is that while the former

These facts and arguments are of so convincing a nature, that we feel entirely at a loss to account for the pertinacity and vehemence with which a writer of the well known ability of M. Ewald attempts to support the opposite side of the question. He exclaims, "How can DE: to revenge one's self derive its meaning from a passive signification?" (Krit. Gram. d. Hebr. Sprache, § 103.) We would merely ask in turn, What is the difference between I will revenge myself, and I will be revenged, excepting merely that in the former phrase the agent is indicated (viz. as being identical with the subject of the verb), while in the latter it is not?

^{2.} Another consideration may be brought forward in support of the conclusion at which we have arrived; and this is, that if we take Niph'hal for the passive of Kal, each active species, both primitive and derivative, will then have its corresponding passive, since Hithpa'hel includes both active and passive in itself. But if we consider the primary meaning of this species to be reflexive, we shall then not only have two reflexive forms, Niph'hal and Hithpa'hel, but while the other active species, Pi'hel and Hiph'hil, are each provided with a passive, the primary form Kal will be left destitute of one.

^{3.} A comparison of the Hebrew Niph'hal with the corresponding species in the cognate dialects, affords additional proof of the correctness of these views. Thus in Arabic, the primary meaning of the seventh species, which is likewise marked by a prefixed Nun, is passive, e. g. I. List to kill, VII. to be killed. In Chaldee and Syriac there is no form especially devoted to the reflexive, which when required is expressed by the passive, e. g. First, he was killed (scil. by another or by himself). In Latin also a reflexive signification, for which there is no separate form of the verb, is sometimes denoted by the passive, thus versari, to be turned, or to turn or employ one's self. The Greek has a particular form or voice for the reflexive, viz. the middle, which likewise is formed from the passive (but never the passive from the middle); and from this it differs only in the future and aorist, the other tenses of the reflexive being expressed by the pure passive, e. g. λούω τινά I bathe one, λοῦμαι I bathe myself, lit. I am bathed, scil. by myself; στέλλειν to send, στέλλεισθαι to travel, send one's self = Heb, Ξὸ.

states the action absolutely, the latter has regard to the time before the action took place or was completed, e. g. לְבֶּלָה to be sick, יַבְּלָה to be sick; so also the substantive verb הָּלְה to be, בְּבְּלָה to become. When Kal is not in use, Niph'hal expresses the passive of Pi'hel or Hiph'hil, e. g. לְבָּלָה to profane, בוֹלֵי to be profaned; בוֹלֵי to be saved. The Niph'hal participle not unfrequently has a signification corresponding to that of the Latin fut. pass. part. in ndus, e. g. בּוֹלֶר to be desired, desirable; בּוֹלְלָה to be feared, terrible; בּוֹלֶלְה to be born, about to be born.

III. Formation of Pi'hel.

- § 142. This species, which is appropriately termed the intensive, is formed by reduplicating one of the letters of the root, on the principle that, as the repetition of a sentence or of a word imparts a greater degree of energy to discourse, so the reduplication of even part of a word may be employed with like effect. The letter selected for reduplication is generally the second radical, whereby the greatest degree of force is obtained; since this letter can thus be made audible in both syllables, which is not the case with either of the others. This reduplication is denoted by Daghesh forte, thus appear (§ 27). And hence the characteristic of the Pi'hel form is a Daghesh inserted in the second radical; the first being accompanied by the shortest vowel (), by means of which the reduplication of the letter following can be the most forcibly expressed (§ 102. 1. b.); and the second taking its cognate long vowel (...).
- § 143. The above is the regular manner of forming the Pi'hel species whenever all the three radicals of the verb are perfect letters (§ 7), as is the case with the root by. But should the second radical be a letter which from its nature does not admit of reduplication, as for instance a guttural (§ 29); or should it be one which is not easily doubled, as the letter γ (§ 93. 4.); or should it be already repeated, as in verbs yy; recourse must then be had to some other expedient, which will serve instead, and at the same time show that the second radical would have been reduplicated, had this not been forbidden by its nature. These objects are effected, according to the letter constituting the second radical, in three separate ways:
- 1. The first consists in lengthening the first vowel, which is generally done when the second radical is a guttural, since the dwelling

longer upon a syllable, by lengthening it, confers an emphasis equivalent to the forcible expulsion of the voice in reduplicating a consonant, e. g. פרק, באר for קרב, באר for קרב.

- 2. When the second radical is א, on account of the weakness of this letter the third is doubled in its stead, and א rests in its homogeneous vowel o (§ 30), e. g. קבם for קוֹם; and occasionally, though seldom, this reduplication of the third radical takes place when the second is a guttural, e. g. רְעֵוּך מְשֵׁרְן זְשֵׁרְן.
- 3. When the second letter is repeated in the root (§ 115), the first is reduplicated in the intensive form, e. g. Kal בְּבָּס, Pi. בְּבָּס, which by transposition (§ 74. 3) becomes בּבָּס. Sometimes the Pi'hel of these verbs is formed by lengthening the first vowel, and then it appears like that of verbs לְבָּר, e. g. Kal בְּבָס, Pi. בּבָּס.

The following are the different forms which this species assumes: אָפָבֶר, הָבֶרָ (for בַּבֶּר, בָּבֶרָ (for בַּבָּר).

Signification of Pi'hel.

§ 144. The significations of Pi'hel are as follows:

- 1. Verbs which are transitive in Kal have in this species the additional idea of intensity, e. g. קטֵל to kill, קטֵל to kill with violence, to murder; שָׁבָר to break, אַבָּע to dash in pieces (to shiver): or of repetition, e. g. אַבָּר to sacrifice, אַבַּר to sacrifice frequently; אַבָּר to narrate.
- 2. Intransitive verbs in like manner acquire intensity, as הַלָּה to go, הַלָּה to pass away, Eccl. 8:10. Hab. 3:11; אַמַד to grow, דְּמֵה to grow luxuriantly.
- 3. Intransitive verbs become transitive, as בְּלֵל to be or become great, to make grow; לְּמֵל to learn, לְמֵל to teach; למֵל to be full, אַלֵּא to fill; אָטָל to be unclean, ממַל to be exceedingly unclean, and hence to defile another, or merely to pronounce unclean.
- 4. By the intensive force of Pi'hel some nouns are as it were animated into verbs, which designate an action performed with that noun, e. g. פֿיָל a root, שֹׁרְשׁ to root up; שְׁלֵּם ashes, וְשֵׁלְ to cleanse from ashes; a bone, עַבֵּם to break the bones; עַבָּם dust, עַבַּם to cast dust.

IV. Formation of Pu'hal.

§ 145. The Pu'hal species is the passive of Pi'hel, and accordingly expresses the idea of the root with intensity in the passive voice. Its

characteristic is also Daghesh forte inscribed in the second radical letter; the first being accompanied by the vowel u, and the second by u, in verbs consisting of three perfect consonants; thus u.

- 1. If however the second radical is a guttural, which cannot receive Daghesh, \check{u} is lengthened into \check{o} (§ 102. 5. a.), e. g. $\exists \dot{z}$.
- 2. If the second radical letter is 7, which does not readily admit Daghesh (§ 93. 4.), the intensity is denoted, as in Pi'hel, by a reduplication of the third; the first radical here also taking the homogeneous vowel of the second, e. g. Dajp.
- 3. If the second and third radicals are the same, either the first, as in Pi'hel, is doubled and transposed with the usual vowels of the species, e. g. $\Box \Box \Box \Box \Box$; or the first takes the vowel \bar{o} , and the second \check{a} , e. g. $\Box \Box \Box \Box$.

Hence we have the following forms of Pu'hal: קְמַל (for קְמַב , קְמַב (for קְמָב , קְמַב , קֹבַב , קֹבַב).

Signification of Pu'hal.

§ 146. The signification of this species, as above stated, is usually the passive of Pi'hel.

V. Formation of Hiph'hil.

- § 147. The fifth species is Hiph'hil, by which a causative meaning is added to the idea expressed by the root; the subject in this species denoting not the immediate performer, but the primary cause or originator of the action. Its characteristic is $\overline{}$ prefixed to the root, accompanied by the vowel $\overline{}$, the second radical receiving $\overline{}$, thus $\overline{}$ to cause to kill. These are the vowels of this species when the root consists of none but perfect letters; but,
- 1. When the first radical is a letter incapable of ending a mixed syllable, as in Niph'hal, the preformative instead of i takes its comparatively long cognate vowel i (§ 84. 2.), e. g. הַאָמִיר for הַּאֲמִיר, הָּחֲדִוּיִל.
- 2. If the first radical is 3, it is assimilated as in Niph'hal to the following letter, and then rejected (§ 77. 2.), e. g. הַבְּּנִישׁ for הַבְּּנִישׁ.
- 3. If in Kal the first radical letter is ר, the original א will be restored in this species, and quiesce in its homogeneous vowel ō, e. g. Kal אָלָשָׁר, Hiph. הוֹשְׁיב.

4. When the second radical is א, it is rejected in this species by § 93. 3. b., and its vowel given to the first; and as this has now a vowel of its own, it cannot without the insertion of Daghesh forte end a mixed syllable: consequently the i of the preformative is lengthened into \bar{e} (§ 102. 1. c.), e. g. הַקְרַם for הַקְרָם. The form is the same where the second and third radicals are alike, with the exception that the first radical also takes \bar{e} , e. g. \bar{e} \bar

The following then are the forms in which Hiph'hil appears : הָּקְטִיל, הָּקְנִים (for הָּקְנִים (for הַבָּנִישׁ (for הַבָּנִים (for הַבְּנִישׁ הַבְּעָרִים).

Signification of Hiph'hil.

- § 148. This species denotes the causing or permitting of the action signified by the primitive Kal. Its force may be said to be twofold, which however does not arise from any diversity in the accessory meaning imparted in Hiph'hil to the root, but depends on the transitive or intransitive nature of the verb itself.
- 2. When Kal is neuter or intransitive, i. e. indicating merely a state of being, or an action which as it does not pass over to an object may be said to reside in the subject, the Hiph'hil species signifies the causing or permitting of such state or action, and is consequently transitive, e. g. בְּבָה to be many, in to make many, to multiply; שִׁבְּי to be holy, הַבִּיל to sanctify; בִּבֹי to fall, הַבִּיל to fell; אוֹם to come, הַבִּיל to bring; בְּבִי to know, הַבִּיל to cause to know, to inform; בִּבִיל to be heavy, hard, הַבִּיך to permit or suffer to be hardened.* In many

^{*} It can scarcely be necessary to suggest to the merest tyro in philology, that although this species is often to be rendered by a verb differing totally in appear-vol. 1.

verbs of this kind also the Kal form is not to be found in the Bible, as to destroy.

3. As Hiph'hil has the power of converting a state of being into one of action, the verbs of this species which are derived from nouns have also an active signification, e. g. אֶדֶּל ear, הַבְּעִד to give ear, to hear; בְּעָד root, הַבְּעִד to take root; בַעָם thunder, בְּעָד to thunder; בְּעָד to cause to rain.

VI. Formation of Hoph'hal.

- § 149. The characteristic of this species, the passive of the preceding, is likewise a prefixed π , which here generally takes the vowel \tilde{o} , and occasionally \tilde{u} ; the second radical being accompanied by \tilde{a} , e. g. בְּשְׁלֵה, הְּלְּטֵל. The varieties of formation occasioned by the occurrence of imperfect letters in the root, are as follows:
- 1. If the first radical letter is a guttural, it takes ($_{_{71}}$) by § 22, e. g. העמד.
- 2. In verbs ב", the original ה' is in this species invariably restored, and rests in its homogeneous vowel \bar{u} , e. g. הדּשָּׁב.
- 3. In verbs \ddot{z}_0 , the first radical is assimilated to the second, which then receives Daghesh, the preformative π taking the vowel \ddot{u} (§ 101. 3. a.), e. g. \ddot{u}_0 .
- 4. In verbs ע", where א is rejected, and its vowel placed under the first radical, the () of the characteristic ה is lengthened into (א) to make a simple syllable, e. g. בּבְּבַם for הַבְּבַּח (see § 102. 5. b.). The same obtains in verbs ע"ל, e. g. בּבְּבַח for הַבְּבַּח for הַבְּבַּח ; though sometimes by inserting Daghesh in the first radical, the original of the preformative is retained, e. g. שַּׁהָּ for בּבָּבָּח.

The varieties of Hoph'hal are accordingly הְּלְשֵׁל, הְלְּצֵלֶּה, הְלְשֵׁל, הְלְנֵעֹּל (for הַלְּעֵל (for הַלְּעָל (for הַלְּעָל (for הַלְּעָל (for הַלְּעָל)).

ance from that answering to Kal, yet this does not arise from any variation in the value of the Hebrew form, but is merely a consequence of the different structure of the English language, which does indeed contain some few causals, formed, as in the Teutonic dialects generally, by a change of vowel from neuter and active intransitive verbs, such as sit, set; rise, raise, &c.; though in by far the greater number of instances causality is indicated by a verb derived from an entirely separate source, as to come, to bring; to see, to show; to know, to inform. So that on looking narrowly at the signification and force of its equivalents, it will be perceived that Hiph'hil uniformly retains its causative power.

Signification of Hoph'hal.

§ 150. The signification of this species is always the passive of its corresponding Hiph'hil, which therefore we have only to consult in order to ascertain the different shades of meaning borne by Hoph'hal.

VII. Formation of Hithpa'hel.

§ 151. This species is reflexive, that is, its subject and object are identical. Its characteristic is the syllable אָם prefixed to the infinitive constr. of Pi'hel, e. g. inf. Pi. אָמָט, Hithp. אָמָט, ; הְּתְבָּוֹלֵם, בְּרֶבֶּ, הָּוֹלֵל ; הִתְקוֹמֵם , קוֹמֵם . Hithpa'hel has also some peculiarities of its own, which are caused by the nature of the first radical letter. They are as follows:

1. When the first radical is one of the sibilants שׁ סרס, the lingual ח of the preformative is placed after instead of before it, e. g. אַחַבָּלּ, for הַמְשַׁמַר for הַמְשַׁמַר, הַמְשַׁמַר הַמְשַׁמַר (לְּאַמַר הַמְּשַׁר הַמְּשִׁר הַמְּשִׁר הַמְּשִׁר הַמְּשִׁר הַמְּשִׁר הַמְּשִׁר הַמְּשִׁר הַמְּשִׁר הַמְּשִׁר הַמְּשֵׁר הַמְּשְׁבְּיִּר הַמְּשְׁבְּר הַמְּשְׁבְּר הַמְּשְׁבְּר הַמְּיִבְּר הַמְּשְׁבְּר הַמְּשְׁבְּר הַמְּיִבְּר הַמְּיִבְּר הַמְּיִבְּר הַמְּשְׁבְּר הַמְּבְּר הַמְּיִּבְּר הַמְּיִבְּר הַמְּיִבְּר הַיְּבְּיִבְּר הַיִּבְּר הַיְּבְּיִבְּר הַמְּיִבְּר הְיִּבְּיִבְּר הַיִּבְּיִיבְּר הְיִבְּיִבְּר הְיִבְּיִבְּר הְיִבְּיִבְּר הְיִבְּיִבְּר הְיִבְּיִבְּר הַיִּבְּר הַבְּיִבְּר הְיִבְּיִבְּר הַבְּיִבְּר הַבְּיבְּר הַבְּיבְּר הַבְּיבְּר הַבְּיבְּר הְבִּיבְּר הְבִּיבְּיבְּר הְבִּיבְּר הְבִּיבְּר הְבִּיבְּר הְבִּיבְּר הַבְּיבְּר הְבִּיבְּר הְבִּיבְּר הְבְּיבְּר הְבְּיבְּר הְבְּיבְּר הְבְּיבְּר הְבְּיבְּר הְבְּיבְּרְיבְּר הְבִּיבְּר הְבִּיבְּר הְבְּיבְּר הְבְּיבְּר הְבְּיבְּיבְּר הְבְּיבְּרְבְּיבְּר הְבְּיבְר הְבִּיבְּר הַבְּיבְּר הְבּיבְּיבְּר הְבּיבְּיבְּיי הְבּיבְּייִיבְּיּבְּר הַבְּיבְּיבְּיּבְּיּבְּיּי הְבּיבְּיּיִים הּבּיבּיל הַיבְּיבּיי הְבּיבְיּיבְיּים הּבּיבּיל הּבּיבּיים הּבּיבּיל הּבּיבּיים הּבּיבּיל הּבּיבּיים הּבּיבּיל הּבּיבּיים הּבּיבּיל הּבּיבּיים הּבּיבּיל הּבּיבּים הּבּיבּים הּבּיבּים הּבּיבּיים הּבּיבּיים הּבּיבּים הּבּיבּיּבּים הּבּיבּים הּבּיבּיבּים הּבּיבּים הּבּיבּיים הּבּיבּים הּבּיבּים הּבּיבּים הּבּיבּי

2. If the first radical is the softest sibilant 7 or the hardest x, the n is transposed, and changed in conjunction with 7 into the softer lingual 7, e. g. הַּבְּטַבְּק for הַבְּטַבְּק (5 74. 2. b.).

3. If the first radical is a lingual, its cognate ה of the preformative is in general assimilated to it, e. g. הְּחָבֵּה for הְּחָבֵּא (§ 77. 1. b. c.). This is sometimes the case when the first radical is כ, which is equivalent to ה (§ 73. 2. c.), or the liquid ב, e. g. הְּבִּבֶּא הְהַבְּבֹּץ הְבִּבָּא הְבִּבֹּץ הְבִּבֹּץ הִכּוֹנֵן הַ for הְבֹּבָא הִבָּא הְבִּבֹּץ הִבּבֹּץ הִבּבֹּץ.

The principal forms assumed by Hithpa'hel are therefore as follows: הַתְּפַשֶּׁל, הְתַּבְּרָה, הְתַבְּשֵּׁל, הָתִקּוֹמֵם, הַתְבָּבֶּן, הְתַּבְּשֵּׁל, הָתִקּוֹמֵם, הַתְּבָּרָה, הַתְּפַשֵּׁל.

Signification of Hithpa'hel.

§ 152. The primary signification as above stated is reflexive, and this may be considered as of three kinds; according as, 1. The subject makes himself the object of his own action, thus מַבְּלֵּח to kill one's self. 2. He makes himself the object of another's action, e. g. אַבָּלְּח to shave, הַּבְּעַלְּח to get shaved, i. e. to cause one's self to be shaved by another; אַבָּה to heal, אַבְּהְרָה to cause one's self to be healed; שַבְּּה to seek, שַבְּּהְרָה to hide one's self, lit. to cause one's self to be sought. 3. He performs an action on his own account; as in the phrase הַּתְּבֶּלְּח אֹנִיה to desire for one's self.

- § 153. 1. As this species of the verb denotes the performing of an action not only by but also upon the subject, which action is in such case of more than ordinary interest to its agent, it is hence very appropriately formed from the intensive species Pi'hel, whose meaning it always includes. The only difference in signification between the two is, that in Pi'hel the action is directed with intensity upon another than the subject, while in Hithpa'hel it returns upon the subject himself, e. g. אַבָּלָּה to uncover, אַבְּלָּה to uncover one's self; אַבָּלָּה to encourage, בַּרָּהְבָּלָה to encourage one's self, take courage; בְּרָהְבָּרָה to bless one's self, to esteem one's self blessed.
- 2. In treating of the Niph'hal species, we stated that it also has occasionally a reflexive signification; though even then there is a difference between its force and that of Hithpa'hel, which is very perceptible in all those verbs of which both species are in use. The difference is this: in Niph'hal the action is uppermost in the speaker's or writer's mind, whereas in Hithpa'hel his attention is directed chiefly to the agent. See note to § 141. 2.

MODES OF VERBS.

Indicative.

\$ 155. The Indicative (הַהְלְּטָה) has but two tenses, a preterite and a future. Each of these contains the three radical letters, and differs from the other in its vowels, and in its manner of taking the fragments of the personal pronouns, by means of which are denoted the several accidents of person, number, and gender. This choice of tenses in the Hebrew, as well as the paucity of their number, are additional

proofs of the venerable antiquity of the language. For every action must of necessity be predicated as taking place either at the period in which we speak, or at some time antecedent or subsequent to that period: and if we consider these different points of time, or tenses as they are termed, in the relation which they bear to the actual concerns of life, and with a view to their respective importance as regards the purposes of speech, we cannot fail of perceiving that the so-called present is of all others the least indispensable, and the most difficult of The chief use to which men in a state of nature put the faculty of speech, is the intercommunication of facts or occurrences which have come under their observation; and hence doubtless it is, that the root or simplest form of the verb in Hebrew is in the past tense or preterite. The next in simplicity of conception and frequency of employment is the future, whose extent is as unlimited on one side of the point of time in which we find ourselves at any given moment, as is that of the preterite on the other. Moreover, the exceeding utility, or rather unavoidable necessity, of possessing an inflection of the verb especially devoted to this division of time is indisputable; for as the past tense is that whose chief use is to impart information, so the future is the one principally employed in its acquisition. present has a claim on the score of usefulness, as serving for the expression of the feelings of the moment, and for the statement of universal propositions; but in this respect it is subordinate to both the other tenses, and especially to the preterite. Its conception, moreover, requires from its evanescent nature a much greater power of abstraction in the mind; for even during the act of speaking, events which lav hid in the uncertainty of the future are adding to the records of the past.

These two tenses of the indicative, the Preterite and Future, are used throughout all the species of the verb.

Infinitive.

§ 156. The Infinitive (הַבְּקִרֹּה) in Hebrew is a noun of action, expressing the abstract idea of the verb, without reference to any of the accidents of tense, person, number, or gender. This, like all other nouns, can be placed either by itself absolutely, or in regimen with the noun following; whence arise the two forms of the infinitive, called absolute and construct, which are employed in almost all the species.

Imperative.

§ 157. The Imperative (הַאַבּהֹר) is used, and very properly, in the second person only; for it would involve an absurdity, to command either one's self or a third person who is not present to be commanded. This mode is wanting in Pu'hal and Hoph'hal, which are mere passives.

PARTICIPLES.

§ 158. The Hebrew Participle (הַבּרנּיֹנִי) is likewise construed as a noun. But there is this difference between it and the infinitive: the latter indicates the action itself, while the participle is a noun of agency denoting the performer of the action. In Kal there are two participles, an active and a passive; the derivative species have only one each.

PERSON, NUMBER, AND GENDER.

\$ 159. In Hebrew, as in other languages, the verb has three persons (בּוּפִּרם), first, second, and third. It has also two numbers (מֵּכְּבָּרִם),* singular and plural; and two genders (מֵלְבִּרָם), masculine and feminine. The genders are distinguished in the second and third persons of the verb, while the first of both numbers is common. These persons, numbers, and genders, are expressed by adding the principal letters of the corresponding personal pronouns to the root, either at the beginning or end, or else at both beginning and end, in the manner following:

Inflection of the Verb קְטֵל through all the Species.

KAL.

Preterite.

§ 160. In the *Preterite* (پَجِةِر), the fragmentary pronouns which designate person, number, and gender, are added at the end of the root, which without any addition represents the third pers. masc. sing. of this tense; and this person is accordingly placed first in the paradigms of Hebrew verbs. The reason of this peculiarity would appear to

^{*} There are a few nouns in Heb., mostly double members of the body, which have a dual form; but with these the verb agrees in the plural.

be as follows. It is highly probable that in the origin of language no distinction of person, number, or gender, was made in the verb; and this we find at the present day to be universally the language of very young children, or of uneducated persons learning to speak a foreign tongue. Thus a child, on one of its playthings being fractured, runs to his mother, and exhibits the toy, exclaiming broke! broke! The event which has taken place, the injury sustained, is uppermost in his mind, and this alone he strives to express, to the exclusion of all accessory ideas. Again, as the chief aim of language is to communicate the emotions of the mind, which is particularly the office of the verb, so the principal modification of the verb itself is that used to express those emotions by which we are the most ordinarily and the most sensibly affected, viz. which are caused by some action from Accordingly, when in time greater precision of speech without. came to be considered necessary, the simple form of the verb was restricted to its principal use, that of denoting an action performed by a third person; while its secondary offices, such as the representing of an action performed by the person addressed, by the speaker himself, by more than one person, &c. were pointed out by various additions made to the original form.

SINGULAR.

- 3 m. The a of the first radical is long, because it terminates a simple syllable; that of the second, which has to form a mixed one, is short (§ 16. a.).
- 3 f. Here ה, which in Hebrew is the characteristic of the fem. gender, is affixed to the root; and as this letter when final must be preceded, according to the rules of orthoëpy, by a vowel in which it rests, the last radical letter b takes (,), and the vowel of the second is rejected as superfluous (§ 104. 2.).
- מַטְלְּחָ 2 m. Consisting of the root, with the addition of הָ, the principal letter and vowel of the pron. האָה, affixed.
- בְּטֵלְתִּ 2 f. The root with the affixed ה of the pron. אַהַ
- 1 c. The preceding with the addition of the vowel (יד בּעַלְּתְּר (see § 225).

PLURAL.

3 c. The termination of the plural in Heb. is בּ שְּׁמִיל affixed to verbs by means of the semi-vowel ן: but, in

- order to make the necessary distinction between the termination of the third pers. plural and the affixed pronoun of that person in the accusative, the \square of the former was changed into its cognate 7; which, although ultimately rejected as superfluous, is still in a few places to be met with (§ 226).
- 2 m. Here ¬ affixed to the root represents the second person, and ¬ the plural. As the word is thus increased in length by an accented syllable, the vowel of the first radical is rejected (§ 104. 1.).
- קְּמַלְּמֶּדְ 2 f. The letter ה, as in the preceding, designates the person, and 7 for distinction's sake the number.
- 1 c. Composed of the verbal root and the principal letters (נה) of the pronoun of this person.

Infinitive.

- § 161. The Infinitive, or nomen actionis, is formed from the root in the manner following:
- שוֹלל absol. When unconnected with a following noun, or absolute, the infinitive merely changes the second a of the root into its first modification δ , of which is the bearer.
- עשל const. When placed in construction with another noun the vowel of the first radical is rejected; for the word is considered as increased in length by that which follows, and with which it is in close connection. See § 104. 3. The same form is taken on receiving a preposition.

Future.

§ 162. The Future (עָרִדר) or secondary tense of every species is formed from the infinitive construct either by prefixing, or by both prefixing and affixing, the principal parts of the personal pronouns, to denote person, number, and gender.*

^{*} This difference between the preterite and future tenses in the manner of receiving the fragmentary pronouns, may possibly arise from the fact that in the preterite the performed action is uppermost in the speaker's mind, and on that account is placed first in the narration; while in the future, on the contrary, the action has as yet no existence, and accordingly is placed after the person of whom it is predicated that he is about to perform it.

SINGULAR.

- א הרא (§ 123), is originally prefixed with Sh'wa, thus דְּקְטֵּל; but by § 104. 1. a. this Sh'wa is changed into the vowel (), thus דְּקְטֵל; which by § 92. 4. becomes בּקְטֵל.
- אַקְּטֵּל 3 f. The ה characteristic feminine, which is prefixed to the word, is hardened into its cognate ה (§ 73. 2. d.).
- 2 m. The ה here prefixed is from the pron. אַהַה.
- 2 f. The prefixed ה is from the pronoun אַ ; and the afformative is the characteristic vowel (בּי) of the feminine (§ 127). The vowel of the second radical is rejected in this tense also when the third receives one (§ 103. 2. a.).
- י אַקטל 1 c. אַ from אָכָּי is prefixed to denote the first person. The preference is here given to the servile א as the representative of אָכִי because if י were taken, this person of the verb would be liable to be confounded with the third pers. sing.; and if i, with the first pers. plur. As א is one of the weakest of the consonants, it takes instead of () the longer cognate vowel () (§ 88. 1.).

PLURAL.

- זרק 3 m. To the third pers. masc. sing. is added the plural termination און (§ 123), the און of which is in general rejected. So that the person is designated by the און of the third person prefixed to the root, and the number by the plur. term. און סיד און מיד.
 - קטלְנְה 3 f. To the sing. form is affixed the syllable הַבָּה from הַבָּה, to denote plurality.
- קקילר, דרך 2 m. Here again, as in the third pers., the plur. termination or ז'ן is appended to the singular form.
 - 2 f. In this case the affixed syllable קַּמְּקְּיִלְּהָּ, is from the pron. אַתְּיִּבְּה, and denotes both gender and number; consequently the of the sing. is rejected as superfluous. And hence it happens that the fem. plurals of the sec. and third persons appear alike, although they are substantially different, the term. of the former being derived from the pron. אַתִּבָּה, while that of the latter is a fragment of הַבָּה.
 - נקטל 1 c. The prefixed ב is from אָנה.

This manner of designating person, number, and gender, obtains throughout the future of all the species of all verbs whatsoever.

Imperative.

§ 163. In Hebrew the Imperative is used only in the second person of both genders and numbers. And as this mode always designates an action which is yet to take place, it is very properly formed from the future of the indicative, by the omission of the personal prefix, which is readily understood, while by this means the requisite brevity of expression is obtained. Thus,

	Imp.		Fut.	
		SING.		
	קטל		הלחקק	2 m.
In both these cases, where two Sh'was	קִמְלִי		שׁלְמְלֵי	2 f.
In both these cases, where two Sh'was concur at the commencement of a word, the first of them is changed into short *. See §§ 102. 1. a., 104. 1. a.	להֿקנ	PLUR.	فظظمرد	2 m.
	קטלנה		עלמלני	2 f.

Participles.

- § 164. The Active Participle, or nomen agentis, is formed in the Kal species by changing the a of each syllable of the root into the two modifications of that vowel, o and e (§ 10.3.); thus אַבְיָּב he killed, שִׁבְיּ he killed, דו The form of the Passive Participle, or nomen patientis, is אַבְיּב one killed. These are varied to express the accidents of gender, number, and regimen, like other attributives.
- \S 165. The formation of the infinitive from the preterite, the future from the infinitive, and the imperative from the future, holds throughout all the species. And it is extremely natural that this should be the case: for the preterite designates an action which has been performed; and the infinitive, the abstraction of such action from its concomitants of person, number, &c. And as an action which has once been performed may be performed again, by prefixing the personal pronouns to this abstract noun (see \S 162), the future tense is formed; and from this latter, for the purpose of intimating that such action *must* be performed again, is as we have seen derived the imperative.

We will now give the whole of the simple species at one view.

§ 166. Paradigm of the First or KAL Species of Sp.

NIPH'HAL.

- § 167. Preterite. This species consists of the original form of Kal, viz. אָבֶוּל (§ 113), with the letter בּיִלְבִיל ; which by changing the first () into (), according to § 104. 1. a., becomes בּיִבְיבל. The persons, numbers, and genders, are denoted by the same pronominal augments as in Kal.
- § 168. Infinitive. The infinitive absolute changes the vowel a of the preterite into its modification o, thus בּקְעֵל Or else its characteristic receives הוואס prosthetic, thus הַּלְּעָל (§ 80); when becomes assimilated to the first radical, which is signified by an inserted Daghesh; and that this may be expressed with the utmost distinctness, it takes the simple

open vowel a, whence we have הַקְּמַבּיּל. The construct form of the infinitive takes, in contradistinction to the absolute, its other modification e (§ 10. 3.) for the ultimate vowel, thus הַקְּמַבּיּל.

§ 169. Future. This tense is formed from the infinitive construct by means of the same prefixes and affixes as in Kal, e.g. inf. const. בְּקַמֵל, fut. יְהַקְמֵל, which according to § 77. 3. becomes מָּחָמֵל; and so on of the other persons and numbers.

§ 170. Imperative. The imperative of Niph'hal is likewise formed from the second person of the future by rejecting the prefixed ה, in consequence of which the ה prosthetic is restored, e. g. fut. הַּמְּטֵל for שׁהַפְּטֵל whence imp. בּמַטֵל, &c.

§ 171. Participle. The Niph'hal participle—for from the nature of this species it can have but one—is formed from the third pers. masc. preterite by changing its ultimate (_) into (_), thus בְּקְטֵּל; for a participle is in reality a verbal noun, and all nouns, except a certain class called Cegholates, have a long vowel in the final syllable.

§ 172. Paradigm of the Second or Niph'hal Species of קָטֵל.

PI'HEL.

- § 173. Preterite. The characteristic of the intensive species, viz. Daghesh forte in the second radical, is expressed in the most distinct manner possible by means of the preceding (), which is the shortest of all the vowels, thus מַשֵּׁל; and this consequently is retained throughout the whole tense, which is inflected in the same manner as the preterite of Kal and Niph'hal.
- § 174. Infinitive. The infinitive absolute takes \check{a} instead of \check{i} for the first vowel, and o for the second as in Kal, thus \check{b} . The construct retains the ultimate e of the preterite, thus \check{b} .
- § 175. Future. This tense is formed from the infinitive construct in the same manner as in the preceding species, with the exception that, as the first radical has here a vowel of its own (_), the original Sh'wa of the prefixed pronouns is retained, e. g. inf. constr. כשל, לכני, &c.
- § 176. Imperative. Formed from the sec. pers. fut. by rejecting the prefix, thus 500, &c.
- § 177. Participle. The Participle of the Pi'hel species is formed from the infinitive construct by prefixing the letter ב, e. g. בְּבְשֵׁל. This prefix, by means of which the participles of all the subsequent species likewise are formed, is the chief letter of the pronoun שׁבִי who; hence בְּבְּשֵׁל one who murders, a murderer.

§ 178. Paradigm of the Third or Pr'HEL Species of בְּטָב . Preterite.

PU'HAL

§ 179. Preterite. This species, the passive of the preceding, has also the characteristic Daghesh. Its first vowel is \tilde{u} , and its second \tilde{u} , thus \tilde{u} . Person, number, &c. are signified by the addition of the same fragments of the personal pronouns as before.

§ 180. Infinitive. The absolute form changes the vowel a of the second radical of the preterite into a, thus b. In the construct the original vowel is restored, thus b.

§ 181. Future. The future is formed, as in the active voice, by

prefixing the personal pronouns with Sh'wa, thus יָלְמֵל.

§ 182. Imperative. The imperative is wanting. The Pu'hal species is used only as a passive, in which the action does not originate with the subject of the verb; and hence the Orientals did not conceive it logical to address such subject imperatively. The Niph'hal indeed possesses this mode; but that species, it will be recollected, is used with a reflexive as well as passive signification, and it is in the former of these meanings alone that the imperative can ever be employed, as not take heed to thyself.

§ 183. Participle. Formed as in Pi'hel by prefixing מ to the infinitive construct, and lengthening ($_{-}$) into ($_{\tau}$), as in Niph'hal, thus מָּקְשֵׁל.

§ 184. Paradigm of the Fourth or Pu'HAL Species of סטל.

HIPH'HIL.

- § 185. Preterite. הַקְּטֵּרל. The persons, numbers, and genders of the preterite of the causative species are formed, as in the preceding, by affixing the chief parts of the personal pronouns. The second vowel (ב) is rejected, and its place supplied by the appropriate vowel (ב) of the preterite, in those persons where the third radical takes Sh'wa; and thus is prevented the occurrence of a long mixed syllable in the middle of a word, which is inadmissible: consequently (ב) is retained only in the third person singular and plural of this tense.
- § 186. Infinitive. In the absolute form π characteristic takes the vowel \tilde{a} instead of \tilde{i} ; and the second radical changes \tilde{i} into \tilde{e} , thus π . The construct restores \tilde{i} to the second syllable, thus המטיל
- § 187. Future. Formed as usual from the infinitive construct by prefixing the pronouns with Sh'wa, thus יְהַקְּטֵּר, which by § 77. 3. becomes בְּקְטֵּרְל. As in the preterite, is retained in those persons only in which the third radical ends the word, or has a vowel of its own; in the others it is changed into its cognate ē, thus הַּקְטֵּרְלָה.
- § 188. Imperative. When the pronominal ה is rejected, ה characteristic is restored, e. g. fut. הַקְטִיל, imp. הַקְטִיל, imp. הַקְטִיל. In the masc. sing. only, (בַ) is changed for the sake of brevity into (...),

120

בַּיקטִילות

thus הַקְּמֵל ; in the rest of the mode the form of the future is retained, thus הַקְטַרלִר, &c.

§ 189. Participle. Formed from the infinitive construct by prefixing n, and consequently rejecting n, whose vowel it takes (§ 77. 3.), thus מַקְטִיל for מָקְטִיל.

§ 190. Paradigm of the Fifth or Hiph'hil Species of בְּטֵל.

§ 203. The preceding table exhibits the entire perfect verb as inflected through all the species. In order to insure a correct pronunciation, whenever the tone-syllable, which is usually on the ultimate, occurs on the penult, it is marked by an accent () placed on that syllable.

OPTATIVE AND POTENTIAL MODES.

Future Paragogic.

§ 204. The Hebrew Future not only declares that an action is about to happen at some period of time not yet arrived, but is also employed to intimate in addition a desire towards the performance of such action existing in the mind of the speaker or writer: thus אַקְיִבֶּיה I will or shall kill, it wish to kill, or oh, that I may kill! The latter mode shows that the action originates in the mind of the speaker, on the part of whom it expresses either strong desire for its accomplishment (and thence its use as an exclamation), or a feeling of confidence that it will be performed.

\$205. This mode, called the Optative, is formed by adding to the future of the indicative the syllable הָּשְׁ with its directing power, by means of which the desire of the subject is more forcibly expressed as directed towards the action, e. g. אַנְהַיּלְהָּ I will sing, הְיִבְּילְהָ heartily will I sing! Ps. 9: 3.; בְּילֵילְהָר בְּילִילְהָ וֹנִי אַלְּיכָה וֹנִי אַ heartily will I sing! Ps. 9: 2: 3. Sometimes it is used to express determination on the part of the speaker, e. g. אַלְּהַבְּילְהָה now will I sing, Is. 5: 1., אַרְּלָּהָה I will surely divide, Ps. 60: 8., אַלְּהַבְּילְהָה I will surely not be ashamed, Ps. 25: 2. 31: 2., אַבְּלְהָה וֹנְלְּבָּרְהָ וֹנִ וֹנְלְּבָּרְה וֹנִ לְבָּבָּרְה לִבְּרָבְּרָה וֹנִ לְבָּרָה לִבְּרָבָּרְה לִבְּרָבְּרָה לִבְרָבְּרָה לִבְרָבְּרָבְּר לְרַבְּרָבָּר לְרַבְּרָבְּר לְרַבְּרָבְּרָה לִבְרְבָּרָה לִבְרְבָּרָה לִבְרְבָּרָה לִבְּרְבָּרָה לִבְּרְבָּרָה לִבְּרְבָּרָה לִבְּרְבָּרָה לִבְּרְבָּרָה לִבְּרְבָּרְה לִבְּרְבָּרְה לִבְּרְבָּרְה לִבְּרְבָּרְה לִבְּרְבְּרָה לִבְּרְבָּרְה לִבְּרְבָּרְה לִבְּרְבָּרְה לִבְּרְבָּרְה לִבְּרָבְיִי לִבְּרְבָּרָה לִבְּרְבָּר לְבַרְבָּרָבְיִי לִבְּרְבָּרָה לִבּרְבָּרְבְּרָב לִבְרָבְיִי לִבְּרְבָּר לִבְּרְבָּרָה לִבְּרְבָּר לִבְּרְבָּרְבָּר לִבְרַבְּרָבְיּר לִבְּרָבְיּרְבּיּר לִבְּרְבָּרָה לִבּר בְּרַבְּרָבְיּר בּיִבְּרְבָּרְבְּרָבְיּר בּיִבְּרְבָּרְבָּר בְּרְבּבְרָבְיּר לִבְרְבָּרְבָּר בּיִבְּרְבָּרְבּי בּיִבְּרְבָּר בְּרְבּבְרָבְיּר בְּרְבּרְבָּר בְּרְבּבְרָבְיּב בְּרְבְּבְּרְבְיּב בּיּבְּבּר בְּבְבּרְבָּב בּיּבּר בְּרְבּבְרָּבְיּ בְּבּר בְּבְבּרָב בְּרָב בְּבְּבְּבּר בּיּבְּבּי בְּבּבּר בְּבּבּר בְּבּבּר בְּבּבּר בְּבּבּר בְּבְבּבּי בּיּבְבּי בּבּר בְּבְבּבּר בּבּי בְּבּבּבְיבּי בּבּי בְּבְבּבְבּיב בּבּיּבְיּבּי בְּבְּבּי בְּבְּב

§ 206. The peculiar force of this form of the future renders it capable of being employed in those cases only where the speaker is himself the performer or one of the performers of the action, viz. in the first person singular and plural. In a very few instances its use is extended to the third person, e. g. מְּבְּיִבֶּיׁה oh, that he may hasten, Is. 5:19.; and as a simple assertion, מְבִּיבְּיָבְּיִ and she doted, Ezek. 23:20. Occasionally we find ה, for ה, e. g. מְבִּיבְּיָבְּיִ 1 Sam. 28:15., יְבִיּשְׁבָּיִר Ps. 20:4.

- § 207. 1. The paragogic ה is sometimes also affixed to the imperative, for the purpose of softening the command into a warm and anxious request, its force answering in such case to the English I pray, e. g. מיני, its force answering in such case to the English I pray, e. g. awake, I pray thee, Ps. 59:5., הְּקִיבָּה id. v. 6.; so הְּקִיבָּה hear, I pray, הַקְּשִׁבְּה id. Ps. 61:2., מְּבְּבָּה oh, arise! Ps. 3:8.
- 2. When ה paragogic is affixed to the future, it occasions the rejection of the preceding vowel, if it be a mutable one, by § 103. 2. a., thus אַבַּקָּה, אַבַּקָּה, אַבַּקָּה, אַבַּקָּה, אַבַּקָּה, אַבַּקָּה, אַבַּקָּה, אַבַּקָּה, ווֹשְׁלָּה, When affixed to the imperative Kal of perfect verbs, if the second radical has ō, this vowel is shortened and shifted back to the first (§ 103. 2. b.), e. g. אַבְּהָה, וֹשְׁבְּהָה 1 Chron. 29: 18.; those which have ă reject it, and then, on the concurrence of two Sh'was, the first is changed into i (§ 104. 1. a.), e. g. שֵׁבָה, הָשָׁבָּה, סָבָּה, סַבָּה, סַבְּהָה, סַבָּה, סַבְּהָה, סַבְּה, סַבְּה, סַבְּהָה, סַבְּהָה, סַבְּהָה, סַבְּהָה, סַבְּה, סַבְּּה, סַבְּה, סַבְּהְּה, סַבְּהְּהְהָּה, סִבְּהְּהְהָּה, סַבְּהְּה, סַבְּהְּהְּהָּה, סַבְּהְּהְהָּה, סַבְּהְהָּה, סִבְּהְּהְּה, סַבְּהְּהְבְּהְהָּה, סִבְּהְּהְהָּה, סִבְּהְּהְהָּה, סִבְּהְּה

Future Apocopate.

- § 208. When the Future expresses a wish or command, or is connected with the succeeding word by Makkeph, it is enounced with greater brevity than usual: in the former case, on account of the quickness of utterance appropriate to the expression of a command or urgent solicitation (§ 163); and in the latter, in consequence of its close connection with the following word, which causes it to lose the accent that enabled the ultimate long vowel to form a mixed syllable (§ 70).
- § 209. This contraction of the regular form of the verb from the first of the above causes, appears in the following ways, according to the nature of the several classes of verbs.
- 1. In the perfect verb it occurs only in the Hiph'hil species, whose ultimate vowel $\tilde{\imath}$ is changed into its modification \tilde{e} , e. g.

Hiph. fut. יַבְּדֵּל, apoc. יַבְדֵּרל; fut. יָבְדָּרל, apoc. יַבְדֵּרל.

2. In verbs \ddot{v} this contraction takes place in both Kal and Hiph'hil; in the former \bar{u} is changed into \bar{o} , e. g.

Kal fut. יְלְהַתּה, apoc. יְלָהָה ; fut. יְלָה, apoc. בְּלָה. In Hiph'hil of these as of the perfect verbs, i is changed into \hat{e} , e. g.

Hiph. fut. יָקֵרם, apoc. יָקֵרם; fut. יָמָרת, apoc. יָמֵרת.

3. In verbs \Rightarrow every species is subjected to a change. In Kal this consists in eliding the ultimate radical \Rightarrow , and shifting back the vowel

of the second radical to the first, when this latter is destitute of one, e.g.

Kal fut. יְרֶאֵה, apoc. יְרֶאֵה; fut. יְרָאֵה, apoc. יָרֶאָה.

In Pi'hel 7 rad. is rejected together with the preceding vowel, e. g.

Pi'hel fut. יְבַל, apoc. יְבַל; fut. יְבַל, apoc. יְבַל,

In Hiph'hil π is rejected, and (\cdot) given also to the preformative, e. g.

Hiph. fut. יָרֶבֶּל, apoc. יֶרֶבֶּל; fut. יַרָבָּ, apoc. יֶרֶבֶּר,

^{*} The Arabic, which of all the Shemitish dialects is distinguished by the greatest fullness of inflection, and consequent definiteness of expression, exhibits the above with other varieties in the meaning of the verb in a much more marked and uniform manner. In that language, as in Hebrew, the verb has but two tenses, a preterite and a future; this latter, however, is inflected in three different ways besides the primary form, for the purpose of indicating those modifications of the simple idea, and those relations which actions bear to one another, which in the Indo-European languages are signified by the different modes. They are as follows:

^{1.} The Conjunctive is formed by changing the final (') of the indicative into ('), and eliding the afformative (), e. g. ind. رُيُقْتُلُ, conj. يَقْتُلُينَ, conj. يَقْتُلُينَ. It is used in general to represent an action as the purpose or design of another action.

^{2.} The Conditional is formed from the preceding by rejecting the final (), e.g. conj. وَعُتَّلُ, cond. يَقْتَلُ. It is most frequently employed in hypothetical sentences, to express an action as the condition or consequence of the performance of another action.

^{3.} The Emphatic is formed by adding to the simple future a double or single o, e.g. ind. يُقْتُلُنَّى, emph. يَقْتُلُنَّى or يُقْتُلُنَّى. It is employed chiefly in wishing, requesting, or forbidding.

WAV CONVERSIVE FUTURE.

§ 212. In addition to the two absolute tenses, Preterite and Future, which the Hebrew verb exhibits, there is also a relative past, or Imperfect tense, which is very appropriately framed by prefixing to the future the principal letter ז of the verb of existence דָּקְטֵל ; thus יִקְטֵל he will kill, בַּיְקְטֵל and he was killing, he killed; and as this particle in a manner converts the future into a preterite, it has received the name of Wav Conversive (דְּוֹבְּהַבְּבִּרְּבְּיִ

§ 213. Although this mode of forming a new tense may appear at first sight arbitrary in the extreme, a consideration of its precise force will show us that its construction is both natural and highly ingenious. The imperfect or historical tense differs from the preterite, inasmuch as by the latter an event is merely stated to have taken place at some previous point of time; but when using the former, the speaker goes back in imagination to that period in which the action designated was being performed, and expresses himself accordingly, even though intending to convey the idea that it has already been brought to a close: thus in the phrase, I saw a man who was writing a letter, nothing is said about the completion of the act of writing, although that may have taken place long before; it is asserted only that at a period antecedent to that in which the statement is made, the act was in the course of performance. Accordingly the Hebrew imperfect is very properly compounded of a fragment of the verb היה he or it was, there was, by means of which the mind of the auditor is transported into the past, and the future of the verb denoting the action, which future, as shown in the Syntax (§ 964. 2.), is frequently employed as

- a present. Hence the phrase בַּבְּרְיוֹ נְהֹאָכֵל it sfruit, and ate, Gen. 3: 6., is equivalent to בַּבְּרִיוֹ הָהָה הַאָּכֵל it was (so that) she takes of its fruit, (and) it was (so that) she eats, where the narrator first refers his reader back to the time of the action, and then speaks of it as actually taking place.*
- § 214. 1. This ק is prefixed to all persons, genders, and numbers, without undergoing any change, and is always to be considered as an abridgment of קָּהְ there was, it was so, used impersonally. It is accompanied by (), the regular vowel of the second radical, although in the verb קָּהְ this is lengthened into ($_{\tau}$) on account of the following weak letter (§ 138.4.). And that the short vowel may be retained, by which this particle is distinguished from $_{\tau}$ conjunctive, whose connecting power it shares (see § 688 et seqq.), whenever the pronominal preformative of the future has a vowel of its own, it takes Daghesh forte (§ 31), e. g. קּלְּאֵבֶּוֹךְ .
- 2. If the performative of the third person has Sh'wa, and thus can terminate a mixed syllable without it, Daghesh is omitted, or more properly speaking is not inserted (§ 33. 1.), e. g. בְּתָהֶל.
- 3. In the first person singular, where the preformative x is a guttural, and consequently incapable of receiving Daghesh although accompanied by a vowel, the first syllable is completed by lengthening (_) into (_,), e. g. רְאָמֶר Jer. 44: 4., רְאָמֶר 1 Sam. 12:1., רְאָמֶר Ex. 4: 23. 32: 24.
- \S 215. This prefix, which increases the word at its commencement by a syllable, exercises an influence on the accent, and thence on the ultimate vowel, in the modes following:
- 1. The accent of the future, which according to § 57. 1. regularly accompanies the ultimate syllable, is shifted to the penult, if capable of receiving it (see § 57. 4.), on the addition of 1 at the commencement of the word; in order that it may not be preceded by more than one syllable (§ 64).
- 2. If the ultimate vowel is long, and makes a mixed syllable by the aid of the accent (§ 55. 1.), when this latter is shifted back on the reception of 'conversive, the vowel is necessarily shortened, e.g. בְּבָּקם, בְּבָשׁם, רָשֵּׁם; וְהַשְׁם; וְהַשְׁם; בְּרָשׁׁם; בְּרָשׁׁם; בְּרָשׁׁם; בְּרָשׁׁם; בְּרָשׁׁם; בְּרָשׁׁם; בּרִבּשׁׁם בּרִבּשׁׁם.

^{*} In Arabic this tense is formed by placing before the future the verb of existence in the preterite as a separate word, agreeing with the nominative in number and person, e. g.

* The was (so that) he goes out, i. e. he went out.

- 3. The same is the case in the future of the Niph'hal species, where also the ultimate vowel is long, e. g. בַּאָטֶה, הָאָטָה; and in future Pi'hel when the second radical is a letter incapable of receiving Daghesh, and the preceding syllable is consequently simple, e. g. בְּבָרָה, יְבָרָה, יִבְרָהָ, יִבְרָהָ, יִבְרָה, יִבְּרָה, יִבְּרְה, יִבְּרָה, יִבְּרָה, יִבְּרְה, יִבְּיּה, יִבְּיּרְה, יִבְּיּה, יִבְּיּה, יִבְּיְרְה, יִבְּיּה, יִבְּיּה, יִבְּיּה, יִבְּיּרְה, יִבְּיּרְרָּה, יִבְּיּרְרָה, יִבְּיּרְרָּיְבְּיּה, יִבְּיּיְרְהְיִבְּיְרְה, יִבְּיְרְיִבְיּהְיּיְבְיּיְרְיִבְּיְרְיִבְּיִיּרְיִיּהְיִבְּיִיּרְ
- 4. But if the penult is a mixed or the ultimate a simple syllable, the accent remains on this latter, whose vowel accordingly retains its length, e.g. Kal הַשָּׁשִׁ, הִשְּׁשֵׁ, יִתְּקוֹ, יִתְּקוֹן, יִתְּקוֹן, יִתְּקוֹן, יִתְּקוֹ, יִתְּקוֹם, יִיתְּקוֹים, יִתְּקוֹים, יִתְּקוֹים, יִתְּיִים, יִיתְּתְּיִים, יִיתְּתְּיִים, יִיתְּיִּתְּיִים, יִיתְּיִּים, יִּיְתְּיִּים, יִיתְּיִּים, יִּיְּתְּיִּים, יִיתְּיִּים, יִּיִּים, יִּיִּיְּיִּיְּיִּים, יִּיְּיִים, יִּיִּים, יִּיִּיְּיִּיְּיִים, יִּיִּיְּיִים, יִּיְיִים, יִּיְיִים, יִּיְיִים, יִּיִּיְּיִים, יִיּיִּיְיִים, יִּיִּיְיִים, יִיּיִים, יִיּיִים, יִיּיִים, יִיּיִים, יִיּיִים, יִיּיִים, יִיּיִים, יִיּיִים, יִיִּיְיִים, יִיִּיְיִים, יִיּיִים, יִּיִּיִים, יִייִּיְיִים, יִיִּיְיִים, יִייִּיְיִים, יִייִּיְיִים, יִיּיִים, יִייִיּיְיִים, יִייִייְיִים, יִייִּיְיִים, יִּיְיִים, יִיּיִים, יִּיִּיְיִים, יִייִּיְיִים, יִייְּיִים, יִייְיִים, יִּיִיּיְיִים, יִייְיִּיְיְיִים, יִייְּיִים, יִייְּיִּים, יִּיְיִים, יִּיְיִים, יִּיְיִייְּיִים, יִייְּיִים, יִּיְיִים, יִּיְיִיים, יִייְיִּיִּים, יִייְּיִים, יִייְיִים, יִּיִּיְיְיִּיְיִים, יִּיִּייִים, יִייְּיִים, יִייְּיִייְיִים, יִייִּיְיִּיִים, יִּיְּיִייְּי

§ 216. In future Hiph'hil, although the accent remains with the ultimate on receiving ז conversive, the vowel (ז-) of this syllable is changed into (..), e. g. רְבָּדֶל , רְבָּדֶל ; נְבָּדֶל , יִבְּדֶל ; נְבָּדֶל , יִבְּדֶל ; נִבְּדֶל , יִבְּדֶל ; בַּרֶל .

- \$ 217. 1. If the third radical is א, which in the future always rests in (") (see § 438. 3.), on taking א conversive, this short vowel is rejected, and likewise the final א, which by the rejection of the preceding vowel is rendered entirely inaudible, e. g. איַבְבֶּה ; וְיִבְּבֶּר, יְבַבֶּה ; וֹיִבְבֶּר, יְבַבֶּה ; in the verbs אָרָה, the (") on being thus shifted back is changed into () the homogeneous vowel of the following א, and the euphonic vowel given to the preformative (§ 162) is rejected as being now superfluous, thus הַּבָּרָה, יְהַבָּרָה, יִהְרָה .

WAV CONVERSIVE PRETERITE.

§ 218. As the Future tense becomes a Preterite by means of a prefixed accompanied by the vowel (_), the Preterite is converted into a relative Future on receiving the same letter without a vowel, which is distinguished from simple accountive by its power of removing the accent of the preterite of perfect verbs from the penult syllable to the ultimate, e.g. אַלְטָלְתְּ thou hast killed, אַלְטַלְתְּ and thou shalt kill.*

17

[•] We may suggest that the reason why the accent is transferred to the last syllable instead of being carried back as in the future, or even allowed to retain its original position on the penult, is that it may give greater prominence to the affixed pronoun denoting the subject of the verb, and thus produce a degree of resemblance to the future proper. See § 162. note.

- § 219. 1. The chief and indeed the only force of 7 conversive preterite may be affirmed to consist in its quality of conjunction; since it seldom occurs unless preceded in the same phrase by a future proper or an imperative, in which case its sole office appears to be to connect the simple meaning of the verb, which is expressed by the preterite (see § 160), with what precedes, showing that the accessory idea of futurity or command is to be attributed also to the verb thus connected: a. with a future, e.g. אָרָה אָלֵיך אָנתן בָּקרבֶּך נָבִיא וְנָתֵן אֵלֵיך when a prophet shall arise in the midst of thee, and (shall) give thee a sign, Deut. 13:2.; or a participle with a future signification, e. g. הנגר מעירם שׁמֶּה נְהַשְּׁבֹתִי גְמִלֹכֶם בָּרֹאשִׁכֶם שׁמָּה נָהַשְּׁבֹתִי גְמִלֹכֶם בִּרֹאשִׁכֶם behold I (am) about to raise them out of the place whither ye have sold them, and (will) return your deed upon your own head, Joel 4:7.; and, b. with an imperative, e. g. לְּךְ וַאֲמֵרְהַת go thou and say, Is. 6:9., רער וְהַאַּזְינה tremble and hear, 8:9.; or an infinitive used as an imperative, e.g. go and say, Jer. 39: 16., and thus very frequently.
- 2. It is also prefixed to a preterite signifying command, where the expression הָלוֹהְ, indicating command or entreaty to do that intimated by the ensuing verb, is omitted, and left to be supplied by the reader, e. g. וְהַיִּהְהָ לְאֵישׁ and be strong and show thyself a man, 1 Kings 2: 2, 3.

REMARKS ON THE PERFECT VERBS.

KAL.

Preterite.

- \$ \frac{5}{221}\$. Third pers. masc. sing. 1. The second radical letter retains its \(\tilde{a} \) in all those persons of the preterite in which the third is destitute of a vowel, except in a few instances, where \(\tilde{i} \) or \(\tilde{e} \) is taken instead, e. g. בְּלְשֵׁהֶּם Deut. 4:1, 22. 11:8, 23. 19:1. 30:5. Josh. 1:15., \(\tilde{V}\) Num. 11:12. Jer. 2:27. 15:10. Ps. 2:7., \(\tilde{V}\) Judg. 13:6. 1 Sam. 1:20.;
 \(\tilde{V}\) in \(\tilde{
- 2. a. Neuter verbs whose second radical has \tilde{e} (see § 134) change this vowel into \tilde{a} in the other persons (191.2. c.), e. g. פָּבָּקָד, דָּקָרָ 1 Sam. 12:2.,

§ 222. Third pers. fem. The ה of this person is occasionally hardened into ה (§ 73. 2. d.), e. g. אַזְלָה Deut. 32: 36. for אַזָּלָה.

\$ 224. Sec. pers. fem. Here in like manner the full termination of the separable pron. אַהָּר is sometimes added, e. g. בְּרָהְּר Jer. 3:5., 13:21. Ruth 3:3, 4. In Syriac the is regularly written, thus בּבֹרָהְר in Arabic the afformative on takes the vowel (), thus בּבֹרָהָר

مَهُكُمُكُ ; in Arabic the afformative نعتم takes the vowel (من من المحكمة عنية عليه المستعملة عليه المستعملة والمستعملة المستعملة الم § 225. First pers. com. According to the analogy of the other persons, the first should be formed by affixing the principal consonant or vowel of the pronoun of the first person to the root of the verb; but this would give either קטלני, meaning he killed me or my killing. Hence, to avoid ambiguity, the n of the preceding person is here retained, to which is added the characteristic vowel of the first person, thus קטלתי. And this we find to be the case not only in Hebrew, but likewise in all the other Shemitish tongues, e. g. Chald. 2 pers. קְּמַלָּהָ 1 pers. קְּטְלֵח, Syr. كَيْلُتُ قَتَلْتُ , Arab. عَيْلُتُ بَيْلُتُ , Eth. אַבְּאַ **MLM**. There are however still to be discovered some indications of the purely analogical mode of formation, as אמרי Job 9: 27. for and perhaps אברתי Job 34: 36., which form is most frequently used in Rabbinic Hebrew. The verb in the infinitive followed by the entire pronoun likewise occurs, viz. שַׁבַּהַ אַנר Eccl. 4:2. . שבחתי for

\$ 226. Third pers. plur. The full form of this person would be מְּשִׁלְּהִם (see p. 89.); but as the same letter is used as the suffix of the accusative third pers. plur., מוֹ is changed for the purpose of contradistinction into אָ e. g. אֲבָּהְוּץ Is. 26: 16. As however this אוֹ is not necessary to perspicuity, it is almost always rejected; so that for the characteristic of the third pers. plur. we have in general אוֹם alone, thus בְּשִׁלְּהָא. In a few instances an otiant אוֹ is added to the plur. term., e. g. אַבּהַא. Josh. 10: 24., אַבּהָא Is. 28: 12., דּבָּשֵׂרָא Jer. 10: 5.;

which is always the case in Arabic, thus is frequently retained.

§ 227. Sec. pers. fem. This person occasionally retains the final השׁלַכֹּחְנָה , like the see pers. masc. sing., e. g. הְשׁלַכֹּחְנָה Amos 4:3.

Future.

§ 228. Third pers. masc. sing. 1. This secondary tense takes for its principal vowel on the second radical (§ 113) a modification of that of the preterite: thus in active verbs, whose second vowel in the preterite is a, the future takes its modification o; and in neuter verbs, whose principal vowel is e or o, the future takes their intermediate a, e. g. בְּבַּל , בְּבָל , בְּבָל , בְּבָל , בִּבָּל , בִּבָּל .

2. We meet also with some active verbs which retain a in the future, e. g. לְבֵשׁ Lev. 6:3., רְבַּקֹר Jer. 13:11. Others have alternately o and a, e. g. הַשְּׁמָה Ex. 23:12. Lev. 26:35., הַשָּׁהָ v. 34.; רְבָּקֹר Job 40:17., רְבָּלָר Ps. 37:23. 147:10.; הַבְּלָר Mal. 2:15., בַּבָּר, v. 10. And in a few instances a occurs, viz. הַשְּׁבּרָר Ex. 18:26., בּבְּרָר Ruth 2:8., בּבּלָר Prov. 34:1., like the Syriac בּבּלר.

3. In a few instances the performative ז is not changed into ז (see § 162), e. g. רְשָׁאֵל Is. 5:29. for לְשָׁאֵל ; so לְשָׁאָל Ezek. 44:24., רְשָׁלֵּל Prov. 2:7.; the same is the case in Pi'hel, e. g. בַּפּרָר 43: 26.

§ 229. Sec. pers. fem. sing. This person sometimes takes a paragogic אָרָבָּקרין, e. g. הְּשָׁתַּכָּרין, Ruth 2:8, 21. 3:4, 18., מַשְׁתַּכָּרין, 1 Sam. 1:14.

§ 230. Third pers. fem. plur. In a few instances this person is formed by adding the syllable לָה to the third pers. masc. sing., e. g. מַבְּהְבְּהָה Gen. 30: 38., רַּהְשִׁרְכָה 1 Sam. 6: 12., בְּהַבְּהָה Dan. 8: 22.; and once the term. of the third pers. m. plur. is retained, e. g. רַהִּקְרְבֹּה Ezek. 37: 7. for הַהְּבְּרָה.

Infinitive.

\$ 231. The infinitive absolute has no anomalies; for whether Hholem be accompanied by ז or not, is entirely unimportant. When used as a noun, it may be converted into a feminine by the addition of the term. אַבָּי, which takes place for the most part on receiving a preposition. In such case the first vowel is rejected, and replaced by the second, which is shortened generally into ŏ, e. g. אַבְּלֶּהָה Ex. 29: 29. לְּבָהְאָה Ex. 29: 29. לְבָהְאָה Ezek. 18: 5.; and occasionally into š, e. g. אַבְּהָלָה Deut. 1: 27.

Imperative.

Participles.

§ 233. Active. The second vowel of the active participle is sometimes $\bar{\imath}$ instead of \bar{e} , e. g. אָרָטָרָה Ps. 16:5., אַרָּטָרָן Is. 29:14. 38:5. In neuter verbs, which for the second vowel of the preterite have either e or o, the preterite and participle are alike, thus אָרָין, אָרָלָן both part. and pret.; for, as already observed, in active verbs the preterite has reference especially to the action, and the participle to the agent; in neuter verbs, however, which do not designate an action, but merely a state of being, this state is attributed to the subject equally by the preterite and participle, and consequently the form of both is the same. The fem., which is generally formed by adding π , frequently takes instead its harder cognate π with (), e. g. π

§ 234. Passive. The passive participle, which appears in no active species except Kal, has sometimes an active signification, especially when the verb is intransitive, e. g. אָחוֹד, grasping, holding, Cant. 3:8., בּמוֹד trusting, Ps. 112:7.

NIPH'HAL.

Future.

§ 235. 1. In the sec. pers. fem. plur. of some verbs the second radical has () for (,), e. g. מֵרְמֵסְנָה Is. 28: 3., הַשָּׁנֶלְנָה Zech. 14: 2.

2. a. If the future is followed by a monosyllable or a word with the accent on its first syllable, that of the future is retracted to the penult (§ 60), and the ultimate long vowel (_), which without the accent

cannot form a mixed syllable, is shortened into its corresponding (ֶ), e. g. רָבָשֵׁל בָּהּ Ezek. 33: 12., יְבָשֵׁל בָּהּ Esth. 5: 6. b. Sometimes, though but rarely, () is changed into (), e. g. מְעֵיֵב אֲרֶץ Job 18:4.; and this also takes place when the verb has conversive, and the pause-accent is on the ultimate (see § 108), e. g. רַרְּבָּעֵל Gen. 21:8., יַרְרָּבָּעֵל Ex. 31: 17., יַרְרָּבָּעֵל 2 Sam. 12: 15.

3. The א of the first pers. future has sometimes i, in order by means of this shortest vowel to express the dagheshed letter with greater distinctness, thus אַבְּעָל Gen. 21: 24., אַבָּעָל 1 Sam. 27: 1. 20: 29. Is. 1: 24.; and regularly in verbs שָׁב, where it is most required (see § 88).

Infinitive and Imperative.

\$ 236. The infinitive absolute appears for the most part with הַּ prosthetic, e. g. הַבְּּהִי, Jer. 32:4. הַבְּּמִל Lev. 7:18. And this form occurs instead of the construct, e. g. הַבְּהַר Ps. 68:3. for אַבָּר Once in the inf. constr. א is found in place of the preformative ה, viz. אַבְּרשׁ Ezek. 14:3. In the infinitive and imperative as well as the future, the accent is retracted to the penultimate syllable on being immediately followed by another accent (§ 60); and in consequence the ultimate vowel is shortened, e. g. inf. הַמָּהָר שָׁב Job 34: 22., הַבְּּהַרְ בָּרֹת בָּרֹ בָּרֹת בָּרֹ בָּרַת בָּרֹ בָּרַת בָּרֹ בָּרַת בָּרֹ בָּרַת בָּרֹ בַּרָת בַּרַת בָּרַת בָּרַת בָּרַת בָּרַת בָּרַת בָּרַת בָּרַת בָּרַת בַּרַת בַּרָת בַּרַת בַּרַת בַּרַת בַּרַת בַּרַת בַרַת בַּרַת בַּר בּרַת בַּרַת בַּרַת בַּרַת בַּרַת בַּרַת בַּרַת בַּרַת בַּר בּרַת בַּרַת בַּר בּרַת בּרַת בּרַת בּרַת בּרַת בּרַת בּרַת בַּרְת בַּרְת

Participle.

§ 237. The second radical is sometimes found with long o, especially when the first is a guttural causing the preformative to take a, e. g. בהמוֹם Esth. 8:8., במכוֹן 9:1.

PI'HEL.

Preterite.

Infinitive.

§ 239. The form of the infin. absol. is לַבֶּר, though not of frequent occurrence; the following examples may be cited: אַבָּר Ps. 118:18., אַבָּר Ex. 21:19., אַבָּר 1 Kings 19:14. In the constr. the first rad. has sometimes though seldom i for a, e. g. אָבָר Lev. 14:43. (which however may be taken as the preterite, with אַבָּע understood), אָבָר Psam. 12:14., אָבָר Hos. 1:2.

Infinitive, Future, and Imperative.

\$ 240. All these when followed by Makkeph, or connected to the succeeding word by an accent, shorten the final ē. Inf. בַּבֶּר Is. 36:11. Jer. 9:4., בַּבֶּר Ex. 13:2. Imp. Once the imperative takes ă instead, viz. בַּבָּר Ps. 55:10. Fut. דְּבָּרָר Ps. 145:21.; the fut. of זָבָרְר jer is formed like that of y gutt., e. g. דְּבָּרֶר Jer. 9:4.

PU'HAL.

Preterite.

\$ 241. In some instances the first rad. takes ō for ū, e. g. קַלָּרְ Ps. 72: 20. for קַלָּרְ Ps. 80: 11., רַבָּרָ Ezek. 16: 4., שָׁבְּרָּר Nah. 3: 7. The cases in which ū is found, as קַלָּר Judg. 13: 8. 18: 29. Job 5: 7., דּבָּרָד Ezek. 16: 34., אַבָּר Ps. 78: 63., are to be looked upon as mere orthographical variations, as is shown by the retained Daghesh; (ק) being written for (), as, on the contrary, () is found occasionally for (¬). See note to § 100. 1.

Participle.

לְּבֶּרָת Nah. 2: 4. Ex. 23: 5. The characteristic ישׁ is occasionally omitted, e. g. מְלָבֶּר Propy for מְלֶבֶּר Eccl. 9: 10. Is. 54: 11. Ezek. 26: 17. Hos. 1: 6. בְּלְבֶּר for מְלֶבְּר Eccl. 9: 12. (some of which however may be considered as the third pers. pret. with an ellipsis of the rel. pron. אַמָל And once the third radical is doubled instead of the second, viz. אַמְלַל Ps. 6: 3. for אַמֵּל ; though this likewise may be construed as a preterite with the omission of

нірн³ніг.

Preterite.

\$ 243. The characteristic prefix ה of this species has in some instances ĕ instead of its appropriate vowel ˇ, e. g. הֶּבְּבֶּבְּרָה Jer. 29:1. Esth. 25:7.; this obtains mostly in verbs הֹא , e. g. הְּבְּבָּרְה Jer. 29:1. Esth. 2:6. The vowel ˇ is retained under the second radical in the first pers. with a suffix, e. g. הְּשִּׁבְּרָה 1 Sam. 1:28., and thus also in Kal, אַבּרִּה הוֹ Judg. 13:6. In some few cases א is irregularly taken for the char. הֹ (as vice versa הֹ for אַ in the Aph'hel species in Chaldee), e. g. אַבְּבְּרָהְר (as vice versa); and so in Hithpa'hel, e. g. אַבְּבְּרָהְר (בּרָה 20:35. for אַבְּבְּרָהְר Is. 19:6. Once ה is hardened into הִ עִּבְּרָב וּבּר Is. 11:3.

Infinitive.

\$ 244. The infinitive absolute takes for its second vowel either (_) or (בְּיִשְׁבֵּר , e. g. בְּשְׁבֵּר Jer. 7: 13., בְּשְׁבֵּר Prov. 1: 3. 21: 16., בְּשְׁבֵּר Is. 14: 23.; בְּשְׁבֵּר Jer. 44: 4. In a few cases א is prefixed for ה, as בַּבְּרָב Cen. 41: 43. On receiving a preposition, ה may be retained, e. g. אֲבְרָּך Num. 10: 7., בְּבַּרְבִּילְרָ Eccl. 3: 5.; or omitted (§ 77. 3.), e. g. בַּבְּרְבִּילְרָב Jer. 37: 12. for בְּבַּרְבְּילְרָב בְּרָב בְּרָב בְּרָב בְּרָב בְּרָב בְּרָב בְּרָב בְּרָב בְּרָב בּרָב בּרְב בּרָב בּרָב

Future.

\$ 245. In the apocopated form the ultimate vowel (בְּי) is changed into (בְּי) (§ 209. 2.), e. g. בְּיִחְבֵּי Is. 27: 5., שַּבְיּי v. 6. The same contraction takes place on the reception of כי conversive (§ 216), e. g. בַּיִּשְׁבֵּו Gen 22: 3., בְּיִשְׁבֵּי 21: 15. 2 Kings 4: 41.; and when this is followed by Makkeph, (_) is still further shortened into (_,), thus בַּיִּשְׁבֶּיִ 2 Kings 2: 21., בַּיִּשְׁבָּיִ 4: 8. In the third pers. plur. the vowel of the second radical is sometimes rejected altogether, e. g. בַּיִּבְּבָּרְ Jer. 9: 2., בַּיִּבְּבָּרְ בַּרָרַ זַבָּר בָּרַבָּרָ Jer. 9: 2., בַּיִּבְּבָּרְ בַּרָר בַּרָרַ בַּרָר בַּרָר בַּרָּבָּרְ בַּרָר בַּרָר בַּרְּבָּרְ בַּרָר בַּרְר בְּרָר בַּרְר בְּרְר בְּיִבְּיבְּרְר בְּרְר בְּרְרְיבְּרְר בְּרְר בְּרְר בְּרְר בְּרְר בְּרְר בְּרְר בְּרְר בּרְר בּרְר בְּרְר בְּרְיבְּרְיבְּבְּרְר בְּרְר בְּרְר בְּרְרְיְבְּרְר בְּרְר בְּרְר בּרְר בּרְר בְּרְר בְּרְרְר בְּרְר בְּרְר בְּרְר בְּרְר בְּרְר בְּרְר בְּרְר בְּרְר בְּרְ

Imperative.

§ 246. When the third radical has no vowel of its own, the (יָּר) of the second is changed into (ֶ), e. g. נְהַשְׁקָם Is. 7: 4., הַעָמֵק v. 11.,

Pana Ps. 35: 2.; and this again into e when connected with the following word by Makkeph, e. g. הַּמָבֶר 2 Sam. 24: 10., קוֹבֶּר Job 22: 21.

Participle.

\$ 247. The participle sometimes takes (_) for (¬¬), e. g. מֶּמְתֵּר Is. 53:3., מֵּמְתֵּר Ps. 135:7.; and occasionally in the plural (¬¬) is rejected, and the second radical takes Sh'wa, e. g. מַחְלָּבְיּרם for מֵתְלָבְיּרם Jer. 29:8., so מֵהְלָבְיּרם Zech. 3:7., מַתְלָבְיּרם 2 Chron. 28:23.

HOPH'HAL.

Imperative.

§ 248. Twice we find the imperative in Hoph'hal, viz. הְשִׁלְּבָה Ezek. 32: 19., הַפָּנה Jer. 49: 8.

Participle.

§ 249. Once ה is retained after the participial prefix מָלְצְעוֹת for מַקְבָּעוֹת Ezek. 46: 22.

HITHPA'HEL.

CHAPTER IV.

IMPERFECT VERBS.

§ 251. According to the paradigm of מול are conjugated nearly all Hebrew verbs whose three radicals are perfect letters (§ 7), and which we have therefore termed perfect verbs. But there are also a number of verbs which exhibit certain peculiarities of inflection, caused for the most part by the occurrence of an imperfect letter in the root; we shall accordingly include them under the general appellation of imperfect verbs. These verbs have been improperly called by grammarians irregular. We say improperly, because in Hebrew we meet with none of those arbitrary deviations from the normal mode of inflection which are of such frequent occurrence in Greek, for example, and the modern languages of Europe, and of which the dictum usus est tyrannus is conceived to furnish all the explanation required. peculiarities of the Hebrew verbs to which this epithet has been applied are all susceptible of explanation as the necessary consequences of the nature of the letters entering into their composition. According to these peculiarities we shall divide them into the three following classes:

Class I. Verbs undergoing a change in the vowels alone, viz. those whose root contains a guttural letter.

CLASS II. Verbs one of whose radicals (generally the liquid 1) is rejected.

CLASS III. Verbs undergoing a change or rejection in both consonants and vowels; comprising those whose root contains a weak letter, and those whose second and third radicals are alike.

CLASS I.

VERBS UNDERGOING A VOWEL CHANGE.

§ 252. The verbs of this class are those whose root contains a guttural letter, whence they are called *Guttural Verbs*. We may here briefly recapitulate the chief peculiarities of the letters which give a name to these verbs; they are as follows: 1st, a preference for the simple vowel a of their own organ (§ 84. 1. a.); 2d, their taking for

the most part compound instead of simple Sh'wa (\S 84. 2.); 3d, an incapability of being reduplicated in pronunciation, in consequence of which they do not receive Daghesh forte (\S 84. 3.); 4th, the reception of Pattahh furtive at the end of a word or syllable when preceded by a heterogeneous vowel (\S 84. 1. b.).

§ 253. These verbs are of three kinds:

- 1. Those whose first radical is a guttural, termed Verbs & Guttural.
- 2. Those whose second radical is a guttural, termed Verbs \ddot{z} Guttural.
 - 3. Those whose third radical is a guttural, termed Verbs 5 Guttural.

1. Verbs whose First Radical is a Guttural.

Verbs פ Gutt. (דָמַד).

KAL.

§ 254. Preterite. There is no deviation in the singular number or in the first or third pers. plural, where the guttural is accompanied by its homogeneous vowel a; but in the sec. pers. plur. the rule § 84. 2. applies, thus אַמַרְהַהָּן, אָמֵרָהָּהָם.

§ 255. Infinitive. In like manner the infinitive absolute has a under the first radical, and in the construct state compound Sh'wa, thus במד

for עמד

- § 256. Future. Here the preformative takes the homogeneous vowel of the compound Sh'wa of the infinitive construct (§ 84. 2), thus בַּצְבּוֹרְ for בְּצְבּוֹרְ. In those persons where the second radical also has Sh'wa, the (ָ) of the compound is rejected, in order to prevent the concurrence of two movable Sh'was (§ 104. 1. c.), e. g. תַּבְּבִּרָ for הַּצְבָּרָרָ.
 - § 257. Imperative. Regularly formed from the future.
- § 258. Participle. As the first vowel o is the characteristic of the act. part. (§ 164), it is retained, although not so consonant to the nature of the guttural as a.

NIPH'HAL.

§ 259. Preterite. As the guttural in consequence of the weakness of its sound cannot terminate a mixed syllable with $\bar{\imath}$, this vowel, which on account of its extreme brevity must necessarily be followed by a consonant in the same syllable, is changed into its longer cognate vowel \bar{e} , the guttural taking the corresponding compound Sh'wa, thus

קמבר (see § 84. 2.). Here also, as in fut. Kal, when the second radical also has Sh'wa, the (ָ) of the compound is dropped by § 104. 1. c., thus נְצְמֵרָה for נֵצְמֵרָה.

§ 260. Infinitive. As the guttural cannot receive Daghesh forte, the

 \bar{i} of \bar{n} prosthetic is lengthened into \bar{e} , thus הַעָבוֹר (§ 84. 3.).

§ 261. Fut., Imp., and Part. Regularly formed from preterite and infinitive.

PI'HEL AND PU'HAL.

§ 262. As in these species of verbs 5 guttural there is nothing to interfere with the peculiarities of the guttural letter, they are inflected in every respect like those of 500.

нірн'ніц.

§ 263. Preterite. Here the preformative takes (ֶ), and the guttural (ֱ), as in Niph'hal, thus הְּעָמִיך for הְּעָמִיך (§ 84. 2.).

§ 264. Infinitive. The guttural receives (_), to correspond to the

preceding (ַ), thus הַעָמִיד for הַעָמִיד.

§ 265. Fut., Imp., and Part. All regularly formed.

HOPH HAL.

§ 266. The guttural takes $\binom{1}{n}$ throughout, on account of the preceding $\binom{1}{n}$ (§ 84. 2.); with the exception of those persons of the preterite and future in which the second radical has Sh'wa, where the $\binom{1}{n}$ of the compound Sh'wa is rejected, as in Niph'hal (§ 259).

HITHPA HEL.

§ 267. Formed regularly from Pi'hel.

Remarks on Verbs 5 Guttural.

KAL.

§ 268. Preterite. In the word בֵּרִיתֶם Deut. 9:24. the compound Sh'wa (__) is taken as the most consonant (see § 21) to the following (_).

§ 269. Infinitive. When the first radical is א, this letter, being the weakest of the gutturals, takes the longer () instead of () (§§ 87., 88. 1.), thus אַלל אַכל . A preposition prefixed originally with Sh'wa takes the corresponding vowel, thus לַאֵלל Gen. 24: 33. 28: 20.; and as א can rest in ē, we have likewise the form לַאָלל (§§ 87., 88. 4.). The letter ה also, which approaches in its nature to the palatals, takes () instead of () (see § 11), e. g. הַלוֹת Gen. 2: 18. Ps. 50: 21.

\$ 270. Future. Verbs whose second radical is accompanied by o take (___) before it: those in which it has a take (___), to avoid a repetition of the same vowel, e. g. בְּחֵלֵּל, ; and particularly in verbs אָשָׁרָל, e. g. בְּאֵרֶל, ; also in a few verbs whose second radical has o, e. g. אַאַרֶּל, Mic. 2:12., בְּאַרֶּל, Ps. 29:9. The gutturals frequently take simple instead of compound Sh'wa, especially the comparatively strong הַ (ַ ְּ 85. 1, 2, 3, 4.), e. g. בַּיְהַבֶּל Job 5:18., בַּיְהַבֶּל I Kings 5:11., בַּיְהַבֶּל Ps. 15:5. Deut. 13:9., הַבָּיָה Is. 61:10., בַּיִּהְרָל Ps. 1:2.

Special Remarks on the Future of Verbs & ...

§ 271. In the following five verbs, אָבֶה, אָבֶה, אָבֶה, אָבֶה, אָבָה, the peculiarities of & extend further than those of the other gutturals; for in the future Kal it does not merely take compound instead of simple Sh'wa, but prefers to rest in the preceding vowel, which of course must then be long. They accordingly require an especial notice, although it is not necessary to devote to them an entire paradigm. The exhibition of this single tense, in which alone they differ from other p gutt. verbs, will be sufficient for our purpose.

§ 272. The vowel thus taken by the preformatives is o; not e, which, in pronunciation at least, would confound the future of these verbs with that of verbs ה'ב, and not (), which would give to it the form of future Hoph'hal. We have then לאכל; but in order to prevent the immediate recurrence of the same vowel sound, the second radical takes the simple vowel a, which produces the form

Kal Future.

	PLURAL.			SINGULA	R.	
Fem.	Com.	Masc.	Fem.	Com.	Masc.	
תאכלנה		ראכלו	תאכל		ראכל	3
תאכלנה		תאכלר	תאכלי		תאַכַל	2
	נאָכַל	•		אַכַל		1

§ 273. The above is the form taken by the future Kal of these five verbs,* except in pause, where the second radical takes e, e. g. יאָכל Lev. 21: 22., האמר Prov. 1:21. Some of the other אם verbs partake of the peculiarities of these, e. g. אחד fut. לאחד 1 Kings 6 : 10., דיאחד לַסָּתָ (6:6; יאַחָזוּךְ Is. 13:8. Jer. 13:21.; אָסָהָ fut. אָאָסֹהָ Mic. 2:12., לֹסָתָ 2 Sam. 6:1. Ps. 104:29. for לאָסָק, in both of which instances א is omitted; so also חֹמֵרך 2 Sam. 19:14. for הַאָּמֶרך 1 Sam. 28:24. for האפה. The verb אמר usually takes () under the second radical on receiving כן conversive, thus דיאמר Gen. 14:19. &c. &c. Very rarely א rests in (..), e. g. אמה Mic. 4:8. Those which have o for the first vowel omit the radical & in the first pers. sing., thus Gen. 24: 33. for אמכפה אונכ Mic. 4: 6. for אמכפה (\ 89. 3. a.). There are also some instances of this omission where the first vowel is \bar{e} , e. g. אַהָב Prov. 8: 17. Jer. 2: 36. for אַהָב = אַאַהָב (§ 88. 4.), so ראחר Gen. 32: 5. Once on the reception of a suffix the \tilde{o} is shifted to the first rad. and shortened, e. g. הַאָּכֶלֶהוּ Job 20 : 26. for תּאָכֶלֶהוּ

\$ 274. Imperative. The first radical generally retains the compound Sh'wa of the future, thus fut. יְּמֵבֶּוֹדְ, imp. יְּמֵבֶּוֹדְ; in verbs אַ this is usually (;), e. g. אַדְּהָ Ex. 4:4., אַדְּהָ Job 38:3., אָבֶּהְ Num. 21:16.; but where the second radical loses its vowel, as on the addition of הְּמִבְּהָ, and in the fem. sing. and masc. plur., the first takes the vowel of the compound Sh'wa, e. g. אַבְּהָה Num. 11:16., הַּמָּבָּה Job 33:5., הַּמִּבְּה Is. 47:2.

NIPH HAL.

§ 275. 1. Preterite. In Niph. of the verb אָתְדְּ the char. בֹּ, like the future preformatives of Kal, sometimes takes the vowel o, e. g. אַמוֹלָה

^{*} Those ending in T take () under the sec. rad. by § 85. 4. b.

- Num. 32: 30. Josh. 22: 9. The guttural occasionally receives simple instead of compound Sh'wa (§ 85. 2. b.), e. g. קּמְטֵּבְּלְ Joel 1: 18., בְּּתְיָבְּלְ Joel 1: 18., בְּתְיַבְּלְ Joel 1: 18., בְּתְיַבְּלְ Joel 1: 18., בְּתְיַבְּלְ Joel 1: 18., בְּתְבַּלְ Joel 1: 18., בְּתְבַּלְ I Sam. 10: 22., בְּתְבַּלְ I Kings 10: 21., גַּיְלְבָּלִ עִּלְ בָּרְ Sam. 1: 22.; and the sometimes (ִ) for (ָ .), e. g. בַּתְבַּלֵּב Job 19: 19. 41: 20., בְּתְבַּלַב v. 21., בַּתְבַּלַב Jer. 13: 22. The participle has sometimes o for a in the ultimate, e. g. בַּתְבּלֵב Sth. 8: 8., בַּתְבַּלְב בּרָ בַּלַבְּלַ בַּרָּבְּלַב בּרָ (§ 237).
- 2. Future. In the word הֵּיכְּשֵׂה Ex. 25:31., the appears to be inserted as a mater lectionis to prevent ambiguity, as it might otherwise be taken for the more common word הַּעָשֵּה.
 - 3. Infinitive. לָרָאוֹת Is. 1:12. for לֶהֶרָאוֹת (§ 77. 3.).
- 4. Participle. The preformative rarely takes (-) for (-,), e. g. מַבְּלְאָה Mic. 4:7.

PI'HEL.

- \$ 276. 1. Future. Here the rad. א is sometimes rejected by \$ 88.3., e. g. מַדְּבֶּרָה for מְאַבְּרָהְ 2 Sam. 22: 40. so יַבֵּר Jer. 13: 20., קאַבָּרְהָ Ezek. 28: 16.
- 2. Participle. Here also by § 88. 3. we have מַלְפָנה Job 35: 10. for מְלֵּפְנה .

нівн'ніг.

- \$ 277. Preterite. The (" ,) are generally shortened into (., .) whenever on account of ז conversive preterite the afformative takes the accent (§ 218), e.g. דְּתְבֶּחָדְ, Ezek. 29:7.; בְּתַבְּרְתִּי Zech. 3:4., הֻעָּבֵרְתִּי Jer. 15:14. The forms הַּתְבַרְתִּי Josh. 7:7. for הַתְּבַרְתִּי , and הַתְּלָרִם Hab. 1:15. for הֶתֶבֶרְתִּי , are anomalous. In this species likewise there are several instances of simple Sh'wa accompanying the guttural, e.g. הַתְּלָרִם 2 Kings 4:27.
- § 278. Infinitive. In אם verbs the first radical is occasionally omitted, and the (_) of the characteristic הוב lengthened into (_,), e. g. הַבְּרֵל Ezek. 21:33. for הַבְּרֵל In the imperative also אוֹ is rejected, and הוב takes (_,), e. g. הַבְּרֵל Is. 21:14. Jer. 12:9. for הַבְּרֵל .
- § 279. Future. Occasionally the radical א is omitted in the first pers. sing., and the performative takes ō, e. g. אַבְּירָה for אַבְּירָה Jer. 46:8., אַבְּירָה Neh. 13:13., אוֹבְירָה Hos. 11:4. for אַבְּירָה ; or rests in the preceding a and lengthens it, e. g. רַּיּאָבֶּה Num. 11:25. for רַיּאָבֶה, once א is omitted, e. g. רַיּאָבָה I Sam. 15:5. for רַיּאָבָה.

2. Verbs whose Second Radical is a Guttural.

Verbs " Gutt. (PZI).

KAT.

- § 280. Preterite. When the second radical is a guttural, it is also affected by the peculiarities described § 252. Accordingly the second radical takes (-:) in the preterite where a perfect letter has simple Sh'wa, thus דְּלֶקה for הַּבְּקָה; which constitutes the sole deviation of this species from that of לְנֵל .
- § 281. Infinitive. As o is the characteristic vowel of this mode, it is retained although accompanying a guttural: hence both absolute and construct are formed in the usual manner.
- לְצְּלֵב. Future. Here, as the vowel o is not essential to perspicuity, the guttural generally takes its homogeneous a, thus דְּיִבֶּעָ ; and sometimes, though but seldom, o, e. g. רְּבָהֹם Is. 5: 29, 30., אַזְעֹם Num. 23: 8., הַּמְעֹל Lev. 5: 15.

NIPH'HAL.

§ 283. The only peculiarity of this species is the substitution of compound for simple Sh'wa, thus הַנְעַקָה for נַזְעַקָה.

PI'HEL.

- § 284. 1. Preterite. As the second radical is incapable of receiving the characteristic Daghesh forte of this species, the i of the first is lengthened into \bar{e} (§ 84. 3.), e. g. \bar{e} for \bar{e} (\bar{e}) not being used in the intensive species, we have adopted with other grammarians the verb \bar{e} as the standard of inflection); in some instances, however, \bar{e} is retained (see §§ 291., 143. 1.).
- 2. Infinitive. The (ַ) of the first radical is lengthened into (ַ) (§ 84. 3.), thus בָּרֹךְ for בָּרֹךְ for בָּרָדָּ for בָּרָדָ.
- 3. Future. From infinitive, יְבֶרֵהְ. In many instances, however, (_) is retained see § 292).

PHO HAL

§ 285. The ŭ of the first radical is lengthened into its cognate ō (see §§ 84. 3., 102. 5. a.), e. g. pret. אָבָב for אָבַב, inf. בָּבָד, fut. יְבֹבֶץ. vol. ו.

Remarks on Verbs 5 Guttural.

KAL.

§ 286. 1. Future. Sometimes the second radical takes o, especially in verbs which are also guttural, where the preformative has a, e. g. אַקרֹג Ps. 78: 47., אַכּוֹג Joel 1: 20.

2. Imperative. In Judg. 19:5. we find the form סְּלֶר.

NIPH'HAL.

§ 287. Preterite. The verb לָאֵל takes in the third pers. plur. the form לְּאֵל Is. 59: 3. Lam. 4:14. (see § 275).

PI'HEL.

\$ 288. Preterite. When the third radical also is a guttural, the second takes ā, e. g. אַחַר Gen. 34: 19. (once אַחָר Judg. 5: 28. for אַחָרא); and occasionally when this is not the case, e. g. בַּרָּךְּ, Gen. 28: 6. Ex. 20: 11. Is. 60: 9. The protraction of the first vowel is frequently neglected, e. g. אָאָר Ps. 10: 3., בַּעַר 2 Kings 23: 24., בַּעָר 14: 48., בַּעַר 15: 51: 3.

§ 289. Infinitive. In the infinitive short a is frequently retained, e. g. מָהֵר Is. 8:1.

לְּמֵהֵל Gen. 18: 16. Ex. 34: 8., יְבָהֵל Is. 40: 11., הַמְּהַר Gen. 31: 26., בּמָהַר Is. 16. Ex. 34: 8., יְבָהֵה Is. 40: 11., הַמָּהַר Gen. 31: 26., וֹבְּבֵּר Is. 16. Ex. 34: 8., יְבַהֵּה Is. 9: 16. Zech. 1: 12. Is. 9: 16. Zech. 1: 12. As in the preterite, when the third radical is likewise a guttural, the second takes a, e. g. הַאַהַר Ps. 40: 18. If conversive be prefixed, or the word following be a monosyllable, the accent is shifted back to the penult, and the ultimate vowel (_) is shortened into its corresponding (ֻ) (﴿ 57. 4., 215. 3.), e. g. יְבַרֶּה יִבְּרָה , יְבַרֶּה , וֹבְּרֵה יִּבָּר , בּבָּר , בּבָּר , בּבָּר , בַּרָה . 1: 22., בּבּר , בּבַר , בַּבְר , בַבְר , בּבְר , בַבְר , בַבְר , בַבְר , בַבְר , בַּר , בַּר , בַב , בַר , בַבְר , בַּר , בַבְר , בַבְר , בַבְר , בַבְר , בַבְר , בַּר , בַבְר , בַב , בַבְר , בַב , בַבְר , בַבְר , בַבְר , בַבְר , בּר , בַב , בּר , בַבְר , בַבְּר , בַבְּר , בַבְר , בַבְּר , בַבְּר , בַבְר , בַבְר , בַבְר , בַבְר , בַבְר , בַבְר , בַבְר

\$ 291. 1. Imperative. In this mode also the first radical often takes (_), e. g. מֲהָרִי Gen. 18:6., בַּחֲמֵה Is. 40:1., צַהְלִי Is. 10:30., בַּחֲמֵה 1:16.

2. Participles. Here also (_) is found under the first radical, e. g. מְרַחֶּמֶם, Gen. 1: 2., מְרַחֶּמֶם Is. 49: 10.

PU'HAL.

 \S 292. When the second radical is the strong guttural π (\S 85. 2.), the \ddot{u} of the first is retained, e. g. הְּתְּאָה Hos. 2:25., בְּרָחַם 14:4., Prov. 30:12. In Hos. 13:3. we find רָסַער.

нірн'ніц.

§ 293. Imperative. Occasionally the second radical takes the guttural vowel a instead of e, e. g. Joel 4:11.

HITHPA HEL.

- § 294. 1. Preterite. In those persons where the second radical originally has (_), which is lengthened by a disjunctive accent into (_) (§ 107.1.), the (_) of the first radical is changed into (_) (§ 101.1.b.), e. g. הַּבְּחָבָּיִה Ezek. 5:13. for הַבְּחָבָּיִה. In the verb שֵׁלָשׁ we find the Hithp. formed from the infinitive of Pu'hal, e. g. הַּבְּחַבְּעִשׁ Jer. 25:16. 48:8.
- 2. Future. The same vowel-changes take place on the reception of a strong disjunctive accent in this tense also, e. g. רְתְּמֶהָם Num. 23:19. Deut. 32:36.

3. Verbs whose Third Radical is a Guttural.

Verbs بي Gutt. (تيشِ).

\$ 295. The sole peculiarity of these verbs consists in preferring the vowel a before the final guttural. In consequence of which, whenever the vowel of the second radical is either e, i, o, or u, and is characteristic of the species, mode, tense, &c., or has a semi-vowel resting in it, as י, י, or י, the guttural takes its homogeneous vowel a (Pattahh furtive, § 23) in addition, e. g. inf. Kal. אַמֹשִׁי, part. pass. אַמַרּשָּׁי, Hiph. דּשִּׁמִילַי. But when the vowel of the second radical is not rendered immutable by either of these causes, in future Kal always, and frequently in the remaining species, it becomes merged into the a of the guttural, e. g. fut. Kal אַמַעִּי, fut. Niph. אַמַעִּי, Pi'hel אַמַעַּיּ

KAL.

§ 296. Preterite. The third radical, in those persons where it is destitute of a vowel, takes Sh'wa simple, contrary to the general rule § 84. 2., thus אָשְׁמַשָּׁ, in order to avoid the too close connection of the root of the verb with the afformative, on whose vowel the pronunciation of the last radical would then depend, as אָשִמָשָׁ; but when the afformative also has Sh'wa, the guttural takes Pattahh furtive (§ 23), thus אַשְמַשָּׁ for אַמִּשְׁשָׁ.

§ 297. Infinitive. Absol.—The vowel o is retained, in order to preserve the necessary distinction in form between this mode and the

preterite, thus שׁמוֹע. Constr.—שׁמוֹע.

§ 298. Future. As the vowel o, which in this tense usually accompanies the second radical, is not essential to perspicuity, it becomes lost in the a of the guttural, e. g. שַׁמַע (see above, § 295) for נְשֵׁמַע (\$299. Imperative. Regularly formed from the future, thus שַמֵּע .

§ 300. Participle. Active.—As the first is the essential vowel, the second may be either retained or contracted; hence the two forms אממים and אממים. Pass.—The ultimate vowel of the passive is accompanied by its homogeneous semi-vowel, and is consequently immutable (§ 295), thus אַמְמָּבֶּי.

NIPH HAL.

§ 301. Preterite. Like the Niph'hal of אָמָשׁ; except the sec. pers. fem. sing., where, on account of the concurrence of two Sh'was, the guttural takes Pattahh furtive (§ 23).

§ 302. Infinitive. Absol.—That this mode may not be confounded with the preterite, the o of the second radical is retained, thus אַשְׁשִׁיב. Constr.—As e is not an essential vowel, it undergoes contraction, thus אַשְשִׁיִק for אַשְשִּׁיק.

§ 303. Future. The future and after it the imperative are contracted like the infinitive construct, thus fut. הַשָּׁבֵע , imp. הַשָּׁבֵע.

PI'HEL.

§ 304. Preterite. The vowel of the second radical, not being essential, is either preserved or contracted, thus DDE or DDE.

- § 305. Infinitive. In the absolute the full form is retained, thus ២គ្នយ់; in the construct the final syllable is contracted, thus ២គួឃុំ.
 - § 306. Future. May be contracted or not, thus יְשַׁמֵע or יְשַׁמֵע .
 - § 307. Imperative. Regularly formed from the future.
 - § 308. Participle. Contracted or not, thus מָשֵׁמֵע or מָשָׁמֵע .

PU'HAL.

§ 309. Throughout like the Pu'hal of לְּמָלֵּל; except the sec. pers. fem. sing. of the preterite, where the guttural takes Pattahh furtive (§ 23).

нівн'ніг.

- § 310. Preterite. The guttural, being preceded by the heterogeneous characteristic vowel i, takes Pattahh furtive, thus הַּשָּׁמִיבּ. And so in the infinitive, future, and participle.
- § 311. Imperative. Here the heterogeneous i is merged into the vowel of the guttural, on account of the quickness of expression proper to this mode, which opposes the extension of the word by an additional vowel, thus אַנְיִלְיִם.

HOPH'HAL.

§ 312. No peculiarity.

HITHPA'HEL.

§ 313. Regularly formed from the infinitive of Pi'hel. As the example of פ" guttural, which in compliance with custom we have thought proper to retain, has the sibilant ש for its first radical, a transposition here takes place (see § 151. 1.), thus הַּחַשֵּׁבִּע for דָּבָּעוֹהָ פּר.

CHAPTER V.

IMPERFECT VERBS. CLASS II.

VERBS ONE OF WHOSE RADICALS IS REJECTED.

§ 314. In most languages the liquid n, when in the process of composition or inflection it is immediately followed by another letter of the same class, is assimilated to such letter, e. g. Lat. colligo = conligo, irrumpo = inrumpo, $Gr. \sigma v \lambda \lambda \alpha \mu \beta \acute{\alpha} r \omega = \sigma v r \lambda \alpha \mu \beta \acute{\alpha} r \omega$. When the Hebrew has no vowel of its own, and is immediately preceded by one, it goes further, and becomes assimilated to any following consonant which can receive Daghesh forte. In the infinitive construct and imperative of the verbs, is rejected, although not preceded by a vowel: in the former case on account of its close connection with the following noun, with which it forms a single compound term (§ 161); and in the latter, in consequence of the brevity of expression proper to the imperative (§ 76). Whenever it has a vowel of its own, this letter is retained.

Verbs whose First Radical is Nun.

Verbs (נָגַשׁ).

KAL.

§ 315. Preterite. Like קטַל.

§ 316. Infinitive. Absol.—This has no peculiarity. Constr.—Here is rejected (see above, § 314), and ה appended to form a feminine Cegholate noun, e. g. אָשֶׁלָּה. If the third radical is a guttural, the infin. constr. takes two Pattahhs, e. g. בְּעֵל Eccl. 3: 2. from עָּעָל.

§ 317. Future. שָׁב for הַבְּשׁ (§ 314).

§ 318. Imperative. Regularly derived from the future, e. g. win 2 Sam. 1:15.; but sometimes with (_), which followed by Makkeph is shortened into (_), e. g. win Gen. 19:9.

§ 319. Participles. Like those of קְּמֵל, both active and passive.

NIPH'HAL.

§ 320. Preterite. win for wind.

§ 321. Inf., Fut., and Imp. In all these, 3 is accompanied by the vowel (); consequently no rejection takes place.

§ 322. Participle. was for wiss.

PI'HEL AND PU'HAL.

§ 323. In all respects like קָטֵל and בְּטֵל, ב having a vowel of its own.

нирн'ни.

§ 324. The liquid : is assimilated to the second radical throughout, thus האביש.

HOPH'HAL.

§ 325. As in the active voice, Σ is assimilated to the letter following; the preformative takes \tilde{u} (§ 149), which before Daghesh forte is preferred to δ (§ 101. 3. b.), thus $\tilde{u}_{\lambda \bar{\lambda}}$ for $\tilde{u}_{\lambda \bar{\lambda}}$.

HITHPA HEL.

§ 326. Regularly formed from infin. Pi'hel; it is consequently inflected throughout like הַהְקְפָשׁל.

Paradigm of Verbs

PRETERITE.	Kal.	Niph.	Pi'hel.	Pu'hal.	Hiph.	Hoph.	Hithp.
Sing. 3 m.	נָבַשׁ	נִבַּשׁ	נגש	נְגַּשׁ	הָגִּישׁ	אַנַש	הִתְנַגֵּשׁ

Active.	לגש		מָנגַשׁ		מַגִּרשׁ		מֹחַנֵּיִּשׁ
Passive.	נָגוּשׁ	زؤق		מְנְגָשׁ		ಭಾಸೆ ಭ	•

Remarks on Verbs "D.

KAL.

לָ 327. Infinitive. The construct in some verbs retains the radical בּ, e. g. בְּלֹרָ Gen. 20: 6. Job 6: 7., מְלֵרָ Is. 1:14., בְּלֹר 34: 4., בְּלֹר Prov. 2:8., בְּלֵר Ezek. 24: 8. 25: 12.

§ 329. Imperative. This mode, like the future from which it is derived, takes either a, e, or o, e. g. wil 2 Sam. 1:15., wil Gen. 19:9., wil Josh. 3:9.

NIPH'HAL.

- § 330. 1. Preterite. As the first radical is here rejected, and compensated by Daghesh in the second, this species is to be distinguished from Pi'hel with a for the second vowel (see § 238) by the context alone, e. g. Niph. and Pi'hel לַבָּר, לָבָּר.
- 2. Participle. In the following instances ō appears instead of ā: למוֹל Gen. 17: 26., נמוֹלִים 34: 22. The first, however, may be considered as a preterite from the root בְּלֵל, as likewise עַלְּלֹּה v. 27. Comp. בַּלֹּה (§ 237).

HIPH'HIL AND HOPH'HAL.

§ 331. Some לֻ guttural verbs retain the ב in these species as in future Kal, e. g. הְּבְחֵלְתִּר , הְּבְחֵלְתִּר , דִּנְחֲלְתִּר , זְּנְחֲלְתִּר , קּנְחֲלְתִּר , קּנְחֲלְתִּר , Job 7: 3. And occasionally one whose second radical is not a guttural, e. g. בְּבוּלְתִרךְ Ezek. 22: 20., קְנְתְּלְר , Judg. 20: 31.

HITHPA'HEL.

\$ 332. In the form מָּנְאֵץ Is. 52:6. for מְהָוֹאֵץ, ה is assimilated to by § 152:3.

Special Remarks on the Verbs לָקַח and הָלָקַם.

§ 333. לְּמָלֵּה. When the liquid בּ, constituting the first radical of a verb, is preceded by a vowel and accompanied by Sh'wa, it is, as we have seen, assimilated to the letter following. It suffers the same change under the same circumstances when occupying the last place in the root, e. g. מְמָהָ for הָּבָה. We find in the pret. Kal some instances of the rejection of the first radical, e. g. הְהָה 2 Sam. 22: 41. for הַבְּהָב, Ps. 8: 2. for הַבְּהָה, although this latter example has hitherto been considered as either the infinitive with ה char. fem., or the imperative with ה paragogic; but if we construe it as a preterite, with the relative המשמ referring to הַבְּהַל, the passage will read, How great is thy name upon the whole earth, which (name) gives (i. e. extends) thy glory over the heavens. In the infinitive construct of this verb both the first and third radicals are rejected, thus הַבָּהַל הוֹנִים.

CHAPTER VI.

IMPERFECT VERBS. CLASS III.

VERBS UNDERGOING A CHANGE OR REJECTION IN BOTH CONSONANTS AND VOWELS.

- § 335. The third class of imperfect verbs comprises those whose root contains a weak letter, or of which the second and third radicals are alike. They are of four kinds:
 - 1. Those whose first radical is 7, termed Verbs "D.
- 2. Those whose second radical is either ז or ז, termed Verbs עדר and עדר.
 - 3. Those whose second and third radicals are alike, termed Verbs בלע
- 4. Those whose third radical is either x or コ, termed Verbs x and n.

1. Verbs whose First Radical is Yodh.

Verbs פר (בְשָׁבָ).

§ 336. Those verbs which have for their first radical, suffer either a rejection or change of this letter, and a consequent change of vowel. It is extremely probable that the greater part of them were originally for which form is generally retained in the Arabic and Ethiopic;* for it is only in the Kal, Pi'hel, Pu'hal, and Hithpa'hel species, where this letter commences a syllable accompanied by a heterogeneous vowel, that it becomes changed into (§ 92.1.b.). In the remaining parts of the verb, where the first radical ends a syllable, is generally restored, or rather remains, and the vowel of the preformative is changed to agree with it. The formation is as follows:

KAT.

§ 337. Preterite. שַׁיֵּי for שַשֹׁיָן.

\$ 338. Infinitive. Absol. קשׁוֹכּי. Constr.—Here י is generally rejected by aphæresis for the same reason as the י of verbs בַּ (\$\ 76, 316); and to form a fem. Cegholate noun, the characteristic יו is affixed, e. g. בּּעָּיבֶּי.

^{*} Thus לְבֶל, Arab. בָּלֶב, Eth. שַּׁאַר, בְּלֵד, Arab. בָּלֶב, Eth. שַּׁאַר, In Heb. also we find לְּלֶּך for לְּלֶּד Gen. 11:30.

§ 340. Imperative. Di, regularly formed from the future.

§ 341. Participles. Like those of סְמֵל

NIPH'HAL

§ 342. Preterite. Here on the reception of characteristic, the original is restored, and rests in its homogeneous vowel o, e. g. בּוֹשֵׁב. This remains throughout the species; and consequently,

§ 343. Infin., Fut., and Imp. are formed like those of יָּקְטֵל.

§ 344. Participle. Usually formed from the preterite by changing the final (_) by § 171. into (_,), thus and it.

PI'HEL AND PU'HAL.

§ 345. In each of these species, on account of the heterogeneous nature of the first vowel, is exchanged for in Kal; which constitutes their sole peculiarity.

нтрн'ять.

§ 346. Preterite. On prefixing ה characteristic, the original ה is restored, and rests in the vowel o, as in Niph'hal, thus הֹלְשֵׁיב.

§ 347. Infin., Fut., Imp., and Part. The same observation applies to these parts of the species, e. g. בּוֹשִׁיב, הוֹשֵׁב, הוֹשֵׁב, הוֹשֵׁב,

HOPH'HAL.

§ 348. In this species ה characteristic regularly takes (), which, that המישב may rest in it, is lengthened into (ה), thus pret. הרשׁב, infin. ברישׁב, fut. ברישׁב, part. ברישׁב.

Paradigm of Verbs 5.

PRETERITE.	Kal.	Niph.	Pi ^{hel.}	Pu'hal.	Hiph.	Hoph.	Hithp.
Sing. 3 m.	רָשֵׁב	= ಬ್ಲೆ i)	⊐ಜ್:	٢٠١٤	חושיב	רוּשַׁב	הַתְּרַשֵּׁב
3 f.	רָשֶׁבָּח	נוֹשְׂבָת			הוֹשָּׂיבָה	ಗಾಭಿಕಗ

PARTICIPLES.							
Active.	רשֵׁב		מנהב		מושיב		ಶಹ್ಮೆಶಹಿ
Passive.	רָשׁוּב	<u> ಇಗೆ</u> !		מְרָשָׁב		מוּשָׁב	·

Remarks on Verbs פר ב

KAL.

לְּלֵל Job 42: 2. Constr.—And, on the contrary, הוא job 42: 2. Lab. 3: 13.; in two instances likewise when הוא job affixed, e. g. בְּלֵּהְ Gen. 8: 7., הַלֶּהְ Num. 14: 16. In the verb הַלְּה besides הַלְּה we have הַלֶּה Ex. 2: 4. Is. 11: 9. without the initial הוא job 32: 6, 10.); so הַלֶּה Gen. 3: 19., בֹּלָה בֹּלְה Constructed בַּלְה Gen. 25: 24, 26., and contracted הבל בור Sam. 4: 19.). In those verbs which are at the same time both הם and and הבל הבל רבונים ווא job 12: מון הוא job 13: מון הוא job 14: מון הוא job 15: 24, 26. הוא job 15: 24, 26. הוא job 16: בּלַה הוא job 16: בּ

\$\sqrt{351. Imperative.}\$ The imperative of the verb אַרָּבְּי appears both with and without אַרָּבּי Ezek. 24:3., אַבָּ 2 Kings 4:41. After the rejection of א, this mode also takes (_), which on being followed by Makkeph is shortened into (_), e. g. אַבָּר ; with ה parag. אָבָר , which by rejecting ה becomes אַבָּר אַר אָרָה, which by rejecting ה becomes אַבּר אָבָר אָר זוֹן, which by rejecting ה becomes אַבּר אָבָר אָבָר זוֹן. Is. 8:10. Judg. 19:30. is instead of אָבֶר (like מַבּוֹר אַבְּר Nah. 2:9.), ה on the rejection of being changed into א, for which is written (_) (see § 100. 1. note).

§ 352. Participle. The word רוֹרָשְתָּה 1 Sam. 21: 3., which is generally regarded either as preterite Hiph'hil for הוֹרָשָתִּה or as a new

species termed Po'hel, we would prefer to consider as the participle of Kal with the pronoun of the first person affixed, thus I (am) knowing, I know, a construction of very common occurrence in Chaldee and Syriac. Comp. also רֹלֵלְהָּתְ Gen. 16:11., בְּשִׁתְּחֶרִיתֶם Ezek. 8:16. (see Josh. 22:23.).

NIPH HAL.

§ 353. Preterite. In a few instances the restored ז takes its other homogeneous vowel \tilde{u} , e. g. לְּכְּלְדְרָ 1 Chron. 3:5. 20:8.; and also in the participle, where we find בַּלְבִּלִר 2cph. 3:18. 1:4.

\$ 354. Future. In this tense ה appears twice, although ה is restored in the preterite, viz. בַּבְּהָל Gen. 8: 12., הַבָּהָל Ex. 19: 13. It is the opinion of the elder (Joseph) Kimhhi, that the former of these instances belongs to the Hithpa'hel species (ה being assimilated to ה); to which the younger (David) objects, that if this were the case, the radical would receive (_), not reflecting that the following letter is a guttural. See Michlol, fol. 32. b. 1., and Shorashim, col. 192. When ה is restored in this tense, the preformative of the first pers. sing. invariably takes the shorter vowel (_) instead of (_), in order to express more distinctly the reduplication of the weak letter \(\) (see \(\) 88. 1.), thus \(\)

PI'HEL.

нтрн'нть.

\$ 356. Preterite. In the following preterites י is retained, and rests in (_), viz. הֵיטִיב, הֵיטִיל, הֵיטִיל, הֵיטִיל, הַיטִיל. This is likewise the case in the infinitive, e. g. הַיטֵיב Is. 1: 17., and also in the imperative, e. g. הֵילִיכִי הֵילִיכִי הַרֹּיִכִי הַ Ex. 2:9.; in which mode ה occasionally takes the vowel (_) notwithstanding the restoration of \(\text{

קרְבֵא Gen. 8: 17., הַּוְשֵׁר Ps. 5: 9. Occasionally the first radical is rejected altogether, thus הֹלְכָּתִּר Hos. 2: 16. for הֹלְכָתִּר.

§357. Future. ביניק, יהיליל for ביליל for ביליל for ביניק , יהיליל 32: 13., רחרנק Ex. 2: 7. (\ 77. 3.); in some verbs ה is retained with this vowel, viz. דהרלרלף Is. 52:5., and occasionally with the original א, e. g. יהושרע 1 Sam. 17: 47. Ps. 28: 7. 45: 18. 116: 6. Sometimes the radical ז takes the vowel of the rejected ה, e. g. לרנורב Job 24: 21., ורלרל Is. 16:7., ררלרל Ps. 138:6.; and once this י is rejected, viz. Ex. 2:9. for הניקהר There are a few instances in which the preformative takes its proper vowel (), the first radical forming with it a diphthong, e. g. אַרְסֵרְהָם Hos. 7:12., רְיָשֵׁירְרָ Prov. 4:25. We occasionally find א in place of the radical א, e. g. האמרכה Is. 30:21. for הַרְמִינוּ, הַּרְמִינוּ, Ex. 5:7. for הוסיפוּן, also הספוּן Ex. 9: 28., and once קוֹסְהַ Prov. 30: 6. for הוֹסָק. On taking כי conversive, the () of the apocopated form is further shortened into () (§ 211), e. g. קרּוֹסְקּ Is. 7: 10., קרֹסָקּ Gen. 8: 10., רַיּוֹאָל Ex. 2: 21., בַהַּיטֶב 2 Kings 9:30., רְהֵּדְנֶק 1 Sam. 1:23.; and occasionally without כי conversive in fut. apoc., e. g. קוֹסְק Deut. 3: 26., דרוֹסְק Prov. 1:5.

HITHPA'HEL.

§ 358. The initial ז of some verbs is restored in this species also, e. g. הְּחְרֵבֶּע הְתְרֵבֶּע הַתְרֵבָּע . In the future we have בַּתְרֵבֵע בּי. 2:4. for הַתְרַבָּע

2. Verbs whose Second Radical is Wav or Yodh.

Verbs ער (קום).

§ 359. Although the verbs of this class differ considerably in appearance from the paradigm of pp, there is nothing in their formation that is not the necessary result of the peculiarities affecting the letter 7. These peculiarities we will now briefly enumerate, for the purpose of explaining by their means the deviations of these verbs from the usual mode of inflection.

§ 360. The weak letter $\ \ \ \$, partaking in its nature more of the character of a vowel than of a consonant, seeks in a manner to resign its consonantal power, and rest in a preceding vowel. This quiescence, however, can take place only in the homogeneous vowel u of the same organ, or its modification o (§ 91). Hence arise the following rules:

2. a. When y would be accompanied by a heterogeneous vowel, (viz. a, e, or i,) and preceded by a simple syllable, such accompanying vowel is changed into one homogeneous to 7, and into this the vowel of the preceding consonant is merged, e. g. בוֹסָה for בוֹסָה = בּוֹסָה. is rejected, and either the accompanying vowel is rejected with it, e. g. בה for הום; or is given to the letter preceding, as for instance in neuter verbs whose second vowel is e, in order to distinguish them from those with a (§ 93. 2. b.), e. g. מַנְת for מַנָּה. c. When א with a heterogeneous vowel is preceded by a mixed syllable, it changes such vowel if possible into one homogeneous to itself, and rests in it; consequently the preceding vowel is exchanged for a long one, in order to form a simple syllable, e. g. נקום for טובי : but should the accompany. ing heterogeneous vowel be followed by a quiescent semi-vowel, which would render the change impracticable, is rejected, and the preceding letter takes its vowel (\S 93. 3. b.), e. g. הקנים for הקנים. as in the intensive species, accompanied by a heterogeneous vowel should be reduplicated by Daghesh, to the reception of which this letter on account of its weakness is opposed, the third radical is generally doubled in its stead (§§ 30., 93. 4.), e. g. קוֹם for קּוֹם.

KAL.

§ 361. Preterite. Third pers. masc. profer profess as above stated, § 360. 2. b. In those persons where the third radical takes Sh'wa before an afformative letter or syllable, the preceding (,) is shortened by § 16. b. into (_), e. g. prof. Arc.

§ 362. Infinitive. Absol. שְׁרִם for חָרָם, () being lost in the following i (§ 360. 1.). Constr. בים: the other homogeneous vowel of is here taken, for the sake of contradistinction; although the o of the

absolute is sometimes retained, e. g. xiz.

§ 363. Future. Formed as in other verbs from the infinitive construct, the second radical resting in u and occasionally in o: and as this serves for a vowel to the first radical, the preformative takes the first long vowel (,), in order to form with it a simple syllable, e. g. יְּלְהַם, ; and sometimes though seldom (), the long cognate vowel of (), e. g. יבושו. In the sec. and third pers. fem. plur. the

semi-vowel, preceded by (,) which takes the accent, is inserted before the afformative \bar{n} , to avoid the formation of a mixed syllable with a long vowel (viz. \bar{u} or \bar{o}) in the middle of a word (see § 185); in consequence of which the vowel of the preformative is rejected, in order that the tone-syllable may not be preceded by more than a single vowel (§ 103. 1.).

§ 364. Imperative. Regularly formed from the future throughout, with the exception of the fem. plur., in which an expedient for avoiding a long penultimate mixed syllable is adopted more consonant to the peculiar quickness of expression characteristic of this mode than that employed in the future for the same purpose; i. e. instead of giving a vowel to the last letter of such syllable, its own vowel (אָנוֹם generally shortened into () (§ 101. 3. b.), or else אָנוֹם rejected: whence we have either אָנְיִבְּיִם or אַנְיִבְּיִם.

§ 365. Participles. Act.—As in the preterite, 7 with its heterogeneous vowel is rejected, thus p for pip (see § 93. 2. b.); by which means the active participle presents the same form with the preterite. Pass.—pip for pip.

NIPH'HAL.

§ 367. Infinitive. הקום for הקום (§ 360. 2. a.).

§ 368. Future. מְּלְּכִּוֹים, regularly formed from the infinitive. In the sec. and third pers. fem. plur. א is in general rejected, as is sometimes the case in the imperative Kal, in order to avoid forming a medial mixed syllable: for here the insertion of (אָבֶּי) between the root and

afformative, as in the simple species, is impracticable; since the vowel of the preformative, which is necessary to the expression of Daghesh in the first radical, does not admit of rejection (§ 103).

§ 369. Imperative. Regularly formed from the future, thus הַקּקוֹם.

§ 370. Participle. Like the preterite (see § 171).

нирн'ни.

§ 372. Infinitive. הַקְרִם for הַקְרָם. As in the preterite, being unable to rest in () is rejected, and the vowel of the preformative is

lengthened to form a simple syllable (§ 16. b.).

\$ 373. Future. יְקְרִם . In the sec. and third pers. fem. plur. (יְּרָ) is changed into (ֵ) (§ 188), instead of the insertion of (יְּרָ) as in Kal, e. g. הָּקְמְיָה.

§ 374. Imperative. הָקִם for הָקָם (§ 188).

§ 375. Participle. Formed from the preterite by prefixing ב, thus pret. מְהַקִּים בְּיִקִים (§ 189).

HOPH'HAL.

§ 376. הַקְּרַם for הַקְרַם. Here the radical ק is rejected, and its vowel given to the preceding consonant, by § 93. 3. b.; and as this latter can no longer terminate the initial mixed syllable, the vowel of that syllable is changed into its corresponding long one (see § 102. 5. b.). This we consider the simplest and most natural account of a form which

grammarians in general, who consider \as transposed, have found so difficult of explanation.

§ 377. Infinitive. Would be like the pret. Din, but is not in use.

§ 378. Future. יוּקם for יְהוּקָם (§ 193).

§ 379. Participle. מרקם for בַּהרּקם.

PI'HEL.

§ 380. Preterite. The verbs T form the intensive species by reduplicating the third radical, on account of the weakness of the letter constituting the second (§ 30); for, although the usual mode of doubling the second by means of Daghesh forte is somewhat preferable, it matters little which is adopted, either being adequate to the end proposed (see § 142). Another effect produced by 7 on the form of this species, is the changing of the vowel of the first radical into one homogeneous to itself, viz. ō, in which it rests (§ 91); the third radical then takes the vowel e usually given to the second, thus paip. Accordingly we perceive, that although the Pi'hel of verbs i differs somewhat in appearance from that of קטל, it is constructed on the same principle, and has precisely the same intensive signification. The above is the form assumed when the third radical is a perfect letter; but if this be also a weak letter, its ground of preference as regards reduplication ceases, and as 7 is then comparatively strong, the ordinary mode of formation is adopted, e.g. 772.

§ 381. Infin. קּוֹמֵם. Fut. יְקוֹמֵם. Part. מְקֹוֹמֵם.

PU'HAL.

§ 382. Here, as in the active voice, the third radical is doubled instead of the second; \neg resting in its homogeneous vowel \bar{o} , and the third radical taking the usual a of the second, thus \neg : and so throughout the species.

HITHPA HEL.

§ 383. Regularly formed from infinitive Pi'hel by prefixing the syllable הָתְקוֹמֶם thus, thus, thus, יהִתְקוֹמֶם.

Remarks on Verbs ע"ר.

KAL.

§ 384. Preterite. According to the theory adopted by several modern grammarians for the explanation of the form by, the medial 7 is changed into & on account of the vowel a by which it is accompanied, thus קאם for קאם; after which this א is rejected,—wherefore is not said,-and its vowel merged into that of the first radical. This explanation would seem to have been suggested by the form which verbs 🕆 assume in Arabic, in which language , is regularly changed into I when preceded or accompanied by the vowel a; a rule, however, which by no means applies to the Hebrew.* And even should we grant the change of 7 into 8, no sufficient reason can be given for the rejection of this latter. A simpler and therefore preferable mode of stating the case is, that the a of of sejected together with its accompanying heterogeneous vowel, whence the form b. In two instances only, the vowel of 7 is taken by the first radical, whose vowel is merely euphonic (§ 113), viz. בו Zech. 4:10., מה Is. 44:18. Neuter verbs with ē and ō (§ 133), as מָנָת, מֶנָת, שָּׁוֹם, שֵּׁוֹב, regularly retain these characteristic vowels on the rejection of ז, thus מָלו, thus, שׁב, בֹּב. In those persons which receive a syllabic afformative e is contracted into ă, e. g. מַהַ לִּצָהַ; and once into ĭ, viz. מַּהָ Mal. 3:20. Verbs with o retain that vowel throughout, e.g. nwin. Those whose first or third radical is a guttural seldom suffer an elision of the second; which, were it to take place, would leave but a single efficient letter in the verb, and thus give rise to ambiguity in speaking. In all such verbs therefore the medial 7, which is strong in comparison with the gutturals, retains its consonantal power, and commences a new syllable, e. g. אָנָה, אָנָה, הָנָב, הַנָל, לָנָה, חַוַר, הַנָל, אָנָה, הָנָב, הֹנָה, הַנָר, הַנָה, הַנָר, הַנָל, הַנָה, הַנָּה, הַנְּה, הַנְה, הַנְּה, הַנְה, הַנְּה, הַנְה, הַנְּה, הַנְהָּה, הַנְּהָּה, הַנְה, הַנְה, הַנְּה, הַנְּה, הַנְּה § 385. Future. In the apocopated form of the future, is rejected, and Hholem substituted for Shurek, e. g. קרם, דָּלָם; יָשׁרָב , יָשׁרָב ; (§ 209. 2.); seldom Kibbuts, e. g. קבם Gen. 27: 31. With ק conversive, Hholem is further shortened into Kamets Hhatuph, e. g. pon, רַשְּׁב (§ 211); and also in a few instances where, although ז is not pre-

fixed, the accent is brought back to the penultimate, or removed altogether (﴿﴿ 60., 70. 1, 2. a.), e. g. רֶקָם לֶּךְּ Job 22: 28., קַּשָּׁב־נָא 1 Kings

[•] In one instance א does indeed occur as the medial letter, e.g. אַלְּבְאָם Hos. 10:14., where it is a mere mater lection of the preceding (ַ).

17:21. But when the first or third radical is a guttural, Hholem is frequently shortened into Pattahh on the reception of 7 conversive (see ל 84. 1.), e. g. ליכת Judg. 4: 18. 6: 38., דרות Ex. 10: 14., דרות Is. 7:2.; and also in fut. apoc., e. g. קור Deut. 2:9. In the third pers. masc. plur., whenever the 7 of the afformative (§ 162) is retained, as the syllable thus constituted, being both long and mixed, must necessarily take the accent (§ 55. 1.), the first vowel is rejected, that the accent may not be preceded by more than a single syllable (§ 103. 1.), thus יקומון, יקומון. The anomalous forms הבואחה it shall come, Deut. 33: 16. for הבואה, and יחבאתר thou hadst come, 1 Sam. 25: 34. for התבוא, which grammarians have found it difficult to account for, may be explained as produced by a repetition of the fragmentary personal pronoun, which is both prefixed as in the future, and affixed as in the preterite, for the sake of emphasis: thus the two expressions are equivalent to, it shall come, it! thou hadst come, thou! In the word הבאחה Job 22: 21., the verb is in the third pers. fem. sing. fut., with a paragogic, which is regularly hardened before the suffix into n (§ 477. 1.).

§ 386. Imperative. For the sake of greater brevity and force of expression, 7 is sometimes shortened into (,), e. g. D. Josh. 7:10., D. Ex. 4:19.

§ 387. Participles. Verbs which have e or o for the principal vowel of the preterite retain the same in the participle (see § 233), e. g. מֵר (בּנִי 12:30., בִּי Ps. 1:1., מֵר (בֹנִי Ps. 1:1., בֹי Ps. 22:10., בֹי Job 40:2. Some, although with () in the singular, receive as neuters () in the plural, e. g. לַּנְיִ בּנִי Neh. 13:21.

NIPH'HAL.

- § 388. 1. Preterite. In the sec. pers. plur. Hholem is sometimes retained (see § 366), e. g. מְלִצוֹרֶת Ezek. 11:17. 20:34., מְלְטֵרְ 20:43., once טָלְטֵרְ Ezek. 6: 9. for נְלְטֵרְ בֹּי
- 2. Infinitive. When the first radical is a guttural, the () of the preformative is lengthened by § 102. 1. c. into (), e. g. לאוֹר Job 33: 30. In a few instances we meet with ק for ק, e. g. לאוֹר Is. 25: 10.
- 3. Future. When the first radical is a guttural, the preceding () is lengthened into (), e. g. לְעוֹרָךְ Joel 4: 12.
- 4. Participle. Here also we find ז for ז, e. g. מְצְרֶּרָה Is. 1:8. Ezek. 6:12.; and once () is written for ז (§ 100.1. note), viz. בְּבָרָם Ex. 14:3. vol. 1.

NIPH'HIL.

§ 389. Preterite. In some instances 7 retains () and Daghesh is placed in the first radical, e. g. הסית Jer. 38:22. When the third radical is a guttural, it causes the first to take () for () on the rejection of ן, e. g. הֶרִיעֵ for הֶרִיעֵ (\delta 85. 3. a.), הַפַּר for הֶפַּיר. In the third pers. fem. sing. and third pers. plur. the first radical generally has () as well as the preformative, e. g. הֶּכֶּער Ps. 119: 126., הֶּרֶער 1 Sam. 17: 20., הקרה Jer. 6: 7.; these, however, may be considered as regular forms of verbs ע"ל. Occasionally i is not inserted between the root and a syllabic afformative, e. g. הטלתר Jer. 16:13. 22: 26., הַנפת Ex. 29: 24, 26., הַמֵּחָ Num. 14: 15.; once 17:6., and fem. במתן Ex. 1:16. When is inserted, ה sometimes takes (__) for (__), e. g. הָטִיבוֹתָ 1 Kings 8:18. 2 Chron. 6:8. (also with (הַטְבוֹתְר Ezek. 36: 11.), הַקְּרָצִׁתִר Ps. 139: 18.; and once when is not inserted, e. g. הַפִּלְצָם Gen. 11:9. radical is a guttural, the preformative 7 takes () instead of compound Sh'wa, e. g. העידתי Deut. 4: 26. 8: 19., העירתי Is. 41: 25., החילתי 1 Sam. 22:15.; for the first of two concurrent gutturals never takes compound Sh'wa, even when the second has a vowel of its own: the reason of which is, that the letters of this class are too feeble in sound to be heard with sufficient distinctness without an intervening vowel. Sometimes between the second and third radicals is omitted, when () is changed into (), e. g. הקמנה Mic. 5 : 4., השברם 1 Sam. 6 : 8., Ex. 6:8.; this most frequently takes place on the reception of a suffix, e. g. מְּשֵׁבְּׁתֵם 1 Kings 8: 34.

§ 390. Infinitive. The absolute appears once with י, viz. הָקֵים Jer. 44: 25.; with ה char. fem. הָנְיָםְה Is. 30: 28. for הָנִיפָּה.

a small number of instances the (_) of the preformative is retained, and Daghesh inserted in the first radical, e. g. רַלַּכְּחָהְהָּ Gen. 2:15. Ex. 16:23, 34., רַלַּכְּרָבָּ, Num. 14:36. Ex. 16:7., Prov. 4:21.

§ 392. Imperative. In the imperative we occasionally have (_) for (_), e. g. שַׁלֵּהְ Ezek. 21:35. Here also, as in the future, the (_) of the preformative is sometimes retained, and Daghesh consequently inserted in the first radical, e. g. הברתר Ex. 16:23., הברתר v. 33.

§ 393. Participle. Here too we occasionally find (_) under the preformative with a following Daghesh, e. g. מַלְּיִנִם Ex. 16:8.

PI'HEL AND PU'HAL.

ל 394. Preterite. The intensity peculiar to these species is sometimes denoted in a manner which gives them the appearance of verbs אַע, e. g. עַרְעֵר, from מַרְעֵל Is. 22:17., עַרְעָר פּרָב 16:12:58. from יְּמַבְּעָר אָר I Kings 8:27. from רְּמַבְּעָּק עָרְעָּר Job 16:12. from מַרְעָּר ; and occasionally, though seldom, the third radical is doubled, and placed before the first, e. g. עַרָּע Job 39:30. from כַּרְּעַר פּרָּצ מִר rarely inflected like מְבֶּיל בָּרָּב בָּרָּא אָרָע פּרָּצ פּרָּצ סַרְּעָר אַרָּע אָרָע אַרָּר אָרָע אָרָע אָרָע אָרָע אָרָע אָרָע אָרָע אָרָע אָרָע אָר אָרָע אָרָע אָרָע אָר אָרָע אָרָ

HITHPA'HEL.

§ 395. Preterite. As in the perfect verbs (see § 250), the second radical sometimes takes (_) for (_), e. g. זְּהְעָבוֹנְןָ Is. 1: 3.

Verbs (בַּרֹן) עוֹר (בַּרֹן).

§ 397. These with other considerations have brought us to the conclusion, that the medial weak letters of the verbs termed שני and עני do not constitute an essential part of the root: but that this properly consists of two strong immutable consonants, in which the fundamental idea of the verb is contained (see § 115); and that between these a weak letter is inserted, to complete the usual triliteral form. Accordingly the j of Dip, although assisting to fill out the word, has no further share in conveying the idea to stand, than has the of the verb in signifying to understand. As this inserted letter does not form an indispensable part of the root, it follows that where I, the weak letter most frequently adopted for this purpose, extends throughout a verb, as for instance Dip, it may be rejected at once, if opposed in its nature to the accompanying vowel, e. g. pret. במה ; or its cognate nay be employed with it alternately in different parts of the same verb, e. g. infin. absol. רוב, constr. דיב; or each of them may be used in the same tense and person by modifying the accompanying vowel, thus we have בנתי and also ידון, בינוֹתוֹ and . This use of extends no further than the Kal species, those verbs in which it appears agreeing in all other respects with the verbs ; it will suffice, therefore, to exhibit the simple species alone, leaving the others to be collected from the paradigm of Dip.

Paradigm of the First or KAL Species of Verbs ".

Preterite.

	PLURAL				SINGULAI	R.

Remarks on Verbs ב"ר.

KAL.

\$ 398. Preterite. Once we meet with third pers. f. sing. לֶּכֶּה 5: 4. for לֶּכָה. The second person appears occasionally with ', e. g. בְּרַנוֹתְי Lam. 3: 58., and רַרבּוֹתְ Job 33: 13.; as also the first, e. g. בְּרַנוֹתְי Dan. 9: 2.; and likewise the third pers. plur., e.g. דָּרָבָּה Jer. 16: 16. In the verb י retains its (_), as it is strong in comparison with the first rad. א (see § 384.), e. g. אַרָבָּהְר Ex. 23: 22.

§ 399. Infinitive. Absol.—In Judg. 11: 25. Job 40: 2. we find γ ; but in Job 33: 19. the K'ri and K'thibh are in direct opposition as to the letter to be employed.

§ 400. Imperative. The imperative appears with ה paragogic, e. g. ריבה Ps. 35: 1. 43: 1.

\$\delta 401. Future. Apoc.—Here \$\bar{i}\$ is changed into \$\bar{e}\$, e. g. לְבֶּלָ, Jer. 9:11. Hos. 14: 10., בְּבֶּלָ 1 Sam. 24: 16. Hos. 4: 4., בְּבֵּל Num. 6: 26. 1 Sam. 2: 20.; which on the reception of \$\gamma\$ conversive is shortened into (,), (\$\delta 215. 2.), e. g. בְּבֶּלֵל Gen. 2: 8. 2 Sam. 12: 31.; and also on the recession of the accent on account of a following monosyllable (\$\delta 60\$), e. g. בְּבֶּל Judg. 6: 31, 32. These, however, may all be considered as belonging to future Hiph'hil.

3. Verbs whose Second and Third Radicals are Alike.

Verbs טַבב).

[•] The same principle of euphony produces in English the rejection of one of two similar consonants which concur in the course of inflection, e.g. read for readed, bled for bleeded, eagles' for eagles's, &c.

sons (as the sec. masc. sing.) where the third radical is destitute of a vowel, and the root takes a syllabic afformative, the vowel is inserted before the latter, e.g. nizo: the reason of which is, that a Sh'wa accompanying a dagheshed letter must necessarily be mobile (§ 19. 2); this if retained would render the augment asyllabic, thus pao read sabb'tha, and thereby connect it too closely with the root, whose final letter must then be pronounced by means of the vowel of the afformative; to prevent which the vowel is inserted, thus הכבת = סברת בסברת בס In the preterite this vowel of separation is generally o, the first modification of a; and in the future, its other modification e (-,), thus The above applies in full only to a certain number of these מסבינה. verbs: some of them follow the paradigm of למיל throughout, and others employ alternately both modes of inflection. As those which deviate from the usual form do so to a considerable extent, we have thought it advisable to discuss them more than ordinarily at length.

KAL.

Preterite.

בּם בֹּבֶב 3 m. Here, upon the contraction's taking place, the essential vowel of the second radical is given to the first, whose vowel is merely euphonic (§ 113).

מַבְּבָה (After the contraction, the vowel of the first radical is shortened on account of the following Daghesh forte, inserted as above stated, § 402.

On the contraction, and the consequent change in the initial vowel (see third pers. masc.), the form becomes קַבֶּס ; but as the afformative is thus too closely connected with the root, and the root at the same time rendered too dependent upon the afformative (see above, § 402), a vowel is inserted between them, which in the preterite is o, the first modification of a, whence קַבְבֶּס, So יְבֵבֶס, קבֹרָבֶס, &c.

סברה בּסברה 2 f. As after the contraction, בְּ being followed by a vowelless letter cannot receive Daghesh forte, is again introduced for the sake of uniformity.

Infinitive.

בוֹם absol. Not contracted.

בלב = סְבּוֹב constr. As the first radical has here no vowel of its own, the second is more easily elided than in the absolute, and gives its vowel to the first.

Future.

- אסבב = רָסבּב 3. m. Formed from the infin. constr. by prefixing the fragmentary pronouns, which, as the first radical has a vowel of its own, receive a long vowel in order to form an independent simple syllable; this vowel is generally (,), as סָבֹּב; sometimes (_), as כְּבָב; and occasionally, though seldom (_), which latter causes the insertion of a Daghesh in the first radical, as שֵׁלֵב (§ 32). And so of the third fem. and sec. masc.
- קּבְּרֶ = תְּסְבֵּרְ = תְּסְבֵּרְ בּ תְּסְבֵּרְ בּ תְּסְבֵּרְ בּ תְּסְבִּרְ בּ תְּסְבִּרְ בּ תְּסְבִּרְ בּ תְּסְבִּר בּר תְּסְבִּר בּ תְּסְבִּר בּר תְּסְבִּר בּר תְּסְבֵּר בּר תְּסְבָּר בּר תְּסְבְּר בּר תְּסְבָּר בּר תְּסְבָּר בּר תְּסְבְּר בּר תְּכְבְּר בּר תְּסְבְּר בּר תְּסְבְּר בּר תְּסְבְּר בּר תְּכְבְּר בּר תְּכְבְּר בּר תְּבְּר בּר תְּבְבּר בּר תְבְּר בּר תְּבְבּר בּר תְּבְּר בּר תְּבְּבּר בּיב תְּבְבּר בּר תְּבְבּר בּר תְּבְבּר בּר תְּבְבּר בּר תְּבְּבּר בּר תְּבְבּר בּר תְּבְבּר בּר תְּבְבּר בּר תְּבְבּר בּר תְּבְבּר בּר בּר תְּבְבּר בּר בּר תְּבְבּר בּר בּר תְּבְבּר בּר תְּבְבּר בּר תְּבְבּר בּר תְּבְבּר בּר תְּבְּר בּר בּר תְּבּר בּר תְבּר בּר תְבּבּר בּר תְבּר בּר תְבּבּר בּר תְבּבּר בּר תְבּב בּר תְבְּבּר בּר בּר תְבּבּר בּר בּר תְבּר בּר בּר תְבְבּר בּר בּר תְבְבּר בּר בּר תְבּב בּר תְבּב בּר תְבּב בּר תְבְבּר בּר תְבּר בּר תְבּבּר בּר תְבּר בּר תְבּר בּר תְבּר בּר תְבּבּר בּר תְבְבּר בּר בּר תְבּר בּר תְבּבּר בּר בּר תְבּבּר בּר תְבּבּר בּר בּר תְבּבּר בּר תְב
- would be expressed by the vowel of the afformative, but with this it should not be so closely connected; accordingly, as in the preterite (see אָלֹבֶבֶּבָּ, it receives a vowel of its own, viz. (יְּבֶּי). This inserted vowel has the accent, and in order that it may not be preceded by more than one vowel, the preformative hakes Sh'wa (see § 103. 1.); while the vowel ō of the first radical, being followed by Daghesh forte and without the accent, is necessarily shortened into ŭ (see § 101. 3. b.).

Imperative.

15, &c. Regularly formed from the future.

Participles.

act. As the vowel of the first radical is characteristic of this part of the verb, no contraction takes place.

The same remark applies here.

NIPH HAL.

Preterite.

אָסָב 3 m. After the customary contraction of the two last radicals into one, catalog takes the first long vowel (), to form a simple syllable (see § 366).

Infinitive.

בה הְּכָּבֹב absol. Here, as in the infin. absol. Kal, a becomes lost in o, upon the coalescence of the second and third radicals.

בּהַבֶּב = הְּסֵב constr. After the contraction, the sec. rad. takes (ַ), and sometimes, though seldom, (ֵ), e. g. בּהַבֶּה.

Future.

אָרָסָב. Regularly formed from the infinitive construct.

אַיְסָב בּיִה = תְּסַבְּנָה = תִּסַבְּנָה = תִּסַבְּנָה = תִּסַבְּנָה בּיִּה בּיִּה בּיִּה בּיִּה בּיִּה בּיִּה בּיִּה בּיִּה בּיִה בּיִּה בּיּה בּיִּה בּיִּם בּיִּה בּיִּב בּיִּה בּיִּב בְּיִּה בּיִּב בְּיִּה בּיִּה בּיִּב בְּיִּה בּיִּב בְּיִּה בּיּה בּיּיה בּיִּב בְּיִּה בּיִּב בְּיִּה בּיּבְּיה בּיִּים בּיּיה בּייִּיה בּיּיה בּייִּיה בּייה בּייה בּיּיה בּייה בּיּיה בּייה בּי

Imperative.

Regularly formed from the future by rejecting n, and restoring n (§ 170).

Participle.

בסב. Regularly formed from the preterite.

нірн'ніг.

Preterite.

אסבּיב = הַסָבּיב 3 m. After the contraction, the $\tilde{\imath}$ of the preformative π is lengthened into its cognate \tilde{e} , to form a simple syllable; and the $\tilde{\imath}$ of the second radical is changed into the same vowel (§ 102. 1. c.), in order to distinguish the Hiph. of verbs ע"ל (§ 147. 4.).

הַסְבִּרָה = הַסְבִּרָה 3 f. The vowel (ָ) remains with the accent, to express the following Daghesh forte.

קסבּהָ = הְסַבּהָ 2 m. Here ה is inserted between the root and afformative, as in Kal and Niph'hal; and as this takes the accent, the (_) of the first radical becomes shortened into (_) on account of the following Daghesh; the preformative ה then loses its vowel, and being a guttural receives compound Sh'wa. And so of the remaining persons where his inserted.

${\it Infinitive.}$

אָסָבֶּב = הְּסָבּב . Absol. and constr. the same; in both cases (_) is lengthened into (_,) after the contraction (§ 102. 3.).

Future.

לסב, &c. Regularly formed from the infinitive.

אַסְבֶּירָה = אְּסִבֶּירָה 2 & 3 f. pl. Here (יָרָי) is inserted, as in the preceding species; and since it has the accent, the vowel of the preformative is rejected: the (_) of the first radical is shortened into (_), on account of the Daghesh following (§ 101. 2. b.).

Imperative.

הַסֶב, &c. Regularly formed from the future (§188).

Participle.

בּמֶבּב = מֵמֶבּב . Formed from the preterite, as in the verbs . ער

HOPH'HAL.

Preterite.

הרְּסַבּ m. Here, after the contraction, the \tilde{u} of the char. π is lengthened into \tilde{u} , to form a simple syllable (§ 102. 5. b.).

קּסְבַּבְּהְ = הּיַסְבּוֹתְ 2 m. In this and the following persons the vowel \bar{o} is again inserted, and the \bar{u} of the first syllable retained on account of the accompanying הוא (\S 100. 1.).

Infinitive. בּוְסֵב הוֹּסֵב like the preterite.

Future. יְהוּסֵב for יְהוּסֵב (see § 378).

Participle. מוֹסָב for בַּחַהַּ

PI'HEL AND PU'HAL.

§ 403. In forming the intensive species of this class of verbs, the language would seem to have experienced some difficulty. And this is by no means surprising: for if the retention of the two similar consecutive letters of the simple species is contrary to the genius of its orthoëpy, the concurrence of three such must be still more so; yet this would take place, were either the second radical doubled by Daghesh

as in the general paradigm of קמל, or the third as in verbs על. Accordingly, for the formation of these species the three following alternatives presented themselves: either to neglect all considerations of euphony, and double the second radical by Daghesh, as in the verb סמל; or give to the first radical a long vowel, to show that the second should be doubled (see § 143. 1.); or else denote the intensity by the reduplication of the first radical, which in the root is single. And we find in effect that of these possible modes of formation, some verbs have made use of one, and some of another, while others again have employed more than one, attaching a different shade of signification to each; the following examples may be given: 1. the second radical doubled, e. g. לכל Is. 8: 21., pass. לכל Is. 65: 20. Job 24: 18.; 2. the long vowel i given to the first radical, and the characteristic ultimate vowels () and () retained, e.g. עוֹלל Jer. 6: 9., pass. עוֹלל Lam. 1:12.; 3. the first radical doubled, with both the appropriate vowels; and the second and third letters transposed, to avoid the double concurrence of two similar consonants, e. g. סכבב for לכבב, so קלקל Ezek. 21: 26. Eccl. 10: 10., קלקל Is. 9: 10. 19: 2.; pass. for DED. And thus we see that the new species Po'hel and Po'hal, Pilpel and Pulpal, which grammarians have laboured to invent, not only possess the usual intensive signification of Pi'hel and Pu'hal, but are likewise constructed on the self-same principle. modes, tenses, and persons, are formed by means of the usual prefixes and affixes.

Remarks on Verbs לע"ד.

KAL.

instances of active verbs with Daghesh in the first radical, and which are certainly not of the Niph'hal species, e. g. אַקוֹב Num. 23:8. Job 5:3. Sometimes Daghesh is omitted after the contraction, e. g. ו רבוה 1 Sam. 14: 36.; and occasionally the vowel of the first radical also, e. g. רָבָבֶּלָה Gen. 11: 7. for רָבָבֶּלָה, so יוֹמר v. 6. for רֹמֵר . רֹמַר יוֹמר When 7 conversive is prefixed, and the tone in consequence retracted to the penult (§ 215), the ultimate vowel is necessarily shortened, e. g. 2 Kings 4: 34., וַבְּכָּב Deut. 2: 1., זְמַעָּד Judg. 3: 10. Some verbs have ז for ז, and hence appear like ל", e. g. דררץ, Prov. 29: 6., דררץ Is. 42:4., רַברם Ps. 91:6.; once () with כ conv., viz. בַּרַרם Ex. 16:20. In some verbs where the first radical has () in the future, the preformative usually takes (), perhaps to avoid the concurrence of two similar vowels, e. g. רחקל Gen. 16: 4, 5., באחל Ezek. 22: 26.; also without א conv., e. g. שַׁמַּם Gen. 47: 9., רָרָה Deut. 20: 3. Is. 7: 4., ימר Is. 24 : 9., בחר Eccl. 4: 11. Ezek. 24 : 11., ימר Ezek. 24 : 10., מחת and אחתה Is. 51:6, 7. Jer. 23:4. In a few instances as a mater lectionis accompanying () is inserted between the preformative and verb, e. g. ארחם Ps. 19:14.

§ 407. Imperative. Occasionally on taking ה paragogic, Daghesh is inserted in the second radical, and ō accordingly shortened into ū (§ 101. 3. b.), for which however ū is found written, e. g. קבּה Ps. 68:29. The imperative sometimes takes a, e. g. אַב Ps. 119:22.; also with ה paragogic, e. g. בַּבָּה Ps. 80:16.; and once when the second radical is a guttural, which consequently does not receive Daghesh, viz. אַרָה Num. 22:6. In some instances, by the insertion of Daghesh in the second radical, Hholem is shortened into its corresponding Kamets Hhatuph (§ 101. 3. a.), e. g. בַּבָּה Jer. 7: 29., בְּבָּר 2: 14., זַבָּר Is. 44:23. 49:13.

§ 408. Participle. Once contracted, and א inserted as a second radical, to retain the vowels, e. g. אָשׁ for סְבָּשׁׁ , which is generally the case in Syriac, e. g. בְּיֵבֶשׁ for בַּבָּשׁׁ . Comp. Niph. רְבָּשׁׁם for בַּבָּשׁׁם.

NIPH HAL.

\$ 409. Preterite. Verbs whose first radical is ה either retain () with the preformative, e. g. מָהֵר Ps. 69:4. 102:4., אוֹלְ אַנְּהָר Mal. 2:5.; or lengthen it into (), e. g. מַהָּד Is. 57:5.; as also those with א for the first radical, e. g. מָאַר Mal. 3:9. In a few instances the first radical takes () for (), e. g. מָלַל Nah. 2:11. Ps. 22:15.)

§ 410. Infinitive. In the construct state the vowel of the rejected radical is sometimes given to the first, e. g. קַמְּסָה Ps. 68: 3. for הַמְּסָה.

§ 411. Future. The first radical appears with either o or a:—with o, e.g. החם Ezek. 47:12., החהם Gen. 47:18., once החם Ezek. 24:11. (as regards the difficulty which has been experienced in deciding whether those futures which have Daghesh in the first radical are to be considered as belonging to the Kal or Niph'hal species, we may remark, that verbs which are used in both generally take a not followed by Daghesh with the preformative in future Kal, and i in future Niph'hal); with a, e. g. לְמֵל Is. 19:1., הְמֵל Zech. 14: 12.: also לְהַל there were ended, Deut. 34:8. for דְּהַמְּמֵר as in Num. 14:35.; and יַהְמֵר Ex. 15:16. Job 29: 21. Lam. 2: 10. for יהמר as in Jer. 48: 2.; accordingly we are not obliged to consider one form an anomalous future Kal, and the other a future Niph'hal, as Prof. Gesenius in his Lexicon has done, since the signification of these verbs admits of their being construed as belonging to the Niph'hal species, and formed from the infinitive absolute. When the first radical is a guttural the preformative takes (ַ), e. g. יַחַת Is. 7 : 8. Sometimes &, probably to retain the original vowels, is inserted in the place of the omitted radical, e. g. לים אס Job 7:5. for יְמַמְסָר, וְיְמֵּמְסָר, Ps. 58:7. for יְמֵּמְסָר. Once the preformative প্ল of the first person takes i for e, viz. মুল্ল Mic. 6: 6. for মুল্ল.

\$ 412. 1. Imperative. Here we find the form הַרֹמֵּר Num. 17:10.
2. Participle. Once מְּבָּהְי 2 Chron. 10:15. for מָבָּהְ, and נְבָּרוֹת Job 20:28. for כֹּבְרוֹת.

нірн'ніс.

§ 413. Preterite. In some instances where the contraction does occur, the first radical takes a instead of e, especially with the pause-accents, e. g. הַהַל 2 Kings 23:15., בּהַל Is. 8:23., הַהַל Is. 18:5.; this is frequently the case with verbs whose third radical is a guttural,

e. g. הַמַר Gen. 17: 14., הַמֵּר Ruth 1: 20. Job 27: 2. We find the first radical with a in some persons of verbs which in general regularly take e, e. g. הַמַבּה 1 Sam. 5: 10. for הַמַבּה ; so בַּמַבּה Deut. 1: 28., בַּמַבּה Jer. 20: 25. Ps. 79: 7., הַמְבַּה 2 Sam. 20: 18. When the first radical is a guttural, the char. ה takes (_) in those persons where it would otherwise have (_), in order to separate the gutturals, and thereby render them more distinct, e. g. הַהַּתְּהַ, Deut. 2: 31., הַהְהַהָּ, 18. 9: 3.

§ 414. Infinitive. On the reception of an asyllabic suffix, the Daghesh of the second radical is restored, and the (__) of the first shortened into (_) by § 102. 2. b., e. g. בַּהַלֵּל Job 29: 3. for בַּהַבֶּל (see § 244).

אַ אַ 15. 1. Future. In some instances ŭ is retained with the preformative, and Daghesh consequently inserted in the first radical, e. g. בַּבְּבַּלְּ בַּצֹּבִיל 18. 13:18., בַּבַּבַּל 1 Sam. 5:8. 2 Chron. 29:6., בְּבַּבַּל Ex. 23:21., בַּבַּבְּל Jer. 49:20., בַּבְּבַּל 2 Kings 22:4. Job 22:3.; and occasionally when the first radical is the strong guttural הוה (\$85.2.b.), e. g. בַּבַּל Num. 30:3. בַּבַּבּל 39:7. Once the preformative takes ē, viz. בַבּבּל Lev. 21:9., which may also be construed as future Niphhal. In all those cases where the preformative with () is followed by Daghesh in the first radical, the accent on the ultimate retains its place when conversive is prefixed (see § 215. 4.); but if the preformative has (,), the accent is drawn back one syllable, and () necessarily shortened into (,) (§ 215. 2.), e. g. בַּבָּבַל Gen. 29:10., בַּבָּבַל 2 Kings 23:6., בַבַּבַּל Job 38:8.: this retraction of the accent and shortening of the final vowel likewise take place before a monosyllable, e. g. בַּבָּבָּל בָּבָּבַל Ps. 91:4.

2. Participle. Occasionally the first radical takes (_) for (_), e. g. אַבָּב 1 Kings 6: 29., בַּבַב Ezek. 31: 3.

HOPH'HAL.

- § 416. 1. Infinitive. Occasionally the preformative takes δ , when the first radical receives Daghesh, e. g. កង្គាំក្នុ Lev. 26:34, 35.; in one case this δ is shifted to the prefixed preposition, thus កង្គាំក្នុ Lev. 26:43. for កង្គាំក្នុ
- 2. Future. In a few instances the first radical has Daghesh after ū instead of ŭ, e. g. בְּבָּבֵּ Is. 28:27., אוֹר וּשִּׁד Hos. 10:14., אוֹר Is. 33:1. Occasionally the preformative takes ŭ followed by Daghesh, e. g. בְּבָּר Is. 24:12.; in plur. once בְּבָּר Job 19:23. for בְּבָּר, on account of the accent.

PI'HEL AND PU'HAL.

\$\frac{\frac{1}{2}}{417}\$. Some verbs עוֹדֵ form the intensive species like לְּבֶּלְ, viz. by doubling the second radical with Daghesh forte, e. g. לְבַבְּלְ, viz. by doubling the second radical with Daghesh forte, e. g. לְבַבְּלְ, which of course can occasion no difficulty to the student: but there are others which form the same species by inserting a between the first and second radicals, e. g. בְּבַבְּל, סִבְּבֵּל and others again by doubling the first, and then transposing the two medial letters, e. g. בְּבַבְּל, סִבְּבַל both of which latter modes of formation cause them to present the appearance of verbs עוֹבָ (see \frac{1}{2}\frac{1}

§ 418. A careful investigation of the phenomena presented by these two classes of verbs has served to convince us that both derive their origin from biliteral roots; viz. that in pand are contained the ideas conveyed by the fuller forms מבב and מבב, and that to express these ideas neither the 7 of the former nor the second 2 of the latter was needed. At first then the verbs of both classes perfectly resembled each other; but in afterwards giving them the usual triliteral form, they were made to differ in appearance, by the contrary methods taken to accomplish this object: thus, some were extended by the insertion of a medial 7, as קום; others by the reduplication of the second radical, as סבב; and others by the alternate adoption of both of these forms with the same ນ້ານັກ, &c. (see § 115). Again, when in forming the intensive species a further reduplication became requisite, the same expedient was resorted to in the case of verbs z as that adopted in the first place by verbs שָׁ, viz. the insertion of the weak letter ש between the first and second radicals, thus סובב, סובב, And, on the other hand, verbs ע"ר occasionally assumed the form usually taken by verbs ענ"ב (§ 395), e. g. ערער, כַלְכֵל , טַלְטֵל.

\$\delta 419. The same theory suffices to explain the insertion of and \$\dagger\$, the one a weak letter and the other a liquid, as medial radicals, e. g. Job 7:5. for מַבְּכָּדְ Job 7:5. for מַבְּכָּדְ Job 7:5. for מַבְּבָּרָ , מַבְּרָרָר Job 40:21, 22. for מַבְּרָרָר Job 40:21, 22. for

בּמְלֵּכֶּה (לֻ 404); the insertion of מְּמְלֵּה , צֵּלְכֶּרֹם Lam. 3:22. for אַמְלֵּה (לֻ 404); the insertion of מוּ and כֹּלּה for the purpose of filling out the form, being far more natural and probable than the change of the second radical into those letters, as is usually taught,—a theory unsupported by the general analogy of the language, or by any solid argument whatever.

HITHPA HEL.

§ 420. This species is always formed by prefixing the characteristic syllable הה to the active voice of the intensive species, e. g. קיצץ, יהתבלבל , בלבל ; התרוצץ Once we find א for ה, viz. אשחוללר Ps. 76: 6. for התעללת ; and also the perfect form התעללת Ex. 10:2. (see § 417). If the second radical is a guttural, which cannot receive Daghesh, a contraction may take place here also, e. g. מְחַבֶּר 2 Sam. 22:27. for החברר, where the second ה takes the vowel of ב after the contraction, and consequently receives Daghesh forte. The word החפל is asserted by Gesenius, for the purpose of making the verse in which it appears (2 Sam. 22:27.) correspond throughout to Ps. 18:27., to be an anomalous transposition of the second radical for התפחל from ... A simpler mode of explanation would be to consider this word as belonging to the Hithpa'hel of שלל, with its proper signification as the reflexive of Pi'hel (§ 153. 1.), by which the analogy of the verbs לנ"כ is preserved; the sense would then be as follows: To the pure thou showest thyself pure, but to the wicked thou showest thyself a judge.

4. Verbs whose Third Radical is Aleph or He.

Verbs אָל (מְצָא).

- § 421. When the third radical letter is &, the deviations from the usual mode of inflection caused by the nature of this letter are but few in number, and as follows:
- 1. This weakest even among the weak letters (§ 87) can in no case terminate a mixed syllable; hence a preceding short vowel is regularly exchanged for its corresponding long one, and in this א rests, e. g. אַבָּאָ for אַבָאָ, אַבָּאָן for אַבָאָ, הַרָּאָצָאָ.
- 2. a. When is final is preceded by a long vowel, no change in the latter takes place; for the extreme weakness of the sound of this guttural allows it to rest in any vowel whatever: thus we have now

- word but also in the middle, e. g. הְּבְּצִּהְ, ; in the latter case, however, it prefers to rest in the vowel e, which it does in all the derivative forms of verbs אָלָּהְ, although the primitive retains its characteristic a. This peculiarity does not arise from the nature of the letter א, which may quiesce in any vowel; but as e is the first modification of a, it is preferred as the vowel of the derivative species, e. g. הְבְּצֵאָהְ, &c. So too in the secondary tense of Kal, viz. the future, א is preceded by a at the end of the word, but in the middle by e, e. g. third pers. masc. sing. אַבְּאָהָ, third pers. fem. plur. הַּאָצָהָה.
- 3. Both the second and third persons of the fem. plur. take the short vowel (") through all the species, probably as a compensation for the addition of the long syllable 75 to the end of the word.
- 4. A letter may be affixed to the root without a vowel of its own after א quiescent, which, on account of its weakness, presents no obstacle to the passing over of the preceding vowel to form a mixed syllable with a following consonant, e. g. part. אַבְּיֵׁב, הַבְּיֵבׁיִב; infin. אַלְאָרוּ, הַלֹּאָרוּ, הַלֹּאָרוּ, הַּלֹאַרוּ, הַבּיֹבּיִּב.

Paradigm of Verbs בוֹא

Remarks on Verbs &5.

KAL.

\$ 423. Infinitive. The construct is sometimes formed by adding n as a feminine termination, e. g. אַלאָרוֹ Lev. 8:33. 12:4. Job. 20:22. Esth. 1:5., אַרְאָרוֹ Judg. 8:1., אַלְּאָרוֹ Prov. 8:13.; occasionally with (_) under the second radical, e. g. אַרְאָרוֹ, employed as a particle with the preposition לְּקְרֵאֵרוֹ (see §§ 89. 2., 104. 1. a.). Sometimes the first radical takes (_), giving the infinitive the appearance of the construct of a feminine noun ending in אַרָּ פּרָ פּרָ אַרְאַרָ Deut. 1:27. Here also אַ is occasionally omitted, e. g. אַרָּאַר Gen. 20:6. for אַרָּאַר, אַרַשׁ Job 41:17. for אַרָּאַר.

\$\delta 424. Future. All verbs לא have a for the principal vowel of the future like אָלְיִישָׁבָּן, with the sole distinction that (ָ) is taken instead of (ַ), on account of the following א (\delta 421. 1.), e. g. אָרָבְּאָר for אָבְּרְי, &c. Occasionally, though rarely, the second radical takes (ָ) as in verbs אָרָבָּן 2 Chron. 16: 12:; and once we have רְבָּיִלְּאָר (\delta 90: 3:). Once (ֶ בְּיִ בְּיִבְּר (\delta 90: 3: 49. Occasionally אַ is omitted, e. g. אַרָּבָּן אַר 17. Ruth 1: 14.

\$\delta 425. Imperative. In the word רְרֵאֵר 1 Sam. 12:24. Ps. 34:10., does not receive a vowel, and is retained in the orthography solely for the purpose of distinguishing the imperative of רָאָה from that of Once we have רְבָּאָה. Once we have רְבָּאָה.

§ 426. Participle. In some instances &, instead of quiescing in the second vowel, takes it for its own, e. g. האמר Cant. 8: 10., האמר

1 Kings 10: 22.; once א is omitted, viz. אוב פונד Deut. 28: 57. And on the contrary, א is sometimes quiescent in the plural, e. g. אוֹדְאָם רּם Sam. 14: 33. for אוֹדְאָם; so בּוֹדְאָם Neh. 6: 8. for בּוֹדְאָם. Occasionally the second radical takes (ֶ), as in verbs הֹדֹשָׁ, e. g. אוֹדֶאָם Eccl. 7: 26., אוֹדֶאָם 9: 18. Is. 65: 20.

NIPH'HAL.

\$ 427. Preterite. In the third pers. masc. sing. Niph. of אַרָּהָ, the first radical of which is a guttural, the preformative takes (ַ), e. g. אַרָּהָאָּה; and in the other persons (ַ), e. g. הַּבְּאָרָ, נְּהְבָּאָרָ, בָּרְבָּאָרָ, בְּרָבָּאָרָ, בּרָבָּאָרָ, בּרָבּאָרָ, בּרָבָּאָרָ, בּרָבּאָרָ, בּרָבּאָר, בּרָבּאָבּאָר, בּרָבּאָר, בּרָבּאָבּאָר בּרָבּא, בּרְבּבּא בּרָבּאָרָ, בּרָבּאָבּי, בּרָבּא בּרְבּאָבּי, בּרָבּא בּרָבּא בּרָבּא בּרְבּא בּרָבּא בּרָבּי, בּרְבּבּא בּרָבּא בּרָבּי, בּרְבּיבּא בּרְבּי, בּרָבּיּבּא בּרָבּא בּרָבּי, בּרָבּא בּרָבּי, בּרָבּא בּרָבּא בּרָבּי, בּרְבּיּבּא בּרָבּי, בּרָבּיי, בּרָבּא בּרָבּי, בּרָבּיי, בּרָבּי, בּרָבּי, בּרָבּיי, בּרָבּיי, בּרָבּי, בּרָבּי, בּרָבּי, בּרָבּיי, בּרָבּי, בּרָבּי, בּרָבּי, בּרָבּי, בּרָבּי, בּרָבּיי, בּרָבּי, בּרָבּי, בּרָבּי, בּרָבּי, בּרָבּי, בּרָבּי, בּרָבּיי, בּרָבּי

§ 428. Infinitive. With ה added, הבבאה Zech. 13: 4.

§ 429. Participle. The second radical, which generally retains the vowel a in the plural, as מְמְצָאִים, in some instances takes Sh'wa, e. g. בּיִנְאָאִים Esth. 1:5. 4:16., מֶתְבָּאִים Josh. 10:17. נְתְרָאִים Ezek. 20:30.

PI'HEL.

לְאָלָא Jer. 51:34. for מְלָא Jer. 51:34. for מְלֵּא Ps. 143:3. for אָבֶּא, Occasionally in those persons which receive a syllabic afformative, א rests in () instead of (), e. g. בְּבָּא, 2 Kings 2:21.

§ 431. Infinitive. Sometimes ה is added as in Kal, e. g. מַלֹּאָת Ex. 31:5. 2 Chron. 36:21.

§ 432. Future. Once א rests in (ֶ,) as in verbs לה, viz. אָלה, Job 39:24.; and in the following instance it is replaced by ה, thus יְמֵלֵה Job 8:21. for יְמֵלֵּא

HIPH'HIL.

\$ 433. Preterite. Sometimes א is omitted, e. g. הֶחֲטִי 2 Kings 13:6. for הֶחֲטִי, so הְטְצִיחָהְ 2 Sam. 3:8. In the third pers. fem. sing. we find הַחְבָּאָחָה Josh. 6:17. for הַחָבָאָחָה (see § 427).

§ 434. Infinitive. The same omission occurs in the infinitive, e. g. ארושיה Jer. 32: 35. for החשר .

§ 435. Future. And in this tense likewise, e. g. רְשֵׁר Ps. 55: 16. for ישׁרא.

HOPH'HAL.

§ 433. Preterite. Third pers. fem. sing. הְבָּאת Gen. 38:11. for הְבָּאַה, as in Kal.

Verbs אוֹל (מַּלָּה).

- § 437. Those verbs whose third radical is π deviate in their mode of inflection from the paradigm of π , not only in changing the vowel of the second radical like the verbs π , but also in changing or altogether rejecting the last letter of the root. These peculiarities of formation are all to be ascribed to and illustrated by those of the weak letter π , in like manner as the apparent anomalies of the verbs π are explained by a knowledge of the nature and powers of π . We will here briefly repeat the peculiarities of π , in order to deduce from them the mode of formation.
- § 438. 1. The second guttural π (§ 6) has a stronger sound than the first \aleph , and forms one of the connecting links between this latter and the palatals (see § 73. 2. c. d.): consequently it is not like \aleph a mere quiescent, scarcely exerting any influence on the vowel in which it rests, but prefers to be preceded by either the guttural vowel a or the palatal a (§ 85. 4. a); except in those cases where some other vowel is characteristic of the species, &c., and is therefore retained.
- 2. As ה is a weak letter, and consequently incapable of ending a mixed syllable, it always has the effect of lengthening a preceding (_) into (_), e. g. אַבָּלָה for בַּבְּלָה for בַּבְּלָה for בַּבְּלָה for בּבְּלָה for בּבְּלָה for בּבְּלָה, הַבְּלֵה for בַּבְּלָה, הַבְּלֵה, הַבְּלַה, הַבְּלֵה, בּבְּלֵה for בַּבְּלֵה, בּבְלֵה, בּבְּלֵה, בּבְּלֵה for בּבְּלֵה, בּבְּלֵה, בּבְּלֵה for בּבְּלֵה, בּבְּלֵה, בּבְּלֵה, בּבְּלֵה, בּבְּלֵה for בּבְּלֵה, בּבְלֵה, בּבְּלֵה, בּבְּלָה, בּבְּלָה, בּבְּלָה, בּבְּלֵה, בּבְּלֵה, בּבְּלֵה, בּבְּלָה, בּבְּלָה, בּבְּלָה, בּבְּלָה, בּבְּלֵה, בּבְּלָה, בּבְּלָה, בּבְּלָה, בּבְּלָה, בּבְּלָה, בּבְּלֵה, בּבְּלָה, בּבּבְּלָה, בּבְּלָה, בּבּבְּלָה, בּ
- 3. The tenses of perfect verbs are distinguished in part by means of their principal vowels, the preterite taking a, and the future its modification o; so also in verbs $\ddot{\neg}$, where the nature of the last radical requires that the vowel preceding it should be either a or e (§ 85. 4. b.),

the second radical takes (,) in the preterite, and (,) in the future. As o is the characteristic vowel of the infinitive, it is retained.

in the middle of a word.

^{*} The substitution of " for ה, and a single instance where " is found in the same situation, viz. אָבֶּלְהָשְׁל Job 3:26., as also a knowledge of the fact, that the ultimate radical of many verbs which is ה in Hebrew is in Arabic ", have led some late writers to conclude that all Hebrew ה ל verbs were originally either "ל or "ל ל. This " or " they suppose to have been first changed into ה on account of the preceding (_), which was then lengthened into (_), thus הַבָּלָה = בַּלָבָה ; and to have been restored wherever in the course of inflection it occurs

Remarks on Verbs 75.

KAL.

§ 440. Preterite. In the third pers. fem. sing. we occasionally find n, the hard form of the feminine characteristic, affixed; the third radical being rejected, and its vowel given to the second (see § 77.3.), e.g. עשהת Lev. 25: 21. for עשהת; and once in the same person ה rad. is changed into , as in those persons of which the afformatives are syllabic, viz. חסרה Ps. 57: 2. Once ה is changed into הסלה mobile, viz. ישלרתד Job 3: 26. Sometimes ז for ה is rejected when the second radical is , e. g. הדרת 2 Sam. 10: 11. 15: 33. In the third pers. plur. also we find ה changed into , e. g. הַסְרָּךְ Deut. 32 : 37., נְטֵירָ, Ps. 73: 2. in K'ri.

§ 441. Infinitive. Absol.—Sometimes 77 is omitted, e. g. 132 Is. 30: 19. Jer. 22: 10. 50: 4. Lam. 1: 2. for בכוה, as a final vowelless 7 is never immediately preceded by a quiescent semi-vowel (§ 439. 2.); so also מרוֹ (Gen. 26: 28. Is. 6: 9., הרוֹ 59: 4., ברוֹ Lam. 1: 20., วักซู Is. 22: 13. In some instances the 🛪 of the absolute is hardened into ה, e. g. הוֹח Is. 22: 13., ראוֹת 42: 20. Constr.—In the infinitive construct of all the species 7 is regularly hardened into ה; occasionally however, though but seldom, ה is retained, e. g. האה Gen. 48: 11., קוֹה Prov. 16: 16., השט 21: 3. Ps. 101: 3.

§ 442. Future. Sometimes in the third pers. fem. sing. 77 is changed

into , which rests in (), e. g. נְתִּזְנֶר Jer. 3: 6. for נְתִּזְנֶה ; and also in the sec. pers. masc., e. g. המחה 18: 23. for המחה. Occasionally ה rests in (), as in the preterite, e.g. אַכָּלָה 1 Kings 17: 14. for תכלה, הושעה, Ps. 119: 117. for אָשׁעָה, On the reception of כי conversive, the vowel of the second radical is drawn back to the first, and 77 in consequence rejected (§ 217. 1.), e. g. fut. לְּכָּנָה, with כְּכֹּנָה, with רָּכֶּבֶּן Ex. 2: 12. 7: 23.; sometimes, especially in the first and second persons the () of the preformative is lengthened into (), e. g. בְּהַרָא Gen. 3:6., רַבְּפַן Deut. 9:15., רָבָפַן 2:9. The same takes place in the future apocopate without ז conversive, e. g. ירֶב Gen. 1:22., לכל Job 20: 28. 36: 15., יכל 33: 21., Deut. 9: 27. If the first or second radical is a guttural, the preformative takes () or (), and the first radical (), e. g. רְּהָדֶל Ex. 19: 2., רְהָדֶל Num. 16: 15.; רְהָשׁע Gen. 4 : 4., נְהֵרֶת 21 : 14., בַּהָלָה 47 : 13., בַּהָרָת Job 17 : 7. If the first radical is ה, the preformative also sometimes takes (), e. g. דַרַחַץ Gen. 22: 8., רְחַחַד Mic. 4: 11.; more frequently if ה or ה, e. g. רַיֵּרָא

Gen. 1: 4., בְּתַשׁה 4: 1.; and if ד, always, e. g. רַנְעשׁ Gen. 1: 7., וריעל 17: 22., ביעל Job 3: 2. When the first radical is a guttural, and conversive is not prefixed, the preformative takes either () or () e. g. הַחֵּלֶה Ps. 27: 3., הַחֶּלֶה Ex. 18: 21., רַחֶרֶב Job 10: 17. When the 7 of the third pers. plur. is retained, 7 instead of being rejected is changed into ', e. g. רהמיון Is. 17: 12., רחזיון 26: 11., יהוסיון Ps. 36 : 8., יְרָיָן 78 : 44., יִרְבִּין Deut. 8 : 13., יִרְרָיָן Ps. 36 : 9; also in the singular with ה paragogic, e. g. אָהֶמֶיה Ps. 77: 4. In some verbs, on the reception of a conversive the first radical remains without a vowel, e. g. לְּכֹשׁבּ Jer. 41: 10., הַכֹּפַת Job 31: 27.; also with () under the preformative, e. g. רָלֶבֶּה Gen. 9: 21., רָלֶבֶּדְ 27: 38. 2 Sam. 3: 32. (in Ex. 18: 9. we find לַּכְּחָהָ for לַכְּחָהָ , where ה as a guttural receives Pattahh furtive (§ 23), as is shown by the Daghesh lene in 7); the same form is assumed by the future apocopate, e. g. משט Prov. 7: 25., רְרֵרְדָּ Num. 24: 19., Ps. 72: 8. In verbs whose second radical is , on the rejection of after receiving conversive, the first radical takes (), and that of the preformative is rejected (§ 217. 1.), e.g. הַּלָּהָה, ; רַרְהֵר and also in the future apocopate without כְּרָהֵר ; רָרָהֵר and also in the future apocopate without sive, e. g. יהל Gen. 1: 3., יהל Is. 38:21. Ps. 72: 15. In a few instances ה is retained with ה conversive, e. g. רַלְעָבָה 2 Kings 1: 10., 6:23. מַנְכָרָת

אַ אַמוּר בּע and הּ generally take (ַ ַ), e. g. הֵיהָה ; הַלְּהֵה ; הַ takes (ַ), e. g. הֵיה ; and אָ, the weakest of all, (ַ), e. g. אַבָּר Ex. 16:23., אַרָּר Is. 21:12. In one instance we have הַבָּר Is. 26:20. for הַבָּר In the plur. הוא is changed into , e. g. אַרַרר, בְּעֵירְר, בְּעֵירָר, בְּעֵירָר, בְּעֵירָר, בְּעֵירָר, בְּעֵירָר, בְּעֵירָר, בְּעֵירָר, בְּעֵירָר, בְּעֵירָר, בַּעִירָר, בַעִירָר, בַּעִירָר, בּעִירָר, בַּעִירָר, בַּעִירָר, בַּעִירָר, בַּעִירָר, בּעִירָר, בַּעִירָר, בַּעִירָר, בַּעִירָר, בּעִירָר, בַּעִירָר, בַּעִירָר, בַּעִירָר, בַּעִירָר, בַּעִירָר, בַּעִירָר, בַּעִירָר, בּעִירָר, בַּעִירָר, בּעִירָר, בּעִירָר, בַּעִירָר, בּעִירָר, בּעִירָר, בּעִירָר, בּעִירָר, בּעִירָר, בּעִירָּב, בּעִירָּבּירָר, בּעִירָר, בּעִירָר, בּעִירָר, בּעִירָר, בּעִירָר, בּעִירָר, בַּעִירָר, בּעִירָר, בּעִירָר, בּעִירָר, בּעִירָר, בּעְירַר, בּעִירָר, בּעִירָר, בּעְבַּירָר, בּעְרַרְרָּב, בּעִירָּר, בּעִירָר, בּעִירָּר, בּעִירָּר, בּעִירָּר, בּעִירְרָּב, בּעִירָּר, בּעְרַרְרָּב, בּעִירְרָּב, בּעִירְרָּב, בּעִירְרָּבּירָּב, בּעִירְרָּב, בּעִירְרָּב, בּעִירְרָּבְּיִּבְּירָּבְיּבְּירָּבְּיִבְּירָּבְּירָּבְּיִבְּיבְּיבְּירָּב, בּעִירָּב, בּעְבִּירָּבְיבְּיבּירָ

NIPH'HAL.

§ 445. Preterite. In some instances ר rests in (,), as in Kal, e. g. נפלרנו (,), as in Kal, e. g.

§ 446. Infinitive. Absol.—The absolute appears with ה preformative, e. g. הְלָאָה Judg. 13:21. 1 Sam. 3:21. Constr.—Sometimes without ה, e. g. בְּלֵהְת 2 Sam. 6:20., where the word is repeated for the sake of emphasis.

לְּלֵּקר. With ק conversive, ה as in Kal is rejected, e. g. אַרָּקר Num. 23: 4.; and also in the apocopated form, e. g. אָדָּלְ Is. 47: 3. When the first radical is a guttural, () is changed into (), e. g. פּרָאָא Gen. 3: 2.

§ 448. Participle. Occasionally the second radical takes (,), e. g. הבלוח Is. 17:11., הבלוח 56:3. Dan. 8:1.

PI'HEL.

§ 449. Preterite. Here also ז frequently rests in () instead of (), e. g. בַּלְּיְהֶוּ Lev. 25:11., צְּיִּרְתִר 25:21. 1 Kings 1:35., בַּלִּיהָר Ps. 143:9. Job 31:33., דמֵירְתוּר Is. 14:24. Cant. 1:9., מוֹנְלִיתְר Is. 57:8.

לַ אַנְרָי בּל . Future. Once ה rests in (ַ), viz. הְּלֵּבֶּה Lev. 18.7. Here also ה conversive causes the rejection of ה, and consequently of the Daghesh in the second radical, e. g. בְּיַבֶּל , רַיְבֶּל . Sometimes, though seldom, the first radical takes (ָ), e. g. הַיְבָּל . I Sam. 21:14.; and likewise in the future apocopate, e. g. הְּבֶל Prov. 25:9. In the plural, ה is occasionally changed into ה, as in Kal, e. g. הְבַּלְבִיךְ Is. 40:18, 25., הַכַּכְּרַבֶּרְ . 15:5.

\$ 452. Imperative. In a few instances ה is rejected, e. g. אַ Deut. 3:28. Is. 28:10. for הַמָּה, Amos 6:10. for הַמָּה. In the plural, is once changed into א, viz. דַּלְירָּ, Prov. 26:7.; in which instance, as 5 takes Sh'wa, the characteristic Daghesh is omitted (§ 33. 2.).

§ 453. Participle. Here also (") is changed into (") in the construct state, e. g. מצרה Is. 55: 4., מתכה 64: 3., סורה Jer. 31: 10.

PU'HAL.

§ 454. No deviation from the paradigm of 75.

нірн'ніц.

\$\lambda 455. Preterite. Sometimes ה preformative takes () for (), e. g. הַּלְּכָּה Esth. 2:6.; and once ה is changed into ה which rests in (), e. g. הַּהְלָּה Is. 53:10. In a few instances, as in Kal, ה is affixed for the feminine characteristic of the third person, and ה radical rejected, e. g. הַּבְּלֵית Lev. 26:34., הַּלְאָת Ezek. 24:12. Occasionally rests in () instead of (), e. g. הַּלְּכִית Ex. 33:1. Num. 14:13., הַּבְּעִית הַרְאִית הַרְאִית הַרְאִית Is. 9:2. Once הַּבְּעִרִית הַרְאִית הַרְאַרָּת הַרְאַרָת הַרְאַרָת הַרְאַרָּת הַרְאַרָת הַרְאַרְת הַרְאַרָת הַרְאַרָת הַרְאַרָת הַרְאַרָת הַרְאַרָת הַרְאַרָת הַרְאָרָת הַרְאַרָת הַרְאַר Dan. 5:3.); perhaps is thus deprived of its vowel that it may rest as usual in the preceding () (see § 95).

§ 456. Infinitive. Once ה preformative appears with (ִ) instead of (ַ), viz. הַקְצוֹת Lev. 14: 43. for הַקְצוֹת The regular הַקְצוֹת is used only adverbially (see § 662); when employed as an inf. abs. it takes

the form הַרְבָּה.

\$ 457. Future. With א conversive the preformative generally takes (ֶ), to accord with that of the first radical, e. g. אָרָבֶּלָן Judg. 15: 4., אַרָּבֶּלָן 2 Kings 18: 11., אַרָּבֶּלְן Ps. 105: 24.: it adopts the same vowel in verbs שׁ guttural, where the first radical has (ַ), e. g. אַרָּבָּלָן 2 Chron. 33: 9.; and also in the future apocopate, e. g. אַרָּבָּלָן Neh. 13: 14. Jer. 18: 23. In verbs whose first radical is a guttural the preformative takes (ַ), e. g. אַרַבֶּל פּרָבָּל Gen. 8: 20. Num. 23: 2. Ezek. 14: 7.; these, having the same form as fut. Kal (see § 442), are to be distinguished from it by the context alone. Occasionally, on the rejection of א after receiving א בסייניים, the first radical remains without a vowel, and the preformative takes its appropriate (ַ), e. g. אַרַבָּלָן Gen. 29: 10.; and also in the future apocopate without \(\) conversive, e. g. א ברך 15. 41: 2.

§ 458. Imperative. On the rejection of the third radical, the characteristic א, like the future preformative, sometimes takes (ֶ), e. g. הַּבֶּבְּ Ps. 51:4., הַבֶּבְ Deut. 9:14. 1 Sam. 11:3.; but when the first radical is א, both it and the preformative take (), e. g. הדעל. 8:1.

§ 459. Participle. In the construct state, the participle as in Kal takes (ֶ) for (ֶ), e. g. מַנִּי מַם Gen. 40:1. Hab. 2:15. The verb sometimes retains (ֶ) in the construct, e. g. מַנְּבָּה Ex. 2:11. Is. 14:6.; where the emphasis of the first syllable required for the expression of Daghesh forte, lessens that on the ultimate, by which (ֶ) is usually changed into the longer (ֵ).

нори'нац.

אָ 460. Preterite. In a few instances the characteristic ה of verbs guttural has ō for ŏ, e. g. הֹצֶלָה Judg. 6: 28. for הֹצֶלָה Nah. 2:8. for הַגֶּלָהָה In the third pers. fem. sing. ה is added as the feminine characteristic, and ה radical omitted, e. g. הָּגְלָה Jer. 13: 19. for הָגָלָה .

HITHPA HEL.

\$ 461. Future. The second radical sometimes takes (ָ) for (ֶ), e. g. אָמָהְעָּה Is. 41:23. On the reception of אַ conversive, ה is rejected, e. g. אַרְהְאָר 2 Sam. 13:6.; and in the future apocopate without אַ conversive, e. g. אָרָהְאָר Ps. 45:12., אַרְהָאָר Prov. 23:3, 6., אַרָּהָאָר Deut. 2:9, 19. The verb שִׁהְהָּ appears in this species with א as its third radical; but since the employment of this letter as a movable final radical would be contrary to all analogy, it is followed by the weak letter ה, e. g. pret. הְשִׁתְּהָרָה, fut. אַרָּהָבָּיּרָה; fut. apoc., where א rests in ū, אַרְהָּהָּרָה רָּהַבָּיִרָּה. As the sibilant w here constitutes the first radical, it is transposed with the ה of the characteristic prefix, according to § 74. 2. b.; in the formation of the other species this verb follows the paradigm of אַלָּהַר.

400 and

General Remarks on Verbs \$\infty\$ and \$\infty\$.

воок и.

\$\delta 463. The intimate connection existing between these two species of verbs is shown, 1st. In those of אָל, by their occasionally taking either the vowels of הֹל, e. g. לְּלֵאָתְל Ps. 119: 101., אַטְה Eccl. 8: 12. 9: 18.; Pi'hel מְלָּאָת Jer. 51: 34., הַפָּאָתְל 2 Kings 2: 21., אַטָּא Job 39: 24.: or both vowels and ultimate weak letter, e. g. הַבְּלָּאָרַ Jer. 26: 9. 2dly. In those of הֹל, by their sometimes assuming the form of אָל, e. g. בְּבָּאָתִל Ezek. 43: 27., infin. אַטָּיָל 1: 14., אַטָּיָל בּבּרָ בַּבּרָ בַּבְּרָ בַּבְּרָ בַּבּרָ בַּבּרָ בַּבּרָ בַּבּרָ בַּבּר בַּבּרָ בַּבּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַבּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְרָ בַּבְּרָ בַּבְרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְרָ בַּבְּרָ בַּבְרָ בַּבְּרָ בַּבְּרָ בַּבָּר בַּבְּרָ בַּבְּרָ בַּבְרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָבְּי בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְּרָ בַּבְרָ בַּבְּרָ בַּבְּיִבְּיִי בַּבְּיִי בַּבְּרָ בַּבְּרָ בַּבְּי בַּבְּיִי בַּבְּיִי בַּבְיּבְיּבָי בַּבְיּבְיּבְיּבְיּבְיּ בַּבְּי בַּבְיּבְיּבְיּבְי בַּבְּי בַּבְיּבָּי בַּבְיּבְיּבְיּבָּי בַּבְיּבְיּבְיּבְי בַּבְיּבְיּבְיּבְיּבְי בַּבְיּבְיּבְיּבְיּבְיּ בַּבְּיּבְיּבְי בַּבְיבָּ בַּבְי בַּבְּ בַּבְּי בַּבְי בַּבְי בָּבְי בַּבְי בַּבְי בַבְּיבָּי בַּבְי בַּבְּבָּ בַּבְי בַּבְי בַּבְי בַּבְי בַּבְי בָּבְי בַּבְי בָּבְי בַּבְי בַּבּי בַּבְיבָּ בַּבְי בַּבְי בָּבְי בָּבְי בָּבָּי בַּבְי בַּבְי בָּבְי בַּבְי בַּבּי בַּבּי בַּבְיבָי בַּבְיבָּבְי בַּבְי בַּבּיבּ בַּבְיבָּבְי בַּבְיּבְיבָּבְי בַּב

\$ 464. The reason of the facility with which the verbs מֹלה and כֹה and adopt each the forms proper to the other, appears to exist in the fact, that they, as well as the verbs ע"ר and ע"ר, are in reality derived from roots consisting in every case of two perfect letters; and as in the latter class a semi-vowel is inserted in the middle (see § 397), so in the former a weak letter is added at the end of the primary root, for the sake of completing the usual triliteral form. These added imperfect letters are not essential to the signification, for this the two original radicals fully express; and hence the facility with which the cognate semi-vowels and weak letters of these verbs interchange, or assume the slight peculiarities of each other as respects the accompanying vowels, without in the least degree affecting their meaning (§115). This appears to us a more rational as well as more simple mode of viewing the subject than that adopted by Prof. Gesenius, who considers each of these forms to be derived from separate roots, which he accordingly inserts in his Lexicon; thus diminishing what he designates as "anomalies" in one way, by increasing them in another.

VERBS WITH TWO IMPERFECT LETTERS.

 verb, except in those cases where the peculiarities of one would interfere with those of the other. This interference takes place whenever the two are found in juxtaposition, viz. when they constitute the two first or two last letters of the root: thus, if a verb be at the same time both שש and שש הלון, the peculiarities of שש alone will take effect; and if שש and שש הלון, only those of שש בא the same time one or other of the classes of which we have already treated, it is unnecessary to enter here into any details respecting them. There remains then for us to speak of those cases only in which each of the imperfect letters has a share in producing deviations from the paradigm of שש בא מון אום מון אום

Verbs x and #5.

- fut. אַבָּה Prov. 1:10. Here אָּבָה Prov. 1:10. Here אָּ, the first radical, causes the preformative to take the vowel ō (§ 272); and the second radical ב takes ĕ on account of the final ה (§ 438. 2.).
- is thrown back to the first radical (§ 442), e. g. רַאֹּלֶה ו Sam. 14: 24., which on account of the following אַר is perhaps to be rendered causatively, he caused to swear; or the particle אַר may be translated with, thus, Saul swore with the people. Gesenius, however, considers it as an irregular future Hiph'hil.
- אָפָה fut. אוֹאָר Ex. 16: 23., with א omitted בְּחֹפֶה בֹּי 1 Sam. 28: 24. Niph. fut. אוֹאָם Lev. 6: 10.; imp. אַפָּה Ex. 16: 23. for אַפְּה, where on the rejection of ה, and the adoption of its vowel by the preceding letter (§ 77. 3.), which can no longer end the first mixed syllable, (ַ) is lengthened into (ַ) (§ 102. 1. c.).
- קּאָתְה Mic. 4:8., א resting in (); but in Prov. 1:27. we find also יַבְּאֵתְה ; with conv. יַבְּאַתְה Is. 41:25.; in plur. ה is changed into יַבְּאַתְרְּדְּלְ, יֹב Is. 41:5. Job 3:25.; imp. יְבַּאַתְרְּלָן Is. 21:12. 56:9, 12. Hiph. imp. אַרְרָּל Is. 21:14. Jer. 12:9. for הַאַתְּלָּר In two instances א assumes the place of the final ה (see § 463), viz. אַרְאָּ Is. 21:12., אַרָאָר Deut. 33:21.

Verbs פר and אנל.

יבא infin. באת; imp. אב. Hiph. הוצאתר.

יְרֵא fut. יְרִיךְא ; יִירָא; inf. constr. לֵרֹא 1 Sam. 18:29. Niph.

Verbs פר and מה.

- יְבָּה Hiph. הוֹבְּרָהְ Lam. 1:12. 3:32.; fut. הוֹבְּרָהְ Job 19:2.; part. with suff. מרְבֵּרְ Is. 51:23. Niph. part. pl. constr. מרְבֵּר Zeph. 3:18. for לוֹבֵר , so בהוֹר Lam. 1:4. Pi'hel fut. הבוֹר Lam. 3:33. for בְּרַבָּה but which J. Kimhhi considers as Hiph. for בּרָרה.
- יְרָהְ imp. י retained, יְרָהְ Jer. 50: 14. Pi'hel fut. יַרְהָּהְ Lam. 3:53. for יְרָהְּהְ, but according to J. Kimhhi, Hiph. for יַרְיָהְהְּ Hiph. הֹיְהְהְּ fut. יִרְיָהְיּ with suff. אַרְרָהְ Is. 12: 1., אוֹרְהָּ Ps. 42: 6, 12.; with ה retained, אוֹרֶבּּר Ps. 28:7. for אוֹרְבּּר ps. 42: 6, 12.; with ה retained, יְהֹרְבּר for אוֹרָבּר Ps. 45: 18., אוֹרָבּר Ps. 49: 8., הוֹרָה Neh. 11: 17.; imp. הוֹרָה Is. 12: 4. Hithp. התוּרָה בער. 5: 5., התוְרָה Num. 5: 7.
- לְּכָה fut. first pers. plur. with suff. כְּיָהַם Ps. 74:8. Hiph. בוֹנה Ezek. 22:7.; fut. הוֹנה Lev. 25:14.; part. with suff. בוֹנַרָהְ Is. 49:26.
- יְּפָה fut. יְּרְפָּה ; with יְ conv. רְּהִיךְּ Ezek. 31:7. Sec. pers. fem. רְהַלְּכָּר Ezek. 16:13. Pi'hel fut. יְרַפֶּה Jer. 10:4.; the intensive species is formed also by doubling the two first radicals, thus יְפִּיפְרָה Ps. 45:3. Hithp. fut. sec. pers. fem. sing. יְבִּיבְּרָה Jer. 4:30.
- ירְה infin. יְרְה with preposition לְּרוֹת ,לְּ Ps. 11: 2. (﴿ 104. 1. a.), יְרֹת infin. יְרָה עֹרְרוֹץ 2 Chron. 26: 15.; fut. first pers. plur. with suff. ביְרְבָּה Num. 21: 30. Niph. י retained, יְּרָה Ex. 19: 13. Hiph. fut. הוֹף Ps. 45: 5., יִרף 2 Sam. 11: 20.; with יורף, 2 Kings 13: 17., בְּלֹרֶן 2 Chron. 35: 23.; also א for הוֹף, דְּרָּהְן 2 Sam. 11: 24.; part. מוֹרֶה Is. 9: 14. Job 36: 22.

Verbs in and ab.

עָבָא Niph. נְבָא Ezek. 12:27., נְבָּאתְר 37:7.; infin. הַנָּבאׁת Zech. 13:4. Hithp. הַנְבָּאתִר Ezek. 37:10.

- קשא infin. נשא Is. 1: 14., שאר Gen. 4: 7. 44: 1. Ex. 27: 7., also שור Gen. 89: 10.; fut. אישר Gen. 32: 21., אישר Ps. 16: 4., דער Ruth 1: 14. Jer. 9: 17.; imp. איש Gen. 27: 3. Ex. 10: 17., fem. איש 2 Kings 4: 36.
- לָהְשֹּׁאַתְ Hiph. הְשֹׁאַתְ Jer. 4: 10.; infin. constr. with. prep. לַהְשֹׁוֹת לַּרְשׁׁוֹת 2 Kings 19: 25. for לְהִשׁוֹת.

Verbs פנ and מל.

- קּדָה fut. רְּבֶּה Lev. 6: 20., with כְּחָר conv. רָבָּד 2 Kings 9: 33., apoc. רָבָּד Is. 63: 3. Hiph. רְבָּה Lev. 14: 7.; fut. רָבָּד Is. 52: 15., with כְּחָר conv. רָבָּד Lev. 8: 11.
- לְכָה Hiph. יְהַכּיְתְ, יְהְכָּה finf. יְהַכּוֹת בּלְתְּה 2 Kings 15 : 16.; apoc. אָרָ Hos. 14 : 6.; with יו conv. רַבָּק 2 Kings 15 : 14, 16., אָבָּה Ex. 9 : 15., אָבָּה Deut. 2 : 33.; imp. רְאֵבָּה Ex. 8 : 12. Ezek. 21 : 19.; part. מַכַּהר Is. 9 : 12. 10 : 20.; Hoph. הְבָּה Num. 25 : 14., once הּיִבָּה Ps. 102 : 5. (אַר written for () (§ 241).

נְצָה Niph. נְצָה; part. נְצִים Ex. 2:13. Hiph. הָצָה; infin. הַצוֹת Num. 26:9. Ps. 60:2.

- עַּשָׁה Niph. נָשָׁה Job 39 : 17. ; fut. נָשָׁה 11 : 6.
- § 466. Of those verbs whose second and third radicals are weak letters, the two הָּהָה and הָּהָה require a separate notice; as they possess some peculiarities to which the second radical has given rise, in addition to those of verbs הֹב'ה.
- קּהָה fut. יְהְהֶּלְּה, apoc. יְהְהֶּלְּה; the rejection of the final ה with the vowel in which it rests, produces the form יְהְיִה; but as here two weak letters concur without a vowel, the first radical takes () on account of the following , which rests in it, and the vowel of the preformative is rejected as superfluous, thus יְהָהְ (§ 98. 1.), with יְ conv. יְהִרָּה (§ 217. 1.); and so too in one instance the future of הַהָּה,

viz. יְהְהֶּא Eccl. 11:3. for יְהְהֶּה, where the resting of in \bar{u} causes the vowel of the preformative to be rejected. Infin. abs. קְּיִל Gen. 18:18. for קְּיִל (\S 441); constr. קָּילוּת, once בַּבּר Ezek. 21:15.; with a preposition, בַּרְיּלוּת, בַּהְילוּת, בַּהְילוּת, בַּהְילוּת, בַּהְילוּת, בַּהְילוּת. The same remarks apply to the verb

קיהי fut. יְהִיהָה, apoc. יְהִיה, with a conv. יַרְיְהָיה. We meet with a preterite of this verb formed according to the analogy of the verbs אָש"ע, viz. קרַר Gen. 3: 22, as if from הַרָּב.

REMARKS ON THE IMPERFECT VERBS.

distinct verbal roots, as $\delta \rho \acute{a}\omega$ (ΓΚΠ), fut. $\delta \psi ο \mu a \iota$ from $\delta \tau \iota \omega$ (ΓΓΓ); $\epsilon i \delta \sigma \nu$ aorist from $i \delta \omega$ (ΓΓΓ); but rather resemble those of which the several parts are deduced from a single stem by different modes of conjugation, as $\partial \nu \acute{\rho} \sigma \iota \omega$, aorist $\dot{\epsilon} \partial \alpha \nu \sigma \nu$ as from $\partial \acute{a} \iota \omega$, pret. $\iota \dot{\epsilon} \partial \nu \eta \iota \omega$ as from $\partial \nu \acute{a}\omega$; $\lambda a \nu \partial \acute{a} \nu \omega$, aorist $\dot{\epsilon} \lambda a \partial \sigma \nu$ from $\lambda \acute{a} \partial \omega$ ($\dot{\epsilon} \iota \omega \partial \nu$). As all these particulars are given in the best lexicons under their respective heads, where they can be most conveniently referred to, any enumeration of them in a grammar would be a mere waste of time; we will therefore now leave the subject, content with having pointed out to the student the mode in which such appearances are to be accounted for.

QUADRILITERAL VERBS.

- § 469. The number of *Quadriliteral Verbs* in Hebrew is exceedingly limited. Their formation is as follows:
- 2. Others are formed from triliteral roots by the insertion of the liquid א, e.g. בְּבֶּל בִּבְּל . In one instance א is prefixed, viz. שַּבְּעַא Job 33: 25. The word בְּבְּלַ Job 26:9. may be considered as formed by the reduplication of the third radical, thus שַּבְּלְשׁי from שַבְּבָּ, and the subsequent mutation of the sibilant w into ז (§ 73. 1. d.).
- \$ 470. Those few verbs which consist of five letters are evidently formed from triliteral roots by the reduplication of the second syllable, e. g. מְחַרְחֵר Lam. 1: 20. 2: 11. from מְחַרְחֵר, אַחַרְחַר Ps. 38: 11. from מְחַרְחַר In one of these verbs the two first radicals are repeated, e. g. אַרְּכָּרָה Ps. 45: 3. from יְּבָּרָה Ps. 45: 3. from יְבָּרָה These also, being formed on the principle of the Pi'hel and Pu'hal species, have a corresponding intensive signification.

CHAPTER VII.

VERBS WITH PRONOMINAL SUFFIXES.

- § 471. It is a distinguishing characteristic of the Hebrew in common with the other Shemitish languages, that the personal pronouns when governed in the oblique cases by a verb, do not constitute independent words, like those of the languages of Europe, as amo eum, I love him; but on the contrary the principal letter or letters of a pronoun so governed are closely connected with the verb, so as to form with it a single word, thus instead of אַכְּילְּהָיִר אָרִיר עָּילְהְיִר וּ עִּילְהְיִר וּ וּ אַנִילְהְיִר וּ וּ אַנִילְהִיר וּ hence they have received the name of affixes, or suffixes. What are the fragmentary pronouns used for this purpose, as also the manner of their formation, have already been shown in the chapter on Personal Pronouns (§ 123). Accordingly, there remains only to state, 1st, to what verbs they are to be added; 2dly, to what parts of those verbs; and 3dly, the mode of connection, with the influence exercised by it on the vowels of the verbs.
- § 472. These fragmentary pronouns are affixed to all active verbs, whether transitive or intransitive, in the several relations indicated by the accusative, dative, and ablative cases of the Indo-European languages.
- 1. To transitive verbs they are joined chiefly in the accusative, as קְּמֵלְהָּ he killed thee; and sometimes in the dative, e. g. עֲמֵלְהָי, not I have made me, but I have made (it) for me, Ezek. 29:3., thou hast given (it) to me, Josh. 15:19., לְמֵילְבֵּל to pay (it) to him, Deut. 23:22., bring to me, Gen. 37:14.
- 2. And to intransitive verbs in the dative or ablative, e. g. חַזְּקְתִּיִּר thou hast prevailed over me, Jer. 20:7., דְּנְקְרָּהְ רִע they cry to thee, Neh. 9:28.; קּנְרְהְּרַע לְאֵבוֹר נַפְשׁר לְאֵבְיר נְפְשׁר לְאֵבוֹר נַפְשׁר לְאַבְיר בְּע soul shall be filled with them, Ex. 15:9., חַשְּׁבְּעָבּר thou art satisfied with it, Prov. 25:16. באור they went out from me, Jer. 10:20.
- § 473. Each of these pronouns may be added to any person of the preterite or future tenses, with the exception of those cases in which

^{*} Sometimes indeed, for the sake of emphasis, the entire pronoun is given in addition to the fragmentary suffix, e. g. בְּרֶבֵיִר נַם־אָנִי bless me, also me, Gen. 27:24.

the suffix would necessarily coincide with the subject of the verb, and thereby indicate a reflexive action, the expression of which has been assigned to a particular species, viz. the Hithpa'hel; accordingly we find, not אָסֵילְהָּף, but הְּשְׁשִׁלְּהְ thou hast killed thyself.* Hence all the affixed pronouns can be employed in the accusative with verbs in the third person only, where the subject and object, although of the same person, are not necessarily identical: thus the expression שִּׁשְׁלִּהְ he killed him, means that he killed, not himself, but another; so שִּׁשְׁלִּהְ hey killed them, not themselves. To verbs in the first person the pronouns of the second and third only can be added in the accusative; and to verbs in the second person, only those of the first and third: the latter rule of course includes the imperative.

§ 474. To the infinitive, in its quality of verbal noun (§ 156), the same fragmentary pronouns are affixed in the accusative; their use, as when joined to the other parts of the verb, being to point out the receiver of the action, thus קְּטֶבְּלֵיִי killing me, i. e. the killing performed upon me. For the purpose of designating the author of the action, or agent, the suffixes of the nouns are employed, thus מְטֵבִילִי my killing, i. e. the killing performed by me. This distinction of case obtains likewise in the suffixes of the participles: although, as the active participle itself denotes the agent, this can never be represented by the suffix, which in both cases denotes the object of the action, e. g. מֹבֵיִר one making me, Job 32:22., מֹבִיר my creator, Is. 49:5. With a passive participle, it of course denotes the subject of the action alone. For a more detailed exposition of all these points see the Syntax, Book III. Chap. VII.

[•] To express a reflexive action with intensity, the word שָׁבָּׁי soul, is frequently employed in the oblique cases, e. g. אַיָּר take heed to thy soul, i. e. to thyself, Deut. 4:9. (See § 873 et seqq.).

the feminine, which has no accompanying vowel, is constantly preceded by the vowel of union when the verb ends in a consonant; the masculine, only when the word is *in pause*, i. e. accompanied by a disjunctive accent (§ 107. 3.). The suffixes of the second person plural of both genders, which always have the accent, are joined to the verb without an intermediate vowel.

§ 476. The vowel adopted for the purpose of connecting the pronominal suffixes with the preterite of verbs, is the appropriate vowel of that tense a (_) or (_);* the future, imperative, infinitive, and participle employ its first modification e (_). The following table exhibits the whole of them at a single glance.

Table of Pronominal Suffixes of Verbs.

	For the Future.			For the Preterite.				
			SINGUL	lr.				
		֝֝֝֝֝֝֝ <u>֚</u> ֖֚֝֝֡֡			בָרְ ַ	С.	1.

		7			7-	F.)	

^{*} The only exception is דְּפֶרֵנָי Is. 8:11. for בְּפֵרֵנָי, where the (_) of the first radical appears to have been shifted to the second, in order to serve as a vowel of union.

- § 477. The addition of suffixes to verbs gives rise to several changes in the vowels of the latter, the chief of which are as follows:
- 1. a. When the verb begins with a simple syllable, as is the case with nearly all the persons of the preterite Kal, the addition of a pronoun causes the rejection of the first vowel, thus אָטֶלְּהָּ, קְטָלֵּהְ, קְטָלֵּהְ, אַטְלָּהָּ, אָטְלָּהָּ, אָטִרּבָּהָּ, אָכִיּ הָיִשׁרִפָּהָ. whose first syllable is simple and its vowel mutable, e. g. יְשֹׁרְפָּהָּ, הָיִשֹׁרְפָּהָ.
- b. Some forms beginning with a simple syllable not only reject the first vowel, but also shorten the second, and shift it to the initial letter: as in the infinitive, קְטֵלֵר for קְטֵלֵר (§ 103. 2. b.); and occasionally in other parts of the verb, e. g. רתנה Gen. 43: 29. for דרונה.
- 2. a. When the first is a mixed syllable, the vowel of which is consequently immutable (§ 103), on the reception of a suffix preceded by a vowel of union (§ 474) the second vowel is rejected instead. This is the case with the future of perfect verbs, thus יְקְטֵלֵה for יְקְטֵלֵה (§ 103.2.a.); and also with the Pi'hel species, thus קְטֵלֹה for יְבָטֵלָה.
- b. But when the suffix is syllabic, and without a vowel of union, the second vowel is merely shortened, to prevent the formation of a mixed syllable with a long unaccented vowel (see § 55. 1.), thus קטלה, רְלַטֵלָה.
- § 478. The influence of the suffixes extends also to the consonants of the verb, in which they give rise to the following changes:
- 2. The sec. pers. fem. sing., on receiving a suffix, takes before the latter the feminine characteristic (אָן 127, 224) as a vowel of union, that it may not be preceded by two vowelless consonants, thus thou (f.) hast killed him.
- 3. The sec. pers. plur. masc. and fem., the ¬ and ¬ of which, as in plural nouns, seem to oppose the close connection of the verb and its suffix, reject these final consonants, and take the plural vowel of union (¬) (see § 160, 3 pers. pl.), thus קְּטֵּלְהוֹנְיֵּל you (m. or f.) have killed me.
- § 479. For the sake of greater perspicuity and facility of reference, we will now give the whole of Kal at one view, with all the suffixes of the different modes, tenses, and persons. And this will serve for the entire verb, as they are affixed in a precisely similar manner to those of the remaining species whose meaning admits of their reception.

REMARKS ON THE SUFFIXES OF VERBS.

Preterite.

- 2. The suffix אָן of the sec. pers. masc. sing. sometimes appears with או final (sec § 223), e. g. בּצָּבָה Gen. 10:19, 31. The fem. suffix אָ of the same person occasionally receives the characteristic vowel (יִּדְ) of the feminine (§§ 127, 224), e. g. אַבְּעַבְּרֵבִי Ps. 103: 4. These forms appear in like manner with the future (see Jer. 7:27. Ps. 137:6. 145:10.). In a few instances אוֹ is preceded by (ָ) instead of (ַ), e. g. אַבְּאָבָּן Is. 54:6.; which frequently occurs when in pause, e. g. אוֹרָה Is. 60:9.
- 3. Once the vowel (_) is used instead of (_) for connecting the pronominal _ of the third pers. m. pl. with the verb, viz. בַּצַבַּן Amos 9:1.
- \$ 481. The sec. pers. fem. sing. of the verb in a few instances takes (ֶ) for the vowel of union instead of (יְרָ), which causes it to resemble the masculine, e. g. יְלַדְמָּנרּ Jer. 2: 27. for הְלַבְתָּתרׁנּרָ בַּיְלְדְמִּרנּ בּיִלְרְמָּנרּ יִלְרְתָּרנּ יִלְרְתָּרנּ יִלְרְתָּרנּ בּי יִלְרְתָּרנּ וּ Josh. 2: 17, 20. for הֹוֹרֶרְתֵּנר ; and occasionally (ֵ), e. g. הוֹרֶרְתַּנר 2: 18.
- § 482. In the afformative ה (=ה) of the third pers. fem. sing. a Daghesh is inserted, on the rejection of the ה of the affixed pronoun ה (§ 77. 3.), in order to complete the mixed syllable, and thereby retain the preceding short vowel (_) (§ 34. a. note), thus קְּטָלַהְּה she killed him for קְּטָלַהְה; the same effect is produced by the shifting back of the vowel of the fem. suffix ה, thus קְּטָלַהְה she killed her for השלחה.
- \$\\ \square\$483. Verbs whose second radical has \$\bar{e}\$ in the preterite (\(\sqrt{133} \)) generally retain it on receiving a pronominal suffix, and reject the first vowel (477. 1. a.), e. g. אַרְבּרָהְּ 2 Sam. 12:24. Is. 48:14., אַרְבּרָהְ Deut. 24:3., אַרְבּרָהְ Gen. 32:18., אַבְּרָבְּרָהְ Is. 49:14. Jer. 2:32. Those with \$\bar{o}\$ when thus making a mixed syllable in the middle of a word, change it into \$\bar{o}\$ (\(\sqrt{477.1.b.} \)), e. g. רבלתור Ps. 13:5. for הַבֹּלְתִּרָר.

^{*} Gesenius, without sufficient reason, supposes this I to be paragogic, with the accusative omitted. See his Lexicon Manuale, p. 1023.

Future.

§ 484. 1. In the future singular, before the suffixes masc. אַ and fem. אָ of the third person, a termed Nun epenthetic (§ 81. 2.) is sometimes inserted, in order to avoid the hiatus caused by the weakness of אָ לְּמָשְׁלֶּהְי, וְּמְשְׁלֶּהְי, וֹמְשְׁלֶּהְי, וֹמְשְׁלֶּהְי, וֹמְשְׁלֶּהְי, וֹמְשְׁלֶּהְי, וֹמְשְׁלֶּהְי, וֹמְשְׁלֶּהְי, וֹמְשְׁלֶּהְי, in order that the preceding (ֶ) may still form a mixed syllable, and thus remain unchanged (§ 34. a.), e. g. אַבְּשֶׁבֶּהָה, וֹמְשִׁלֶּבָּה, וֹמְשִׁלֶּבָּה, וֹמְשִׁלֶּבָּה.

2. In like manner has arisen the Daghesh following the short vowel ("), in the suffix ק of the sec. pers. masc. sing., e. g. אַרְאֶדָ Gen. 12:1., אַרְאֶדָ Is. 43:5.; in כָּל of the same person (see § 480. 2.), e. g. קיינון Prov. 2:11.; and in כָּל of the first pers. sing., e. g.

לערדֶנְר Jer. 49: 19.

\$\delta 485. On receiving either of the pronominal suffixes הה or ה, the final \$\gamma\$ of the third pers. plur. (\delta 162) is often retained, e. g. רְמִיצְאַרְּכָּהְ Jer. 2: 24.; in such cases () is frequently written for (\gamma\$) (\delta 100. 1. note), e. g. בְּמַבְרְכָּהְרָ 5: 22. Sometimes \$\gamma\$ is retained before the suffixes of the sec. pers. sing., e. g. בְּשִׁאַרְכָּהְ Ps. 91: 12., בְּמַבְרְכָּהְרַכָּרְ Prov. 1: 28., and occasionally before that of the first, e. g. בְּמָבְרְכָּהְרַכָּרְ Prov. 1: 28., where it once takes (), viz. \$\gamma\$ 10b 19: 2.

\$ 486. Sometimes the preterite vowel of union a is employed instead of the future e, e. g. רֲבְּרִלְנִי Gen. 29: 32., הַּבְּקַנִי 19: 19., יַבְבְּרֹלֵנִי 19. 56: 3., בְּבְּרַלֵנִי Job 9: 18., בְּרְשֵׁרְבֵנִי 1 Kings 2: 24., רַאֲבִי מָנוּ 1 Num. 22: 33., יִלְבָּשָׁם Ex. 33: 20., הְבַּעֲתַנִּי Job 9: 34.; בּלַבָּשָׁם 29: 30.,

רשימם Deut. 7: 15., יוֹשָׁעֶל Ex. 2: 17.

Infinitive and Imperative.

§ 488. The suffixes are added to the infinitive and also to the imperative with the vowel of union (__). The former of these modes, when taking the suffixes of the second person, occasionally retains its ŏ under the second radical, e.g. אַבְּלָבֶם Gen. 2:17., אַבַלֶּבֶם 3:5.; and some-

times, though rarely, this vowel when shifted to the first (see § 477. 1. b.) is further shortened into (ֶ), e. g. קַבְּרֶכֶּם Lev. 19:9. 23:22. The latter mode, being formed from the future, takes in like manner Nun epenthetic, e. g. קְּרָאֶנָּה Jer. 36:14. = קְּרָאֶנָּה for קְּהֶהָ ; so דְּקְרָאֶנָּה v. 15., קְהֶהָ Job 5:27.

§ 489. As was before stated (§ 478), the suffixes are added to the remaining species in the same manner as to the Kal form; the changes in the vowels to which they occasionally give rise, are all to be explained by means of the general principles already laid down. These observations apply to all verbs whether perfect or imperfect. It may, however, be proper to add, that in verbs אול , the final אול , או

CHAPTER VIII.

THE NOUNS.

- § 490. The words in Hebrew included in the general term Noun (Heb. ਬੁਲੂਂ) correspond to those of the same class in other languages, and like them may be divided into,
 - I. Concrete Nouns (מֶשֶׁלֶּשׁ), i. e. names of existences which are subjected to the observation of the senses; these names are each derived from some prominent attribute allowed by common consent to stand for all those of the object to which it belongs. They may be subdivided as follows:
 - 1. Proper nouns, or names appropriated to individual existences, as בּנַעָן Abraham, יַרְדָּדָן Jordan, בַּנַעָן Canaan.
 - 2. Appellative nouns, or names of whole species of individual existences, whether found in nature, as אָרָשׁ man, הוה mountain, עַלְי tree; or the work of art, as מַבְּרָה garden, שַּבְּרֶלָה garment.

- 3. Material nouns, or names of existences taken in their most extended sense, without respect to the form or organization which confers individuality, as לכום corn, מנים gold, מנים water.
- II. Abstract Nouns (שֵׁם מִקְרָה), i. e. names of qualities or modes of existence, abstracted or taken from the objects with which they are found in combination, and consequently as such perceptible to the mind alone, as בַּבְּרֵה love, בַּבְּרַה strength, הַבְּבָּה wisdom.
- § 491. With regard to sex, Hebrew nouns are divided, according to the form under which the objects they represent are found existing in animated nature, or to the aspect under which they present themselves to the mind, into two genders, masculine and feminine. They are likewise divided as to number, whether consisting of one or more, into singular and plural. Lastly, the relations nouns bear to each other are pointed out by certain inflections, which may be termed cases. Of all these we shall treat separately in their proper order.
- § 492. The formation of Hebrew nouns gives rise to another division, into primitive and derivative.
- I. Primitive Nouns are in a manner self-existent, not deriving their origin from any other word, whether noun or other part of speech; they comprise most material-nouns, as well as the names of many animals and plants, and of the double members of the human body, e. g. אָדָן flesh, קָבָּק silver; סַרּט horse, עָדָ tree; אָדָן ear, דְר hand.
- II. Derivative Nouns. Under this head are comprehended all nouns derived either from verbs or from other nouns, by means of a change in the vowels, or by the addition of certain letters to the beginning or end. The following examples may suffice:
- 1. Verbal Derivatives, e. g. from ליב to write are formed the noun of action מְבוֹים writing, the noun of agency מֵבוֹים writer, and a noun denoting the product of the action, as מִבְּבִיב a writing, that which is written; from יוֹב to open are formed מוֹב door, that which opens, key, that which causes to open.
- 2. Nominal Derivatives, e. g. from עברי Heber is formed עברי a Hebrew, a descendant of Heber; from א head, האשירה a beginning.

GENDERS.

§ 493. The nouns as well as the verbs of the Hebrew language have but two genders, masculine (זָכֶר) and feminine (בַּקְבָה); to one or the other of which every object, whether animate or inanimate, is conceived

to belong. The neuter gender of many Indo-European languages, i. e. a separate class containing those nouns which it is considered cannot with propriety be included in either of the above, is entirely unknown, not only to the Hebrew, but also to the whole family of tongues of which it forms a member. Some names of things which are neither masculine nor feminine by nature are used alternately in both genders, and thence receive the appellation of common (קַהָּשִׂבְ).

§ 494. The two genders masculine and feminine are in general to be distinguished either by the termination or by the signification.

- I. By the Termination. 1. In the Hebrew language, nouns which belong to the masculine gender are of the simplest form, ending for the most part in a strong consonant; from these the corresponding feminine nouns are derived by softening the termination through the addition of the weak letter ה resting in the long open vowel (,), e. g. אַשָּׁה man, אַשֶּׁה woman; שׁלֵּבֶה boy, בַּבֶּרָה girl; אַשֶּׁה king, אַשֶּׁה queen. This mode of formation is admirably adapted to the expression of the opposite qualities of force and delicacy which characterize the two sexes, and at the same time would seem to intimate the fact of the priority of man's creation.
- 2. As almost all words ending in היים are of the feminine gender, and as many masculine nouns may be converted into feminines by affixing this termination, it has been appropriately named the feminine characteristic (§ 160). We find, moreover, that הוא is very frequently hardened into its cognate הוא (§ 73. 2. d.), and hence this latter consonant is sometimes employed for the same purpose, e. g. הַּבְּיִלָּה song, Ex. 15: 2. Is. 12: 2., אַבְּילָה possession, Ps. 16: 6., הַּבְּילָה help, 60: 13. 108: 13., אַבְּילָה sleep, 132: 4., הְיִה fruit-tree, Gen. 49: 22. These at first were mere alternate forms with the preceding, as all the nouns which take הַ usually terminate in הַבָּי but in process of time the hardened form of the feminine characteristic acquired a permanent place in certain nouns, preceded by (ֶ), e. g. בַּבֶּיה בּבֶּיה sloay הַבְּבֶּיה glory* (especially in feminine participial nouns, thus בְּבֶיה beginning, בַּבְּיה youth, kingdom; or by (בְּבָּיה beginning, the distinguished from Hence arises the rule, that feminine are to be distinguished from

[•] When the last radical is a guttural, the term. חַ, is changed into חַ,. A few have a feminine ending which are masculine by their signification, e.g. מְּשְׁהָּ governor, מְשְׁהָּ preacher. The n of the latter is supposed by some to be added to form a nomen muneris, as מִבְּיֵב Ezra 2:57., and by others to correspond to the sexcellentiae in Arabic.

masculine nouns by the termination $\pi_{\overline{\tau}}$, or π preceded by one of the vowels above enumerated.*

§ 495. The above general rules will be found to hold almost throughout; but, as inanimate objects have no gender except the ideal one attributed to them according to the light in which they happen to be regarded, it is by no means to be wondered at if any arbitrary classification made with a view to this particular should prove to be defective.

^{*} A few nouns sometimes take the termination אָ for הַ; they are as follows: לְּבָיָּא Jer. 50:11., אֹדָה Num. 11:20., אֹבָה Is. 19:17., אֹדָה Dan. 11:44., לְּבָיָּא Ezek. 19:2., אָדָה Ruth 1:20., אַדָּא Lam. 3:12., אָדָה Ezek. 27:31., אַבָּיִּא Ps. 127:2., which may be considered as Aramaisms.

[†] The words אַ דְּרוֹץ Is. 17:5. and רַּלֶּלֶר Ps. 73:2., appear at first sight to be construed in the masculine. The difficulty, however, may be easily cleared up by prefixing to each of these words the preposition ב, whose omission is of such frequent occurrence. The first of the two passages would then read, "They are like one who gathers standing corn, and cuts it with his arm" (i.e. inclosing it in his arm); the second, according to the K'thibh, "I should soon have fallen with my feet." There are a few instances, notwithstanding, in which these words are undoubtedly masculine, e. g. דְּרוֹצַ Is. 51:5., בָּלֶל, Prov. 1:16. 7:11. Jer. 13:16.

- 1. Accordingly we find some nouns which are feminine, although destitute of the characteristic termination of that gender, and not included among those which are feminine by signification, e. g. אָבָּן bowl, הַבָּע brasier, אָבְּבַּע finger, אַמַּבּר step, אַבָּע well, אַבָּע belly, בּעָר שָּׁר בּעָר אָפּער, אָבּע פַּר קבּע Great Bear, עֶרָש morsel, בַּילָע rib, בְּבֹר north, בּרֹא myriad, בּרֹל, south.*
- 2. Other nouns of this sort are construed in both genders alternately, although in some of them the masculine prevails, and in others the feminine, e. g. אָבֶּל stone, אוֹא sign, אָבְּל ship, אוֹא ark, אַבְּל road, שֹׁאַ fire, אַבְּל wall, אֲבֶל garden, אָבֶל vine, אָבָן gate, אָבָן way, אַבָּן multitude, אָבֶן beard, אָבֶן window, אָבֶר court, יבְּירן right hand, בְּלַן bread, אַבָּן beard, אַבָּן soul, אָב cloud, אָב cloud, אַב veening, אַל time, אַב sheep, אַבָּן host, אַב sparrow, אַב veull, אַב bow, אַב wind, אַב אַב street, אָב host, אַב rod, שַׁבָּי sabbath, שַׁבֶּי sun, אַב tooth, מּצַוּר, אַב אַר razor.+

Ingenious as his theory certainly is, and plausible as it may appear, still a slight examination of the foundations on which it rests, will suffice to prove it a theory and nothing more: for the majority of the nouns he has adduced as examples, of which we have given only a part, are common, and some of them more frequently masculine than feminine; while by far the greater part of the remaining nouns embraced by his statements, are employed in the masculine exclusively.

^{*} The fem. nouns na wine-press, na decree, should be classed with those ending in the hardened form of the fem. char. (§ 494. 2.), the former being a contraction for nat from pag from pag to press, and the latter for nation for nation to judge.

[†] Prof. Ewald has endeavoured, by the application of certain general principles, to include every noun which without the feminine termination is either feminine or common, in the category of those which are feminine by their signification. His arrangement of feminine nouns without the characteristic termination is as follows:

I. Names of persons and animals which belong to the female sex in a physical point of view, e.g. אַ mother, בְּחֵל ewe.

II. Names of objects to which the feminine gender is attributed in an ideal manner, viz. 1. Names of objects to which is attached the idea of maternal care and support, e. g. אָרֶא earth, פּרָבוֹ sun, &c. 2. Names of invisible agents, e. g. אַרָּא soul, הַרֹּת breath, אֵר fire, &c. 3. From the idea of dependence and subserviency attached to the weaker sex, especially in the East, the feminine gender is conferred upon, a. many names of limbs of men and animals, e. g. אָרָ hand, אָרָ foot, אָרַ פִּעָּר אָרָ. b. names of articles of clothing, e. g. אַרַ shoe; c. names of implements, e. g. בְּיֵל sword, אָרַ razor, בּוֹל cup, &c.; d. names of plants and minerals made use of by man, e. g. אָלָ stone, אַלְּ well. (See Krit. Gram. d. Hebr. Sprache, §§ 166, 167).

§ 496. This use of nouns as common, or of either gender, is not confined to the names of inanimate objects, but extends likewise to some names of animals: these latter consist of, 1. Nouns which constantly preserve the masculine form, the animals they denote being regarded as strong and bold; their gender is left to be determined by the adjective or verb with which they are construed, e. g. אַבָּל camel, בֹּבְיל volf, הַבְּלִים בֵּילִים בִּילִים בָּילִים בָּילִים בָּילִים בָּילִים בָּילִים בַּילִים בַּילִים בָּילִים בַּילִים בָּילִים בַּילִים בָּילִים בַּילִים בָּילִים בָילִים בָּילִים בְּילִים בְילִים בְּילִים בְילִים בְּילִים בְּילִּים בְּילִים בְּילִים בְּילִים בְּילִים בְּי

§ 497. In Hebrew as in English, the names of many female animals, whether with or without the characteristic termination, differ totally from those of their males, e. g. אָרָה he-ass, אָרָה she-ass (not קֹבִיא she-ass (not לְבִיא lioness from לָבִיא lioness from לָבִיא lioness from אַרָּה (not אָרָה). The same is the case with some nouns denoting the titles and offices of human beings, e. g. אָרָה lord, בְּבִירָה lady (from מָבּרֹר, אָבוֹרְה אַבּרֹר); אַבּרֹר אַבּרֹר מִשֹּבּר מִבּר מִבּר אַבּרֹר אַבּר מִבּר אַבּר מִבּר מִבּר אַבּר מִבּר אַבּר מִבּר אַבּר מִבּר מִבּר אַבּר מִבּר מִבּר אַבּר מִבּר מִבְּר מִּר מִבְּר מִּר מִבְּר מִבְּר מִבְּר מִבְּר מִבְּר מִבְּר מִּבְּר מִבְּר מִבְּר מִבְּר מִבְּר מִבְּר מִבְּר מִבְּר מִבְּר מִבְּר מְבְּי מִבְּי מִבְּי מִבְּי מִבְּי מִבְּי מִּבְּר מִבְּי מִבְּי מִבְּי מִּבְּי מִבְּי מִבְּי מִּבְּי מִּבְּי מִבְּי מִּבְּי מִבְּי מִבְּי מִבְּי מִּבְּי מִבְּי מִבְּי מִבְּי מִבְּי מִבְּי מִּבְי מִבְּי מִבְּי מִבְּי מִבְּי מִּבְּי מִּבְּי מִבְּי מִבְּי מִבְּי מִּי מִּ

FORMATION OF NOUNS.

\$ 498. As has been already stated, nouns may be divided, as regards their formation, into two classes, primitive and derivative. Of the latter by far the greater number derive their origin from verbs: thus we find nouns formed after the preterite, infinitive, and participles of Kal as well as of the other species. These are taken either from active-transitive verbs, denoting, 1st, the action of the verb, as אַרְּבֶּלְּה the person acting, or agent, as בְּבֶּלְה killer, one killing; 3d, the instrument of action, as בַּבְּלְה (from בַּבְּלְה to sacrifice); 5th, the product of the action, as בַּבְּלַב מִילְבָּלְה a writing, something written (from בּבָּלָב or from intransitive or neuter verbs signifying a state of being, to which the force of such derivatives corresponds, e. g. from בּבָּלְב session, בַּבָּל sitter, בּבֹּל sitter, בּבֹל sitter, בּבֹל sitter, בּבֹל sitter, שׁנִיבּל seat; from בְּבַל to be wise, בּבֹל man, שׁנִבּלָב wisdom.

§ 499. These derivative nouns are all formed from or in imitation of different parts of the verb, by changing the vowels, or by prefixing or affixing one or more of the letters &, \(\pi_1, \pi_1, \p

recollection have been composed into the technical word הַאֲבֶהָהְ (see § 8. note). Of these א is always prefixed, and ה generally affixed; the rest are added either at the beginning or end.

§ 500. We will now enter upon the classification of verbal nouns, arranging them with regard to their forms, in the order of the different modes, tenses, &c. from which they are derived. And as all the primitive nouns likewise present one or other of these forms, we shall include them under the same general heads, leaving the lexicographer, within whose province it falls, to make the requisite distinction between these two classes of nouns, and exhibit their fundamental meanings. All nouns, whether primitive or derivative, have the appearance of being constructed, like the verbs, from roots of three letters, each, either consisting entirely of perfect consonants, or containing one or two imperfect ones; accordingly we shall employ in representing their forms the corresponding parts of the several paradigms of verbs.

NOUNS FROM PERFECT VERBS.

KAL.

Preterite.

- לָּסָל , מְטָל , לְּטָל , הַּמָל . Formed after the preterite of verbs whose second radical has (), which in the nouns is changed for the sake of contradistinction into (), e. g. Masc. בַּשָּׁר , flesh, הָבָת wise, הַבָּי word, הַהָּד gold, הַבָּי new, הַבָּי wise, הַבָּי straight, שִׁרְכָה work. Fem. בְּּבְיָה blessing, הַבְּי new, בְּבָר wise, הוֹלְשׁ work. Some are formed by rejecting the first vowel, and lengthening the second, e. g. הַבְּר נִיקר, מֹנַחוֹל מִינִר writing, בְּבָר remainder; in a few instances the second vowel is not lengthened, e. g. הַבָּר new, הַבַּר honey, הַבָּר fear.

- 2. מ. אָטֶלָה, אָטְלָה, אָטְלָה, קַטְלָה, In forming some nouns, both vowels of the preterite are changed into e (ֶ), the first modification of a, whence they have received the name of Cegholates, the distinguishing characteristic of which is that by § 56. 2. they all have the accent on the penult, e. g. Masc. אָלֶהְ way, אָלֶלְה king, אַכּר servant. When the third radical is a guttural, either the second takes (ַ), e. g. אַבֶּר sacrifice, אַבֶּר seed; or the first takes (ַ), e. g. אַבֶּר branch, אַבָּל report. When the second and third radicals are gutturals, both the first and second take (ַ), e. g. אַבּר הַאָּב step. Fem. אַבְּלְהָה song, אַבְלְהָה maid-servant; אַבּ מָבֶר, אַבּ מַבְר, עַבָּב מִנְר, אַבּ מַבְר, עַבְּבָּר נַבְּרָה shame; מַלְבָּר נַבְּרָה step. Fem. אַבְּלַרְה youth, מַבְּלָרָה kingdom.
- b. קֹטְלֶּה, קְּטְלָּה, קְּטְלָּה, קְּטְלָּה, קּטְלָּה, קֹטְלָּה, sometimes the first radical of a Cegholate takes o, e. g. Masc. אֹכֶר food, אֹכֶר speech, דְּיָה strength, דְּיָה depth, שֹׁיִך holiness. When the second or third radical is a guttural, (ֶ) is exchanged for (_), e. g. שִׁיִּה gift, בּבָּה height. Fem, אָכְלָה food, אַבְּהָה wisdom, הִרְבָּה desolation, אַבְּהָה strength; הַבְּה הַיְּהָה capital of a pillar, שֹׁבֶּרָת lead, אַרְלָּת worm.

Infinitive.

Participles.

- \$503. Active. 1. לְטֵלָה, הּ לְטֵלְה. The regular form of the nomen agentis, e. g. Masc. הבל sailor, דוֹנֵל suckling, עוֹלֵל child, הוֹנֵל fuller. Fem. הבל shield, שוֹמַבְה desert, abomination.
- 2. לְּטָל. Here the second radical takes a instead of e, e. g. אוֹצֶר treasure, בּוֹרֶל seal, עוֹלֶם eternity.

- אָלָה, קְטַוּלָה, לְטַוּלָה, לְטַוּלָה, לְטַוּלָה. Regular form of the nomen patientis, e. g. Masc. בְּחִוּר chosen, יְכוּר male, שֵׁצְהָּם mighty, בְּחִרּם naked. Some reject the first vowel, e. g. בְּחִרּם deed, יְבוּל מְשׁבּוּל ing, יְבוּל produce, בְּרוּב cherub. When the first radical is א, it takes (ַ) (§ 88. 2.), e. g. בְּרוּב crib, שֵׁבוּר מִשְׁר מִבוּר בּרָה שִׁברּרָב bandage, בְּבוּרְה, בְּרַבּר מִיבּר שִׁבְּרָב הְּרָב מִּל הְבִּר מִיבּר שִׁבְּרָב הְּרָב מִּרְבָּר שִׁבְּרָב הְּרָב מִּרְבָּר הִיבּר מִיבּר שִׁבְּרָב הְּרָב מִּרְבָּר הְּרָב הְּרָב מִּרְבָּר הַבְּרְב מִּרְבְּרָב הְּרָב הְרָב הְּרָב הְּרָב הְרִב הְרָב הְּרָב הְרָב הְיִיב הְיִיב הְרָב הְיב הְרָב הְיּב הְרָב הְרָ
- 2. לְטִילֹּ, לְטִילֹּ, הְטִילֹּה, לְטִילֹּה, אָמָילֹּה, לְטִילֹּה, לְטִילֹּ, לְטִילֹּ, לְטִילֹּ, לְטִילֹּ, Some, like the passive participle in Chaldee and Syriac, have (י-) for the second vowel instead of (זְּ), e. g. Masc. אָסִיךְּ harvest, אָסִירְ prisoner, אָבִיל joint, בְּצִיר chosen, נְיִיר vintage, בָּיִרֹי stack of corn, בְּיִשִּׁ anointed, יְיִר consecrated. Some reject the first vowel, e. g. בְּיִרְם bar, יְרָירְרָת food, יְבִירְרָת food, בְּיִרְרָת food, יְבִירְרָת food, יְבִירְרָת food, בְּיִרְלָּרָת food, בְּיִרְלָּרָת food, בְּיִרְלָּרָת food, בְּיִרְלָּרָת food, יְבִירָרָת folly.

Dagheshed Nouns.

§ 505. Some nouns have (_) or (_) under the first radical, and consequently Daghesh in the second. These may be regarded as formed from or after the intensive species.

PI'HEL.

Preterite.

לָּסוּל. פַּסְלּת, קְּשֵׂדֹל , קְשִׁדֹּל , קְשִׁדֹּל , בּמִשְׁרָת. Examples: מָשֶׁל, תְּשִׁל , מְשִׁלּת , קְשֵׁדֹל , פּמָה וּשִׁל , בּמִשְׁר , פּמָה וּשִׁל , בּמִשְׁר , שִּׁבְּל , פּמָה וּשִׁל בְּמִּדְּל , שִׁבְּל וּשִׁר , אַבְּלָת , בּמַה אַבְּר , אַבְּלָת , בּמַה אַבְּר , אַבְּר וּשִׁר , אַבְּר , פּמַה אַבְּר , פּמּר , בּמַר , פּמַר , פּמַר , פּמַר , פּמַר , פּמַר , פּמַר , פּמּר , פּמַר , פּמַר , פּמַר , פּמַר , פּמַר , פּמַר , מוֹן , פּמַר , פּמַר , פּמַר , פּמַר , מוֹן , פּמַר , פּמּר , פּמַר , פּמַר , פּמּר , פּמַר , פּמַר , פּמַר , פּמַר , פּמּר , פּמַר , פּמּר , פּמַר , פּמּר , פּמַר , פּמּר , פּמַר , פּמּר , פּמַר , פּמּר , פּמַר , פּמַר , פּמַר , פּמּר , פּמַר , פּמַר , פּמַר , פּמּמּי , פּמּמּר , פּמּמּי , פּמּמּמּי , פּמּמּי , פּמּמּי , פּמּמּמּי , פּמּמּמּי , פּמּמּמּי , פּמּמּי , פּמּמּמּי , פּמּמּמּי , פּמּמּי , פּמּמּמּי , פּמּמּי ,

Infinitive.

עָּטֶלָה, לְטָטֶל, לְטָטֶל, לַטְטֶל, לַטְטֵּל, לַטְטֵּל, לַטְטֵּל, לַטְטֵּל, לַטְטֵּל, לַטְטֵּל, לַטְטֵּל, לַטְטַל, לַטְטַל, בּצam-ples: אַבְּיֶרָה מַמְלּה magnificence, בַּבֶּיר cover of the ark. Some nouns of this class take (ָ) for the second vowel, e. g. טַבְּל, thief, בַּבָּר sin. Others have (יִ-), e. g. בַּבְּיִר מַמְרָּר strong, שַׁבְּיִר מַמְרָּר בְּיִיר מַמְרָר מַשְׁרָר מַעְּבִּר, אַבְּיִר מַמְרָר מַעְּבִּר. And a few have (יִ-), e. g. שַׁבְּרוֹל, שַׁבַּרוֹל, בַּבְּרוֹל בְּבִּרוֹל בְּבַּרוֹל. (ז), e. g. שַּבּרוּל, שָׁבַרוּל בְּבּרוּל בַּבְּרוֹל מִיבוּל בְּבְּרוֹל מִיבוּל בְּבַּרוּל מִיבוּל בְּבַּרוּל בַּבְּרוֹל בְּבַרוּל בַּבְּרוֹל בְּבַּרוּל בְּבַּרוּל בַּבְּרוּל בַּבְּרוֹל בְּבְּרוֹל בְּבִּרוּל בְּבִּרוּל בְּבִּרוּל בְּבִּרוּל בְּבָּרוּל בְּבָּרוּל בְּבְּרוּל בְּבְּרוֹל בְּבְּרִיל בְּבִּרוּל בְּבְּרוּל בְּבְּרוּל בְּבְּרוּל בְּבְּרוּל בְּבְּרוֹל בְּבְּרוּל בּבְּרוּל בְּבְּרוּל בְּבְּרוּל בְּבְּרוּל בְּבְּרוֹל בְּבְּרוֹל בְּבְּרוּל בְּבְּרוֹל בְּבְּרוֹל בְּבְּרְל בְּבְּרוֹל בְּבְּרוֹל בְּבְּרוֹל בְּבְּרוֹל בְּבְּרִל בְּבְּרוֹל בְּבְּרִל בְּבְּרִל בְּבְּרִיל בְּבְּרוֹל בְּבְּרִל בְּבְּרוֹל בְּבְּרוֹל בְּבְּרִיל בְּבְּרִיל בְּבְּרוֹל בְּבְּרִיל בְּבְּרִיל בְּבְּרוֹל בְּבְּרִיל בְּבְיִיל בְּבְּרוֹל בְּבְּרִיל בְּבְּרִיל בְּבְּרִיל בְּבְּרִיל בְּבְירִיל בְּבְּרִיל בְּבְּירִיל בּבְּיר בּבְּרִיל בּבְּרִיל בּבְּרִיל בְּבְּרִיל בְּבְּיל בּבְּרִיל בְּבְּיל בּבְּרִיל בּבְּרִיל בּבְּרִיל בּבְּיל בְּבְיל בּבְּיל בּבְּבְיל בְּבְּיל בּבְּיל בּבְּיל בּבְּיל בּבְּיל בּבְּבְיל בְּבְּיל בְּבְּיל בְּבְּיל בְּבְּיל בְּבְּיל בּבְּיל בְּבְּיל בּבְּיל בְּבְיל בְּבְּיל בּבְּיל בּבְּיל בּבְיל בּבְיל בּבּיל בּבּיל בּבּיל בּבּיל בּבּיל בּבּיל בּבּיל בּבּיל בּיבּיל בּבּיל בּבּיל בּבּיל בּבּיל בּבּיל בּבּיל בּיבּיל בּיבְיל בּיבּיל בּבּיל בּבּיל בּיבּיל בּיבּיל בּיבּיל בּבּיל בּיבּיל בּבּיל בּיבּיל בּיבּיל בּיבּיל בּיבּיל בּיבּיל בּייל בּיבּיל בּיבְיל בּיבּיל בּיבּיל בּיבּיל בּיבּיל בּיבּיל בּיבּיל בּייבּיל בּיבּיל בּי

PU'HAL.

§ 508. לְּטֵּלֶת; f. קְשׁלֶּח. A few are formed after the infinitive of this species, e. g. אָבָּטְלָח burden; בּתְּבֶּח tunic.

Nouns formed by the Addition of a Servile Letter.

prefixed.

- § 509. The letter א prefixed to verbal roots to denote the place or instrument of action is considered, and properly so, to be a fragment of one or other of the interrogative pronouns א שָּבְיּל what? א שָּׁבְיּל who? In addition to the participial nouns of the Pi'hel, Pu'hal, Hiph'hil, and Hoph'hal species, e. g. אַבְּעֵּע kitchen, אַבְעֵּע corner, בְּשְׁבָּוֹת didactic poem, אַבְעָּע corruption, there are other nouns formed by prefixing אונה denote either the instrument, place, or product of the action, or the action itself considered abstractedly.
- 2. Place. מְלְטֵל (מִקְטֵל), מַקְטֵל Examples : מָזְרָח sunrise, מְלָטֵל מִישְׁכָּן מִישְׁכָּן altar ; מָלְטֵל stall.
- 3. Product: מָקְטָל , מִקְטָל . Examples : מָקָטָל writing, מֶזְמוֹת distance, מְזְמוֹר song.
- 4. Abstract Nouns. בְּלְטָלָה; f. הַלְּטָלָה) (בְּלְטָלָה). Examples: מְלְטָלָה sale, מְלְטָלָה dominion; מַלְטָלָּה war, מְלְטָלָה dominion, מְלְטָלָה audience: מַלְטָלָה tithe, מְלְטָלָה assembly; sovereignty, מַלְטָלִה id.

n prefixed.

\$510. 1. The letter is prefixed to the root in forming a large number of nouns. This afformative, for whose explanation grammarians, after exhausting their ingenuity on the subject, have left little else than fanciful conjectures, may be assumed to be the principal letter of the particle in (see chapter on the Particles); which, being closely connected with the verbal root, points it out as denoting

either a concrete existence to which is attached the attribute contained in the root, or as the attribute itself taken abstractedly, e. g. פַּאָר to glitter, אַקאָרָאר (that which glitters); לענר, to be bitter, שַּבְרוּר to be bitter, שַּבְרוּר (the quality of being bitter).

2. מַקְטֵל, חַקְטֵל, חַקְטֵל, הַּלְטָל, הַּלְטָל, הַּלְטָל, הַּלְטָל, הַקְטֵל, הַבְּקטִל, הַבְּקטִה, הַבְּקטִה, הַבְּקטִה, הַבְּקטִה, הַבְּקטִה, הַבְּקטִה, הַבְּקטִה, cloak, הַבְּקִיר, מִבְּקטִר, הַבְּקטֹר, הַבְּקטִר, הַבְּקטִר, הַבְּקטִר, הַבְּקטִר, הַבְּקטִר, הַבְּקטִר, הַבְּקטִר, הַבּרְּטָר, הַבְּקטֹר, הַבְּקטר, הַבּרְטָר, הַבּרְטָר, הַבּרְטָר, הַבְּקטר, הַבְּקטר, הַבְּקטר, הַבּרְטָר, הַבּרְטָר, הַבְּקטר, הַבּקטר, הַבְּקטר, הַבּקטר, הבּבּקטר, הבּבּקטר, הבּבּקטר, הבּבּקטר, הבביקר, הבבּקטר, הבביקר, הבביק

refixed.

אָבְּנָטְלָה, אַקְטִלּ, אַקְטָלּ, Examples : אָבְנָטְלָה, f. אָבְטָלָל, Examples : אָבְּנָטְל, finger, אֶבְּנָע קוֹנְה (a few have (_) under the first letter, as אַבְנָה false, אַבְנָדָה hard) אַבְנָה armlet, אַבְנָה memorial, אַבְנָה sack : אַבְנִיר אָבְנִינוּל, אַבְנִינוּל fullet, אַבְנִינוּל girdle, אַבְנִינוּל Achzib.

¬ prefixed.

אָ 512. יַקְטַּוּל , יַקְטַּל Examples : יְבֶּקָנ oil, אָדָּדְי Isaac ; יַבֶּקֹב Jacob ; יַבְּקָנים bag.

, or is affixed.

D or Di affixed.

§ 514. A few nouns used adverbially are formed from others by affixing this letter, e. g. אָמְיָם daily, אָמְיָם truly, בּחָאֹם (= בַּחָאֹם) suddenly.

- affixed.

- § 515. These are derived from other nouns by affixing the letter resting in its homogeneous vowel (.); their forms of course depend upon those of their primitives. They consist of,
- 1. Patronymic nouns, or ancestral appellations, e. g. דָּרָר Gadite, דָּרָר Danite, ישׂראלר Israelite, ישׂראלר Ishmaelite.
- 2. Gentile nouns, or national appellations, e. g. מָבְרִי Egyptian, מְבִרִי Hebrew, מְבִרִי Philistine, בְּרִיִּר Perizzite. The feminine of these nouns is formed by adding either the char. term. הַ, and inserting Daghesh in the final י of the masculine, in order to retain the preceding short vowel; or by merely affixing its hardened form ה, e. g. מַבְרִיה or מַבְרִיה an Egyptian woman, מַבְרִיה an Egyptian woman, מַבְרִיה an Egyptian woman.
- 3. Appellations which have reference neither to descent nor citizenship, but to some other prominent attribute, e. g. אַרְבָירָל, red, אַרְבָּירָל, red, בּיִרְבָּיר, princely, שׁנֵיר second, &c.
- § 516. 1. Feminine nouns ending in ¬, on receiving this termination, change the final ¬ into ¬ (see § 73. 2. d.), e. g. עַּהָה Gaza, עַּהָה Gazate, inhabitant of Gaza.
- 2. When a masculine noun which should receive an affixed הי ends in ה, either this latter is rejected, as בְּרִישָה Beriah, בְּרִישָה a descendant of Beriah; or the noun is employed in the signification required without a change of termination, as הַּיְמָה מִשְׁפַּח הַיִּמְה of Jimna, the family of the Jimnites, Num. 26: 44.; or else ה is rejected, and replaced by the syllable י, as לְּשֵׁלָה מִשְׁפַּחַת הַשְּׁלֵּה מִשְׁפַּח הַּשְׁלָּה מִשְׁפַּח הַּשְׁלָּה מִשְׁפַּח הַשְׁלָּה מִשְׁפַּח הַשְּׁלָה מִשְׁפַח הַשְּׁלָה מִשְׁפַּח הוא מוּ מִיּיִים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִיִּים מִּיִּים מִּיִּים מִיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִיִּים מִּיִּים מִיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִיִּים מִּיִּים מִיִּים מִּיִּים מִּיִּים מִּיִּים מִיִּים מִּיִּים מִיִּים מִיִּים מִיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִּיִּים מִיִּים מִּיִּים מִיִּים מִּיִּים מִּיִּים מִיִּים מִּיִּים מִּיִּים מִייִּים מִיִּים מִּיִּים מִייִּים מִּיִּים מִּיִים מִּיִּים מִּיִּים מִּיִּים מִייִּים מִּיִּים מִּים מִייִּים מִּים מִּיִּים מִּים מִּיִּים מִּיְּים מִּיְּים מִּיְּים מִּיְּים מִיּים מִּיְים מִּיְים מִּיְּים מִיּים מִיּים מִיּים מִיּים מִיְּים מִּיְים מִּיְּים מִּיְּים מִּיְים מִּיְּים מִּיְּים מִּיְים מִּיְים מִיּים מִיּים מִּיְים מִיּים מִיּים מִּיְּים מִּיְים מִיּים מִּיְּים מִּיְים מִּיְים מִּיְים מִּיְיִים מִּיְּים מִּיְיִים מִּיְּים מִּיְים מִּיְים מִיּים מִּיְים מִּיְים מִּיְים מִּיְים מִּיְים מִּיְיְיִים מִּיְים מִּיְים מִּיְיִים מִּיְיְיִים מִּים מִּיְים מִּיְים מְיִים מְיִים מְיִים מִּיְים מְיִּים מִּיְים מִּיְים מִּיְים מִּיְיִים מִּיְים מִּיְים מִּיְים מִּיְים מִּיְיִים מְיִים מְּיִּים מִּיְיְים מִּיְיְיִים מְיִּים מִּיְיִים מִּים מִּיְיְים מִּיְיִּים מִּיְים מִּיְים מִּיְים מִּיְיִים מִּיְיִי
- 3. When the primitive ends in ה, the afformative is omitted, e. g. לישׁוִר מְשׁפַחַה הִישׁוִר of Jesui, the family of the Jesuites, Num. 26: 44.

NOUNS FROM IMPERFECT VERBS.

From Verbs " and ".

\$ 517. שֹׁלָשׁה, הַ מְּנֶשֶׁה The only nouns ב are those formed by prefixing ה with a vowel to the root; the initial liquid, as in the verbs, being assimilated to the letter following, which consequently receives Daghesh (§ 314). These comprise abstract and concrete nouns, which in form resemble participles of the Hiph'hil species, e. g. Masc. בַּבָּה expectation, בַּבָּה plantation, הַבָּה expiring, זְהַבָּ gift, בַּבָּה הַבּּיִה gift, בַּבָּה הַרְּיִּה בּּיִה בּיִּה בּיִה בּיִּה בּיִּיה בּיִּיה בּיִּה בּיִּה בּיִּה בּיִּיה בּיִיה בּיִּיה בּיִיה בּיִּיה בּיִיה בּיִיה בּיִּיה בּיִיה בּיִיה בּיִּיה בּיִּיה בּיִיה בּיִּיה בּיִיה בּיִיה בּיִיה בּיִיה בּיִּיה בּיִיה בּיִיה בּיִיה בּיִיה בּיִיה בּיִּיה בּיִיה בּיִיה בּייה בּיִיה בּיִיה בּייה בּייה

- staff. Fem. מַשְּלָה custody, מַבּּפָה ruins; מַבּפָה plague, מַבּּיָה ruins. A few take o or u for the second vowel, e. g. מַשְּׂוֹר saw; מַבּוּת fountain, מבּוּת seduction.
- \$\sqrt{518.} 1. מוּשֶׁבָה מוֹשֶׁב, מוֹשֶׁב, מוֹשֶׁב, מוֹשֶׁב, מוֹשֶׁב, מוֹשֶׁב, מוֹשֶׁב, מוֹשֶׁב, מוֹשֶׁב, מוֹשֶּב, מוֹשֶּב, מוֹשֶּב, מוֹשֶּב, אוֹה מוּס מוֹים מוּס מוֹים מוּס מוֹים מוֹים מוּס מוֹירָע מוֹיבְע מוֹיבְי מוֹיבְע מוֹיבְי מוֹיבְע מוֹיבְי מוֹיב מוֹיבְ מוֹיב מוֹים מוֹיב מוֹיב מוֹים מוֹיב מוֹיב מוֹים מוֹיב מוֹיב מוֹים מוֹיב מוֹיב מוֹיב מוֹים מוֹיב מוֹים מוֹיב מוֹיב מוֹים מו
- 2. בּשְּׁבֵ, f. בּשְׁבֵּן Some nouns פֿר are formed like those of מָדְב, e. g. מָדְב knowledge, מֵצְב station; מַבּרל deluge: מַצְב pillar, מַצְב id.
- 3. שְּׁשֶׁבְה, הִישִּׁבְה, קּמשׁבְה. Some nouns are formed from these roots by prefixing ה in the same manner as ה, e. g. שִּישָׁב sojourner, הִיבְּוֹן chastisement; הִיבְוֹן must, south.
- \$ 519. שַׁבֶּה. A few feminine nouns are formed by affixing the char. fem. הַ, and rejecting the first radical, e. g. אָדָה knowledge, מַּבָּה counsel, שֵׁבָּה sleep; and one by repeating the two last radicals, viz. אַבָּאָר productions from אַדָּיִר.

From Verbs נ"ר or נ"ר.

KAL.

- \$\delta 520. 1. Preterite. קַבְּה קַבְּה קָבְּה , קַבְּה , קַבְּה . Some nouns עדׁ are formed precisely like the preterite of verbs of the same species, viz. by rejecting ז together with its vowel, e. g. זְּ stranger, בָּר cloud, אַר enemy, ידָר poor; בְּרָה rival, קבָּה standing corn: or by rejecting ז, and giving the intransitive vowel (_) of the second radical to the first (\$ 384), e. g. אַל god, בַּרְה stranger, בַּר upright, בּר corpse, בַּר lamp; שַּרָה witness, בַּר food.
- 2. פֿרָם, קרם, קרם; ה. Some retain, which rests in o or u, e. g. אוֹר פֿוֹם אוֹר פֿוֹם לוֹם day; קרָם קוֹם stature, שוֹר לוֹם shame: אוֹר אוֹר אוֹר הוֹם hole, סוֹם horse, היין wind; הּרְבָּה fishing, silence, בּרְהָה form, שׁרְבָּה treturn. These, however, may be considered as formed from or according to the infinitive absolute or construct.

- 3. קָּרֶם. In others ז is mobile, and takes the vowel (ֶ), e. g. אָּלֶּרָ vanity, הָּלֶּרָ death, בְּלֶרָל iniquity, הְּלֶךְ midst. Once, where the third radical is א, it has (), viz. אָלָה falsehood.
- 2. בְּרנוֹך, קְמוֹן . Some are formed by affixing זְן to the preterite, e. g. הָרוֹן pride, לְצוֹן scorn, יְדוֹן joy; הַרוֹן outside, הַּרכוֹן medial: once זָרדוֹן proud, as from זרד.
- § 522. Infinitive. יְבִרן, וְקְהַם. A few nouns are formed from the infinitive by prefixing, יְבִרּל produce, יְבִרּל being, יְבִרּל investigation; יְבִרּל adversary.

prefixed.

- § 523. The majority of nouns from this part of verbs are formed by prefixing 2; they generally denote the place of action.
- \$ 524. 1. Absolute. מְּקֹנְהָה, f. מְקֹנְהָה. Examples: Masc. מְלוֹרְ a light (a place whence light issues), מְלוֹרְ מְעּפּוֹרִן dwelling-place, מְלוֹרְ lodging. place; very seldom מֵ takes (ֵ). e. g. מֵרוֹם Merom (high place), מְבוֹרָה race. Fem. מְבוֹרָה place, מְבוֹרָה net.
- 2. Construct. a. מְקרָהְ ; f. מְקרְהָה. Masc. מְברִּשׁ pudendum, מְברִּקּ dwelling-place, מְברִּקּ darkness, מְברִּרָ persecution. Fem. מְברִּסְה trampling down, מְברִּקָה emptiness, מְלרְנַה shed, מִנּיּחָה rest, חבּרִקּה.
- \$ 525. מְקרְטָה ; f. הְקרְטָה. A few nouns are formed after the infinitive construct by prefixing ה, e. g. מְּהְהָה abyss; מְבּרְנָה understanding, הְברּנָה place, הְברּנְה image, הְקרּנְה power of resistance, הְרוּטָה return.

HOPH HAL.

§ 526. Participle. מרקתה; f. מרקתה. The nouns of this form are few in number, e. g. מרּעָקה darkness, מרּעָקה foundling; weighty burden.

From Verbs ".

\$ 527. Preterite. בּסָ, בֹּסָ: לּ. הַבְּסָ. הַבְּסָ. These biliteral monosyllables take either (_), e. g. בַּן garden, בַּן weak, נַל strong, בֹּן light, הַן alive; which in some is lengthened into (_), e. g. בַּן warm, בּהָ perfect: or (_), e. g. בַּן grace, בֹּל heart, בַּן time, בַּן nest, דְּבָּ nest, דְּבָּ neth, הַבְּיַ tooth. Feminines are formed by adding the term. הַ and inserting Daghesh in the second radical, e. g. בְּיַה alive, בַּלָּה warmth, בַּלָּה bride, בַּלָּה desolation; those which have (_) in the masculine changing it into (_) by § 101. 2. b., e. g. בַּבָּה marsh, בַּלָּה fleece, הַבָּן plan, בַּלָּה word, abomination; unless the second radical is a guttural, when the (_) is retained, e. g. בַּלָה cud.

 \S 528. Infinitive. שׁם ; f. קּבָּה. Examples: שׁה warmth, על strength, אַט yoke, אָס cold, שׁה fulness, קּבָּה oppression. Feminines are formed by adding הַ and changing \bar{o} on the insertion of Daghesh into \bar{u} , by \S 101. 3. b., e. g. הַּבָּה a spring, הְּבָּה bridal bed, חָבָּה statute, סְבָּה tent.

prefixed.

\$ 529. בְּסֶבְ, סְבֹּבְ, בַּסֶבְ, בְּסֶבּ, בְּסֶבּ, בְּסֶבּ, בַּסָבְ, בַּסָבְ, בַּסָבְּ, בַּסָבְ, בַּסָבְ, בַּסָבְ, בַּסָבְ, בַּסָבְ, בּסַבְּ, בּבַּסָבְ, These consist of nouns formed from איס roots by prefixing, e. g. Masc. Kal pret. בְּבַּלְּה shield; infin. קבְּעָב fortress: Hiph. part. בְּבַּב divan, בַּבְּב strait; בְּבֶּב tribute, בְּבֶּר bitterness; בְּבָּר running about: Hoph. part. בְּבָּלְה covered walk, בְּבָּר fear. Fem. בְּבָּלְה roll, בְּבָּלְה thought, בְּבָּלְה destruction, בְּבָּלְה phigh road; when the second radical is a guttural, the first takes (_), e. g. בְּבֶּלְה curse, בְּבֶּלָה saw; once with pref. ב, viz. בְּבָּלָה event.

n prefixed.

§ 530. הַסְבָּה; f. הְסָבָה. Examples: Masc. מְבֶל defilement, מְבֶל melting. Fem. הְבָּה praise, הְחָלָה beginning, החנָה mercy, prayer.

From Verbs #5.

KAL.

§ 531. Preterite. בֶּלֶה, בָּלֶה, בָּלֶה, בָּלֶה, בָּלֶה, בָּלֶה, בַּלֶּה, בַּלֶּה, בַּלֶּה, בּלֶה. The nouns of this class which end in הַ are masculine; those in הַ are feminine, of which this is the characteristic termination, the radical ה being rejected by § 77. 3., whence the forms בֵּלָה for בַּלָה and בֵּלָה. Ex-

amples: Masc. קֹנֶה breast, קֹנֶה leaf, קנֶה staff, קֶּבֶּה end, חַשֶּׁבְ hard, מְּבֶּה field. Fem. מְנָה portion, מְבָּה end, מְבָּה hard, מְבָּה lip, שְּבָּה Some have (_) for the first vowel, e. g. Masc. בַּבָּה proud, בַּבָּה reviling, בַּבָּה end, מַבָּה associate. Fem. בַּבָּה pride, בַּבָּה hundred, בַּבָּה corner. Others take (_), e. g. בַּבָּה meditation.

אָלָרָה , בָּלְרָה , בַּלְרָה , בּבְּרָה , בּבְרָה , בּבְּרָה , בּבְּרָה , בּבְּרָה , בּבְּרָה , בּבְרָה , בּבְרָה , בּבְּרָה , בְבְּרָה , בְּבְּרָה , בּבְּרָה , בּבְּרְה , בּבְּרָה , בּבְּרָה , בּבְּרָה , בּבְּרָה , בּבְּרָה , בּבְרָה , בּבְּרָה , בּבְּרָה , בּבְּרָה , בּבְּרָר , בּבְּרָה , בּבְּרְיה , בּבְּרָה , בּבְּרְרָה , בּבְּרְה , בְבְּרְה , בְבְּרְה ,

 \S 534. בָּר. Some nouns of the preceding form whose second radical is also א or א, reject it according to \S 93. 3. b., e. g. אַ aridity for אָר, בָּרָר howling for בָּר, אֲרָר for בָּרָר, בָּרָר howling for בָּר, אֲרָר for בָּרָר.

\$ \$35. Participle. הַלָּה, אָלֹרָה, וּלֵּלָה וּלֵּלָה וּלֵּלְה וּלֵּלְה וּלֵּלְה וּלֵּלְה וּלֵּלְה וּלֵּלְה וּלֵּלְה וּלִּה rearly rain, במרות seer. Fem. (see the form הַּבָּה, \$531) שׁרְאָה storm, הּרְתָה impiety. Occasionally הוֹ is changed into וֹ (or perhaps we should rather say the original וֹ is restored, see § 439. 1. note), which rests in the vowel u, e. g. במרונים, which rests in i, e. g. במרונים, which rests in i, e. g. במרונים, wheaten bread, הְבִּרְה sickness. Fem. Formed by the addition of the characteristic הַרְּ, which causes the insertion of Daghesh conservative in וּלָלְה מַלְּיִם בּּרִבְּה הֹבְּיִבְּה fruitful; also with u for the first vowel, e. g. הַּבְּיִבְּה silence.

prefixed.

\$ 536. מַגְלֶּה , מַגְלֶּה , מַגְלֶּה . מַגְלָּה . מַגְלָּה . To these the letter is prefixed with either () or (_), the radical ה resting in (ֶ), e. g. Masc. with (_), הַבְּנֶה building, מַקְנֶה hope, מְקְנֶה purchase, מַקְנֶה accident, מִקְנֶה the second; with (_), resembling the Hiph. part., מַקְנָה spinning, מִקְנָה sight, מַקְנָה greatness. Fem. מִקְנָה command, מַקְנָה figure.

n prefixed.

עלקרת , תַּגְלָּה , תִּגְלָה , תִּגְלָה , תִּגְלָה , תַּגְלָה . When the first radical is א, the weakest of the gutturals, the prefixed ח always has (_), e. g. תַּבְּהָה wish, תַּבְּלָה , perfection, תַּבְּהָה hope; sometimes (_), e. g. תַּבְּלָה , sin, תְּבְלָה , deceit; and occasionally (_), e. g. תְּלָאָה , channel. Some end in ח or ח (§ 494. I. 2.), e. g. תַּבְּרָה תַבְּרָה תַּבְּרָה תַּבְרָה תַּבְּרָה תַבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַּבְרָה תַבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַבְּרָה תַּבְּרָה תַּבְּרָה תַבְּרָה תַבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַּבְּרָה תַבְּרָה תַבְּרָה תַבְּרָה תַבְּרָה תַבְּרָה תַבְּרָּרְה תַבְּרָּרְה תַבְּבָּרְה תַבְּרָה תַבְּרָה תַבְּרָּה תַבְּבְּרָה תַבְּרָּה תְבְּרָּה תְבְּרָּרְה תִבְּבְּרְה תַבְּרְה תַבְּבְּרָה תִבְּבְּרְה תְבְּבְּרְה תְבְּבְּרְה תִבְּבְּרְה תִּבְּרְה תִּבְּבְּיִיה תְּבְּבְּה תַבְּבְּה תִבְּבְּרְה תְבְּבְּבְּה תְבְּבְּבְּיה תְבְּבְיּה תַבְּבְּבְּה תְבְּבְּבְּה תַבְּבְּרָה תְבְּבְּרְה תְבְּבְּר תְבְּבְּבְּבְּה תַבְּבְּבְּה תַבְּבְּבְּה תְבְּבְּה תְבְּבְּבְּה תְבְּבְּבְּבְּבְּבְּבְּה תַבְּבְּבְּה תַבְּבְּבְּה תַבְּבְּבְּתְבְּבְּה תַבְּבְּבְּה תְבְּבְּבְּה תְבְּבְּבְיּבְּבְּה תְבְּבְּבְ

& prefixed.

 \S 538. אַגְלָה \S f. אָגְלָה \S few nouns are formed from roots by prefixing \S with (_) or (_), e. g. אַרְבֶּה locust; אַרְנָה declaration, אַרְבָּה gift.

i or i affixed.

From Verbs %5.

KAL.

§ 540. هِيْتِ هِيْ هِيْتِ . Those few nouns which are formed from roots مَنْ take either the precise form of the preterite or participle, or deviate from it in the vowels alone. None of them receive an additional letter, e. g. Pret. هِيْتِ host, هِيْتِ thirst; هُيْتُ grass, هِيْتِ basket, هِيْتُ prison, هُيُّةِ miracle. Part. هِيْءَ papyrus, هِيْقُ wine.

PI'HEL.

§ 541. শুমুন, শুমুন. A few dagheshed nouns are formed from these roots, resembling either the preterite or infinitive of the intensive species of the verb, e. g. Pret. শুনু seat. Infin. শুনু broken, শুনু sinner, শুনু jealous.

QUADRILITERAL NOUNS.

 $\S 542$. לְסְלֵּרְל , קְּטְלֹּרְל . These quadriliterals are formed, not by affixing an additional letter to the root, but by doubling the third radical, with \tilde{a} , \tilde{o} , \tilde{u} , or $\tilde{\imath}$ for the intervening vowel, e. g. בַּבְּלָרָל quiet; בַּבְּלֵּרָל pasture, בַּרָלִרל pasture, בַּבְּלָרל pasture, בַּבְּלַרל pasture, בַּבְּלָרל pasture, בַּבְּלָרל pasture, בַּבְּלַרל pasture, בַּבְּלַרְל pasture, בַּבְּלַרְל pasture, בַּבְּלַרְל pasture, בַּבְּלַבְּל pasture, בַּבְּלַבְּל pasture, בַּבְּלַרל pasture, בַּבְּלַבְּל pasture, בַּבְּלַבְּל pasture, בַבְּלַבְּל pasture, בַּבְּלַבְּל pasture, בַּבְּלַבְּל pasture, בַּבְּלַבְּל pasture, בַּבְּבָּל pasture, בַּבְּבָּל pasture pasture

Nouns Reduplicating the First Radical.

From Verbs 5".

לָּבְּטָר. סַבְּסָר, הַבְּסֶרָה, הַבְּסֶרָה. These nouns are formed like the intensive species of verbs of the same class, viz. by the reduplication and subsequent transposition of the first radical (see § 143. 3.). They may be ranged under the heads of preterite and infinitive, according to the vowels by which they are accompanied, e. g. Pret. אַלְּצֵלְּצִי cymbal, אַנְאָצִי pot. Infin. אַלְבָּלְי crown of the head, הַבְּלָבְל skull; בְּלְבֶּל inflammation: בַּלְבָּל wheel, בַּלְבָּל pain; אַנְאַנְעָן fear-ful, אַנְאָנָע eyelash, אַנְאַנְעָן pain; בְּלְבָּל ineck, אַנְעָּעָר scale: בְּלָבָל this last form is also assumed by a noun whose root is not אָר, אינד. אינד, אינד. אינד. אינד. אינד. אינד מוֹח.

Nouns Reduplicating the Final Syllable.

Nouns Affixing or Inserting a Liquid or Palatal.

\$ 545. Quadriliterals formed by affixing a liquid to the root for the most part take ל, e. g. בַּרְעָל iron, בַּרְעָל garden, שֵּרְעָל darkness, שֵּרְעָל ankle, שֵּרְעָל corolla; some take ל, e. g. שַּרְעָל axe, יַבְּעָל finger-nail. The liquid most frequently inserted is א e. g. שֵּרְעָל band, שֵּרְעָל axe, שֵּרְבָּר sceptre; in the following instance we have an inserted ל, viz. בַּלְבַל solitary. The two following are formed by affixing the palatal א מַלְבִּר treasury, חַרְבָּל מִּרְבָּר Afint, שֵּרְבֶּל מִּרְב שׁרִי sickle, שִּרְבָּל spider.

Nouns of Miscellaneous Forms.

\$ 546. The derivation of the following quadriliterals has not hitherto been satisfactorily ascertained, viz. Masc. בְּלְב treasurer, בַּבְּה edict, סְבַּפְּר satrap, סְבַפָּר mouse, עַקְרָב scorpion, שַּרְעָשׁ fin. Fem. אַרְנָבָת hare, הַבָּצֶלֶת meadow-saffron.

MULTILITERALS.

§ 547. A few nouns occur consisting of five or more letters, and which are not formed by reduplicating the final syllable (see § 544): they are mostly Chaldaisms, and are employed, with but few exceptions, only by the later writers, e. g. אַרְבֶּעָל purple (formed perhaps from the root אַבְּרָטָל, with אַ prosthetic and ז affixed), אָבַרְטָל basin (אַ prosthetic and י inserted), אַבְרְכּוֹן מּמִינִינוֹ affixed בּעַרְבָּעָל frog (supposed to be compounded of יבִּעַ and מַּעַרִינוֹן, וְרָבֵע מַ kind of cloth.

Compounds.

\$ 548. Some Hebrew multiliterals are composed either of two nouns, of a verb and noun, or of a particle and noun; they consist for the most part of proper names: 1. of two nouns, e. g. אֲרָיאֵל Ariel (lion of God), אֲרָיאֵל Gabriel (man of God), אַבִּירָאֵל Abimelech (father of a king), אַבִּירָאָל Hazarmaveth (court of death), אַבּירָאָל Azmaveth (might of death), אַבּירָאָל shadow of death, אַבּירָאָל fire-flame (this word, which is commonly said to be of the Chaldee form אַבּירָל, may be considered as compounded of אַאָּ, whose אַ is rejected by aphæresis (\$76), and אַבְּיֹבֶּיל, אָבֹילְבָּל, אָבּילְבָּל (from אַבּילִבּל, אָבַלְּבָּל (\$76), and אַבְּילָבְּל (from אַבּלּבְּל (God strengthens), אַבּילְבָּל (death), אַבּילִבְּל (idem), אַבּילִבְּל (fod hears), אַבּלּבְלָל (fod); זוֹלְלְּלָל (from בּלִרְלֵל (fod)); אוֹל (from בּלִרְלֵל (fod)); אוֹלְלְלָל (from בּלִרְלֵל (fod)); אוֹל (from בּלִרְלֵל (from בּלְרָלְל (from בּלְרָלְל (from בּלִרְלֵל (from בּלִרְלֵל (from בּלְרָלְל (from בּלְלְלָל (from בּלִרְלֵל (from בּלִרְלֵל (from בּלְרָלְל (from בּלְרָלְל (from בּלְלְלָל (from בּלְרָלְל (from בּלְרָל (from בּלְרָלְל (from בּלְרָל (from בּלְלְל (from בּלְלְלָל (from בּלְלְלָל (from בּלְל (from בּלְלְלָל (from בּלְלְל (from בּלְלְלְל (from בּלְל (from בּלְל (from בּלְלְל (from בּלְלְלְל (from בּלְלְלְל

CHAPTER IX.

INFLECTIONS OF NOUNS.

FORMATION OF THE PLURAL.

§ 549. In Hebrew, as in most other languages, the Plural number (בְּבִּרֹ בְּרָדִי) is distinguished from the Singular (בְּבִּרֹ בְּרָדִי) by a change of termination; and as its nouns are all either masculine or feminine (§ 493), there are but two different forms of the plural, one appropriated to each gender.

MASCULINE.

\$ 550.. 1 The sign of the Plural Masculine of both nouns and adjectives is affixed to the singular form by means of the connecting vowel (תַּבְּיִם, e. g. בְּּבִּיִּם stranger pl. בְּרִיבֹ great pl. בְּרִיבִּם. As the letter is the only essential part of the plural termination, the preceding ת which is merely the accompanying mater lectionis of the vowel of union, is in many instances omitted in writing, the quantity of the syllable remaining the same (§ 100. 1. note), e. g. תַּבְּיִנִים sea-monsters for תַּבְּיִנִים.

2. When the singular, as in patronymics and gentile nouns, ends in (§ 515), the vowel of union (בר) is generally omitted altogether, e. g. להדרים לפט ליה ליהודים ליה

\$551. In a few instances, which may be regarded as Chaldaisms, the cognate ז is adopted as the plural termination instead of ם, e. g. thers, Job 31:10. for אַהַרִים islands, Ezek. 26:18., אַהַרִין wheat, Ezek. 4:9., יָמִידן days, Dan. 12:13., מַלֵּכִין words, Job 18:2., מַלֶּכִין hings, Prov. 31:3.

\$553. A greater anomaly consists in the change of יָרָ into יִרָּ besides the omission of יֵרָ פּ. פָּ. יִרָּרְ Ezek. 13:18., יְבָרְלְּ Zech. 14:5., בּוֹבֶר Amos 7:1., יַבְּרֹ Jer. 22:14. הוֹרֶר Is. 19:9., יְבָּרֹ and בּוֹבֶר with these may be reckoned the plurals of preëminence, אַבְּרֹי and אַבְּרֵי the latter of which has () probably to distinguish it from אַבְּרֵי the ordinary plural of אַבְּרֹי with the suffix of the first person. It may, nevertheless, be justly doubted whether the final יִר and יַ of all these instances are in reality anomalous plural terminations or pronominal suffixes. See Gesenius's Lehrgebäude, § 124, and Ewald's Kritische Grammatik, § 164.

FEMININE.

§ 554. The distinctive termination of the Plural Feminine is the feminine characteristic ה (§ 494. 2.) affixed to the singular by means of the connecting vowel (i), e. g. אָלוֹת voice pl. קוֹלוֹת shoulder vol. i.

pl. בְּתֵּפּוֹת. Since the termination הן designates not only the plural number, but also the feminine gender of that number, all nouns and adjectives which in the singular end in either of the feminine characteristics ה סר ה, רפְּבִּרוֹת in the plural as superfluous,* e. g. הְּבְּבְּרוֹת wisdom pl. אֲבְּרוֹת מְּבְּרוֹת great pl. אֲבְּרוֹת ; בְּדְוֹלוֹת letter pl. אֲבְּרוֹת מִלְּבְרוֹת אַבְּרוֹת (the ה of nouns in ה, becoming mobile in the plural, is changed into ה, and receives Daghesh on account of the preceding ŭ).

EXCEPTIONS.

§ 555. Although in the great majority of cases, the nouns of both genders take the terminations appropriated to them respectively, there are yet many masculines which form the plural in ni, as well as feminines which form it in ni, while some nouns of each gender take alternately both ni. It must be observed, however, that the termination of the plural does not affect its gender, which remains the same as in the singular.

אָבֶּן. The following feminines form the plural in בַּיִּר, viz. אָבֶּנִים stone pl. אַבָּנִים ; so אַבְּנִים widowhood, בַּיֶּבֶים live coal, בְּבַנְּה בְּבֹנְה bee, הִיִּ וְמִיּלְה idolatry, זְבוֹרְה pranch, הְשָׁה wheat, הְבַנְּה darkness, הַבְּנִיה dove, בַּבְּנִה pail, הַבָּנְה brick, הֹבָי brick, מַלָּה word, בַּנְלָה prick, שִׁלָּה measure, שַׁלֶּבֶּי concubine, הְאָה flax, חַבַּ piece, שִׁבֹּנִים barley, מָשִׁים ear of corn, הְאָהָה fig-tree: בָּצִים eggs and נְשִׁים women are used only in the plural.

^{*} An exception is found in the word הַּאָּה, plur. הַּמְּהוֹת Gen. 31:33. 2 Sam. 6:22. &c., where the final ה is retained, probably to distinguish it more completely from מְּמֵהוֹת plur. of הַאָּב. A few nouns in הַאָּ and הַיָּם also retain the final ה, e. g. בּלְה door pl. הֹוֹתְשׁ Ezek. 41:24., הַּשָּׁה bow pl. הַמְּשׁה spears, Is. 2:4. Mic. 4:3., הַוֹּתְיה pits, Ps. 107:20. Lam. 4:20.

§ 559. This indecision of the language with regard to the gender of the plural we have purposely considered as an anomaly, and have presented accordingly all the instances in which it makes its appearance. For notwithstanding that rules might be given which would hold good to some extent, and that a ground of distinction might be affirmed to exist in the meanings of the two forms, which are sometimes found to differ more or less essentially, still the number of cases which, after all had been done, must necessarily be considered as exceptions, would render the attempt to reduce them to system far more perplexing than useful.* Indeed with regard to those names of things whose gender is not determined by their intrinsic qualities, but depends upon the light in which they present themselves to the mind, almost all nations differ more or less in their practice upon this point both from one another and among themselves.

[•] As a proof of the correctness of the above remark, we need only refer the reader to the signal manner in which Prof. Ewald has failed, after laying down a multitude of rules often contradictory and unsustained by facts, in adducing any satisfactory theory of the gender. See his Kritische Grammatik, §§ 173, 174.

e. g. קבְּמַרוֹת, הוֹלֵלוֹת foolishness, הְּכְמוֹת wisdom, מּוֹלֵבוֹת circum-cision, הוֹלֵלוֹת delight, שֹלֵלוֹת gleaning, קְבָּצוֹת jealousy, הוֹעֲבוֹת swiftness, הַוְּעֲבוֹת guidance. Add the plurales excellentiæ, or plurals used to signify preëminence, e. g. אֵלְהִים God, אֲדֹיָר Lord (see § 553), הַבְּחַבוֹת hippopotamus, &c.

§ 561. Others are employed in the singular with a plural signification; these are for the most part collectives, and consist of the generic names of animals, e. g. אַבָּ cattle, אָם children, שִּיֹם fowl, שֵים birds of prey, אַבּ sheep, אוֹם oxen.

FORMATION OF THE DUAL.

אָל אָרָי זְּהְנָּר) may be considered as a secondary and derivative form of the plural, made by giving the () of בּיִר to the which it before preceded, and inserting () in its stead, thus בַּיִר. This termination may be affixed to masculine and feminine nouns ending in a perfect consonant, e. g. בְּיֵלְ הַוֹּח both hands; בַּעַלִּים shoe, בַּעַלִּים pair of shoes; בַּעָלִים door, בְּעָלִים gate of two leaves; and also to feminines ending in הַיָּ, after hardening הווס הווס הווס אוֹם שַּבְּתִּים pair of lips.

§ 563. This form is not employed in Hebrew as in Greek to denote the number two applied to any object: it signifies more properly a pair;* whence its use is restricted to,

- 1. The names of things which in nature are found existing in pairs, e. g. ב. לוב לופרם, the ears, בּבְּבַּים the nostrils, בְּבְּבִים the knees, בְּבָּיִם the hips, בְּבָבִים the wings, בְּבָּיִם the loins, בְּבָּיִם the eyes, בַּבְּיִם the feet, בְּבָבִים the teeth (i. e. the two rows), בְּבָבִים the lips. And hence the dual form is retained when even more than one pair is denoted, e. g. בַּבְּבִים the legs, applied to quadrupeds, בֹּבְבַּיִם six pair of wings, Is. 6:2., בַּבְּבִים seven pair of eyes, Zech. 3:9.; and also after the word בְּבַבִּים the every, e. g. בַּבְּבַּיִם every pair of hands and every pair of knees, Ezek. 7:17. 21:12.
- 2. The names of things made double by art, as קַּלְחֵים gate of two leaves, הַלְחֵים pair of scales, מֶלְקְחִים pair of tongs, הַחִים handmill (consisting of a pair of stones), בְּלֵלִים pair of shoes.
- 3. The dual is also occasionally employed as we use the word couple, in speaking of two things of a kind, whether belonging toge-

^{*} On this account it is found in nouns only, and never in verbs.

ther in pairs or not, e. g. the numeral שָׁבִּים, which in addition to its ordinary meaning, two. is used also to denote a pair, as in the phrase שְּבִים in pairs, Gen. 7:15.; מְבִיבִּים a couple of hundred. It is often applied to periods of time, e. g. רֹבִיבִים a couple of days, שִׁבְּבִים a couple of weeks, שִּבְּבִים twilight, שִּבְּבִים midday (combining the double light of morning and afternoon). The word בַּבְּבִּיבִים slothfulness, Eccl. 10:18., would appear at first sight to constitute an exception; but it may be considered as referring to the inactivity of both hands, an interpretation favoured by the latter clause of the verse cited. Comp. Prov. 19:24.

- § 564. 1. The names of double members of the body appear also with the feminine plural termination אוֹן; this form, however, is rarely applied to the members of the natural body, but rather to factitious imitations of them, or by a figure of speech to inanimate objects supposed to bear to them some analogy, e. g. קַרְנִים the hands, יְבָיִם the hands, אַבְּנִים the hands; בְּבָּיִם the hands, אַבְּנִים the hands בְּבָּיִם the wings, בְּנִיִּנִים the wings, יַבְיִנִים the eyes, יְבִינִים the altar; בְּנִינִים the wings, אַבְּנִינִים footsteps.
- 2. In a very few instances the plural is used in the same signification as the dual, e. g. אוֹרְישִׁים the lips, Ps. 45: 3. 59: 8. Is. 59: 3.; and on the other hand, the dual form occasionally appears with the figurative signification, e. g. אוֹרָים sides. In one or two instances the dual is superadded to the plural form, e. g. אוֹרְישִׁר wall, pl. אוֹרְישׁר walls, du. הוֹרְישׁר the two walls of Jerusalem (this form may be explained in another manner, viz. by supposing the הוֹר of the singular to have been hardened into הוֹר on the reception of the dual termination (§ 562), and Kamets replaced by Hholem); לְּהֹרְתִים tablets, du. לְּהֹרְתִים the two decks of a ship.

Internal Changes of Nouns.

- § 565. We come now to consider the changes in form that nouns undergo, to indicate their various relations and modifications in the course of grammatical construction; and here we have to show, 1st, in what cases and from what causes they suffer a change; and, 2dly, what the changes are which they are subjected to.
- 1. With respect to the first subject of consideration, we find that changes take place, a. in singular nouns, when passing from the independent or absolute (Heb. בּרְבֹרוֹת cut off, free) into the construct

state, or state of being connected with another noun (Heb. סְמֵרְכוֹת supported); b. in singular nouns on receiving the plural termination, masc. ק-ל, fem. הַּלּה (﴿﴿ 550, 554); c. in plural nouns, when passing from the absolute into the construct state.

- 2. As regards the changes themselves, we find that they are confined almost exclusively to the mutable vowels: thus a long mutable vowel becomes shortened or rejected, a short one lengthened or rejected, and sometimes in consequence of a rejection a new syllable is formed. The only changes that take place in the consonants, besides the addition of and and to form the plural, are those of fem. sing. nouns ending in and, which in the construct is converted into and of masc. plur. nouns, which in the construct reject the final and
- § 566. It must here be remarked that all nouns do not suffer these changes, and that in those which are subjected to them they do not take place in precisely the same manner. It will therefore be necessary to treat separately of each of the cases above enumerated, showing what nouns undergo the changes referred to, and what those changes are. And here we find on examination that in each of the above cases, viz. in the formation, a. of the singular construct, b. of the plural absolute, and c. of the plural construct, the nouns may be divided into three classes, containing, 1. those which suffer no vowelchange; 2. those which suffer one vowel-change; and, 3. those which suffer two changes.

A. SINGULAR CONSTRUCT.

§ 567. The term Construct is applied to the condition of a noun which is followed and restricted by another, as compared with that of one not thus followed and restricted. As examples of the two states we may take the expressions, לְּבְּיִ הְּלְּבִּה the hand of Jehovah; in the latter of which the meaning of the word hand is not left unrestricted as in the former, but is qualified as being the hand of Jehovah and of no other. The closeness of this connection is shown moreover by a quick pronunciation of the first noun, in order to arrive sooner at the end of the whole compound expression. From this it results, that the noun in the construct shortens or rejects one of its vowels, or, if practicable, shortens one and rejects another; while the qualifying noun, which undergoes no restriction of its meaning, does not suffer any contraction of its form. And hence the relation of possessor and

possessed is exhibited in the Hebrew in a more philosophical manner than in the classical and other languages, where the qualifying noun is inflected to point out this relation, while that which is qualified remains unchanged.

- § 568. As the formation of the construct state consists in shortening or altogether rejecting one or more of the vowels of the absolute when practicable, it of necessity depends entirely upon the form of the word, and not upon its gender or signification, whether on entering this state it is to suffer any change or not, as also what change if any it shall undergo. In this respect all nouns may be divided into the following three classes, observing that those ending in π change this termination into π —, as already remarked (§ 565. 2.), besides slightly differing from other nouns, as will be seen, in the internal changes which they undergo.
- 1. Nouns which in forming the construct suffer no change, but retain the form of the absolute; those with π merely changing the termination into π —.
- 2. Nouns which suffer one change, viz. the shortening or rejection of a vowel; those in Top suffering a rejection.
- 3. Nouns which suffer two changes, viz. the shortening of one vowel and the rejection of another; those in True undergoing both a rejection and the consequent formation of a new syllable.

First Class.

§ 569. I. The first division of the first class comprises,

a. All monosyllabic nouns with a long immutable vowel, i. e. one accompanied by a mater lectionis, e. g. אוֹר light, אוֹר day; אוֹר me-ass, מַרר he-ass, אוֹר leaven: סַרּס horse, אַרר וּהַוּן he-ass, limit, אַרָּרּל habitation: מָרר tin, בְּרַרל lord. As these nouns have but a single vowel, which can neither be shortened nor rejected (§ 100. 1.), the form of the construct must necessarily remain the same as that of the absolute. With them may be classed monosyllables with the vowel (_), which seldom suffer any change in the construct, e. g. בַּרָ son, בֹר tree, שֵׁר name;* well, אַר well, אַר welf, בַּרָר pain.

^{*} Sometimes however, especially when followed by Makkeph, these nouns shorten their (ָ) into (ָ), e. g. אבן 1 Sam. 20:30, 31., also בּן Deut. 31:23. בּלָּבְּי Prov. 20:5. 22:15., בּלִי Gen. 16:15.

- b. Monosyllables with a short vowel, which of course admits neither of contraction nor rejection (§ 103), e. g. בַּל roof, דַב poor, הכוּש mountain, בַּל honey, מועם a little.
- c. Dissyllables whose first syllable is short and mixed, and whose second is long and immutable, e. g. אבור song, אַבְּעָרָבְּיִלְּיִ song, אַבְּעָרָבִּירִ stumbling-block; אַבּרָר hero, בְּבַּרִר sparrow: מַלְבַרִּתְּל מַלְבַרִּתְּר hero, אַבְּרָר אַבּרָר מַלְבַרִּת מַלְבַרִּת מַלְבַרִּת hero, מַלְבַרִּר שׁ sparrow: מַלְבַרִּת מַלְבַרִּת heap: בַּבְּרַר division, אַבְּרָר pupil; אַבְּרַר mighty, פַבְּרַר there the nature of both syllables forbids any contraction or rejection of the vowels (see §§ 100. 1., 103.); the same is the case when the last also is a short mixed syllable, e. g. בַּרְבָּן, iron, בַּרַבָּן axe.
- d. Dissyllables whose first syllable is simple, with either a long or short vowel, and whose second is short and mixed. These comprise all that class of nouns usually termed Cegholates, from the Ceghol which constitutes their ultimate vowel, except when changed into Pattahh through the influence of a final guttural (§ 501. 2.). In passing into the construct state they undergo no change in either syllable:—for none can take place in the second, since it is both short and mixed (§ 103): and the first does not admit of rejection, on account of the accent which accompanies it; and if long, it cannot be shortened, as it forms a simple syllable, e. g. אָרָל king, אָרָל seed, בַּבֶּר book, הַבֶּר splendour; בַּבּר holiness, הַבָּר javelin.*
- II. All feminine nouns ending in הַּיִּדְ, which being put into the state of construction change their termination into הַ, e. g. שׁפְּהָה. The reason of this peculiarity appears to be, that the final long vowel offers a hindrance to that close connection of the two nouns which is the peculiar characteristic of the construct state: on this account the (,) is shortened into (); and as a cannot end a mixed syllable, it is hardened into its cognate n

^{*} Except בּשְׁלֵּ fætus constr. בְּשַׁלָּ Deut. 7: 13. 28: 4, 18, 51., בּשַׁבֶּ plantco nstr. בַּשָּׁל, רָשִׁל constr. בַּשָׁל, הַשִּל בּרוּג ימוּזעי constr. בַּשָּׁל, בַּשַּׁל בּרוּג ימוּזעי constr. בַּשָּׁל בְּשׁׁר בּרוּג ימוּזעי בּרוּג ימוּזעי בּרוּג ימוּל בּרוּג ימוּזעי בּרוּג ימוּל הוּצר בּרוּג ימוּל בּרָת בְּרֵל בְּרָת בְרָת בְּרָת בְּרִת בְּרָת בְּרָת בְּרָת בְּרָת בּרָת בּרָת בּרָת בְּרָת בּרָת בּרָת בּרָת בּרָת בּרָת בּרָת בּרָת בּרָת בּרְת בּרָת בּרָת בּרְת בּרְת בּרְת בּרְתְיבְיּבְי בּרְתְיבְיּבְי בּרְתְיבּי בּרְתְיבְי בּרְת בּרְת בּרְתְיבְי בּרְת בּר

[†] Nouns ending in הַ, which are masculine, do not harden the final ה; this being a radical, and therefore remaining unchanged: but they lengthen (ֶ) into (ֵ) contrary to the principle of the construct, thus מְּמֶבֶּה possession constr. מְמָבְּה field constr. בְּיִבְּה field constr. בְּיִבְּה The cause of this seems to be, that the close connection between the two nouns attracts the tone of the former more strongly towards the latter, and thus lengthens the syllable which it accompanies.

- (§ 73. 2. d.). The following are the nouns which constitute the second division:
- b. Feminines in הַּיָּ, whose first syllable is short and mixed, whether ending in a vowelless letter, e. g. אַמְרָה speech constr. אַמְרָה, so עַרְלָה garment; הַּרְפָּה scorn, עַרְלָה nakedness; עַרְלָה maiden, שַּרְלָה unrighteousness; הְבָּפְה wisdom, עַרְלָה cunning; הְפָּה liberty, הְמָּאָה impurity: or in a letter with Daghesh, e. g. הַהָּה terrour constr. הַהָּה; so תַּבְּה impurity בַּהְה roll, הְהַהְה praise; מַבָּה smiting, תַּבָּה temptation; הְקָה law, סָבָּר tent.
- c. Feminine trisyllables in ה-, whose first syllable is short and mixed, and whose second is long and simple, e. g. מַּהְשַּכָּה overthrow constr. מַרְשַּׁבְּה, so מִבְּיּבָה ruin; בּכּוּרָה early fig, מוֹבְּיּבָה wound; בַּקַשָּׁה care, בְּקַשָּׁה request.*

Second Class.

- § 570. I. The second class comprises all nouns which in forming the construct either shorten or reject a vowel: the contraction takes place only in the ultimate, and the rejection only in the penultimate.
 - 1. Those in which a vowel is shortened are:
- a. Monosyllables with the long vowel (ָ), which being mutable (§ 100. 2.) is shortened into (ַ) on account of the quickness of pronunciation proper to nouns in the construct state, caused by the hastening onward of the voice, in order to arrive at the qualifying noun, e. g. אַדְ fish constr. אַדָ, so דָּב blood, אַדְ stranger, אָדָ hand, רָב poor; † נְבוּר time constr. אָדָן time constr. אָדָן time constr. אָדָן time constr. אָדָן honour.

[•] Many nouns, however, which end in הַ, change each () into its modification (), e. g. הַבְּבָׁהְ kingdom constr. הַבְּבָּה, so הַבְּבָּהְ war, הּבְּבָּה dominion, הַבְּבָּה chariot, &c.; and הַהְּבָּה species constr. אוֹם שִׁיבּ , where () is taken instead of () on account of the strong guttural ה (§ 84. 1.).

[†] Except לְּבֶל cloud, whose long vowel accompanying a weak guttural is occasionally found unchanged in the construct, e. g. בְּבֶב עֵל Is. 18:4. Ezek. 41: 25. Prov. 16: 15.

- b. Dissyllables whose first vowel is long and immutable (§ 100. 1.), and whose second is (ָ), which is shortened into (ַ) as in the preceding, and for the same reason, e. g. אוֹצֶר treasure constr. אוֹצֶר so בּוֹכֶב star, בּוֹלָטֶב sitting-place; בּוֹלְטֵב hecklace, מֵילָטָב best part.
- - 2. Those in which a vowel is rejected are:
- d. Dissyllables whose first vowel is (ָ), and whose second is long and immutable: these reject the first vowel, e. g. אָדוֹן lord constr. אָדוֹן, so בְּרוֹּם great, בְּקֹרִם place, שָׁלוֹם peace; בְּרוֹּם blessed, שְּצִרּם naked; בְּרוֹם rorn-stack, קַבִּרוֹם prince, קַבִּרוֹם liberal, קַבִּרוֹם harvest, מָבִיר innocent, בְּלִר roasted grain. And also some whose first vowel is (ַ),† e. g. בְּלִרץ interpreter constr. בַּלִרץ.
- e. Trisyllables whose first syllable is short and mixed by means of Daghesh in the second letter, whose second vowel is (,), and whose third syllable contains a quiescent semi-vowel. As both the first and third syllables are immutable (§§ 101. 1., 103), the vowel of the second is rejected in the construct, and generally also the Daghesh in the second letter, which is then no longer required (§ 33. 1.), e. g. אַברוֹן, so יַּבְרוֹן consumption, שַּבְּרוֹן destruction. Sometimes, however, Daghesh is retained, e. g. יוֹבְרוֹן labour constr. יַּעַבּרוֹן .
- II. a. Feminine dissyllables in ה-, whose first vowel is either () or (), making a simple syllable, which not being immutable is rejected, e. g. פּבָּה end constr. בְּבָּה, so שְׁבָּה lip, ישׁנָה year; הַעָּה knowledge,

^{*} A few nouns of the form בְּלְבֵּעְ change the first vowel into (ַ) and the second into (ַ), viz. מַּלְבֵּעְ key constr. מַלְבֵּעְ, so בֵּלְבֵּע lair, בַּלְבֵּע outcry, בַּעְבֵּע womb, בַּעְבֵּע staff.

[†] Except when the letter bearing this vowel is %, which on account of its weakness retains its vowel in the constr., e. g. אַבוּט stall, אַנוֹם hyssop, אַבּוֹּט ephod (see § 88. 2.).

א בּיְּבֶּה hundred, מֵּבֶּה corner. b. Some trisyllables whose first vowel is long and immutable reject the second, e. g. הוֹעֶבָה abomination constr.

Third Class.

- \S 571. The third class comprises all dissyllables which suffer two changes.
 - I. The following reject the first vowel, and shorten the second:
- a. Dissyllables which have a (ָ) in each syllable; these, being mutable, are both affected, e. g. בְּשֶׁר flesh constr. בְּשֵׁר, so בְּבֶּר word, קבָר wise, בְּשֵׁר wise, זהב wing.*
- b. Dissyllables whose first vowel is (ָ), and whose second is (ַ); in passing into the construct state, the former is rejected, and the latter changed into the simplest short vowel (ַ) (§ 101. 2. c.), e. g. אָבָן old man constr. אָבָן, so אָבָן court, אָבָן inhabitant.†
- c. Dissyllables which have (_) for the first vowel and (_) for the second, e. g. לבב heart constr. לבב vine, קוֹער, hair.
- II. Feminine dissyllables in ה- whose first syllable begins with a vowelless letter, and has a long mutable vowel. Upon the rejection of this vowel there will be two concurrent Sh'was at the commencement of the word, the first of which is changed by §103. 4. into (), e. g. בַּבְּבָּה blessing constr. בְּבָּבָּה for בִּבְּבָּה corpse; occasionally into (), e. g. בְּבָּבָה cart constr. בְּבָּבָּה beast; and sometimes, especially when the second radical is a guttural, into (), e. g. בְּבָּבָה for בְּבָּבָה aguttural, into (), e. g. בְּבָּבָה constr. בְּבָּבָה for בְּבָּבָה beast; are buke constr. בְּבָּבָה for בְּבָּבָה for בְּבָּבָה beast; a guttural, into (), e. g. בְּבָּבָה constr.

^{*} Except הַלֶּב milk constr. הַלֵּב .

[†] Except those from verbs אָלְ, e. g. אָלֶ זְּעוֹ constr. אַלְּבְיּ ; a few others which retain the (_) of the absolute, e. g. מַלֵּד five constr. בְּבָר , so בְּבָר , wheel ; and the following, which in the construct take two Ceghols, viz. אַנֶּר constr. בְּבָר , so בְּבָר thigh, קוֹם shoulder, and once בְּבָר heavy Is. 1:4. In Is. 11:14. הַבַּב retains the absolute form.

B. PLURAL ABSOLUTE.

§ 574. The affixing of the plural terminations masc. בים, fem. הז, gives rise to certain changes in the vowels of nouns, similar in principle to those which occur in forming the singular construct; for, as the close connection of a noun in the construct with that which follows it causes the hurrying over of the voice to arrive at the principal accent of the compound term, which is that of the last word,-so in forming the plural, the addition of a syllable which must always receive the accent (§ 55. 1.) carries the tone forward, and this necessarily gives rise to changes in the vowels (§ 103. 1.). But although the producing causes are similar in the two cases, the effects are not always the same. This arises from the fact, that the plural terminations of both genders are asyllabic, and give their vowel to the final letter of the singular, whose ultimate vowel if long is retained, e. g. D7 blood, יַר hand, דָבֵר word, plur. דָבִרם, דָבָרים;* or if short, must be lengthened to form a simple syllable, the accent being already occupied by the termination, e. g. קה mountain, מַלָּה king, plur. הרים, בלכים. In the singular construct, on the contrary, where no such necessity exists, the vowel-change consists in shortening. But this distinction extends only to the change of one vowel into another; for the causes which effect the retention of the absolute form or the total rejection of a vowel in the formation of the singular construct, operate also in that of the plural absolute: thus, immutable vowels remain, e. g. סרסים horse, קוללות , voice, מַלְבַּרִּשׁ clothes, plur. קולות , קולות מלברשים; while others are rejected, e. g. מַלברשׁים place, מַלברשׁים overseer, interpreter, plur. מְלִיצִים, פָּקִידִים, מַקֹּימוֹת. These are the principal rules to be observed in forming the plural absolute; and according as they severally apply, nouns may be divided into the three following classes:

- 1. Those which undergo no change whatever on receiving either of the terminations בים סיד.
 - 2. Those which reject a vowel.
 - 3. Those which reject one vowel, and change another.

^{*} Except בְּבֶּל camel, which in the plural shortens the (,) of the second radical into (,), and consequently inserts Daghesh in the third, thus בַּבֶּל־ם

First Class.

§ 575. To the first class belong the nouns included in a, b, c, Div. I. of the first and second class of Construct nouns; and all nouns ending in n_{-} , with the exception of those whose first syllable is mixed.

2. Those in b of the first class with (_) retain this short vowel, and, being derived for the most part from roots ע"ל, receive Daghesh forte in the second radical, e. g. הַלְּלִים, הָבֶּלִים, בָּלִים, בָּלִים, בָּלִים, בָּלִים, בָּלִים, בָּלִים, בָּלִים, בַּלִים, בַּלִּים, בַּלִים, בַּלִים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִים, בַּלִּים, בַּלִים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בּבְּלִים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִים, בַּלִּים, בַּלִים, בַּלִים, בַּלִּים, בַּלִים, בַּלִים, בַּלִים, בַּלִים, בּלִים, בַּלִים, בַּלִּים, בַּלִים, בַּלִים, בַּלִים, בַּלִים, בַּלִים, בַּלִים, בַּלִים, בַּלִּים, בַּלִים, בַּלִים, בַּלִים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּים, בַּלִּבְּבִּים, בַּבְּים, בַּבְּבִּיבְּים, בַּבְּים, בַּבְּבִּים, בַּבְּבִּים, בַּבִּים, בַּבְּבִּים, בַּבְּב

3. Those in c can likewise undergo no change, e. g. מְזְמוֹרִים, מְמִוֹרִים , גּבּוֹרִים , מֹלְבִּישׁים ; גּבּוֹרִים , מֹלְבִּישׁים ; גּבּוֹרִים

4. Those in a of the second class retain their long vowel (ָ), which on the reception of the plural termination must form a simple syllable (see above, § 574), e. g. פּֿתָבִים , יָרִים , יָרִים , יָרִים , יָרִים , יַרִים , יַּרִים , יַּרִים , יַּרִים , יַרִים , יִרִים , יַרִים , יִרִים , יִּיִים , יַּיִים , יַּיִים , יִּיִּים , יִּיִּים , יִּיים , יַּיִים , יִיִּים , יִיִּים , יִיִּים , יִיִּים , יִיִּיִּים , יִיִּים , יִיִּים , יִיִּיים , יִיִּיִּים , יִיִּיִּים , יִיִ

5. Those in b likewise suffer no change, e. g. אוֹצְרוֹת ; \parallel ; כּוֹכְבִים; היכלים; כּוּמזים and היכלים.

6. Those in c suffer no change, e. g. מְשְׁכְּנוֹת אָ מְשְׁכְּנוֹת מְשְׁכְּנוֹת מְשְׁכְּנוֹת ; מְשְׁכְּנוֹת אָפָרִים , אַפְּרִים , אָפְרִים , אָפְרִים , אַפְּרִים , אַפְּרִים , אַפְּרִים , אָפְרִים , אָפְרִים , אָבְּרִים , אָבְּרִים , אָבְּרִים , אָבְּרִים , אָבְּרִים , אַבְּרִים , אָבְּרִים , אָבְּרִים , אָבְּרִים , אָבְּרִים , אַבְּרִים , אַבְּרִים , אָבְּרִים , אַבְּרִים , אָבְּרִים , אַבְּרִים , אַבְּרִים , אָבְּרִים , אַבְּרִים , אַבְּרִיבְּיִים אַבְּרִים , אַבְּרִיבְּיִּבְּיִים , אַבְּרִיבְּיִּים , אַבְּרִים , אַבְּרִי

7. To nouns undergoing no vowel-change on the reception of the plural termination may be added the feminines in הָּי, except dissyllables whose first is a mixed syllable ending in a vowelless letter, e. g. best אָאָנידוֹת , בַּפּוּרוֹת , בָּפּוּרוֹת , בְּפּוּרוֹת , בְּפּוּרוֹת , בַּפּוּרוֹת , בַּפְּשׁוֹת , בַּפְּשׁוֹת , בַּפְשׁוֹת , בַּפְשׁוֹת , בַּפְשׁוֹת , בַּפְשׁוֹת , בַּבְּשׁוֹת , בַבְּשׁוֹת , בַּבְּשׁוֹת , בַּבְּשִׁתְּת , בַּבְּשֹׁת , בַּבְּשׁוֹת , בּבְּשׁוֹת , בּבְּשִׁתְּיִים , בּבְּעִּשׁוֹת , בּבְּבְּשׁוֹת , בּבְּבְּשׁוֹת , בּבְּבְּשׁוֹת , בּבְּבְּשׁוֹת , בּבְּבְּשֹׁת הַיִּיִים , בּבְּבְּשֹׁת הַיִּבְּיִים , בּבְּבְּשׁוֹת , בּבְּבְּשׁוֹת , בּבְּבְּעִיּיִים , בּבְּבְּשִׁתְּיִים , בּבְּבְּיִים , בּבְּבְיּתְיּיִים , בּבְּבְּבְּיִים , בּבְּבְּשׁוֹת , בּבְּבְּיִים , בּבְּיִים , בּבְּבְּיִים , בּבְּבְּיִים , בּבְּיִים , בּבְּבְּיִים , בּבְּיִים , בּבְּבְּיִים , בּבְּיִים , בּבְּבְּיִים , בּבְּיִים , בּבְּבְּיִים , בּבְּבְּיִים , בּבְּבְּיִים , בּבְּבְּיִים , בּבְּיִים , בּבְּבְּיִים , בּבְּיִים , בּבְּבְּיִים , בּבְּבְּיִ

[†] Except בָּנְרם , and also monosyllables with (ֵ) from roots אָ , which shorten (ֵ) into () on account of the following Daghesh forte, e. g. אָהָרם , pl. מָלָבוֹת (§ 101. 2. b.).

ל Except בְּחַ חַר, הַחְרָם, חַפַּ pl. שִׁרְם עַל by § 84. 3., and מַ pl. מָפִּרם פָּמָ pl. מָפָּרם חַפָּ pl. מָפָּרם חַבָּ pl. מָפָּרם חַבָּיך pl. מָפָּרָם חַבָּיך מָפָּרָם חַבּיך pl. מָפָּרָם חַבּיך מַפְּרָם מַ

[§] The two following shorten (ָ) into (ַ), and take Daghesh forte in the last radical, viz. בְּיִם נְּמִים (to distinguish it from רָמִים pl. סֹוֹים, וְמִיּם pl. בַּיִּם נִמָּים.

ון Except מוֹשָׁבִים pl. אוֹפָּן, מוֹשָׁבִים pl. אוֹפָּנִים.

א Except הַקְּמָשְׁמָן pl. מְשְׁמֶן סֵר מְּהְתַּקְים pl. מְלְמִילִים, הַבְּלְזֹת pl. הַיְּמָשְׁמָן מְלָנות הַוֹּבְחָם pl. הַוְּבַּלְות הַלְּוֹת מְלָנות הַיִּבְּעָ

Second Class.

- § 576. To the second class, comprising nouns which reject a vowel in forming the plural, belong those in d and e of the second class Singular Construct, and all those of the first division of the third class, including some of the exceptions in the note to b.
- 1. Those in d of the second class reject the first vowel, as in the singular construct (see § 570. 2.), e. g. מְלִיבִּים, בְּדוֹלִים, בְּדֹילִים, בָּדִילִים, בִּילִיבִים; עֵּצִּוּמִים: . נַּדִיבִים, בִּילִיבִים:
 - 2. Those in e reject the second vowel, as in the singular construct,
- e. g. אַלְיוֹנִים ; תָזְיוֹנוֹם ; שְׁגְיוֹנוֹם , זְכְרוֹנִים ; שְׁגְיוֹנוֹם ; בַּיְוֹנִים ; צַּוְרוֹנִים ;
- 3. Those of Class III. Div. I. reject the first vowel, e. g. בְּבָרִם דְּבָּרִם , זְּבָבִים , בְּבָבִים , זְבָּבִים ; as also those in the note to b, e. g. בְּבִרִים , גְּבֵלִית ; the plural of חֲמֵשׁׁים however is בְּמִפִּים.

Third Class.

- § 577. The third class comprises nouns which in forming the plural lengthen one vowel, and reject another, viz. those included in d of Class I. Div. I., termed Cegholates, and those in b of Class I. Div. II. whose first syllable ends in a vowelless letter.
- 1. Those of the Cegholates which have for their ultimate vowel either (ֶ) or (ַ), can retain it only so long as the last syllable remains mixed, which is always the case in the singular, both absolute and construct: but on the reception of one of the plural terminations סי הֹן, each of which gives a vowel to the last radical, the syllable containing the short vowel in question, now become the penult, must be made simple; and as the accent is necessarily given to the ultimate (§ 56. 1.), this can be accomplished only by lengthening its vowel, which in general is done by taking for the short (ֶ) or (_) the first long vowel (ͺ) (§ 102. 2. b.), at the same time rejecting the first vowel by § 103. 1., e. g. הַבֶּרִרם , זְרַבִּירם , מְבֶּרָרם , מְבָּרָרם , מְבָבְרִרם , מְבָּרָרם , מְבָרָרם , מְבָּרָרם , מְבָּרָרם , מְבָּרָרם , מִבְּרָרם , מִבְּרָרם , מְבָּרָרם , מְבָּרָרם , מְבָּרָרם , מְבָּרָרם , מִבְּרָרם , מִבְּרָרם , מְבָּרָרם , מְבָּרָרם , מְבָּרָרם , מִבְּרָרם , מִבְּרָרם , מְבָּרָרם , מְבָּרָרם , מְבָּרָרם , מִבְּרָרם , מִבְּרָרם , מִבְּרָרם , מְבְּרָרם , מִבְּרָרם , מִבְּרָרם , מִבְּרָרם , מִבְּרָרם , מִבְּרָרם , מְבְּרָרם , מִבְּרָרָם , מְבְּבָּרְרם , מְבְּרָרם , מִבְּרָרם , מִבְּרָרם , מִבְּרָרם , מִבְּרָרם , מִבְּרְרָם , מִבְּרָרם , מְבְּבְרָם , מְבְּרָרם , מְבְּבְרָם , מְבְּבְרָם , מְבְּבְרַם , מְבְּבְרַם , מְבְבָּרְרָם , מְבְבָּבְרָם , מְבְבְּבְרָם , מְבְבְּבְרָם , מְבְבָּבְרַם , מְבְבָּבְרָם , מִבְּבְּבְרָם , מְבְבְּבְרַם , מְבְבָּבְרַם , מְבְבְּבְרַם , מְבְבְּבְ

^{*} Except שַׁרָשׁים pl. פָּרָשִׁים.

[†] The plural of שׁבָי forms an exception: when alone, it retains its first vowel ō shortened into ŏ, thus בְּיִשִּׁים (kŏdāshīm); which, on the reception of the definite article or a preposition, is replaced by the compound Sh'wa (ָ), thus שׁבָשׁים Add also the following exceptions, שַּבְּיָשִׁים pl. שׁבִּילִים Add also the following exceptions, בַּקְּרָשִׁים pl. שַׁבְּיַבׁים מּבְּיִלִּים dissyllables, בַּלִּלֹם pl. בַּלְּלֵּח . בַּלְלֵּח . בַּלְלֹח . בַּיִלְּחָבִים . Shad also the בֹר לֹח מִצְּרָבׁים . בֹּרְלֹח . בַּיִּלְּחִים . בֹּרְלֹח . בַּיִלְּחָם . בֹּרְלֹח . בַּיִלְּחָם . בֹּרְלַח . בַּיִּלְחִים .

- 2. The feminine nouns in b of the second division of the first class take the same form in the plural, with the exception of the termination, as the preceding, e. g. מַּפְּחוֹת, שַּׂבְּלוֹת, הַעָּבְּוֹת.
- § 578. This division of the nouns according to their modes of forming the plural absolute, which are regulated entirely by the laws of euphony, will enable the learner to understand them as they appear in the paradigm, and to form for himself the plural of almost every noun in the language.

C. PLURAL CONSTRUCT.

- § 579. When a noun in the plural number is put in the state of construction (§ 565), it undergoes as in the singular some changes from the absolute form, the principal of which consists in rejecting the of the masculine termination בים, and changing its () into (), e. g. סרסים horses, סרְכֹּר פַרעֹה the horses of Pharaoh. This change appears to be effected as follows: the long mixed syllable and opposes or rather prevents that intimate connection of the two nouns which is the distinguishing feature of the construct state; and after the consequent rejection of b, the remaining b is changed into b, that it may not be confounded with the pronominal suffix of the first person singular (§ 123). The consonant of the feminine termination n; which is a soft lingual, seems not so strongly to oppose the required connection, and is therefore suffered to retain its place in the construct, e. g. minis lights, אורות השמים the lights of heaven. Besides the rejection of the consonant of the masculine termination, the plural number of each gender in forming the construct undergoes vowel-changes analogous to those of the singular, and from the same causes (see § 567). should be remarked, that the dual in construction assumes the same form as the plural. Plural nouns may then be divided, according to their manner of forming the construct, into the three following classes, viz.:
- 1. Those which deviate from the absolute form in the termination only.
 - 2. Those which reject the penultimate vowel.
 - 3. Those which in addition form a new syllable.

First Class.

§ 580. To the first class belong:

- a. Dissyllabic plurals whose penult is long and immutable, e. g. Masc. מְקוֹנֵי ; הֲמוֹנֵי ; הַמְלוֹנִי ; בּיבוֹי ; הַמוֹנֵי ; בְּיבוֹי ; מְקוֹמוֹת ; מִיבוֹת ; שׁירוֹת . שׁירוֹת .
- b. Dissyllables whose penult is short and mixed, e. g. Masc. נָבֵי, דָּכֵּר, דָּכֵּר, דָּכֵּר, דָּכֵּר, דָּכֵּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּבָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דָּכָּר, דְּכָּר, דְּבָּר, דְּכָּר, דְּכָּר, דְּכָּר, דְּכָּר, דְּכָּר, דְּכָּר, דְּכָּר, דְּכָּר, דְּכָּר, דְּבָּר, דְּבָּר, דְּבָּר, דְּבָּר, דְּבָר, דְּבָּר, דְבָּר, דְבְּרָר, דְבְּרָר, דְבָּר, דְבְּרָר, דְבָּר, דְבְּר, דְבְּרָר, דְבְּרָר, דְבְּרָר, דְבְּרָר, דְבְּרָר, דְבְּרָר, דְבָּר, דְבְּרָר, דְבְּר, דְבְּרָר, דְבָּרְרָר, דְבְּרָר, דְבְּרָר, דְב
- c. Trisyllables whose antepenult is short and mixed, and whose penult is long and immutable, e. g. Masc. מֵלְבּישֵׁר; נְבּוֹרֵר, מִזְמוֹרֵר, בִּפֹרוֹת, זכרוֹנוֹת Fem. מַלְבּירֶר, בְּבּוּרֵר, בִּכּוּרֵר,

VOL. I. 35

Second Class.

§ 581. To the second class belong:

- a. Dissyllables whose first syllable consists of a single consonant and a rejectible vowel, e. g. Masc. שָׁנֵר, הָבֶּר , הָנֵר , דְּמֵר , דְּנֵר , דְּמֵר , דְמֵר , דְמִיר , דְמֵר , דְמֵר , דְמֵר , דְמֵר , דְמִיר , דְמֵר , דְמִיר , דְמִיר , דְמִר , דְמִיר , דְמִיר , דְמִיר , דְמִיר , דְמִיר , דְמִיר , דְמִי , דְמִיר , דְמִיר
- b. Trisyllables whose antepenult is immutable whether long or short, and whose penult is mutable, e. g. Masc. בַּכְּבֵר , בִּיקְהְשֵׁי , בִּיֹכְבֵר , בִּיקְהְשֵׁי , בּיֹכְבֵר , בִּיקְהְשֵׁי , בּיִּכְלוֹת , אוֹצְרוֹת .

Third Class.

- § 582. To the third class belong the plurals of both genders whose penult is a simple syllable, consisting of two consonants and a mutable vowel. In forming the construct this latter is rejected, and to prevent the concurrence of two vowelless letters at the beginning of a word, the first consonant takes a short vowel (§ 103. 4.), e. g. בְּבְרֵית constr. בְּבְרֵית constr. בְּבְרֵית constr. בְּבְרֵית tr matters little which of the short vowels is taken to form this new syllable, and accordingly we find them all employed in turn; still the original vowel has some influence in deciding the one to be adopted, thus:
- a. Those whose first radical has e in the singular take either e or more commonly one of its modifications i or a (§ 103. 4.), e. g. Masc. בְּלֶלְים, בְּלֶלְים, בְּלֶלִים, בְּלֶלִים, בְּלֶלִים, בְּלֶלִים, בְּלֶלִים, בְּלֶלִים, בְּלֶלִים, בְּלֶלִית, בְּלֶלִית, בָּלֶלִית, בָּלֶלִית, בָּלֶלִית, בָּלֶלִית, בָּלֶלִית, בָּלֶלִית, בָּלֶלִית, בַּלֶלִית, בַּלֶלִית, בַּלֶּלִית, בַּלֶלִית, בַּלֶּלִית, בּלֵּלִית, בַּלֶּלִית, בּלֶלִית, בּלֶלִית, בּלֶלִית, בּלֶלִית, בּלֵלִית, בּלִלְית, בּלִּלִית, בּלִּלִית, בּלִּלִית, בּלִּלְית, בּלִּלִית, בּלִּלִית, בּלִּלְית, בּלִּלְית, בּלִּלְית, בּלִּלִית, בּלִּלְית, בּלִּלְית, בּלִּלִית, בּלִּלִית, בּלִּלִית, בְּלָּלִית, בְּלֵלְית, בְּלֵלְית, בְּלֵּלִית, בְּלֵּלִית, בְּלֵלְית, בְּלֵלְית, בְּלֵלְית, בּלִּלְית, בְּלִּלְית, בְּלָּלִית, בְּלָּלִית, בְּלָּלִית, בְּלָּלִית, בְּלָּלִית, בְּלָלִית, בְּלָּלִית, בְּלָּלִית, בְּלָּלִית, בְּלָּלִית, בְּלִּלִית, בְּלִּלִית, בְּלִּלִית, בְּלִּלִית, בְּלִּלִית, בּלִּלִית, בּלִּלִית, בּלִּלִית, בְּלִּלְית, בּלִּלְית, בְּלִּלְית, בְּלִּלְית, בּיִּלְּלִית, בְּלִּלְית, בּילִּלְית, בּילִּלְית, בּילִּלְית, בּילִּלְית, בְּלִּלְית, בּיבְּלְּלִית, בּילִּלְית, בּילִּלְית, בּילִּלְית, בְּילִּלְית, בְּילִּית, בְּילִּלְית, בּיבּילְית, בּיבּלְית, בּיבּלְית, בּיבּלְּלִית, בּיבְּלִית, בּיבּילָּת, בּיבּלְּלִית, בּיבּילָּת, בּיבּילָּת, בּיבּילָּת, בְּיבְּלְּית, בְּילִּלְית, בּיבְּלְּת, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִית, בְּילִית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִּית, בְּילִּית, בּילִּית, בּילִּית, בּיבְּית, בְּילִית, בּיבּיל, בּיבְּילְית, בּיבּיל, בּיבְּילְיתְית, בּיבְּילְית, ב
- b. Those whose first radical has o in the singular generally take o or its modification \tilde{u} (§ 101. 3.). e. g. אַבְּרִים, בַּקְרִים, בְּקַרִים, כְּמָצִיר, קְמָצִיר.
- § 583. The above are the leading rules for the formation of the plural construct from the absolute. In these there is nothing arbitrary, nothing for which a reason cannot be given; indeed they all depend on the application of a few simple principles, by mastering which the learner will be enabled at once and without difficulty to form the plural construct of almost every noun from the absolute.

^{*} We must except dissyllables from an ערׁרם (פֿרָם, שָּׁבִּרם, שָּׂבָּרם, root, e.g. עֶּרָרם; שָּׁבָּר root, e.g. שָׂרֵים, יָשָׂרִים, יָשָׂרִים.

CHAPTER X.

NOUNS WITH PRONOMINAL SUFFIXES.

§ 585. Here also, as in the verbs, it becomes requisite to make a distinction between those suffixes which are preceded by a vowel of union and those which are not, and also between the forms of nouns receiving them, whether terminating in a consonant or in a vowel.

§ 586. With regard to the first particular, we find that suffixes consisting of or commencing with a vowel, as those of the first pers. sing. ¬, and of the third pers. sing. masc. ¬ and fem. ¬, are joined immediately to nouns without an assistant vowel. To these must be added the suffix of the sec. pers. masc. sing. ¬, which receives the accent when the noun does not end in a vowel (§ 58. 3.), and those of the second pers. plur. masc. ¬¬ and fem. ¬¬, which are always accompanied by the accent (§ 58. 1.); in these cases the tone is thrown too forcibly on the suffix, to suffer it to be preceded by another vowel. Of the remaining suffixes those of the sec. pers. fem. sing. ¬¬ and the first pers. plur. ¬¬ are preceded by the connecting vowel (¬), and those of the third pers. plur. masc. ¬¬ and fem. ¬¬ by (¬).

§ 587. As to the forms of nouns, a distinction must be made between those of the singular and those of the plural. The reason of which is, that nouns receiving suffixes are always to be regarded as in the construct state, in which they really are, the expression my house being equivalent to the house of me.

1. Singular nouns of each gender when taking a pronominal suffix end generally as in the construct in a consonant, e. g. m. סקס horse constr. סקס, f. הסקס mare constr. הסקס. To these therefore the asyllabic suffixes are added by means of a connecting vowel, thus m. סקס, f. קסקס.

2. a. Masculine plural nouns, which in the construct constantly end in - (§ 579), receive every suffix without a vowel of union, whose place is supplied by the termination itself, thus סרְסִינְהַ , סַרְּסִינָהַ , סַרְּסִינָהַ , סַרְּסִינָהַ , סַרְּסִינָהַ . The conjunction of the masc. plur. termination -(e) and the affixed pronoun of the first pers. masc. sing. - (i) produces the diphthong ז- (ai),* e, g. סרסר my horses. The same change of termination takes place on the reception of the suffix of the sec. pers. fem. sing. 7: this added to the plural construct would form the ending קים (thus קים (thus קים), to distinguish which in pronunciation from the singular 3- (thus סרסה), the final ל takes its corresponding vowel (), thus מרסה; and to make the distinction more obvious, () is changed as in the first person into (), thus 3700. Again, on the addition of the suffix of the third pers. masc. sing. 7, which as a consonant would be expressed by the vowel termination of the plural construct >-, the intervening >, in order to become distinctly audible, takes, as before the suffix 7, its homogeneous vowel (), thus סהסרך, which then becoming changed into -, thus סרסרך, thus רדך, thus היה sūsáv. Before the suffixes of the sec. pers. masc. sing. 7 and third pers. fem. sing. 7, the terminating - of the noun is for distinction's sake shortened into -, thus סוסיה, סוסיה. Before all the plural suffixes the terminating - remains unchanged, thus כרסינה, סרסינה .

b. To the feminine plural the suffixes are added in a different manner; for since the consonantal termination mi of the absolute is retained in the construct (§ 579), it is always necessary to insert a connecting vowel, in order to prevent the occurrence of a long mixed syllable in the middle of a word (§ 185). For this purpose are employed the same vowels as those which precede the suffixes to the masculine; so that, while the appearance is in both cases precisely similar, what in the latter constitute the termination of the construct or its contraction, are in the former mere vowels of union.

§ 588. The following table, showing the forms assumed by the suffixes when added to nouns of both genders, will prevent the necessity for further explanation.

^{*} In the construct of certain nouns we have an instance of the opposite change of ai into e, thus הום constr. הום constr. אָרָהָ , &c. (§ 569. d. note.).

Table of Pronominal Suffixes of Nouns.

§ 589. The changes produced in the forms of nouns by the addition of the pronominal suffixes, are similar as regards the rejection of vowels to those which take place in forming the plural number: that is, nouns which do not contain a mutable vowel suffer no internal change, e. g. סְּכִים plur. סְּכִים, suff. סְרָכִים; while those which have a rejectible one take Sh'wa in its stead, e. g. אַדְרָכָּר, plur. אַדְרָכִּר אַרָּכִים.

§ 590. There remains, however, a distinction to be noted, as respects the lengthening or shortening of original vowels, between those suffixes which are immediately connected with the noun, and those which consist of a vowel, or are added by means of one.

1. The suffixes of the second and third pers. plur. בֶּל, בֶּבֶּר, בֶּבֶּר, אָבֶּר, בְּבֶּר, which invariably receive the accent (§ 58.1.), whence they are termed grave, are not preceded by a vowel of union (see above, § 586). Hence nouns to which they are added retain in both numbers the form of the construct state (§ 587), e. g. קבָר, constr. sing. קבַר, suff. בְּבֶרְבֶּם , דְּבַרְבֶּר ; constr. pl. קּבְרֵרֶם, suff. קּבְרֵרֶם.

- 2. The remaining suffixes, which in contradistinction to the above are called light, are always preceded by a simple syllable formed by means either of their own vowel or of the vowel of union. And hence nouns receiving them take in both numbers the form of the plural absolute (§ 574), e. g. קבָר, plur. הְבָרָר , suff. קבָר, The suffix of the sec. pers. masc. sing. ק likewise, although added to singular nouns without a vowel of union, and taking the accent, does not cause the ultimate vowel of the noun to be shortened; since the accent in this case is not so forcibly drawn towards the end of the word, as when the latter receives one of the grave suffixes, or is in construction with another noun. To avoid the formation of a long mixed syllable in the middle of a word, the ultimate vowel, if (,), takes Methegh (§ 63. 2.), thus קקבן d'bhār'chá.
- § 591. 1. Nouns ending in the mutable vowel (_) shorten it into (_) on receiving a syllabic suffix, e. g. בָּבָּד, אַרְבַב ; בַּבְּד, אַרְבַב ; בַּבָּר, בַּבָּך , בַּבְּר, בַּבָּר , בַּרָּב , אַרְבב ; בָּבִיר , בַּרָּר , אַרְרב . אַרִּרב , אַרְרב .
- 2. a. Cegholate nouns in the singular on receiving a suffix, reject the second vowel (§ 103. 2. a.), and either retain the first, e. g. נֶגָדְיּ ; מֶבְרָר, הָבֶּל ; בֶּבְרָר, הָבֶל ; בֶּבְרָר, הָבֶל ; בְּבְרָר, הָבֶל ; הָבֶל ; הָבֶל ; הָבְלָר ; הָבֶל ; הָבְלִר ; הָבֶל ; הָבְלִר ; הָבָּר ; הָבָל , הָבֶּר ; הַלְלְר ; הַבְּל , הַבְּר ; הַבְּל , הַבְּר ; הַבְּר , הַבֶּר ; הַבְּר , הַבָּר ; הַבְּר , הַבֶּר ; הַבְּר , הַבֶּר ; הַבְּר , הַבֶּר ; הַבְּר , הַבֶּר , הַבֶּר ; הַבְּר הַבְּר , הַבְּר הַבְּר , הַבְּר הַבְּר הַבְּר , הַבְּר הַבְּר , הַבְּר הַבְּר , הַבְּר הַבְּר , הַבְּר הְבְּבְר הַבְּר הָבְיב הְבְּר הְבְּר הַבְּר הַבְּר הְבְּר הַבְּר הְבְּר הְבְּר הַבְּר הְבְּבְר הַבְּבְר הַבְּבְּר הְבְּבְר הְבְּבְר הְבְּבְר הַבְּבְי הְבְּבְר הַבְּבְר הְבְּבְר הַבְּבְּר הְבְּבְר הְבְּבְר הְבְּבְר הְבְּבְר הְבְּבְר הְבְּבְר הְבְּבְר הְבְּבְר הְבְּבְּר הְבְּבְר הְבְּבְר הַבְּבְר הְבְּבְר הַבְּבְר הְבְּבְר הְבְּבְר הַבְּבְר הַבְּבְר הַבְּבְר הַבְּבְר הַבְּבְר הַבְּבְר הְבְּבְר הְבְבְּבְר הְבְבְר הְבְבְיּב הְבְבְּבְר הְבְבְּבְר הְבְבְּבְר הְבְבְבְר הְבְבְר הְבְבְר הְבְבְיב הְבְבְר הְבְבְּבְר הְבְבְר הְבְבְּבְּבְּבְּבְיבְר הְבְבְּבְר הְבְבְּב הְבְבְּבְּבְּבְּבְר הְבְבְּבְיבְבְּבְר הְבְבְר הְבְבְר הְבְבְּבְבְר הְבְבְבְּבְר הְבְבְּבְר הְבְבְּבְר הְבְבְבְּבְר הְבְבְבּר הְבְבְבְר הְבְבּב הְבְבְבְבְיב הְבְבּב הְבְבּב הְבְבּב הְבְבּב הְבְבּב הְבְבּב הְבְבּבּב הּבְבּב הּבְבּבּב הּבְבּב הּבְב

b. In the plural, the light suffixes are added to the absolute form,
 e. g. מַלְבֵּרָ, מְלְבֵּרָ, and the grave to the construct, e. g. מַלְבֵּרָ,

. קבריכם

3. Nouns ending in ¬- reject the final ¬ on receiving a pronominal

suffix (see § 489), e. g. מָקְנֵיה ,מְקְנֵיה ,מְקְנֵיה ,מְקְנֵיה ,מְקְנֵיה .

§ 592. In addition to the preceding paradigm, which exhibits the suffixes alone, we here present one showing the mode of their connection with nouns of both genders and numbers. For this purpose we have selected the nouns of horse, not mare, which suffer no internal change.

REMARKS ON THE SUFFIXES OF NOUNS.

Singular Nouns.

- \$ 593. The suffix of the sec. pers. masc. sing. אוֹ is commonly added without a vowel of union, thus אַבְרֶבְּ (§ 590. 2.); but when the word is in pause, the accent is placed immediately before the suffix, which has the effect of changing the preceding (ְ) into (ֶ) (§ 107. 3.), e. g. אַבְּרָבְּהָ, אָבְּרָבְּיָר. In a few instances this suffix receives אַרְבָּרָה e. g. בְּבְּרָבְּה Ps. 13:16., בְּבָּרְבָּר בָּבָּר בָּבָּר, viz. מֵלְאָבֶרְה Ps. 139:5.; and once fem. מַלְאָבֶרְה Ps. מַלְאָבֶרְה A appears inserted between the noun and suffix, viz. אַבְּרָבְּרָה Ps. 9:15.
- \$ 594. 1. The suffix of the third pers. masc. sing. is sometimes written ה' instead of ', e. g. בְּעִרה Ex. 22: 24., המנה v. 26., בַּעָרה 32: 17.; these the K'ri corrects, but not the following, viz. אָבָה בֹּוֹי Jer. 2:21. Ezek. 11: 15. 20: 40., המנה Deut. 34: 7., שׁרַרה Ps. 42: 9.
- 2. The Mappik of the suffix of the third pers. fem. sing. is occasionally omitted, and Raphe placed above הוויס (§ 45), e. g. אַטְּרָה Lev. 13: 4., הַּבְּשֶׁרָה Num. 15: 28., עֲרָה v. 31., הַרְשֶּאָה Prov. 21: 22. Once אַ is found instead of הַ, viz. אַבָּב Ezek. 35: 5.

§ 595. The suffix of the first pers. plur. is preceded in a few instances by (ָ) as a vowel of union, e. g. מִרבְּעָהָנוּ Ruth 3: 2., קרְמָנוּ Job 22: 20.

לָּבָרָיָה The suffixes of the sec. and third pers. fem. plur. sometimes take ה paragogic, e. g. בְּבָרָהְ Ezek. 23:48, 49.; בְּבָרָה Gen. 21:29. מְלַבָּה (41:21. בְּבָרָה (42:36.

§ 597. A few nouns which form the construct by the addition of the vowel >-, thus >\(\), receive all the suffixes without a vowel of union, whose place this termination supplies (§§ 474, 587. 2.) The mode in which this is effected is shown in the succeeding article on Anomalous Nouns.

Plural Nouns.

\$598. The suffix of the first pers. sing. added to plural nouns sometimes assumes the fuller form יָר, e. g. מְדְתְּבָּר 2 Sam. 22:40. for מֵדְתָּר ; and once appears as בּ alone, viz. מֵדְתִר Ps. 132:12. for עדתר.

- קניָּר, בְּשְׁבְּטִרן Is. 49: 13. for עֲנִיּרן. The feminine suffix of the third person sometimes takes א paragogic instead of ה, e. g. אַהִיכֶיהָא Ezek. 41: 15.
- § 601. The suffix of the sec. pers. masc. plur. בֶּ is once in some editions preceded by יְּ, viz. הְמִבְּעוֹתְיכֶם Jer. 25: 34. for הְמְבִּעוֹתִיכֶם; and occasionally י is omitted, e. g. הַמְלֵנֶכָם Deut. 3: 19. for בִּקְתַּרֶכָּם The feminine בְּקְתוֹתְיכֶנָה is found with ה paragogic, e. g. בְּסְתוֹתֵיכֶנָה Ezek. 13: 20.
- \$ \\$ 602. 1. The suffixes of the third pers. plur. likewise take הממספונ, e. g. masc. צֵלְהַבְּשׁ Ezek. 40:16., fem. בְּלְּהַנְהָי אוֹנְהְי בּוֹנְהְי בּבְּי בּבְּי בּבְּי בּבְּי בּבְּי בּבְּי בּבְי בּבְּי בּבְי בּבּי בּבּי בּבּי בּבְי בּבְי בּבּי בּבְי בּבְי בּבְי בּבְי בּבּי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְּבְי בּבְי בּבְיים בּבּבּי בּבְי בּבּבּי בּבְי בּבְי בּבְי בּבְי בּבְיי בּבּי בּבְיי בּבּי בּבְי בּבְי בּבְי בּבְיים בּבּבּי בּבּי בּבְי בּבְיי בּבּי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְי בּבְּבְי בּבְי בּבְּבְי בּבְיבְי בּבְי בּבְּבְי בּבְי בּבְיבְי בּבְי בּבְבְי בּבְיבְי בּבְיבְיים בּבּבּי בּבְבְיים בּבּבּי בּבְבּי בּבְבּי בּבְבּי בּבְבּי בּבְבּי בּבְּבַי בּבְּבְי בּבְיבּי בּבְּבַי בּבְיבּי בּבְיבּי בּבּבּי בּבְבּי בּבְיבּי בּבּבּי בּבְיבּי בּבּבּי בּבּבּי בּבְבּי בּבְיבּי בּבּבּי בּבְיבּי בּבּבּי בּבּבּי בּבּבּי בּבְבּי בּבְיבּי בּבּבּבּי בּבּבּבּב בּבּבּב בּבּב בּבּב בּבּב בּבּבּב בּבּב בּבּב בּבּב בּבּב בּבּב בּבּב בּבּב בּבּב בּבּ
- 2. The suffix of the third pers. masc. plur. is sometimes added to fem. plurals in the form proper for singular nouns (see §§ 597, 598), e. g. מְבְלֹחֶבּם Ex. 1:11. for סְבְלֹחֵבּם, so אַרֹחוֹיִם Ps. 74:4. Job 21:19., מוֹנְחָם Is. 53:11.
- § 603. Nouns in the dual number receive the suffixes in precisely the same manner as in the plural.

ANOMALOUS NOUNS.

- § 604. A few Hebrew nouns present certain peculiarities of inflection which are not accounted for by the general rules already given. These, being of very common occurrence, deserve a particular notice; they are as follows:
- אָב father forms the singular construct by adding יַּר, which on the reception of the suffixes serves as a vowel of union, e. g. constr. אָבִרנּה אָבִרנּה אָבִרנָה אָבִרנָה אָבִרנָה אָבִרנָה אָבִרנָה אָבִרנָה אָבִרנָה אָבִרנָה אָבִרנָה אָבוֹתְם אָבּוֹתְם אָבּוֹתְם אָבּוֹתְם (§ 556), אָבוֹתָם בּנוֹת בּג נוּת בּג בּג נוּת בּג
- אָת brother, like אָב, thus constr. אֲהָר, ; suff. אֲהִרּר, אָהִרּר, אָהָר, אֲהַרּכֶּם, אֲהַרּכָּם, אָבָּחִרּר, אָבָּרָר, אֲבָּרָר, יַאֲהָר, ; suff. אֲהַרּרָה, אֲהַרּכָּם, אֲהַרּכָּם, אָבָּרִרָהם, אַהַריבָם, אַהַריבָם, אַהַריבָם, אַהַריבָם, אַהַריבַם, אַהַריבָם, אַהַרבָם, אַהַריבָם, אַהַריבָם, אַהַריבָם, אַהַריבָם, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַבּיב, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַהַרבּיב, אַבּיבּיב, אַבּיב, אַבּיבּיב, אַבּיבּיב, אַבְיבּיב, אַבּיבּיב, אַבּיבּיב, אַבְּיבּיב, אַבּיבּיב, אַבּיבּיב, אַבְיבּיב, אַבְיבּיב, אַבְיבּיב, אַבְיבָּב, אַבְיבּיב, אַבְיבּיב, אַבְיבּיב, אַבְיבּיב, אַבְיבָּב, אַבְיבּיב, אַבְיבּיב, אַבְיבּיב, אַבְיבּיב, אַבְיבּיב, אַבָּבּיב, אַבְיבּיב, אַבְיבּיב, אַבְיבּב, אַבְיבּב, אַבְיבּב, אַבְיבּב, אַבְיבָּב, אַבְיבּב, אַבְיבּב, אַבְיבּב, אַבְיבּב, אַבְיבּיב, אַבְיבּב, אַבְיבּב, אַבְיבּב, אַבְיבּב, אַבְיבּב, אַבְיבָּב, אַבְיבָּב, אַבְיבָּב, אַבְיבָּב, אַבְיבָּב, אַבְיבָּב, אַבְיבָּ
- sister, formed by affixing the fem. term. ה by means of the vowel i to the preceding. This form it retains in the singular,

e. g. אָחוֹתְהּ, אֲחוֹתְהּ: but in the plural it takes י before הוֹ, פ. g. אַחִיוֹתָי ; suff. אַחִיוֹתָין, אַחִיוֹתָי, as though from אַרִּי, אַחִיוֹתִי ; suff. אַחִיוֹתָי , as though from אַרִּי, אַרִּין , אַחִיוֹתִי , אַרִּין אַרִּין אַרִּין , אַרִּין אָרִין אָרָין אָרִין אָרָין אָרִין אָרָין אָרָּין אָרָין אָרָין אָרָין אָרָין אָרָין אָרָין אָרָין אָרָין אָרָּין אָרָּין אָרָּין אָרָּין אָרָין אָרָין אָרָין אָרָין אָרָין אָרָין אָרָין אָרָין אָרָּין אָרָין אָרָּין אָרְייִין אָרָין אָין אָרְייִין אָרְייִין אָרָין אָרְייִין אָרָין אָרְייִין אָרָין אָרְייִין אָרְייִין אָרְייִין אָרִין אָרָין אָרְייִין אָרָין אָרְייִין אָרָין אָרְייִין אָרְייִין אָרְייִין אָרָין אָרְייִין אָרִיין אָרָין אָרָין אָרָין אָרְייִין אָרְייִין אָרָין אָרָין אָריין אָרָין אָ

מיש man generally forms its plural from the obsolete singular איש man generally forms its plural from the obsolete singular thus אַנשׁרם, constr. אַנשׁר ; the regular plural אַנשׁרם is seldom used, and then conveys the accessory idea of eminence, distinction (see Ps. 141:5. Prov. 8:4.). The 7 of the later singular אָרשׁ must not be considered as supplying the place of 2, to which it bears no kind of affinity, and with which it is never commuted: on the contrary the 2 of שנא for אוא is rejected, like that of the infinitive הוה (§ 77. 2.); and since the following final cannot receive Daghesh, the vowel () as a compensation is lengthened into (יר). Comp. קמוש – סיפניה – סיפניה בקמוש – קימוש . In the feminine form, after the addition of the characteristic termination 77, Daghesh can be and accordingly is employed, thus אשׁה; the construct of this latter however adopts the mode of compensation followed by the masculine, viz. that of lengthening the vowel () into () (§ 102. 1. c.), thus nux.

אם mother; suff. אמר אמר : plur. אמיה: plur. אמיה.

maid-servant. This constitutes an exception to the generality of feminine nouns, in preserving the characteristic ה of the singular on the addition of the plural termination הוֹ (see § 554. note.), thus אַמָהוֹר, constr. אַמָהוֹר.

אָשָּׁהְ woman for אָלְּיָהְ ; in the construct ז is compensated by lengthening () into (), thus הְשָׁהְ ; suff. אָשָׁהְאָּ or הְשִׁהְ : אֲשָׁהְ or הְשִׁהְ ; suff. אָשָׁהְ or הְשִׁהְ : plur. בְּשִׁהְ , formed by rejecting the א of the masc. plur. בּשִּׁהְם. The form אָשָׁה appears as an absolute in Deut. 21:11. 1 Sam. 28:7. Ps. 58:9.; the two first instances however may be considered as in the construct state. The regular plural אָשִׁה appears only in Ezek. 23:44.

אפתרם house בְּתְּרֶם (like מֵּלֶשׁ בּאָרֹשׁ); p'ur. בְּתָּרֶם (böttím) for בָּתָה , constr. בְּתָּרִם; this form is taken also on receiving the suffixes, e. g. בְּתֵּרֶם, בְּתֵּרֶם, &c., Methegh being placed on the first syllable by § 25. 2.

son; constr. בָּן, also בָּן Deut. 25: 2. 31: 23. Prov. 30: 1. Jon. 4: 10.; suff. בְּלֵּךְ, בְּלֵּךְ, בְּלֵּךְ ; constr. בְּלֵּרְ ; suff. בְּלֵּרְ ; constr. בְּלֵּרְ ; suff. בְּלֵרְ ; the construct form בְּלֵרְ, which occurs Gen. 49: 11., the final בְּרַ may be considered as paragogic, as in the words בְּלֵּרְתִּר Is. 1: 21., בַּבְּרָר Lam. 1: 1., or as the termi-

nation of the plural construct for ב: another form בָּנוֹ appears Num. 24:3, 15., in which is paragogic, as in Gen. 1:24.

בּת daughter = בְּנְתְּל = בַּנְתְּל = הַנְתְּל ; suff. בְּתְּל for בְּתְּל, בְּתְּל ; plur. בָּנוֹת ; constr. בְּנוֹת .

נְיא valley; constr. בֵּיא: plur. נֵיאָנית 2 Kings 2:16.; suff. בָּיאוֹתְיךָה Ezek. 35:8.

קְּם father-in-law; יְּיִהְיהָ inserted before the suffix, as in אָבִּרְּהָּ, אָבִרְּהָּ, אָבִרְּהָּ, הָּבִּירְּ, הְּבִּירְּ, הְבִּירְהָּ, וּהְבִירְהָּ, From this is formed the feminine הְמַרִּה mother-in-law, in the same manner as אַדוֹרָת, which see.

יוֹם day: dual יְבֵיק: plur. יְבִים for יְבִיק like the Chald. יְבִיק Dan. 12: 13., poet. יְבִיק Deut. 32: 7. Ps. 90: 15.; constr. יְבֵיר; suff. יְבֵיר.

כָּלִים utensil: plur. בֶּלִים; suff. בֶּלִי, בֶּלִים, בַּלִים.

בּירִם water; constr. מֵר, and reduplicated בֵּרְמֵּר Ex. 4:9. 7:19. 8:2. 2 Kings 5:12.; suff. בַּרבֵּיך , בַּרבֵיך.

קְּנְהְ portion for מְנְהָת : plur. מְנְהֹרָת Neh. 12:47. 13:10., also מֵנֹהָתָה 12:44.; suff. מְנֹהָרָה, הָמֵנֹהָרָה Esth. 2:9.

שָּה mouth; constr. שָּׁר; suff. שָּׁר for קְּבֶּר, פִּרְהָ, פִּרה, פִּרה, פִּרה, פִּרה, קּבְּר, Job 18:2.

ראשׁיר head: plur. ראשׁיר ; suff. ראשׁיר Is. 15: 2.

הַישׁ thorn; suff. ישׁרהי Is. 10: 17.

שׁמִר name; suff. שִׁמְדֹּר : plur. שִׁמִּבוֹן; constr. שִׁמִלוֹן; suff. שִׁמִר יִּשְׁמִר יִּשְׁמִר יִּיִּים מִיּבוֹן

CHAPTER XI.

ADJECTIVES.

- § 605. The Adjective (שֵׁם הַהֹּשֵׁר), or word joined to a noun for the purpose of qualifying its meaning, can hardly be considered as an independent part of speech in Hebrew; since in this language it is merely a noun placed in apposition with the word to which it refers. Its derivation and inflection, therefore, do not require a detailed separate treatment.
- § 606. 1. As regards their derivation, Hebrew adjectives are nouns formed from neuter verbs, and consequently express a state of being, that is, some property or quality, e. g. pp wise from pp to be wise, pp small from pp to be small.
- § 607. Besides the attributives properly so called, of which there are not many in Hebrew, we frequently find abstract nouns employed as attributives in construction with the nouns whose signification they restrict, e. g. מֵב שֶׁבֶר mountain of holiness, i. e. holy mountain, שֵב שֶׁבֶר witness of falsehood, i. e. false witness.

CHAPTER XII.

NUMERALS.

§ 609. The Hebrew Numerals (שְׁמֵלֵּה הַמְּסֶבֶּר) are for the most part to be regarded as attributives denoting quantity. They are divided into two principal classes, cardinals and ordinals.

CARDINAL NUMBERS.

§ 610. The Cardinals (מֵּסְפֵּר יְסוֹרְה) from one to ten inclusive present both a masculine and a feminine form, each of which undergoes changes in the construct similar to those of other nouns. They are as follows:

	LINE.	MASCU	NINE.	FEMININE.	
	Absol.	Constr.	Absol.	Constr.	
One.	אֶתָר	אַתַד	אַחַת	מַתמ	
Two.	שָׁבַּרָ ם	יָ ט בֵּר	שְׁמַּיִם	שָׁמֵר	
Three.	<u>ښٔ</u> לשָׁה	מַלֹשֶׁת	שׁלשׁ	שׁלשׁ	
Four.	אַרָבָּעָה	אַרִבָּעַת	אַרְבַּע	אַרבַע	
Five.	ترخشك	ַדְּמַשֶּׁת	חָמֵשׁ	בוביש הביש	
Six.	بقش	מַ שָׁ שָׁ	ਲੇ ਲ ੇ	שׁשׁ	
Seven.	שׁבִעֶּה	שָׁבְעֵּת	שָׁבַע	שָבֵע	
Eight.	שמנה	שׁ מֹנֵת	שׁ מֹנֶה	שׁמֹנֶה	
Nine.	הִשָּׁעָה	עה הוא הי	שַׁשַּׁע	אָשַׁיבּ	
Ten.	אַשָּׂרָה	ؠٟٞڜ۬ڕ۩	ڮٞڛٚ٦	בָּׁשֶּׂר	

- § 611. In nearly all of these numerals some peculiarity of construction appears; but that which prevails to the greatest extent, and which is apt to strike us as the most singular, is that from three to ten inclusive, those with feminine terminations are joined to masculine nouns, and those with masculine terminations to feminine nouns, thus שֵׁלשֵׁ three men, שֵׁלשׁ three women.
- § 612. This mode of construction, which is peculiar to the Shemitish languages (it being found also in the Aramaic and Arabic), has occa-

sioned much perplexity to grammarians. The following attempt at its elucidation may therefore not be unacceptable. As the learned Schultens long ago observed (Institutiones, p. 217), the Hebrew numerals are in reality abstract nouns, and as such are of the feminine gender by signification, whether bearing the characteristic termination or not. Accordingly, when employed in connection with masculine nouns, they take the feminine termination n-, which shows that they are in effect independent feminine nouns; thus שׁלשה בנים a triad of sons, i. e. three sons. The same form would be retained by these numerals before feminine nouns; but as they are then pointed out by means of the nouns with which they are connected as of the feminine gender, the characteristic termination becomes superfluous, and is dropped for the purpose of making a distinction between the genders as well in the numerals as in the nouns themselves, thus שלש בנות a triad of daughters, i. e. three daughters. The word לשור ten, which is added to the units to form the numbers from eleven to nineteen, is put in the masculine before masculine nouns, the units preceding it from three onwards being already feminine; and in the feminine before fem. nouns, the units being already masculine, e. g. המשה עשר בנים, חמש עשרה בנות.

Remarks on the Cardinals.

\$ 613. For אָּדֶּדְ we find אַדָּדְ Gen. 48: 22. Is. 27: 12. Ezek. 33: 30. Zech. 11: 7.; constr. אַדָּדְ . Sometimes אַ is rejected, thus דַּדַ Ezek. 33: 30.; and once in the K'thibh we have the form אָדָּדְ Ezek. 18: 10. (comp. Sanscr. eka, Pehlv. yek). Fem. אַדָּדָרָ for לָּלֶדָרָת , as לַלֶּדָרָת 15 (\$ 77. 1: b.); in pause אַדָּדְרָּם Gen. 11: 1. Plur. masc. אַדִּדְרַם Gen. 11: 1. 27: 44. 29: 20.

\$ 614. שְׁבֵּרִים, fem. שְׁבֵּרִים 1. The Daghesh in the ה of the feminine is usually considered to have arisen from the rejection of the of the original form שִּבְּרִים or שִּׁבְּרִים (§ 77. 2.). Some, however, maintain that the original was שִּבְּרִים ; but to this they are led by the word בַּיִּבְיבִּים Judg. 16: 28., in which ה appears without Daghesh after Sh'wa mobile, while it receives one after Sh'wa quiescent, thus בִּיִּבְיבִּ Jon. 4:11. Neither of these explanations is perfectly satisfactory; for an anomaly still remains in the reception of Daghesh by an aspirate after Sh'wa mobile. Our own opinion on the subject is, that although a has been rejected from the original form, the Daghesh in a, which as it occurs after Sh'wa must necessarily be Daghesh lene (§ 37), like

every other of its kind is purely euphonic, i. e. is employed solely for the purpose of removing the original aspiration of the letter in which it is inscribed (§ 36). The necessity of this arises from the difficulty experienced in uttering an aspirate in in conjunction with a sibilant (§ 74. 2.), in consequence of which recourse is had to the expedient of depriving the lingual of its aspiration, although by the general rules for the insertion of Daghesh lene this would not be required. principle of euphony sometimes gives rise to the insertion of Daghesh lene, contrary to general usage, in the first of two concurrent aspirates at the beginning of a word, when preceded by a word terminating in a vowel and with a conjunctive accent (§ 39.4.). 2. When connected immediately with a noun, the masculine construct rejects the of the absolute, e. g. שׁבֵר נְרָרֶם Gen. 25: 23.; but when followed by another numeral, this letter may be retained, e. g. שׁנֶרֶם עָשֵׂר Gen. 17: 20. Num. 7:84. The same is the case with the feminine, e. g. שַׁמֵּל נַשִּׁרם Gen. 4: 19., שׁמֵּים עָשִׂרָה Num. 7: 84.

אָל 15. In the numerals from three to ten the feminine termination היי is hardened in the construct into ה (§ 572). The construct שְׁלְשֵׁר is found also with feminine nouns, e. g. לְשֵׁלשֶׁת Gen. 7:13., לְשֵׁלשֶׁת Job 1:4.; with suffixes שִׁלְשֶׁת, הַשְּׁלשֶׁת Num. 12:4. For שׁבְעָה שׁבעה שׁבעה Job 42:13.

§ 616. The numerals שֵׁבְעָה and שִׁבְעָה take the dual form when denoting reduplication, e. g. שֵׁרְבַּעְתִּים fourfold 2 Sam. 12: 6., שֵׁבְעָתִים sevenfold Gen. 4:24.

§ 617. The cardinal numbers from eleven to nineteen are formed by placing after the respective units the number שָׁשֶׂר before masculine and עַשְׂרָה before feminine nouns. Thus,

FEM	INI	NE.	MAS	CU	LINE.	
עָשְׂרֵה	{	אַחַת אַחָת	 יָשָׂר	{	אַחַד אַחָד	Eleven.
עָשְׂרֵה	{	שָׁתֵּים שָׁתֵּים	בָּשָׂיר	{	יְּשׁוּבֵּרם יְשׁוּבֵר	Twelve.
עָשָׂוֹרֵה		שׁלשׁ	עָשָׂר		שָׁלשָׁה	Thirteen.
עֶשׁוֹרֵה		אַרבַע	עָשָׂר		אַרְבָּעָה	Fourteen.
עֶשְׂיבֵה		המש	עָשָׂר		تاخشا	Fifteen.
ֶּעֶשְׁרֵ ה		viv	עָשָׂר		بنش	Sixteen.
	& c			&	c.	

§ 618. The tens are formed from the units by affixing the plural termination בָּשִׂרִים; except בֶּשִׂרִים twenty, which is the plural of בָּשִׂר ten. Thus,

דשִּׁשִׁרם Sixty. בְּשְׂרִים Twenty. בְּשְׂרִים Seventy. שִׁבְּעִים Thirty. בּאַרָּטִּים Eighty. בּאַרְבָּעִים Forty. הַאָשִים Fifty.

- § 619. When compounded with units, these latter are placed either before or after the tens, the last word receiving כ conjunctive, thus twenty-one. The form remains the same whether connected with masculine or with feminine nouns.
- \$ 620. The word מֵאָה hundred is feminine; constr. מְאַה, dual מְאַה, plur. מְאַה, Once in the K'thibh ה is changed into ה, viz. אַהְהָיה 2 Kings 11:4, 9. The hundreds are numbered by placing before the word מְאוֹת the numerals proper to feminine nouns, thus הַבְּשׁ מָאוֹת, הַשְׁלֹשׁ מָאוֹת.
- אָלְפִּים אָלְפִּים. The units by which it is numbered are those of masculine nouns, thus יְצִּלְפִּים ,שְּלְפִּים ,אֲלָפִים ,אֲלָפִים ,אַלְפִּים ,אַלְפִים אַלְפִּים ,אַלְפִּים אַלְפִּים ,אַלְפִים אַלְפִּים and בּאַלְפִים וּאַלְפִים the words אַלְפִים are placed in the state of construction; which is the effect of the close connection existing between the different parts of compound numerical expressions. The last term (viz. אַלְפִים or בַּאַלִּים) may be put, like the units, either in the absolute or construct state.
- לָבֶּבֶה, Deut. 32: 30., is feminine; dual רְבִּרְחָים, plur. רְבִּאוֹת. In expressing compound numbers we may either begin with the units, and proceed to the numbers of larger denominations, in the order of their magnitude, e. g. הַאָּתִּה שָׁנָה לְּמָאַת שָׁנָה Gen. 5: 18.; or a different arrangement may be adopted, e. g. רְשִׁבְּיִם וְשֵׁשִׁ מֵאוֹת וְאֵלְבִּים שָּׁבֶּל הַשְּבֶּעִם שָּׁבֶּל הְשִׁבְעִם בְּשִׁבְּעִם בְּשִׁבְּעִם שָּׁבֶּל הַשְּׁבָּעִם הַשְּׁבָּעִם הַשְּׁבָּעִם הְשִּׁבְּעִם הְשָּׁבְּעִם וְשִּׁבְּעִם וְאַבְּעִם וּשְּׁבִּעִם וּשְּׁבַע מָאוֹת וְאַרְבָּעִים וּשְּׁבִּעִם וּשְּבִּעִם וּשְּׁבִּעִם וּשְּׁבִּעִם וּשְּבִּעִם וּשְּבִּע מֵאוֹת וְאַלְבָּעִם וּשִּבּעִים וּשִּבּע מִּאוֹת וְאָּבְּבְּעִם וּשְּבִּעִם וּשְּבִּע בִּאוֹת וְאָּבְּבְּעִם וּשְּבִּעִם וּשְּבִּעִם וּשְּבִּעִם וּשְּבִּעִם וּשִּבּע. מִאוֹת וְאָּבְּבְּעִם וּשִּבּע בּעִים וּשִּבּע.

^{*} The rabbinical writers employ the letters of the alphabet after the manner of the ancient Greeks for the purpose of numerical notation. The units from 1 to 9 are represented by the letters & - v, the tens from 10 to 90 by - v, the hundreds from 100 to 400 by - v (see the table, p. 3.). The intermediate numbers Vol. 1.

ORDINAL NUMBERS.

§ 623. The Hebrew Ordinals (מְּמֶבֶּר סְדּרְרָּר), like those of other languages, are derived from the Cardinals. This is effected by affixing to the cardinals from two to ten inclusive the termination – (see § 515. 3.), and inserting the same vowel between the second and third radicals. The masculine plural of the ordinals ends in בּיִר (§ 550), the feminine singular in בּיִר (\$ 494. I. 2.), and the feminine plural in בּיִר (see § 554). Thus,

שָׁשִּׁר שִׁ	Sixth.	רָאשׁוֹדָ	First.
יִח ברער	Seventh.	יָּטַ בִּר	Second.
יִ י בִּירנִר	Eighth.	יְש ַלִרִּשִׁר	Third.
הְשִׁרעִר	Ninth.	רְבִרעִר	Fourth.
עֲשִׂררָר בַּשִּׂררָר	Tenth.	האישר המשר	Fifth.

Remarks on the Ordinals.

 \S 624. רְאִישׁוֹץ first, Job 15 : 7. for רְאִישׁוֹץ, formed from אַל head, chief, first; fem. רְאִישׁוֹנְה once רָאִישׁוֹנְה Josh. 21 : 10. for רְאִישׁוֹנְה, and once ראַישׁוֹנִית Jer. 25 : 1.

אָ 625. שׁבר second; plur. שׁברים Gen. 6: 16. Num. 2: 16.

§ 626. The ordinals differ in form from the cardinals only as far as ten; for the mode of indicating the remainder, see Syntax, § 944.

from 11 to 19, 21 to 29, &c. are denoted by placing after 7, 5, &c. the additional unit required; thus 87 10+1=11 (except that for the number 15, instead of the regular combination הם 10+5, which are the initial letters of the name ההונה, the letters 3 9+6 are employed), \$3 20+1=21, &c. These again are affixed to the hundreds, to denote the intermediate numbers, thus NP 100+1=101, סרא 100+10+1=111, &c. The later Jewish authors also represent the hundreds from 500 to 900 by adding to 5 400 the letter required, thus 55 400+100=500; the more ancient writers, however, including those of the Masora, employed for this purpose the five final letters of the alphabet, thus 7 500, □ 600, 7 700, □ 800, 7 900. The thousands are denoted by the units with two dots placed above them, thus & 1000, 2 2000, &c. The current year would therefore be represented by אָלְמָבּא 1842. The Jewish books are dated from the creation of the world, which makes the present year according to their computation 5602; the 5000 however is usually omitted in writing, and this is intimated by the explanatory phrase לִפַרָט קטוֹן by the small number, abbreviated לפ"ק, thus מרב לפ"ק A. M. 5602, i. e. A. D. 1842.

FRACTIONAL NUMBERS.

CHAPTER XIII.

THE ARTICLE, ETC.

DEFINITE ARTICLE.

§ 628. The Definite Article (הַאֹּבְּקְרִיבֶּי,), or that particle by means of which an indefinite noun is rendered definite, consists in Hebrew of a prefixed אונה אונה which is generally accompanied by (_), and followed by Daghesh in the initial letter of the word to which it is attached, e. g. הַבְּיִבְּי a book, הַבְּיִבְי the book. This ה is a fragment of the personal pronoun אָה, which takes the homogeneous vowel of its principal letter ה (see p. 87) only while constituting an independent word: for when as a definite article it is prefixed to a noun or adjective, it resumes the simple vowel a of the verbal root from which it derives its origin (§§ 113, 214. 1.); whence we have the form הְּבָּיְבֶּי, which by § 77. 3. becomes הַבְּיֵבָּי, Daghesh forte being inserted in the succeeding letter by § 32, in order to preserve the short vowel ().*

^{*} A few vestiges of the original form are still to be met with, e. g. תַּלְּבֵּר 1 Sam. 30: 24., הַרְּבֶּּדָ Jer. 29: 23.

§ 630. When the initial letter of the word receiving the article is destitute of a vowel, Daghesh may be inserted or omitted (§ 33. 1.), e. g. הַּיְרִיעָה , הַּסְפַרִים , הַּלְוָיִים.

\$ 631. 1. When preceded by one of the inseparable prepositions בְּ, בָּ, the article ה' is rejected by \$ 77. 3., and its vowel given to such preceding letter, e. g. בַּהֶבֶּ for בָּהֶבֶּ for בַּהֶבֶּ for בַּהֶבֶּ for בַּהֶבֶּ for בַּהֶבֶּ

לָאָרֶץ for לָאָרֶץ; פָּהֶעָרִים for לָאָרֶץ.

2. In some instances, however, the article is not rejected, and consequently the Sh'wa of the preposition is retained. This occurs but seldom with בְּ, e. g. בְּבְּבֶּבְ Ps. 36:6., בְּבְּבֶּרְ Neh. 9:19.: more frequently with בְּ before the word בְּבִּבְּרָן Gen. 39:11. Deut. 6:24. 1 Sam. 9:13. Jer. 44:22. Neh. 5:11. 9:10. (although even in this case it is occasionally rejected, e. g. בַּלְּבְּרָם Gen. 25:31, 33.); seldom before any other word, e. g. בְּבָּבְרָם Eccl. 8:1.: and sometimes with בְּבָּבְרִם Ezek. 47:22., בְּבָּבְרָם Neh. 12:38., בַּבְּבָּרָב Chr. 10:7.

DEMONSTRATIVE PRONOUNS.

לפבר הַרוֹבֵין) in Hebrew distinguish both gender and number. The chief constituent element of the near demonstrative is the sibilant, to which when referring to a masculine noun is affixed the weak letter ה resting in the vowel (ֶ) as a masculine termination (see § 569. a. note.), thus הַ this, hic; occasionally instead of ה is taken the weak letter ה resting in its homogeneous vowel u, thus ה Hab. 1:11. Ps. 12:8. When referring to a feminine noun, it receives the feminine termination ה (§ 494. I. 2.),

thus not this, hac. Sometimes it appears without n, and with the semi-vowel n instead of n, on account of the accompanying vowel o, thus in Hos. 7:16. Ps. 132:12.; and sometimes in Ecclesiastes with n, e. g. ni Eccl. 2:2, 24. 5:15, 18. 7:23. 9:13.

2. The plural of this demonstrative, which is the same in both genders, is expressed by b with the semi-vowel א prefixed, thus א these, which besides the Pentateuch appears only in 1 Chron. 20:8. Much more frequently הַ is affixed, when b receives Daghesh in order to preserve the original mixed syllable (§ 32), thus א גָּלָּה ; a formation precisely similar to that of הַבָּה (see § 123).

RELATIVE PRONOUNS.

§ 634. The definite article ה prefixed to a participle or verb supplies the place of a Relative Pronoun (בְּנִיר הַבְּיִבֶּי,), e. g. שְׁהַהֹלֶה who walks; lit. the (person) walking, הַהַלְּכֵר who went (see § 726. et seqq.).

§ 635. When standing for a noun, the relative is expressed by the separable particle who, which, of both genders and numbers, e. g. Gen. 1:12,21.6:4.19:8. For its use and construction, see Syntax, Chap. IX.

§ 636. The principal letter of \\ \text{w}_{\text{\text{\$\bar{\text{\$\te

§ 637. Another relative exists in the pronoun של who, which, what (qui, quæ, quod), Gen. 3:19. 4:25. Is. 54:6. 57:20. Ps. 22:31. This word however is employed more frequently as a particle, signifying that, so that (quod); in which sense also אַלָּיִר is often used. See § 1091.

INTERROGATIVE PRONOUNS.

§ 638. In Hebrew there are two Interrogative Pronouns (פָּנֵהֶ הַשְּׁאֶבֶּה who? and מְּכֵּ what? the first relating to persons only, the latter to things.

§ 639. Although the pronoun 72 is most frequently accompanied by (), it also takes either () or (). a. When the initial letter of the following word is a guttural not accompanied by (,), the pronoun takes (ַ), e. g. מַה־רֶבֵּר Ps. 8 : 5. Job 7 : 17., מַה אָפַעל v. 20., מַה־רֶבַּר Ps. 3: 2., בה רב 31: 20. b. When connected by Makkeph with a word beginning with ה or ה, (_) is sometimes employed, e. g. מה־הוא Num. 16:11., בה־הַפְצוֹ Job 21:21.; occasionally also without Makkeph, e. g. מה השאתר Gen. 31: 36. c. When followed by a guttural with (1), (1) is generally taken for the sake of distinctness (§ 101. 1. b.), e. g. מה-חמאתר Gen. 20: 9., מה-חמאתר Ps. 89: 48.; and occasionally, though seldom, when followed by another letter, e. g. עה כבוֹדִי Ps. 4:3., לא Job 7:21., מָה מָשָׁפָּט 2 Kings 1:7., על־מוה חכר Is. 1:5. d. Generally, however, when followed by any other letter than a guttural, The takes (); and as the final The of this pronoun, which is almost always connected with the following word by Makkeph, is not regarded in its pronunciation, the initial letter of the following word takes Daghesh forte (§ 33. 1.), e. g. מה־דֹאֹת Gen. 12: 18., מָה־יַּקרָא 2: 19., מָה־יַּלָּה 21: 17., מָה מַצָּאת 31: 37., 21: 36. מַה־פְּשׁׁלֶר , 33: 46 מה מעשׂיכם

§ 640. In some instances this pronoun is connected with the following word so as to form with it but one; and then ה is rejected, e. g. מַהְּלְעָה (מַה־לָּכֶם Ex. 4: 2. for מֵהְלָעָה (מַה־לָּכֶם Is. 3: 15. for מַהְלָעָה (מַה־לָּכֶם Mal. 1: 13. for מֵה הַּלָעָה .

\$ 641. This particle occasionally receives the prepositions בְּ, בְּ, לְּ, when it takes for its vowel either a or e. The two first, ב and ב, are usually accompanied by (_), which is followed by Daghesh in the initial letter of the pronoun, e. g. בְּבָּב Ex. 22:26. 33:16., בְּבָּ Gen. 47:8. Job 13:23, בְּבָ Zech. 7:3.: the last, לֹ, takes (_), whether followed by Daghesh or not, e. g. בָּבָ Ps. 49:6. 2 Sam. 2:22., בֹּבָ Sam. 1:8.

HE INTERROGATIVE.

- § 642. The letter ה is used also as an interrogative prefix to verbs, nouns, or particles, and corresponds to the Latin an? num? It is then termed He Interrogative (הַאָּשָׁהָה).
- § 643. This prefix is generally accompanied by the compound Sh'wa (ַ), e. g. הַנְבְּיָב אָנֹכִי am I the guardian? Gen. 4: 9., הַנְבְיָב אָנֹכִי at there be found? 41: 38., הַזֶּה is this? 43: 29., בְּבְּלֵּר because not? Ex. 14: 11.
- § 644. Before a guttural (_) is usually taken, in order that both letters may be sounded distinctly, which could not be done were ה to retain the Sh'wa, as the voice must then pass quickly to the letter following (§§ 391, 413), e. g. אַרָאָר Job 22:15., בְּהַרְּמָר Num. 31:15., אַרְאָר Hag. 1:4.; and in one instance before the weak letter , viz. בְּהַרְּמַב Lev. 10:19. for בְּהַרְמַב .

\$ 645. Before a guttural with (ָ), like the article it generally takes (ֶ) (see § 629. 2.), e. g. הַאָּבוֹר Ezek. 28:9., בּשָּׁהָה Gen. 24:5., בּאָבוֹר Ezek. 18:23.

אָלָפֿענ, Before a vowelless letter, it retains only the (_) of the compound Sh'wa (_), in order to avoid the concurrence of two Sh'was, e. g. הַּלְבֶּלָ Gen. 34; 31., הַלְּמֵעֵלָהְ Job 18:4.; and frequently the initial letter receives a Daghesh, e. g. הַבְּרָב Job 23:6., הַּלְבֶּלֶ Gen. 17:17.; הַּלְּבֶעֵלֶתָה 18:21., מוֹרָב זֹרָב 37:32.

HE DIRECTIVE.

§ 647. The letter π , which when placed at the beginning of a word has the power of singling it out from others of its class, and rendering it definite, when added to the end of a noun, and resting in (,), signifies direction towards the object which the noun denotes, thus π_{π}

the house, הַהְרָה to the house (oἶxórδε); הָהָר the mountain. From this it receives the name of He Directive, or, as it is usually termed, He Local.

§ 648. As this suffix is connected very loosely with the noun, the last syllable of which retains its accent (§ 56. 1.), it exerts but little influence on the vowels of the word, e. g. צפוֹנָה north, צפוֹנָה northward; קרנה Haran, הַרָנה to Haran; שַׁש there, הַשָּׁש thither; בַמָּה sea, רַמַה seaward, i. e. westward. It chiefly affects the vowel immediately preceding: this, when short and making a mixed syllable, is rejected on the addition of the directive particle, the () in which the latter rests being given to the final letter of the noun (§ 104. 2.), e. g. בַּרָה, בּרְהַה; בַּיְהָה, שָׁמֵיִם; This is especially the case with Cegholate nouns, e. g. בֶּלְבָּה , כֵּלֶבָּה , חֹרָשָׁה , חֹרָשָׁה , חֹרָשָׁה ; which sometimes shorten the first vowel also, e. g. אֶרֶעָה, הַאָּרֶעָ. The rejection occasionally takes place when the vowel is long, e. g. מזרחה, מזרח Ex. 27: 13. and מַזְרָתָה Deut. 4: 41. When the ultimate syllable of the noun commences with a vowelless consonant, its vowel, whose rejection would cause the concurrence of two consonants neither immediately preceded nor accompanied by a vowel, is shifted to the first of them, e.g. שֶׁכְמֵה, שֶׁכְמֵה Hos. 6:9. In the following instance (_) is changed into (ֱ) by § 101. 1. b.), viz. פַרָּנָה, פַּרָּנָה.

\$ 649. The words מַשְלָה upwards, מַשָּה downwards, generally receive also the directing particle ל , which is prefixed for the sake of emphasis, thus לְמַשְה ,לְמַשְלָה. The same is the case with the word לְּשָׁאוֹלָה to hell, Ps. 9:18. It also occurs with the preposition ב, e. g. בּהֹרְשָׁה בּרַ

1 Sam. 23:15, 18, 19.

VOL. I.

CHAPTER XIV.

THE PARTICLES.

\$ 650. Particles (מַלֵּרֶם) are words which do not represent ideas of actions, things, or attributes, as verbs, nouns, and adjectives; but are employed merely for the purpose of pointing out the various relations existing between one notional word and another, and one sentence and another, and thus serve to give clearness and precision to discourse. As these words do not belong to what may be called the essential part of language, it is obvious that they can be the most easily dispensed with, and that a language in its earlier stages of existence, before accuracy of expression has become an object, must necessarily be poor in particles, the number of which however gradually increases as the desire for perspicuity becomes more and more sensibly felt; so that the quantity and variety of particles in a language serves in some measure as the standard of its cultivation. Accordingly, as might have been anticipated, the Hebrew, which reached a certain degree of refinement while a living tongue, has a moderate number of particles. Of these but few are primitives, the majority being derived from other parts of speech.

§ 651. The Hebrew particles may be divided according to their various offices into,

§ 652. Adverbs, or words used to qualify the meaning of verbs and adjectives, e. g. רַהְּבֶּה he ate אַנכוּ, מְעֵנֵט he left little, בּוֹלְנֵע very great.

§ 655. Interjections, or words employed as exclamations, to express some strong emotion, e. g. הוֹר אַריאַל wor to Ariel!

§ 656. We will now discuss the several species of particles separately, showing from which parts of speech and in what manner they are derived.

ADVERBS.

\$ 657. Adverbs (הֹאֵר הַפֹּעֵל), as we have already observed, are words used to qualify verbs or adjectives. Some are derived from verbs. Of these the greater number are from the infinitive, e. g. infin. Kal, מְבָּר to be good; infin. Pi'hel, מְבָּר to be good; infin. Pi'hel, מְבָּר to be good; infin. Pi'hel, מְבָּר to be good; infin. Pi'hel מָבֶּר to be good, הַבְּר to be numerous. A few are from the imperative, e. g. הַבָּר come from בְּבָּר to give, בְּבָּר come on from בְּבָר to see; and the following from the future, viz. אָבַן surely, lit. I affirm, fut. apoc. Hiph. of בַּרְר to stand firm.

\$ 659. A few nouns are employed adverbially in the plural, e. g. מֵישָׁרִים righteously from מֵישָׁרִים righteousness, מֵישָׁרִים wonderfully from מֵלָא wonder הַלִּיפוֹר alternately from הַלִּיפוֹר change.

¶ §660. Adverbs derived from nouns by means of a change, are formed,

§ 661. By affixing to the noun the termination בְּ or בּ., e. g. אָמְנָם or סִבּי, truly from הָבָּק truth, הַבָּח gratis from הַלְם grace, favour, בּוֹלְם by day from בָּילם emptily from בָּילם empty, empty-handed, בּוֹלָם

(= מְּחְעֹם) suddenly from מֶחֶע moment (comp. Is. 29:15.), שִׁלְשֹׁם the day before yesterday (three days ago) from שֶׁלִשׁ three.

\$ 662. By affixing the termination בְּרִר, e. g. בְּרִרָּרָת backwards from בְּרָרִר in Aramaic from בְּרָרִר Aramæa, בְּרָרִית in Ashdodish from בְּרָרִר Ashdodish from יְהַרְּרָר in Jewish (or Hebrew) from קֹרְבָּרִר Judea, קְּרַבְּרַר mournfully from קֹרְבָּרִר prightly from קֹרְבָּרִר pheight.

§ 663. In one instance by affixing a personal pronoun, viz. בְּחָבֶּר together (in its union) from בַּהְר union and the pronominal suffix –, written fully only in Jer. 46:12, 21. 49:3.

\$664. By prefixing a preposition, e. g. אָבְּבְּ exceedingly from בְּאָרִן strength, בְּאַרִן almost from אַרִּן nothing, בְּאָלַ softly from אַבּ murmur, בְּבִר from בַּ separation, בְּלַבְּר confidently from בְּבָּ confidence, בַּר straight forwards from בְּבָּר presence, בּרִ אַרָּבְּל for ever from בָּבָּ peaceably from בְּבָּר peaceably from בְּבָּר

§ 665. The number of negative and affirmative adverbs is very limited. Some of those which must have been needed from the first are primitive. The negatives are אַ not, אַל no, not (אַ privativum whether prefixed or affixed expressing negation), אַרן מי מַלָּר מַ מַלְּר מַ בַּלְר מַר מַבְּל מַר מַר בַּלְר (בַּעָבי יַנְ יַנְ עַבּי) it is, זָ thus.

PREPOSITIONS.

- § 666. Prepositions (מֵלֵּי הַרָּהַם) in Hebrew are words placed before nouns or pronouns, or more commonly fragments of words prefixed to them, in order to point out the kind of relation existing between them and some preceding word. They are termed separable or inseparable, according as they constitute independent words, or are prefixed to the noun or pronoun which serves as the complement of the relation.
- \$ 667. 1. The separable prepositions are mostly derived from nouns with little or no change, e. g. אָחָר pl. אַחָר behind from אַחָל hinder part, אַחַר between from בַּין interval, אַחָר opposite from אַחָל front, מָנָר from from עָנָר portion, עַנָר unto from עַנָר progress, עָנָר upon from נָנֶר wito from בַּעַד or בַּעַד progress. נַנֶר bejot. 2. Others are primitive, e. g. אָ to, בַעַר or בַּעַד by, near, נָנֶר before, תַבַּין id., עַבַיר progress.

^{*} For the differences in the use and signification of the negatives, see Syntax, Chap. XVIII.

- § 668. The inseparable prepositions, which occur by far the most frequently, are primitive particles, consisting of single letters, which are prefixed to words, instead of being merely placed before them. They are $\exists in, by, \exists like, as, b to, of, \neg from for \neg (see § 673).$
- \$\\ 670. 1. The three fragmentary prepositions ב, ב, ב, are regularly prefixed with Sh'wa, e. g. בְּבִית in a house, בְּבֶּבֶּת with a book, כֹּלְרָרָך to or of David; בְּבֵּלְת Moses; but when they are added to a noun which has the definite article אוֹ , this latter is rejected by \$77. 3., and its vowel given to the preposition, e. g. בַּבָּבֶר בָּהַבָּבָר בָּהַבָּבָר בָּהַבָּבָר בָּהַבָּבְר בָּהַבְּבֶר בָּהַבְּבָר. For a similar elision of the initial אוֹ of the inf. Hiph. see \$244.
- 3. When a word commences with , the preposition takes (-), and rests in it, by § 97. 2. a., e. g. בִּיבִיר, בִּיבִיר.
- \$ 671. When prefixed to the pronoun הב, the two prepositions ב and ב generally take (), thus הבב, החבב; and b takes (), thus הבב, thus הבב, and b takes (), thus הבב, they all receive () before certain monosyllabic pronouns accompanied by a pause-accent, e. g. בב, הבב, הבב, The b also frequently takes () before other monosyllables, e. g. לְבֶרֶ לִּבֶּר, לְבֶרֶ לִבְּר, לְבֶרֶ לִבְּר, לְבֶרֶ לִבְּר, לְבֶרֶ לִבְּר, לְבֶרֶ לִבְּר, לִבֶּרְ לִבְּרָ לַבְּרָ לִבְּרָ לַבְּרָ לַבְּרָ לַבְּרָ לְבָּרָ לִבְּרָ לִבְּרָ לִבְּרָ לִבְּרָ לִבְּרָ לִבְּרָ לַבְּרָ לִבְּרָ לִבְּיִי לִבְּיִבְּי לִבְּיִי לִבְּי לִבְּי לִבְּי לִבְּי לִבְּי לִבְּי לִבְּי לִבְּי לִבְּי לִבְי לִבְיי לִבְיי לִבְּי לִבְּי לִבְּי לִבְיי לִבְיי לִבְּי לִבְיי לִבְיי לִבְיי לִבְיי לִבְיי לִבְיי לִבְּי לִבְיי לִּבְי לִבְי לִבְי לִבְיי לִבְיי לִבְּי לִבְיי לִבְיי לִבְּי לִבְיי לִבְיי לִבְי לִבְיי לְבְיי לִבְיי לִבְּי לִבְיי לִבְיי לְבְיי לִבְיי לְבְי לְבְיי לְבְיי לְבְיי לְבְיי לְבְיי לְבְיי לְבְיי לְבְיי לְבְיי בְּבְי בְּיבְי בְּבְי בְּי בְּיבְי בְּיבְי לְבְיי לְבְ
- § 672. When the preposition בְּלֵבְעָם is prefixed to a word, its , is assimilated to the letter following, which is shown by a Daghesh forte inserted in the latter when capable of receiving one (§ 77. 2.), e. g. אַנְבֶּעָם for בְּבָעָם, בְּעָבֶעָה. But when followed by a guttural,

its short vowel (ִ) is lengthened into (ֵ) (§ 102. 1. c.), e. g. מֲבֶל, מֲהָר ; except the strongest guttural ה, before which () generally remains unchanged (§ 85. 2. a.), e. g. מֲהַרּץ.

Prepositions and Adverbs with Suffixes.

\$ 673. The prepositions ב, ב, ל, receive the pronominal suffixes, and frequently in a manner peculiar to themselves. When the preposition receives a suffix, the syllable ב is inserted between them. When preceives a suffix, it is doubled, the () of the second syllable changed into its modification (), and its in each case assimilated to the letter following, which frequently takes a Daghesh, thus with suff. first pers. sing. מִּנְמֵנְיֵנִ = מִמֶּנְיֵנִ בּ מָמֵנִי . The following table shows the manner in which each of the inseparable prepositions, viz. בְּ, לְ, בְּ, מִּלְ, receives the pronominal suffixes.

		SIN	GULAR.		
	ڬۿؚڎ؞	בָּמֹוֹנִי	ڔؙ؞	בֿר	c. 1.
	خفك	כְּמֹוּהְ	לְהּ לְכָּה לֵּהְ	בַּה בְּכָה בֵּהָ	M. 2.
	فقك	כָמוֹדָּ	לָּוּ	취구	F. \ 2.
לענ לופּענ	خۋىد ۋ	כְּמֹוֹהוּ	לו	בּרֹ	M. (3
	خرفرذي	בְּמֹוֹהָ	לָה	ਪਤੰ	F. 3.
		P	LURAL.		
	خرفردر	כָּמֹוֹנרּ	לָנר	چٔدہ	c. 1.
בֶּם	—— فر	فَوْم	לָכֶם	בֿכֶם	M. } 2.
چر	<u> </u>	בָּכֶּוּ — -	ڔؙڎؚڔ	בָּכֶּרָ	F. \ ~.
בם מֹנְבׁם	ش	כְּמֹהֶם כָּהֶם	לָהֶם לָמוֹ	בַּהֶם בָּם	м. } з.
ثرز	<u> </u>	בְּבֵּוּנְ	לִבוּן לָהֶוּ	בָּהֵן בָּהֶן	F. \ 0.

\$ 674. The syllable מו inserted between מו and its suffixes is supposed to be the pronoun מו inserted between מו and its suffixes is supposed to be the pronoun מו what, the הו of which is changed into ז on account of the accompanying vowel o, thus מול like (that of) me, במוֹן like (that of) thee. In poetry we find it attached to this and other prepositions to form an independent word, thus מוֹן בֹּנוֹן in (it), ווֹל נִנוֹן to (it). The syllable מוֹן is generally inserted between מו and its suffixes in those cases only where the accent is regularly on the penult, viz. before the suffixes of the singular number and that of the first person plural.

\$ 675. The same is to be observed concerning the reduplication of the preposition אָרָ from, which generally takes place before the light suffixes, viz. those of the first and third pers. sing. and first pers. plur. The אָרָ of the sec. pers. sing. attracts the tone too powerfully to admit of the compensation of אָרָ by the insertion of Daghesh, thus אָרָי : unless the word be in pause, when the accent falls on the penult (§ 107.3.), thus אַרָּ בְּיִּ הַ for אָרָבְּיִר . Before the grave suffixes, viz. those of the second and third pers. plur., which constantly receive the accent (§ 58.1.), the reduplication does not take place, thus אַרָּבָּי, אָבֶּי ; in the latter person, where the initial letter of the suffix is a guttural, the preceding () of the preposition is lengthened into (). In poetry this preposition sometimes remains single when receiving the suffixes of the first and third pers. sing., e. g. אַבֶּי Ps. 18:23. Job 21:16.; אַבָּרָר Job 4:12., אַבָּרָר Ps. 68:24. Occasionally אָר without a suffix takes אַר paragogically, e. g. Judg. 5:14. Is. 46:3.

The Preposition and Illustrative Particle 78.

\$ 677. The Preposition אָ מֹר with, by, near, is held to be a contraction for אָּבֶּי vicinity from לְּבָּי to be near (§ 77. 2.). This particle is usually employed to denote intimate connection or companionship between one subject of an intransitive verb and another, e. g. "Enoch walked אַר־אֵבֶלְהִרם with God," Gen. 5: 24., "fulness of joy is אַר־אֵבֶל הִרם thy countenance," Ps. 16: 11.

§ 678. Both the illustrative and the prepositional אַמ when connected with a following word by means of Makkeph, shorten the vowel

(_) into (_,) (§ 70. 2. a.). Accordingly when placed before nouns as separate words, the context alone can determine whether and or an in a given instance be the illustrative particle or the preposition. But when joined to the pronominal suffixes, they are distinguished from each other by taking different vowels, the illustrative particle receiving in such case the vowel \bar{o} , thus with me; while the preposition shortens its former (_) into (_) (§ 101. 2. b.), and consequently receives Daghesh forte in a, thus with me. The following are the modes in which the suffixes are taken by each.

		SING	JLAR.			
	אהור			אותי	c.	1.
भ्रत्भ	#WK		श्रांद्रह	אוֹתְהָּ	м.	2 .
	श्रक्त			אוֹתְדָּ	F.	۲.
	אָתוֹ			אותו	м. F.	١,
	त्रकृत			אוֹתָה	F.	\ °.
		PLU	RAL.			
	אָהָֿנר			אוֹתָנוּ	c.	1.
	אָתְכֶּם		מֶּתְכֶּם	אוֹתְכֶם	M.	2 .
	نغظڅل		אָרְכֶּל	אוֹתְכֶּן	F.	۲.
	بغثت	אוֹתָם	מֶּתְהֶם	אוֹתְהֶם	м.	3.
	بخشا	אוֹתָּלָ	ڠڟڎۮۮ	אוֹתְהֶּן	F.	\ °.

\$ 679. Both these particles appear occasionally with (ֶ), although not followed by Makkeph, as in Ps. 47:5. 60:2. Prov. 3:12. With the illustrative particle the suffix of the sec. pers. masc. sing. is once written in pause with הוא paragogic, viz. אַרְהָה Ex. 29:35. for אַרְהָה and also that of the third pers. fem. plur., viz. אַרְהָה Ex. 35:26. for אַרְהָא. The suffix of the sec. pers. fem. sing. is once added to the preposition אַ with its proper vowel of union () instead of (,), viz. בּאַאָהָנ Is. 54:10. for אַרְאָהַנ Is. 54:10. for אַרְאָהַנ Is. 54:10.

\$ 680. To some prepositions the fragmentary pronouns are prefixed by means of the vowel (בר), thus אַהַרֵינוּ; the prepositions in such cases assuming the form of nouns in the plural construct, which they really are (\$667. 1.). They consist for the most part of such as include the idea of a substantive, e. g. אַהַר (hinder part), בּרך, between (interval), שֵׁ unto (progress), שׁל over (height), שׁל under (lower part). The same vowel of union is taken by the preposition

Гвоок и.

		SINGU	LAR.			
	ברנר	שָׁלַר		אַלַר	אַדְרַל	c. 1.
قدذك	قرژدك	ע ֶּלֶיה		אַלֶּרוּד	אָדורֶֿיוּה	м. } 2.
		עַלַיִּה			אָדֻרַֿיִּהְ	F. \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \
בֵּרנוֹ	בַרכָרר	עָלָרר		אַלָיר	אַבְרָיוּ	M. } 3.
					אַדְלָיהָ	F. \ 6.
		PLUI	RAL.			
בֵּרנוֹתַׁרנוּ	בַרבַֿרכר	עָבֿרנר		אַלַרנר	אָדְתֹבינה	c. 1.
	בּרנֵיכֶם	עַ בַּרכֶם		אֲלֵיכֶם	אַאַתריכֶם	м. (о
					אַבְורֵיכֶּן	M. } 2.
בּינוֹתָם	פֿרניהם	עֲלֵיהֶם עָלֵימוֹ	אֵלֵימוֹ	אֲלֵיהֶם	אַדְרֵיהֶם	м. / о
	-				אָבְרֵיהֶן	м. } 3.

\$ 681. The remaining prepositions receive the suffixes without any peculiarity, e. g. לְבַרָּל, לְבַר , בְּלָלֵל, ; first. pers. לְבַרָּל, ; בָּלְתָּר , בְּלָלֵל, \$ sec. pers. בְּלָתַר , בְּלָלֵל, &c.

§ 682. Some adverbs are by their meaning rendered capable of receiving the fragmentary personal pronouns; and as they include for the most part the idea of action or existence, they take the suffixes of the verbs, and frequently with an intervening epenthetic, e. g. קה or בה behold, שֵל yet, שֵׁר it is, not, אֵל where.

1. הַּכָּר , with ה parag. הַכָּר . First pers. הַכָּר behold me, Is. 65:17, 18., הַּכָּר , behold us, Jer. 3:22.; when in pause, the first retains its vowel (_), and consequently receives Daghesh conservative (§ 33. 1.), e. g. הַבָּר , Gen. 22:11. Is. 65:1., הַבָּר Job 38:35.; occasionally it takes (_) for (_), which gives rise to an additional Daghesh in the second c. e. g. הַכָּר , Gen. 22:7. 27:18., הַכָּר , Gen. 44:16. 50:18. Num. 14:40. Sec. pers. masc. sing. הַכָּר , once הַבָּר , in pause בַּבָּה; fem. הַבַּר , in pause בַּבָּר ; fem. הַבַּר , in pause בּבָּר , Gen. 16:11.; masc. plur.

- Deut. 1:10. Third pers. masc. sing. הְּבֶּרָּ Num. 23:17. or הְבָּהָּר Jer. 18:3., plur. הְּבָּה Gen. 47:1.
- עוֹרָכּ. First pers. עוֹרֶנּי. Sec. pers. עוֹרְכֶם, עוֹרְכֶם, עוֹרְכֶם, עוֹרְכֶם, עוֹרְכָם, עוֹרְכָם. Third pers. עוֹרְכָם fon. 18: 23., עוֹרָם.
 - 3. בלחד . First pers. בלחד Hos. 13:4. Sec. pers. בלחד 1 Sam. 2:2.
- 4. בישׁר. Sec. pers. רְשֶׁרֶם רְשֶׁרֶם Deut. 13: 4. Third pers. רְשֶׁרֶל Deut. 29: 14. 1 Sam. 14: 39. 23: 23.
- 5. אֵרְכֶּם, אֵּרְכָּם, אֵרְכָּב. Sec. pers. אֵרְכָּב. אַרְכָּב. אַרְכָּב. אַרְכָּב. אַרְכָּב. אַרְכָּב. אַרְכָּב. אַרְכָּבּר for אֵרְכָּבָּה, אַרְכָּבָּה Gen. 7:8., אַרְכָּבּר poet. אַרְכָבּר Ps. 73:5.
- 6. אַר constr. of אַר, with ה parag. אַרָּה Gen. 22:7. Sec. pers. Gen. 3:9. Third pers. אַרָּה Ex. 2:20., אַרָּה Is. 19:12.

CONJUNCTIONS.

- § 683. Conjunctions (מֵלֵּר הַּדְּוֹבֵּרְר) are particles which connect two or more simple sentences, or those parts of such sentences as do not coincide, and thus serve to combine them into one. They are mostly derivative, and consist of one, two, or three letters each; they are formed from other particles, from pronouns, or lastly from verbs. We shall divide them according to their force and signification into copulative, conditional, causative, and disjunctive.
- 1. When prefixed to a word whose first letter has Sh'wa, in order to prevent the concurrence of two vowelless letters, the conjunction r, instead of the vowel i, which it should take by the general rule § 104. 1. a., prefers its homogeneous u, in which it quiesces (§ 92. 3.), e. g. קַבָּבֶּרֶץ for הְבָאֶרֶץ.
- 2. When followed by יְ, the latter causes the conjunction to take its homogeneous vowel i, in which it then rests, e. g. יְרְהֵּר for רְּהֵר for רְּהָר The influence of reaches the conjunction even through an intervening ה or ה, and causes it to take the same vowel (§ 19.3. note.), e. g. רְהָרִיהֶם Josh. 8: 4. Zech. 8: 13. for הְהִירְהֶם \$7: 5, 6, 14.

- 3. a. When followed by one of the letters ב, ב, ב, ב, of the same organ (§ 6), ר conjunctive rests in its homogeneous u, even when, such initial letter being provided with a vowel of its own, the first rule above given does not apply, e. g. בְּבֶּבֶרֶ הַבְּעִשְׁכֵּע וּבְבֶּבֶרֶ הַ This peculiarity arises from the difficulty of enunciating two labials in immediate succession;* which must be done were the utterance of the rallowed to depend on the vowel of the succeeding letter, as רְבַבֶּבֶרֶ הָּ &c.: to prevent this, the laws of euphony compel the labial rale to resign its consonantal power, and rest in its homogeneous u (§ 92. 3.).
- b. When the first syllable of a word bears a disjunctive accent, a prefixed ה conjunctive generally takes (ָ), in order that the accent may be preceded by a vowel (see § 671), e. g. הַלֶּילֶהְלָּ Josh. 1:8., בַּלֵּילָהְלָ Ezek. 27:17. And even if the first letter be a labial, e. g. הָבֶּיקְ הַ Gen. 1:2., בְּבֵּיאָ 1 Sam. 18:16., הַבָּח וְפָּהַת נְפָּה 19:19. בַּבָּא, 28:8.

§ 685. The conditional conjunctions are בי אם if, פר אם if not, but, אם if.

\$686. The causal conjunctions are אָשֶׁ that, because (๑ँדו, quòd), אַשֶּׁ as, so as (quemadmodum), אַל בַּן because, עַל בַן סר לָבֵע therefore, שָׁבֶּב wherefore, מַבֶּע because, וְבָּי because, שִׁבּר wherefore, מַבֶּר אַ היים מוּבּים מוּבּים מַבְּי שִׁבְּר אַר אַר אַר היים מוּבּים מוּבִּים מוּבּים מוּבים מוּבּים מוּבים מו

§ 687. The disjunctive conjunctions are לא אל and בל not, אל but,

לרלי only, לרלי or, לרלי unless.

Remarks on Wav Conjunctive.

§ 688. The particle Wav Conjunctive (דְרָ הַּתְּבֵּלּף), the explanation of whose origin was long left unattempted, has lately been fancifully supposed to derive its connecting power from the meaning of its name, או hook! We hope, however, to be able to show satisfactorily that both the origin and force of this particle are to be found like those of ז כיייי בייייים.

§ 689. If we examine into the nature of the simple conjunction, we shall find that its chief use is to connect nouns and verbs, or the names of things and actions, by means of the fundamental idea common to both, viz. that of existence. In the phrase, "Moses and Aaron preached

^{*} For the same reason in both Sanscrit and Greek, when two aspirated syllables concur, the first aspirate is changed into a mute, e. g. $\pi \epsilon \varphi i \lambda \eta \varkappa \alpha$ for $\varphi \epsilon \varphi i \lambda \eta \varkappa \alpha$.

and prayed," the first and serves to connect the state of existence implied in the name Moses with that of Aaron, and the second to connect the verbs preached and prayed by the common medium of the existence inherent in both. It thus prevents the necessity for repeating those parts of two or more simple sentences which coincide by connecting together those which do not. So that the single proposition, "God created the heavens and the earth," is equivalent to "God created the heavens," "God created the earth;" and by connecting both their subjects and predicates, the phrase given above is made to contain the four following distinct statements, viz. "Moses preached," "Moses prayed," "Aaron preached, "Aaron prayed."

§ 690. The Hebrew conjunctive particle ן is, we are satisfied, a fragment of the verb of existence הָּהָה , which, being prefixed to the name of a person, a thing, or an action, connects with it the essential part, viz. the existence, of a preceding noun or verb.* When employed as a mere conjunction, it is destitute of a vowel; but when prefixed to a verb in the future tense for the additional purpose of converting it into an imperfect, it takes the vowel () (see § 214. 1.). As the two particles ן and ן have thus an identity of origin, it is easy to conceive in what manner the latter acquires its conjunctive as well as conversive power (§ 214. 1.).

§ 691. This hypothesis, which deduces the definite article ন, ነ conjunctive, and ነ conversive, from the same source, presents us with the means of throwing light on certain phenomena which have not hitherto been satisfactorily explained. We allude to the fact, that in the Samaritan text of the Pentateuch we find \(\pi\) employed for \(\gamma\) conversive, e. g. \(\mathbb{M}\)\mathbb{M}\mathbb{A}\mathbb{M}\mathbb{M}\mathbb{A}\mathbb{M}\mathbb{M}\mathbb{A}\mathbb{M}\mathbb{M}\mathbb{A}\mathbb{M}\mathbb{M}\mathbb{A}\mathbb{M}\mathbb{M}\mathbb{A}\mathbb{M}\mathbb{M}\mathbb{A}\mathbb{M}\mathbb

[•] As a proof of the origin of this particle, we occasionally find it employed in lieu of the verb of existence, e. g. בַּרְבֶּירוֹ in Ramah, that is, in his city, 1 Sam. 28:3. Comp. Ps. 68:10. Job 10:17.

INTERJECTIONS.

§ 692. Interjections (מלֵי הַקְרָאָה) are for the most part isolated exclamations which express some strong emotion of the mind, as grief, joy, fear, anger, &c. On this account they present of all words the most inartificial appearance, consisting for the most part of simple guttural sounds, e. g. an oh! or stronger an Ezek. 30:2., or still more strongly 78 (Germ. ach) 6:11. The weaker form is used with a slight preceding aspiration to denote astonishment or fear, thus ; and the stronger form with a stronger preceding aspiration, to indicate joy or malicious triumph, thus האה Ps. 40:16. Lamentation, threatening, or the prediction of misfortune is made by the interjection אוֹד Is. 1: 4. 10: 1, 5., Amos 5: 18., and more emphatically by its repetition, thus in Amos 5:16. For the same purpose is employed the slighter aspirate אוֹד with a terminating vowel, thus אַרָּה Ps. 120:5.; which once appears in a harder form produced by allowing the lips to come in contact, viz. אבור (oh woe!) Prov. 23: 29. Sometimes though rarely we meet with the acute sound T Ezek. 2:10. or אר Eccl. 4:10. 10:16.

§ 693. Some interjections, the majority of which indicate an earnest desire for the performance of an act by another, are formed from imperatives, e. g. הָּבָה give then! come then! imp. with ה parag. from הַה to give; הְבָּה see! behold! הַה or הַה lo! behold! הַה hush! from הַלִּילָה; הְלַילָה woe is me! from אָלֵל with pron. suff.; הְלֵיל away! from בַּר ; הַלֵל pray! for בַר זַבְּל id.

INDEX TO VOL. I.

The figures, except those with p. (page) prefixed, refer to the sections.

Accents, 47-69; their origin, 47 n.; disjunctive and conjunctive, 47-50; prepositive and postpositive, 51; poetical and prosaic, 52; position of, 53-58, on nouns, 56, on verbs, 57, on nouns and verbs with suffixes, 58; distinctive use of, 59; retrocession of, 60, 61.

Addition of consonants, 79-82.

Adjectives, 605-608.

Adverbs, 657-665.

Aleph, 2, 3; commutation of, 73; transposition of, 74; rejection of, 76, 77; addition of, 80, 82; peculiarities of, 87-90, 421.

Aleph, prosthetic, 80.

Alphabet, Hebrew, Samaritan, and Rab-binic, 2, 3; Sanscrit, Bengalee, and Ethiopic, construction of, 9; Cherokee, construction of, 9 n.

Anomalous nouns, 604.

Aphæresis, 76. Apocope, 78.

Arabic vowels, 11 n.; solar letters, 35, personal pronouns, 125—130; active and neuter verbs, 133 n.; modes of verbs, 210 n.; imperfect tense, 213 n.; nouns used adverbially, 658 n. Article, definite, 628-631.

Aspirates, 7; their reception of Daghesh lene, 36-43.
